## DRAVIDIC FORMS FOR 'BETEL-LEAF.'

BY

L. V. RAMASWAMI AIYAR, M.A., B.L.,

*Maharaja's College, Ernakulam.*

The leaf of the *betel* (*Chavica betle* or *Piper betle* in botanical parlance) is used as a masticatory all over South Asia (India, Ceylon, Indo-China and the islands of the Eastern Archipelago generally). It is found to thrive in a wild state in Java, and presumably therefore in the opinion of botanists it was originally a native of the Eastern Archipelago. Yet throughout India the use of the betel-leaf as a masticatory in conjunction with areca-nut and *cunnam* has become a part of social amenities and even attained a certain degree of importance in Hindu religious ceremonies. These facts led Prof. Przyluski of Paris to inquire into the etymology of the Indo-Aryan term *tāmbūl*. As a result of close investigation, he has shown that this word which has no cognates in Indo-European or Indo-Iranian, is a loan-word from the word-stock of the Austric peoples with whom the Indo-Aryans came in contact on the mainland of India, and among whom the betel-leaf was already a popular favourite as a masticatory ingredient. According to Prof. Przyluski, *tāmbūl* in Indo-Aryan is a form borrowed with slight modifications, from an Austric compound word formed of the prefix *tam* and the base *b(a)lu*. The radical by itself is found in modified shapes used with the meaning 'betel' even to-day in many of the Austric dialects.

The other Indo-Aryan form *pān* (used in Hindi, Bengali, etc.) is structurally native in Indo-Aryan, being derivable from *parṇa* (leaf); but its present semantic content, restricted to the idea of betel-leaf is, according to Prof. S. K. Chatterjee, a prossemic development in Indo-Aryan, obviously induced by the south Asiatic custom of using the betel-leaf as a masticatory.

Prof. Chatterjee has also shown (*Vide* "Pre-Aryan and Pre-Dravidian", page 18; and "Bhāṣatātver Bhūmikā," page 18) that Bengali *bārui* and *bāroj* [the former of which occurs as

*bārayī-ṣaḍa* (the name of village) in a thirteenth century copper-plate grant] contain the base *bar* which is probably a variant of the Austric radical *bal* (betel). Old Bengali *tābol* and modern Bengali *tamli* have of course to be considered as being derived from the common Indo-Aryan borrowing.

The use of the betel-leaf in Dravidian India is as universal as in Indo-Aryan India. Among the 'higher' castes it has always had a semi-religious importance and everywhere it denotes 'maṅgala,' 'kalyāṇa' and good-will generally. Except among the westernised English-educated classes, the use of the betel leaf has even to-day a great importance in ordinary social life. Among the masses (to whichever religious creed they may belong) it answers to the same purpose that is fulfilled by tea in China. The following phrases bearing esoteric significations are illustrative of the importance attached to the use of betel in South India :—

Tamil *vettrilai-vaittal* (the offer of betel leaf) signifies generally the offering of an auspicious welcome for a marriage party cf. Sanskrit *nīśava-tambulam*.

Malayālam *vettīla koḍukkuga* means in certain contexts 'to form a friendship.'

Malayālam *vettīla kīṟippikkuga* signifies similarly in some contexts 'to cause a rupture of unity or friendly relations.'

Tulu *baccirav tinṇini* means 'to make peace'.

The extraordinary importance attached to the betel-leaf over Dravidian India raises the question whether the Dravidic words for 'betel' were native in Dravidian or borrowings from Indo-Aryan. Special significance attaches to this question in view of the postulate recently made by Prof. Przyluski and others that the Dravidians and the Austries might have lived in close contact for large periods of time in pre-Aryan India. It is not only possible but even probable that the intimate contact between Dravidians and the Austries on the mainland of India resulted in the exchange of words from one language-group to the other. I have already tried to show elsewhere that some kind of relationship may have existed between the Dravidic forms 'cheek', 'pomogrande,' etc. and Austric words denoting the same ideas. It is not possible in all cases of such Dravidic-Austric word-correspondences, to determine which group is the lender and which the borrower; but with the materials at our disposal

and with the criteria (limited as they are) available for us, it is possible (and necessary too) to outline perspectives which may be useful for further research.

While in the case of word-correspondences between Austric and Indo-Aryan a number of definite tests<sup>1</sup> could be applied in order to demonstrate the foreign origin of Indo-Aryan borrowings, all these tests are not available for Dravidian. In these Dravido-Austric parallelisms, therefore, we have to make what use we can of the tests available for us and indicate how far the Dravidian forms when confronted with ancient Dr. bases may have been native and whether at all a structural and semantic connection could be postulated between the Dravidian forms on the one hand and the Austric forms on the other, on the basis of collateral considerations such as historical possibilities and linguistic analysis. The question of the lender and the borrower might in any case still remain open in a large number of instances owing to our imperfect knowledge of the conditions in which Dravido-Austric contacts may have developed.

The object of this article is only to envisage the problem raised by Dr. words for 'betel-leaf' and to consider, by the application of such tests as are available for us, if the Dravidian words denoting 'betel' are native or not in Dr.

*Dr. forms for betel.*

The following are the forms used for 'betel-leaf' in the different Dravidian dialects :—

---

(1) The tests applicable in the case of Indo-Aryan are the following:—

(a) If the words under reference showing structural and semantic identity with Austric forms have no cognates in Indo-European and Indo-Iranian, the question of borrowing definitely crops up. (b) If, further, the ideas denoted by the IA words are unique features of the *habitat* of the Austric peoples, additional strength is afforded to the theory of borrowing. (c) If still further it could be shown by an analysis of Austric forms that the IA words under reference correspond to the secondary or derivative forms of Austric (as in the case of IA *tāmbūlam*, as Prof. Przyluski has shown), the question of IA words being borrowings from Austric becomes a likelihood.

So far as Dravidian is concerned the tests (a) and (b) are practically not available. We have also to remember that the *habitat*, customs, etc. of the Austric-speaking peoples and the Dravidians might have shared common features in a very ancient past.

Tamil : *vettilai*, colloquial *vettilai*, *veḷḷilai*, *mellilai*, *tirayal*, *tāmbūlam*.

Malayāḷam : *vettīla*, *tāmbūlam*, *tambaḷam*.

Kannāḍa : *beḷuḍile*, *tāmbūlam*.

Tuḷu : *baccira*, *tāmbūla*

Telugu : *tamalapāku*, *tāmbūla*

Gōṇḍī : *bīr-aki*

Kuvi : *tāmla*

Kurukh : *pān*

*Tāmbūlam* and *pān* among the above are borrowings from Indo-Aryan. Telugu *tamalapāku* is a compound of *tamala* (a modified adaptation through Prākṛt of Sanskrit *tāmbūla*) and *pāku* which is probably native Dravidian.

Tamil *veḷ-ḷ-ilai* (white or shining leaf) and *mel-l-ilai* (tender leaf—*mel* is probably a tadbhava from Sanskrit *mṛdu*) are characteristically expressive terms, descriptive of certain conspicuous features of the leaf. Kannāḍa *beḷuḍile* should be allied to Tamil *veḷḷilai*. Old Tamil *tirayal* is another expressive native word for 'betel' which apparently refers (as its base *tir* to 'turn' implies) to the irregularly climbing nature of the plant. Cf. in this connection the old Tamil word *tiraṅgal* signifying 'pepper-vine'.

All the other words given above appear to be related. They are all compounds constituted of a second component meaning 'leaf' and a first constituent meaning 'betel'. All these exist only as compound forms; we have to note that the first component by itself does not exist separately with the signification 'betel'.

#### *Phonetic aspects of the first component.*

The phonetic variations in the structure of the first components *vett-*, *vett-*, *bacc*, etc., are all characteristically Dravidian.

Old Tamil *tt* (with the alveolar *t*) appears in the modern colloquial as dental *t* as a general rule. Cf. *kāttu*, *kattu* (wind), etc.

Old Tamil *tt* regularly appears as alveolar *t* (after dropping *r*) in Malayāḷam.

-*cc-* of Tuḷu is the palatalised resultant of the original consonant group *tt*. cf. Tuḷu *bacc-* (to be dried) with Tamil *vaṭṭu* with the same meaning.

Initial *r-* of Tamil corresponds generally to *b-* of Kannāḍa and Tuḷu.

*The second component.*

So far as the second components meaning 'leaf' are concerned, all of them except *-āki* in the Gōṇḍi form are derived from a common base. Tamil *ilai* shows the characteristic Tamil ending *-ai* to which Kannaḍa *-e* and Tuḷu *-a* correspond. *r-* of Tuḷu *irā* corresponds to *-l-* of other southern deatects, as in Tuḷu *kāru* (leg) beside Tamil-Kannaḍa *kāl* (leg), Tuḷu *paru* (teeth) beside Tamil-Kannaḍa *pallu* (tooth), etc.

In Gōṇḍi *bīr-āki*, the first component appears to be allied to Santālī *bīr* (jungle). So far as the second component is concerned, it is certainly native Dr., since we have Kui *āku*, (leaf), Malayālam *aka*, Kannaḍa *age*, Tuḷu *agā*, Telugu *āku*, Kurukh *akhuā* (sprout, shoot).

It we were to seek for the derivation of *āku*, *āki* in Dravidian itself, it may be traced to *ag-* (to grow) found in Kannaḍa and related to Dravidian *āg* (to be produced) f. etc.

There is little doubt that the first and the second constituents of

*vettrilai*  
*baccuv*  
*vettilai*

are related. So far as the second constituent is concerned, we have seen already that it is native Dravidian.

The question we have next to take up is whether the base on which the first components have been formed is native Dravidian or not. We shall merely indicate here certain perspectives along which explanations may be sought for. Preliminarily, we may note here the significant fact that there is no word in Dravidian allied to the first constituent of *vettrilai*, etc., and existing in an uncompounded state, with the meaning, 'betel'. We shall, therefore, have to reconstruct the probable base on which *vettr-*, *bacc-* etc. may have been formed, and then on the one hand examine the structural and semantic affinities of this base to other Dravidian bases, and on the other its probable relationship to Austric forms.

*Reconstruction of the probable Dr. base.*

(i) It is a characteristic phenomenon of Tamil phonology that alveolar or 'cerebral' *ɾ* appears, in accented positions and under the assimilative influence of other sounds, as *ttr* (*tt* being

alveolar). *ttr*, therefore, of *vettr-* may be traced to a base with final alveolar *r* or cerebral *ṛ*. As for the initial sound, opinion differ as to whether *v* or *b* is original, though I myself am inclined to regard *v* as the original. The included vowel appears as *-e-* in Tamil, and as *-a-* in Tulu. Without entering for the present into the question as to what the original character of the vowel may have been, we may here content ourselves with recognising that  $v\frac{a}{e}r$  or  $b\frac{a}{e}r$  reveal itself as the base.

(ii) Alternatively, the base may be sought for along different path also. *ttr* (with the long alveolar *tt*) of Tamil appears usually as the assimilative resultant of *l+t* also, as in *vittru*, the past tense base formed the *vil* (to sell) and the past affix *tu*. If we consider *ttr* of *vettrilai* to have been produced thus, the base would emerge as  $v\frac{a}{e}l$  or  $b\frac{a}{e}l$ .

*Resemblance of this base to Austric forms.*

The Austric forms given by Prof. Przyluski in his lists are the following:

<i>balu</i>	<i>mluv</i>	} Basic type <i>balu</i> or <i>malu</i> .
<i>bolou</i>	<i>malua</i>	
<i>blu</i>	<i>melu</i>	
<i>plu</i>	<i>mlu</i>	

Now, whichever of the two reconstructed Dr. base-groups  $v\frac{a}{e}r$ ,  $b\frac{a}{e}r$  or  $v\frac{a}{e}l$ ,  $b\frac{a}{e}l$  may have been the real basis on which the Dravidian words have been formed, a comparison of these bases and the Austric forms does reveal a certain structural correspondence between the initial bilabials and the liquids.

Is this resemblance fortuitous? An intimate structural parallelism such as is evident here, can be affirmed to be accidental, only when we are in a position to establish that the Austric base on the one hand and the Dravidian base on the other could be traced on the one side and on the other to more elementary radicals which have no relationship, either structural or semantic, to each other. In the absence of such conclusive proof, the question of relationship between the Austric and the Dravidian forms cannot be summarily dismissed as being entirely unlikely.

*The Austric radical.*

Is it possible to trace the bases on the one side and on the other to more elementary radicals by discussing affiliations? Prof. Przyluski has tried to connect the type  $b(\partial)lu$  or  $m(\partial)lu$  with the Austric verbal root *mul, mua*, 'to roll up' (*Vide* 'Pre-Aryan and Pre-Dravidian,' page 18), but one does not feel that his attempt has been adequate or conclusive on the semantic side

*Are the bases of the Dravidian forms native?*

We shall take up the group :  $v \frac{a}{e}r$ ,  $b \frac{a}{e}r$  first. Is it possible to relate these to any other known native Dravidian base?

(a) Gundert in his Dictionary explains *vettrilai* as being composed of *ver* (mere) and *ilai* (leaf). Phonetically, this explanation is quite satisfactory, since the cerebral *r* can give rise to *tr* in Tamil and since other similar formations like Tamil *vettrurai* (mere word), and Mal. *vettan* (poor man) etc. in which *ver* with the meaning 'devoid of', 'mere' etc. do exist. It is the semantic derivation that creates difficulty. Why should the betel-leaf have been considered as the 'mere leaf'? It may of course have been considered 'the leaf *par excellence*' in view of its being a universal favourite as the essential component of the people's masticatory; and the ancient Dravidians—who, it may be observed here, denominated plants through very suggestive and expressive names (*vide* below) may have associated with this favourite leaf a kind of affective feeling of admiration and called it the 'mere leaf'. Nevertheless, Gundert's suggestion strikes us as rather naïve and unconvincing.

(b) Another possible suggestion is that the base *ver* may be connected with *vēr* (root).<sup>1</sup> *vēr-ilai* would then suggest the

1. That *vēr* appears to have been associated conspicuously with the naming of plants will be clear from the following Tamil names of plants :—

*vēr-kadalai* or 'root-gram', 'ground-nut' which term appropriately describes the way in which the fruits bury themselves like roots under the ground.

*vetti-vēr* or *vilal-vēr*, 'Andropogan muricatum' has roots valued for its stimulant properties.

Ginger or 'Zingiber officianalis' has, besides the usual name *inji* also an expressive term *vēr-kombu* (sprout of root) to denote it. The rhizomes of ginger are suggestively described by this term.

scendent nature of the plant itself and the appearance of the leaves at the nodes from which roots also appear. Possibly the climbing stem may also have been mistaken for a variety of root (as in the case of the 'ground-nut' fruit called *vet-kadalar*).<sup>1</sup>

Semantically, therefore, it is possible to connect *vet*, meaning 'root' with *vettilar*.

But there exist difficulties on the phonetic or structural side. In the first place, it may be observed that the production of *th* in genitival contexts in Tamil is associated<sup>2</sup> more with *y* than with *r* which is the final sound in the modern form *vet* (root). It may, however, be said in answer to this objection that post-dental and alveolar *r*<sup>3</sup> may have alternated with cerebral *y* (as in Tamil *kar*, *kay*) and that both the alveolar and the cerebral could have suffered the change to *th* in an ancient period as some rare extant instances would testify. Again what appears as a post-dental *r* in *vet* may very well have been alveolar at an ancient period as is suggested by the base from which *vet* and other words have been produced.

Another difficulty is in regard to the length of the vowel *i* in *vet* as it appears to-day has a long vowel, while *vetth*, etc. appear

*vet kuru* (root stump) is the name given for a kind of tender and caecuminate grass with plenty of fibrous roots.

*Vetram* (that which has roots) denotes in classical Tamil what is ordinarily known as *śemou* or 'colocasia arum'.

Again, the *tippali* or *pipali* plant with root-like catkins is described merely as *vet*.

1. That the Dravidians could describe plants expressively would be clear from the above and also from instances like the following:

*nannāri* (well smelling) 'Hemidesmus indicus' with aromatic roots.

*Kāttādi* 'casurina' 'what moves with the wind'

*Puga* (γ) *ilai* 'tobacco' or 'smoke leaf.'

*Kaṇṇappu* (dark) for 'poppy'

*Kāñṇi* (that which irritates), 'Fragia involuerata' which possesses stinging hairs all over its surface.

Tamil *kundrumay*, Mal. *kunṇi kuru*, 'Abrus precatorius' possessing small, coloured round seeds.

*Muḷḷu maruḷḷu*, 'Erythrina indica' having prickles in abundance.

2. Vide my paper on Alveolar *t*, *d* in the "Bulletin of the Rama Varma Research Institute", Vol. I.

3. For a discussion of the different varieties of *r* in Dravidian, cf. my paper on Dr. *r* sounds in I.H.Q., March, 1931.

to have a short vowel. This objection also might be answered by the fact that just as Tamil short vowels appear in derivatives the basal parts of which, when they stand alone, may show long vowels (as in *nēr*, *nettri*; *vēgu*, *vekkai* etc.), the vowel in the compound *vettrilai* also may have appeared as short. Cf. also Tuḷu *berkæ* (roots) which has a *short* radical vowel.

These are, however, only probabilities and in the absence especially of any extant compound in which the first component *vettr-* unequivocally means 'root', it would be hazardous to draw definitive conclusions about *vettr-* of *vettrilai* being related to the word *vēr* meaning 'root'.

112

If now we take up the other probable base  $v\frac{a}{e}l$ ,  $b\frac{a}{e}l$

and attempt to relate it to native Dravidian bases, only vague suggestions are possible. We shall find ourselves here on much shakier ground than with the reconstructed (Dr. bases with final *r* or *-r*).

#### Conclusion.

We shall now sum up what this discussion has disclosed:—

(a) While the second components of the native Dravidian forms for 'betel-leaf' are native, the probable bases on which the first components have been formed show a certain structural correspondence to the Austric words.

(b) Our attempts to establish the native character of these probable bases have not enabled us to form definite conclusions, though we have been led to envisage certain probabilities.

1. It would be interesting to consider if the other dialects offer us any help in this direction.

'Root' is denoted in Gōṇḍi by *sīr*. The first portion of *bir-āki* is contained in *bir-ol* (jungle bush). *bir* with the meaning 'jungle' 'forest' is a common Santālī word and is probably native in that Indian Austric dialect. If Gōṇḍi *bir* of *bir-āki* is a borrowing from Santālī, it may have nothing to do with Dr. *vēr* at all.

To Kurukh *barar* (pendulous roots of banyan or 'Ficus bengalensis'), Kurukh *baṛa* (banyan) is probably allied. Kurukh *baroi*, *barai* denote climbing plants. Kurukh *bara* (banyan) resembles the first word in Santālī *baṛe dare* (banyan), and probably and may be I A. in origin. (cf. Kurukh *baṛa* 'much' 'many,' borrowed from I A.). Whether indeed the other Kurukh words have anything to do with Dr. *bēr* (root), the one cannot say.

(c) The question of the relationship of the Dravidian words for 'betel' and the Austric forms has therefore to remain open. Further researches into Dravido-Austric contacts can alone help us in arriving at satisfactory conclusions.

---

# AMARAKHAṆḌANA OF ŚRĪ HARṢA

BY

T. R. CHINTAMANI, M.A.,

*Senior Lecturer in Sanskrit, University of Madras.*

The Amarakhaṇḍana, the text of which accompanies this short paper, is attributed to Śrī Harṣa in the colophon. Who this Śrī Harṣa is, I have not been able to determine as yet. But it seems certain that he is not identical either with the author of the Ratnāvalī etc. or with the author of the Naiṣadha and other works. The present author quotes from recent writers and hence the conclusion stated above.

Two manuscript copies of this work are known so far. One belongs to the Adyar Library and the other to the Government Oriental Manuscripts Library. Both are in palm leaf and in the Telugu script. Both copies are full of scriptorial errors and the worst part of it is, that both agree in the mistakes. The differences in the reading I not have noted in the foot-notes for they are negligible. The text as printed below is full of mistakes and therefore only tentative. The main reason that induced me to publish such an incorrect text is the historico-literary importance of the work. The work purports to be an unfavourable review of the Amarakośa of Amarasiṃha. Whether the criticisms are sound or otherwise, I do not intend discussing in this paper. But I propose to draw attention to the numerous authors and works quoted therein and make only such comments on them as are absolutely necessary.

The following authors are referred to in the course of the work:—

- |                |                         |
|----------------|-------------------------|
| 1. Ajaya       | 7. Keśava               |
| 2. Cakravarti  | 8. Keśavabhaṭṭa         |
| 3. Gadādhara   | 9. Ko. Lākṣibhaṭṭācārya |
| 4. Govardhana  | 10. Lokākṣibhaṭṭa       |
| 5. Govindapāda | 11. Mahendrācārya       |
| 6. Hemacandra  | 12. Maheśvara Dīkṣita   |

- |                        |                               |
|------------------------|-------------------------------|
| 13. Pārthasārathimiśra | 19. Sudarśanācāryabhaṭṭācārya |
| 14. Parvatavardhana    | 20. Sudarśanamiśra            |
| 15. Pūrvācāryāḥ        | 21. Vajrakhaḍgabhaṭṭācārya    |
| 16. Rabhasa            | 22. Vardhana                  |
| 17. Saṅghabhaṭṭācārya  | 23. Viśvaparakāśikākāra       |
| 18. Sudarśanācārya     |                               |

The following works are referred to:—

- |                            |                               |

| 9. Nānārthacandrikā        | 22. Śabdaśabdārthamañjūṣā     |
| 10. Nānārthāśikhāmaṇi      | 23. Śāradātīlakabhāṣyavivara- |
| 11. Paryāyaratnamālā       | ṇa                            |
| 12. Paryāyārṇava           | 24. Vaijayantī.               |
| 13. Śābarabhāṣyavyākhyā    |                               |

Among the authors referred to above, some are already familiar to us, but many are new. The following are worthy of our attention, on account of the fact that they are otherwise unknown to us:—

*Cakravartī.*

From the reference to Cakravartī on page 21, we are led to think that he is a lexicographer. But the name of his lexicon is yet to be found out.

*Gadādhara.*

It is not known whether this Gadādhara is the same as the famous Naryāyika. He is here referred to as the author of a commentary on the Śābarabhāṣya.

*Govardhana.*

This Govardhana is a lexicographer. His lexicon is called *Maṇi*. Govardhana is referred to in other places also as a lexicographer.

*Govindapāda.*

There are two references to Govindapāda and both the references point to the fact that he ought to have composed some

rk on lexicography. The name of the work is however not en.

*śava.*

The only reference to Keśava is found on page 17. I have been able to trace this quotation either to the Nānārthhārṇa-aṅkṣepa of Keśavasvāmīn or the Kalpadrukośa of Keśava.

*Lākṣibhaṭṭācārya.*

This person is referred to as the author of a lexicon by name ndrikā. Even the name of the author is not quite clear, for re are one or two letters missing between Ko. and Lā. I am at present aware of any manuscript of the Candrikā of this known author.

*kākṣibhaṭṭa.*

Lokākṣibhaṭṭa is again an unknown lexicographer. A otation from the work of this author is found on page 26.

*hendrācārya.*

There are two references to Mahendrācārya in this work. e former of the two references informs us that Mahendrācārya he author of a work called *Mucukundabhāṣyavivarāṇa*. The ond reference may be to the same work or to a different one.

*heśvara Dīkṣita.*

The reference to Maheśvara Dīkṣita is in connection with the labhāgavata—a Kāvya, of which he is made out to be the hor.

*rthasārathimiśra.*

This Pārthasārathimiśra need not be confounded with the hor of the Śāstradīpikā. He is here the author of a lexicon name Śabdacintāmaṇi.

*rvatavardhana.*

A work called Śabdānuśāsana is here ascribed to the author- p of Parvatavardhana. So far as our knowledge goes at pre- t, we do not know of any person of this name as the author a Śabdānuśāsana. It is possible that the scribe has made a stake for Harṣavardhana.

*San̄ghabhaṭṭācārya.*

San̄ghabhaṭṭācārya was the teacher of this Śrī Harṣa, author of the Amarakhaṇḍana. He is here referred to as the author of a work called Śāradatilakabhāṣayivaraṇa.

*Sudarśanācārya.*

We find this author as a lexicographer herein.

*Sudarśanācāryabhāṭṭācārya.*

This author has to his credit a work called Mañjarī-lexicon.

*Sudarśanamīśra.*

He too seems to have been a lexicographer.

*Vajrakhaṇḍgabhaṭṭācārya.*

He wrote a lexicon called Śabdaratna.

*Vardhamana.*

Vardhamana was the author of the Śabdenupamāṇa.

The following, among the works noted, are worthy of attention:—

*Bālabhāgarata.* See Mahāśvara Dikṣita.

*Bāṣkala Bhāṣya.*

Evidently this is some commentary on the Bhāṣya Samhitā of the Ṛg-Veda. We do not know whose Bhāṣya referred to herein.

*Candrikā.* See Ko. Lākṣmibhaṭṭācārya.

*Kośaratna.*

The name itself is suggestive of the contents. The author is unknown.

*Mañjarī.* See Sudarśanācāryabhāṭṭācārya.

*Mañjūṣā.*

We do not know whether this is a contracted name of Śabdaśabdārthamanjara or a different work altogether.

*Mañi.* See Govardhana.

*Mucukundabhāṣya, etc., etc.* See Mahendracārya.

*Nānārthacandrikā.*

This is a lexicon of synonyms of unknown authorship.

*Nānārthaśikhāmaṇi.*

This is another lexicon of synonyms of unknown authorship.

*Paryāyaratnamālā*  
and  
*Paryāyārṇava.* }

The former of these two works belongs to Maheśvaramiśra and the latter to Nilakaṇṭhamiśra. Only manuscript copies of these works are available.

*Śābarabhāṣyavyākhyā.* See Gadādhara.

*Śabdacandrikā.* See Govindapāda.

*Śabdacintāmaṇi.*

On page 20, the author says that the work was composed by his father and on page 23 the name of the author of the Śabdacintāmaṇi appears as Pārthasārathimiśra. It would not be therefore too much to infer that Pārthasārathimiśra was the father of this Śrī Harṣa.

*Śabdamīmāṃsā.*

From the way in which the Śabdamīmāṃsā is referred to here, we are led to think that it is the work of Ajaya. We know that Ajaya has written the Nānārthasaṅgraha. Whether the present work is only another name of that work or whether it is different we cannot say.

There are two other references to the Śabdānuśāsana and one of them is certainly not Parvatavardhana's. About the other, we do not know at present.

*Śabdaratna.* See Vajrakhadḡabhaṭṭācārya. There are 6 references to this work. Evidently it is a lexicon.

*Śabdarūpamīmāṃsā.* See Vardhanācārya.

*Śabdaśabdārthacintāmaṇi.*

This is a lexicon of unknown authorship. There are two references to this work here.

*Śabdaśabdārthamañjarī.*

This too is a lexicon of unknown authorship.

*Śabdaśabdārthamañjūṣā.*

Hamvīramiśrarāja is the author of this work. MS. copies of this work are available.

*Śabdānuśāsana.* See Parvatavardhana.

*Śāradātīlakabhāṣyavivarāṇa.* See Saṅghabhaṭācārya.

Thus we see that in this short pamphlet a number of authors and works are quoted. Many of the works are not available at present. This is the only reason that induced me to publish this much defective text of the Amarakhaṇḍana.

## ŚĀNTA—THE NINTH RASA.\*

BY

PANDIT. D. T. TATACHARYA SIROMANI, M. O. L.,

*Professor of Mīmāṃsā, Sanskrit College, Tiruvadi.*

About the *rasa* called *śānta*, much controversy appears to have arisen and continued long among the old Ālaṅkārikas. The oldest extant work in which we find for the first time this *rasa* expressly mentioned is Udbhaṭa's *Kāvyaālaṅkārasaṁgraha* (p. 49). But there, neither Udbhaṭa nor his commentator, Pratihārendurāja, introduces any opposite views regarding it, and it is merely mentioned along with others, as if there has been no conflict of opinion about it. One reason why some refuse to accept *śānta* is given by Abhinavagupta, by way of introduction to a passage in the *Dhvanyāloka*, where Ānandavardhana endeavours to establish this *rasa*. This is the introductory line (p. 176) :—

ननु नास्त्येव शान्तो रसः । तस्य तु स्याद्येव नोपदिष्टो मुनिने-  
त्याशङ्क्याह—शान्तश्चेति ।

But the following extract from *Dhanika* (Jivananda's Ed. 1878—p. 165) contains some other reasons also :—

इह शान्तरसं प्रति वादिनामनेकविधा विप्रतिपत्तयः । तत्र केचि-  
दाहुः—नास्त्येव शान्तो रसः । तस्याचार्येण विभावाद्यप्रतिपादनाल्लक्षणाकर-  
णात् । अन्ये तु वस्तुतस्तस्याभावं वर्णयन्ति । अनादिकालप्रवाहायातराग-  
द्वेषयोरुच्छेत्तुमशक्यत्वात् । अन्ये तु वीरबीभत्सादावन्तर्भावं वर्णयन्ति । एवं  
वदन्तः शममपि नेच्छन्ति ।

Most probably to the first अन्ये, and केचित्, mentioned by *Dhanika* in the above passage, might be ascribed the authorship of the two *śloka*s respectively, which, *Dharmasūri*, the author of the *Sāhityaratnākara*, quotes in the *pūrvapakṣa* concerning the *śānta rasa*, with a few introductory words :—

अन्ये तु 'न शान्तं मेनिरे रसम्' इति प्रमाणयन्तोऽष्टावेव रसा-  
नभिप्रेत्याहुः—

---

\* Appendix to "Definition of Poetry or Kāvya", thesis approved by the University of Madras for the Degree of Master of Oriental Learning.

रागद्वेषविलाससंभृतरसं विश्वं जगच्चेष्टते  
 तावेतौ सुतरामनादिसुमहाकालप्रवाहोल्बणौ ।  
 नैकोऽपि क्षमते पुमांस्तदनयोरामूलमुन्मूलने  
 तेनात्यन्तपरीक्षणे तु भुवने का नामशान्तेः कथा ॥

अपि च,

यदि नवमतया शमो मतः स्यात्  
 किमिति मुनिः सं च नाललक्षदेनम् ।  
 अपि परिगणयन् रसेषु भावान्  
 रतिमुखानललङ्घदस्य किं वा ॥

Dhanañjaya seems to accept *śama* as distinct from *śānta* *rasa*, which, he thinks, has no place in a drama :—

शममपि केचित्प्राहुः पुष्टिर्नाट्येषु नैतस्य ।

Explaining the above, Dhanika writes :—

यथा तथास्तु । सर्वथा नाटकादावभिनयात्मनि स्थायित्वमस्माभिः शमस्य  
 निषिध्यते । तस्य समस्तव्यापारप्रविलयरूपस्याभिनयायोगात् ।

What chiefly led Dhanika and Dhanañjaya to such a conclusion is evidently the silence of Bharata with respect to its स्थायिभाव—which Abhinavagupta refers to in the line quoted above. But how are we to account for Udbhaṭa's statement (P. 49.)—

“बीभत्साद्भुतशान्ताश्च नव नाट्ये रसाः स्मृताः” ?

From the Locana, we understand that according to some, Bharata himself accepts the *śānta rasa*. Abhinavagupta says there :— अन्ये तु

“खं खं निमित्तमासाद्य शान्तादुत्पद्यते रसः ।

पुनर्निमित्तापाये तु शान्त एव प्रलीयेत ॥ ”<sup>1</sup>

इति भरतवाक्यं दृष्टवन्तः सर्वरससामान्यस्वभावं शान्तमाचक्षाणाः ।

This is his own view also. Because he writes further on—

प्रतीयत एवेति । मुनिनाप्यङ्गीकृत एव “क्वचिच्छमः” इत्यादि वदता ।

Following Udbhaṭa, some held that the chief *rasa* in the *Nāgānanda* is *śānta*. Dhanika refutes this, in defence of his own and Dhanañjaya's theory:

1. My endeavour to trace out these words of Bharata in the *Nāṭya Śāstra* has proved fruitless. Yet I am far from affirming that they could not be found there.

यत्तु कैश्चिन्नागानन्दादौ शमस्य स्थायित्वमुपवर्णितम्, तत्तु मलयवत्य-  
नुरागेण आप्रबन्धप्रवृत्तेन विद्याधरचक्रवर्तित्वप्राप्त्या(च) विरुद्धम् । न ह्येकानु-  
कार्यविभवालम्बनौ विषयानुरागापरागावुपलब्धौ ।

Having in view what he is thus going to say in the fourth Pariccheda, Dhanika concludes in the second Pariccheda (pp. 65—6) that the hero of the Nāgānanda, Jīmūtavāhana, is *dhīrodātta*, not *dhīraśānta*. But Hemacandra, who follows Abhinavagupta in almost everything, accepts heartily *śānta*, and thus attacks Dhanika in his Alaṅkāracūḍāmaṇi :—

एवं यत् कैश्चिज्जीमूतवाहनस्य धीरोदात्तत्वं प्रतिष्ठि(ष्ठापि)तं तत्  
प्रत्युक्तमेव ।

Mammaṭa, who regards *nirveda* as the *sthāyībhāva* of *śānta*, is also attacked here by Hemacandra. The former writes in the Kāvyaaprakāśa : (4th Ullāsa.)

निर्वेदस्यामङ्गलप्रायस्य प्रथममनुपादेयत्वेऽप्युपादानं व्यभिचारित्वेऽपि  
स्थायित्वाभिधानार्थम् । तेन निर्वेदस्थायिभावः शान्तोऽस्ति नवमो रसः ।

This view appears in a metrical garb in Dharmasūri's Sāhityaratnākara :

न स्थायिव्यभिचारिते यदि पुनश्चित्ते मुनेः सम्मते

निर्वेदस्य निरूप्य तान् रतिमुखानष्टावपि स्थायिनः ।

तेषूद्देश्यतया स्थितेषु बहुशो भावेषु सञ्चारिणां

नित्यामङ्गलमुद्दिशेत् कथमसौ निर्वेदमेवादितः ॥

Rejecting the above, Hemacandra says (p. 81):

एतेन निर्वेदस्यामङ्गलप्रायत्वेऽपि व्याभिचारिषु यन्मुनिना प्रथममुपादानं  
कृतं तत् स्थायिताभिधानार्थमिति यदुक्तं तत् प्रतिक्षिप्तम् । तथा हि—कोऽयं  
निर्वेदो नाम ? ..... तस्मात् शम एव स्थायी । न च  
शमशान्तयोः पर्यायत्वमाशङ्कनीयम् । हासहास्ययोरिव सिद्धसाध्यतया लौकिका-  
लौकिकतया साधारणासाधारणतया च वैलक्षण्यात् ।

We meet with an interesting passage in the Sāhityaratnākara, from which we understand that the quarrel about the *sthāyībhāva* was in no way less, perhaps much greater, than that about the *rasa* itself:

किञ्च 'जुगुप्साविस्मयशमाः स्थायिभावाः' इति वचनानुरोधात् श्रुत  
एवास्य स्थायिभावः । केचिदुत्साहं स्थायिनमाहुः । कोहलस्तु उत्साहो वा निर्वेदो  
वा शमो वास्य स्थायीत्युवाच । केचिज्जुगुप्सास्थायिनमेनमाहुः ।

Surely it is quite impossible to trace out at present wherefrom Dharmasūri came to know of this view of Kohala. About Kohala, all that can be gathered from a minute and patient scrutiny of all the existing Alaṅkāra works, is set forth by S. K. De, in his "Sanskrit Poetics" (pp. 24-6). I should add here that one Mārkaṇḍeya-Kavīndra is said to have written in his Prākṛta-Sarvasva as follows:

शाकल्य-भरत-कोहल-वररुचि-भामह-वसन्तराजायैः प्रोक्तान् ग्रन्थान्....  
....मार्कण्डेयकवीन्द्रः प्राकृतसर्वस्वमारभते ।

From this we understand that Kohala was the author of a Prākṛta work now lost to us; but since the chronological order seems to have been kept in view by Mārkaṇḍeya in mentioning these authors it may be well supposed that according to him Kohala was anterior to Vararuci the author of Prākṛta-Prakāśa.

Leaving the question of *sthāyībhāva* of the *śāntarasa*, Dharmasūri goes on to specify—by way of answering a question—the kind of poetry in which *śānta* can have a place;

ननु सर्वव्यापारोपरमरूपस्य तस्याभिनयप्रधानेषु नाट्यप्रबन्धेषु कथमुप-  
योग इति चेन्नैवम् । न हि वयं नाट्यप्रबन्धेष्वपि शान्तरसप्रचारमाद्रियामहे ।  
किन्तु वर्णनात्मककाव्यभेदेष्वेव । अत एव 'अष्टौ नाट्ये रसाः स्मृताः' इति  
काव्यप्रकाशिकाकारः ।

Such an answer perhaps was suggested to him by Ānandavardhana, who, in a somewhat lengthy disquisition in the fourth Uddyota of his Dhvanyāloka, proves that *śānta* is the principal *rasa* in the Mahābhārata. But Dhanika seems to be a bitter enemy of *śānta*, for, even in the Mahābhārata he would not allow it. Introducing and commenting upon a line of Daśarūpa he writes (p. 176);

ननु शान्तरसस्यानभिधेयत्वात् (This is palpably a mistake: it should be  
आनभिनेयत्वात्) नाट्येऽपि सूक्ष्मातीतादिवस्तूनां सर्वेषामपि शब्दप्रतिपाद्यतया  
विद्यमानत्वात् काव्यविषयत्वं न निवार्यते । अतः (?) तदुच्यते—

शमप्रकर्षो (?) निर्वाच्यो मुदितादेस्तदात्मता<sup>1</sup> ॥

शान्तो हि यदि तावत्

1. This line is very badly misunderstood and mistranslated by Haas.

न यत्र दुःखं न सुखं न चिन्ता  
न द्वेषरागौ न च काचिदिच्छा ।  
रसस्तु शान्तः कथितो मुनीन्द्रैः  
सर्वेषु भावेषु शमप्रधानः ॥

इत्येवंलक्षणः, तदा तस्य मोक्षावस्थायामेवात्मस्वरूपापत्तिलक्षणायां प्रादु-  
र्भावात् (?) तस्य च स्वरूपेणानिर्वाच्यता । तथा हि—श्रुतिरपि 'स एष नेति  
नेति' इत्यन्यापोहरूपेणाह । न च तथाभूतस्य शान्तरसस्य सहृदयाः  
स्वादयितारः सन्ति । अथ तदुपायभूतो मुदितामैत्रीकरुणोपेक्षालक्षणः तस्य च  
विकासविस्तरक्षोभविक्षेपरूपतैवेति तदुक्त्यैव शान्तरसास्वादो निरूपितः ॥

Thus Dhanika is in direct conflict with Ānandavardhana though he does not expressly refute his theory. Dharmasūri too is wrong in supposing that Ānandavardhana is not in favour of *śānta* being given a place in dramatic works. For, the latter when arguing in favour of the ninth *rasa*, tells us that the three *vīras* of Bharata, *dayā*, *dāna*, and *dharma*, imply *śānta*,—a fact—which leads us to conclude that those dramatic pieces whose heroes belong to any one of the three above-mentioned classes, are necessarily expressive of *śāntarasa*. That such was the idea of Ānandavardhana is strengthened by the following lines of his commentator Abhinavagupta, who gives the highest place to *śānta* among the *rasas*;

आधिकारिकत्वेन तु शान्तो रसो (न?) निबद्धव्य इति चन्द्रिकाकारः,  
तच्चेहास्माभिर्न पर्यालोचितम् । प्रसङ्गान्तरात् । मोक्षफलत्वेन चायं परम-  
पुरुषार्थनिष्ठितत्वात् सर्वरसेभ्यः प्रधानतमः ।

It is generally known that sometimes the poets themselves propound, expressly or by implication, theories relating to the art of poetry. One of such poets is Kṛṣṇamiśra, the well-known author of the Prabodha-Candrodaya, whose principal *rasa* is *śānta* as Nāgeśa rightly points out in his commentary on *Rasa-gaṅgādhara*<sup>1</sup> (p. 30). It is in Veṅkaṭanātha "Master of all arts and sciences," that we see the most eminent poet who refutes the views of Dhanika and Dhanañjaya with regard to the *śānta-rasa*. The following, taken from the prologue to his drama,

the Saṅkalpasūryodaya, is a portion of the dialogue between Sūtradhāra and Naṭī :—

नटी—युक्तमेवैतद्वाद्गतमार्यस्य । तथापि शान्तो नाम रसो नास्तीति गन्धर्वा-  
गमदेशिकैः समर्थ्यते । तस्मादत्र कथं तादृशस्य रसस्य निवेशः ?

नटी—भवतु नाम सनकसनन्दनादिमुनिजनसंगृहीतः सोऽपि तादृशो रसः ।  
तथापि कथं निष्पन्दनिखिलकरणनिष्पादनीययोगप्रधान एष सर्वजन-  
प्रेक्षणीयेन नाटकवृत्तान्तेन संपाद्यते ।

सूत्रधारः—आर्ये ! मैवं वादीः । न हि वयमवधूतनिखिलधर्माणामलेपकानां  
मतमभिनेष्यामः येनैवमाशङ्कसे । सन्ति खलु भगवता गीताचार्येण  
सहस्रशः प्रतिपादिताः सात्त्विकेन त्यागेन परिकर्मिता निवृत्तिधर्मपद्धति-  
नियता विविधा व्यापाराः यदभिनयेन रङ्गोपजीविनामाजीवावकाशः ।  
अपि चेदं निशमयतु निशामयतु वा नाट्यवैभवं भवती । श्रूयते हि—  
न तच्छास्त्रं न सा विद्या न तच्छिल्पं न ताः कलाः ।  
नासौ योगो न तज्ज्ञानं नाटके यन्न दृश्यते ॥

“Naṭī (with joy)—What my lord sayeth is right, but how to account for the embodiment of the emotion of peace in this drama, when the masters of the Histrionic art maintain that there is no such thing as *śānta*.

Sūtradhāra (contemptuously)—Lady ! Them, then, I do not consider as connoisseurs of the histrionic art.

They hold the opinion that the emotion of peace could not be enacted, perhaps because of the difficulty to find in this world an audience to appreciate that emotion.

Further :—

The erotic emotion pampereth the ways of the wicked; the emotion of valour breedeth mutual contempt, the emotion of wonder bordereth on the grotesque; the other emotions are paltry enough. But peace alone then by elimination is the emotion that allayeth the agony of the mind.

*Nañi*—This superior emotion (peace) is of the experience of great sages, such as Sanaka, Sanandana and others. Still, how could this emotion, the essence of which is *yoga* which is attainable only by the control of the sense-group, be represented in a drama, fit alone to be witnessed by Philistines !

*Sūtradhāra*—Lady! say not so. For:—for thee to raise this doubt, we are not going to depict the creed of Alepakas, who give up the performance of all duties. There are *varṇāśrama* duties expounded times without number, by the divine Lord Kṛṣṇa,—duties ennobled by the doctrine of *Sāttvikatyāga* and which could not be abandoned by the adherents of *Nivṛttidharma*. It is the discharge of these duties that giveth the lovers of Ranga their lives' goal. Further hear and see more, about the greatness of true histrionic art. For, it is said :—

That which could not be depicted in a drama is neither *śāstra* nor *vidyā*, *śilpa*, nor *kalā*, *yoga* nor *jñāna*.”<sup>1</sup>

# THE CHINESE SUVARNA-SAPTATI AND THE MĀTHARA-VRṬTI

BY

S. S. SURYANARAYANA SASTRI, M.A., Bar-at-Law,  
*Reader in Indian Philosophy, Madras University.*

It is well-known that Paramārtha, a Buddhist monk who went and lived in China in the 5th Century A. D., took with him a number of works from India, which he translated into Chinese. One of these was the *Sāṅkhya-Kārikā*, which in the Chinese is known by the equivalent of the *Suvarṇa-Saptati*. The translation includes a commentary as well. Both of these were first made available to the non-Chinese-knowing world by M. Takakusu in the *Bulletin de l' Ecole Francaise de l' Extreme Orient*, in 1904. M. Takakusu noticed several points of resemblance between Gauḍapāda's bhāṣya and the commentary that had been translated by Paramārtha. There is not much room to think that the latter was written by Paramārtha, since, in more than one place<sup>1</sup>, he adds a note of his own, either explaining the commentary or dissenting therefrom. It was, therefore, thought that Gauḍapāda's bhāṣya was possibly translated by Paramārtha, or else some commentary, which was the original for Gauḍapāda as well. When later a manuscript of the *Māthara-Vṛtti* was discovered, it was found that this had far greater affinities with what Paramārtha had translated into Chinese; while at the same time from its being in some ways clearer and fuller than Gauḍapāda's bhāṣya, it seemed to be the original of the latter too. It seemed, therefore, exceedingly likely that the *Māthara-Vṛtti* was the original for Paramārtha. This conclusion was stated by Dr. Belvalkar<sup>2</sup> quite a long time ago and presumably he is of the same opinion still. He is not unaware of some differences between the two, but he considers these to be of little moment, like those incidental to differences of recension, as between the Chinese and the Japanese. Anything like an examination in some detail of the two commen-

---

1. See, for instance, the *sous-commentaires* on verses 8 and 51.

2. *Bhandarkar Commemoration Volume*, pp. 171-184.

taries seems, however, to reveal several differences in fundamentals, differences that can hardly square with the hypothesis of the one having been the original of the other. Such an examination has been under-taken elsewhere by the present writer; he seeks here only to re-state some of the points of difference under three heads : I. Differences in doctrine between Māṭhara and Paramārtha: II. Differences in exposition, where Paramārtha agrees more with Gauḍapāda than with Māṭhara; III. Differences in exposition, where Paramārtha is fuller and more intelligible than either Māṭhara or Gauḍapāda.

# I

(a) The first of these relates to the order of evolution. "The five subtle elements", says Paramārtha, "proceed from *ahaṅkāra*; they are then products; but they produce the five *mahābhūtas* and the *indriyas*; they are then productive; that is to say, the subtle element of sound produces ethereal space and the organ of hearing, the subtle element of odour produces the earth and the organ of smell and so on." The doctrine of the origin of the *indriyas* from the *tanmātras* is foreign to the Sāṅkhya of the *Kārikās*, as expounded by Māṭhara or Gauḍapāda or by any known Saṃskṛt commentator. The account given here (in the commentary on verse 3), occurs elsewhere too, in the commentaries on verses 8, 10, 26 and 56, while it is implied by the commentary on verse 34. A passage from the commentary on verse 26 may be quoted to remove any possible doubt as to Paramārtha's meaning. "The organ of hearing proceeds from the subtle element of sound and is related in nature to the gross element, ether; it perceives, then, sounds alone. The organ of touch proceeds from the subtle element of touch and is related in nature to the gross element air; it perceives, then, contact alone." It must be noted that verses 22 and 25 of the *Kārikās*<sup>3</sup> seem to contain a distinctly different teaching about the order of evolution. In commenting on these, Paramārtha seems to lay no stress on the order mentioned, and cannot be taken to have contradicted the order explicitly laid down in commenting on both earlier and later verses. Presumably these verses were treated as

---

3. *prakṛter mahāms tato 'haṅkāras tasmād gaṇas ca śoḍaśakah |*  
*tasmād api śoḍaśakāt pañcabhyah pañca bhūtāni | |*  
*sāttvika ekādaśakah pravarttate vaikṛtād ahaṅkārāt |*  
*bhūtādes tanmātras sa tūmasas taijasād ubhayam | |*

not teaching a definite sequence or as not intending the sequence.

But not this, that is to say, the commentator whose work he translated, does not seem to have stood alone in thus understanding the sequence of the *tattvas*. His account has great affinities with that given in the *Manimēkalai* and some parts of the *Ācārakārikā*.<sup>4</sup> Here, the organs of sense are said to evolve from the *mahābhūtas*; "from ether (proceed) the evolutes called the ear and sound, from air the evolutes called skin and touch," and so on. If the difference of this doctrine from what is called classical Sāṅkhya, and its affinities with what is known as Epicureanism, can serve as indications of an early date, it is likely that Paramārtha too was translating the work of some very early commentator, one who came long before Māthara or Gauḍapāda.

(2) The next major point of difference relates to verse 67 which is ordinarily understood to teach a state of release, while still embodied. "Virtue and the rest having ceased to function as causes, because of the attainment of perfect wisdom, (the spirit) remains embodied, invested with the body, because of the force of past impulsion, like the whirl of the (potter's) wheel (which persists for a while by virtue of the momentum imparted by a prior cause)." This is not, however, the way in which Paramārtha understands it. Because of full and perfect knowledge, it is said, virtue etc., have no longer any influence; transmigration is (therefore) arrested, as the body of the potter's wheel, whose movement one interrupts. The idea of *jīvanmukti* finds no place here. The verse is introduced with the question "If knowledge gives deliverance, why are you and I not yet released?" As it stands, Paramārtha's commentary seems to give no answer except that release comes with death alone. There is no room to think that M. Takakusu's translation is at fault here, as it is elsewhere, in rendering what Gauḍapāda understands by *yama*, *nyama* etc.; for, it is difficult to believe that the translator misunderstood a whole passage, especially when he was aware of Gauḍapāda's interpretation of that verse as teaching a doctrine of *jīvanmukti*. There is no reason to think either that the doctrine was an integral part of the Sāṅkhya from the earliest times, or that it was not, in view of the many varying conceptions and

<sup>4</sup> See "The Manimēkalai Account of the Sāṅkhya," *Journal of Indian Philosophy*, VIII, pp. 322-327.

explanations of it in the history of its sister system, the Advaita Vedānta. The illustration of the potter's wheel, however, seems hardly to be apposite to the sense conveyed in Paramārtha's commentary. The whole question of release while yet embodied is worth further investigation. In the meantime, we have here a divergence of Paramārtha, on a cardinal point of doctrine, from Māṭhara.

(c) Some minor points of difference may also be noticed :

(1) Under verse 13, the co-operation of the three *guṇas*<sup>5</sup> is explained by Paramārtha on the ground that since they *pertain to one identical soul*, and are not independent, they are capable of acting together. There is nothing corresponding to the words italicised, in the Māṭhara-Vṛtti, or indeed in the commentaries of Gauḍapāda or Vācaspati.

(2) In explaining the function of the senses as *ālocana-mātram* Paramārtha seems undecided as to the interpretation of it as *bare* awareness or *unique* awareness. "The eyes", he says, "only see forms and that is the function of the eyes. It is only a perception incapable of discernment or handling. The other organs too act only on their respective objects."<sup>6</sup> Māṭhara definitely understands *unique* awareness, the sense implied in the third of the sentences quoted from Paramārtha.

(3) The dispositions that are *sāmsiddhika* are explained by Paramārtha as those acquired by good deeds performed in a prior existence.<sup>7</sup> Māṭhara and Gauḍapāda take it to mean *cognate* (*saho'tpanna*), and instance dispositions cognate with the divine sage, Kapila, *in the first creation*. These could not have been produced by earlier acquired merit; indeed, such dispositions are classified as *prākṛtika* by Gauḍapāda.

(4) Both Paramārtha and Māṭhara give lists of teachers that intervene between Pañcaśikha and Īśvara-Kṛṣṇa, but the lists are not identical, nor can they be identified, as suggested by Dr. Belvalkar. Paramārtha names Hokia, Uluka, and Po-poli, while Māṭhara mentions Bhārgava, Ulūka, Vālmiki, Hārīta, Devala, and others, (Devala-prabhṛtīn). Even if we identify Bhārgava with Hokia, and Po-poli with Devala, there are at least

5. *sattvam laghu prakāśakam iṣṭam upaṣṭambhakam calam ca rajah |  
guru varanākam eva tamah pradīpavac cārthato vṛttiḥ.*||

6. Verse 28.

7. Verse 43.

two other names, Vālmiki and Hārīta, for whom there are no equivalents in Paramārtha's list. One of the strong points of Dr. Belvalkar's thesis is thus very insecurely founded.

## II

(a) In explaining the phrase *kaivalyārtham pravṛtteś ca*,<sup>8</sup> Māṭhara, like the author of the *Jayamaṅgalā*, takes the activity (*pravṛtti*) to be that of Prakṛti. Not so Paramārtha, who agrees with Gauḍapāda (and Vācaspati) and expatiates on the futility of *our efforts* to secure release, if bodies alone existed.

(b) *Ādhyātmika tuṣṭis*<sup>9</sup> are understood by Paramārtha as internal contentments produced by the intellect, individuation and *manas*; they *relate to* nature, means, time and luck. Māṭhara, who agrees with Vācaspati, says that they *concern* the self and are *called* nature, means, time and luck.

There are also a few other such instances of agreement between Paramārtha and Gauḍapāda. In view of the many points of resemblance between the *Māṭhara-Vṛtti* and Gauḍapāda's bhāṣya on the one hand and that *Vṛtti* and Paramārtha's commentary on the other, it is impossible to avoid the conclusion of their reciprocal dependence. But the differences noted above would seem to stand in the way of accepting any one of them as the original of the others. It is more likely that all three derive from a common original.<sup>10</sup> It is not unlikely that the commentary translated by Paramārtha, which must have been of some antiquity, was itself the original drawn upon in various ways and at various dates by both Māṭhara and Gauḍapāda.<sup>11</sup>

8. Verse 17.

9. Verse 50.

10. See Keith, *The Sāṅkhya System*, p. 70 *fn.*

11. In a paper contributed by Prof. Umesh Misra to the Sixth Session of the All-India Oriental Conference, on "Gauḍapāda's Bhāṣya and the Māṭhara-Vṛtti" the writer seeks to make out that the latter is a very late work written after the 10th century A.D., perhaps after the 13th century. Though one may not subscribe to this conclusion, it is difficult not to agree with the writer in his view that the dependence of Gauḍapāda on Māṭhara is not proved. The existence of a 73rd verse in the *Māṭhara-Vṛtti*, not found in any other commentary, is strongly suggestive of the lateness of the former. But the argument is not conclusive; for, even the 72nd verse, in the present writer's opinion (not to mention the 63rd verse, referred to in the text of this paper) seems to be an interpolation, though it is found in all commentaries except Gauḍapāda's.

III.

Two distinctive points in the *Suvarṇa-Saptati* deserve notice. (a) What is verse 63 in the *Kārikā*, as known to us, finds no place in the Chinese version. The omission of this verse does not cause any break in the transition of thought from verse 62 to verse 64. The first of these states that the Spirit is in truth never bound, but that it is *Prakṛti* that is bound and migrates. This is the final truth; by the contemplation of this, we are told in verse 64, there results perfect wisdom which leaves nothing to be known, which is pure and absolute. Between these two verses, there is no need to say that *Prakṛti* binds itself through seven dispositions and liberates itself through one. How the bondage is effected has been set forth already. A verse like the present would find its most appropriate place, if at all, after verse 54, which is the last verse treating of the *guṇas*. From verse 55 onwards we are told of the misery which is of the nature of the things and of the functioning of *Prakṛti* towards the release of the Spirit; and there is a natural transition from verse 62 to verse 64, which is not helped in any way by verse 63. It is true, as both Tīlak and M. Takakusu point out, that the sense of the verse finds support in *Sāṅkhya-Sūtras*, but this is not conclusive evidence of the genuineness of the verse. It may be that it was grafted on later, on the strength of the *Sūtras*. The grafting should have been done before the time of Māṭhara, Gauḍapāda and Vācaspati. This is not impossible, as it has not been proved that none of the *Sūtras* in their present form was known to the commentators.<sup>12</sup> If, then, we decide to drop out verse 63, we are left with seventy-one verses of the usually recognised 72. Of these, the last verse need not have been composed by Īśvara-Kṛṣṇa. It is obviously a reply to some hostile criticism of the scope and value of the work. This character it shares with verse 73, which is seen only in the *Māṭhara-Vṛtti*. The reply may have anticipated the criticism, but it may well have come later too. The latter hypothesis has this further advantage, besides its being the more natural one: on the Chinese computation, if verse 72 be left out, as a later addition, we are left with only 70 verses, which make the *Saptati* complete, the last verse ending with "*saṅkṣiptam āryamatinā samyagvijñāya siddhāntam.*" The view here

urged is not implausible. But one at least of the difficulties it has to meet is Tilak's conjectural verse based on the commentary on verse 61. as set forth by Māṭhara, Gauḍapāda, and Paramārtha. The exposition of Paramārtha, however, has here an advantage which is worth noticing.

(b) The verse starts with the *sukumārataratva* of *Prakṛti* which is explained by Paramārtha as subtlety (delicatesse). The commentaries of Māṭhara and Gauḍapāda pass on abruptly from this to a discussion of Īśvara, time, svabhāva etc., as causes of the world. It is this abrupt change of topic that strongly suggests a missing verse of the kind conjectured by Tilak. The transition, however, is more easy in Paramārtha's account. This is how it goes. "Thus, in the world, a man sees a woman endowed with excellent qualities; then he sees another woman, who is the most excellent of all; he thinks 'she is the most excellent and she is unrivalled'. In the same way, Nature is the most delicate (subtle) of the twenty-four principles. How do you know that? Because she does not bear one's gaze (is invisible). One may object: this view is not correct, because the isolation of the soul does not come about from seeing Nature. For, the preceptor who considers Īśvara to be the cause of the world says, 'the soul ignorant and separated from Nature contents itself with joys and sorrows; Īśvara alone can send it to heaven or hell'. Because of this, Nature (?)<sup>13</sup> cannot be liberated even when the soul has seen Nature. The subtleness of Nature cannot be proved." Then commences the discussion of Īśvara etc. It is too much to say that there is nothing unnatural or out-of-the-way in the discussion of these topics. But, as Paramārtha introduces them, they seem far less unnatural. In any case it allows us to suspect a slip of the pen on the part of some early commentator instead of attaching a verse upon Īśvara-Kṛṣṇa. The relative merits of the two hypotheses—supplying a lost *kārikā* or cutting out some possibly spurious ones—will have to be examined later in some detail. But there is no doubt of the fact that Paramārtha's version of the commentary on verse 61 makes much better sense than the *Māṭhara-Īṣṭi*, which is claimed to be the original thereof.

13. This looks absurd, as it stands, for it is not Nature that is liberated. Is it a slip on the part of M. Takakusu?

# \*MADHYAMĀRTHASAṄGRAHA OF BHĀVAVIVEKA.

(Restored from the Tibetan Version with an English Translation.)

BY

PANDIT N. AYYASWAMI SASTRI, LECTURER IN SANSKRIT,  
*Ayurvedic College, Mylapore, Madras.*

The Madhyamārthasaṅgraha which is ascribed to Ācārya Bhavya Viveka (legs-ldan-hbyed) or popularly known as Bhāva Viveka by Tibetan translators is a short treatise consisting only of 11 *anuṣṭup* verses on the nature of the Double Truth as accepted in the Mādhyamika system of Buddhist philosophy. I have not been able to get any evidence other than the colophon of the work itself to attribute this work to Bhāva Viveka and until the contrary is proved we may regard him as the author. In his work, the author has presented in a nut-shell the nature of the two realities *viz.*, the *empirical* and the *absolute* (*saṃvṛti* and *paramārtha satyas*) with their classifications. The Satya Siddhi School founded by Harivarman, which constitutes the stage of a transition between Hīnayānism and Mahāyānism<sup>1</sup> was the first to introduce into Buddhist philosophy the doctrine of the Double Truths.<sup>2</sup> Nāgārjuna, the first to systematise the Mādhyamika School, insists that these twofold truths are very important and without knowing them one cannot realise the deep real import of Buddha's teachings:—

येऽनयोर्न विजानन्ति विभागं सत्ययोर्द्वयोः ।

ते तत्त्वं न विजानन्ति गम्भीरं बुद्धशासने ॥

(Nāgārjuna's Mādhyamika Kārikā XXIV. 9).

In the present treatise Bhāva Viveka has done the classification (*vibhāga*) hinted in the above Kārikā. The same has been done

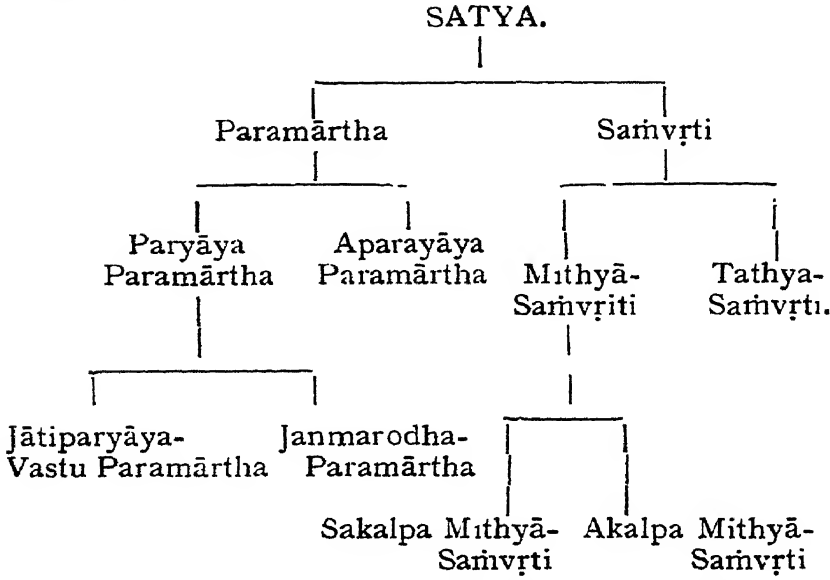

---

\* Submitted to the sixth All-India Oriental Conference, Patna—1930.

1. Yamakami Sogen : System of Buddhist Thought p. 173 (1912).

2. P. L. Vaidya : Aryadeva et son Catuh Sataka. Introduction page 19 (Paris, 1923).

by Candrakīrti in his *Madhyamakāvatāra* which will be taken into account later on for comparison. This table below will explain the classification of Truth made in the *Madhyamārtha-saṅgraha*:—

Now *Bhāva Viveka* asserts that the category of *aparyāya paramārtha* in the above Table represents the absolute reality, which cannot be specified (*aparyāya*) and explaining it, says in verse No. 6 that it is above every possible determination (*sarva-prapañcavarjita*) and it is neither existent nor non-existent, nor both at once, nor neither. This kind of explanation of the *absolute* reminds us of the well-known credo of the *Mādhyamikas*:—

न सत्तासन्न सदसन्न चाप्यनुभयात्मकम् ।

चतुष्कोटिविनिर्मुक्तं तत्त्वं माध्यमिका विदुः ॥

a verse attributed to Ācārya Sarahapāda by the compiler of the *Subhāṣitasāṅgraha*.

*Paryāya paramārtha* (the absolute that can be specified) our author subdivides into *jāti paryāya vastu paramārtha* (the absolute that can be specified as a kind of *Jāti* = *Kārya*<sup>1</sup> = production and the *janmarodha paramārtha* (the absolute which is the complete extinction of all manifestations). As no light is thrown

1. Compare the *Laṅkāvatāra-Sūtra* (Kyota, 1928) p. 186. Verse 72.  
कार्यकारणदुर्दृष्ट्या सर्वे तीर्थ्या विमोहिताः ।

अतस्तेषां न मोक्षोऽस्ति सदसत्पक्षवादिनाम् ॥

by the author on the former, he seems to have included in it the views of the Tīrthikas such as Sāṅkhyas etc.

Bhavya explains *janmarodha paramārtha* by saying that (the Hīnayānists maintain that) the visible world is produced out of four conditions (*pratyayas*) and has the four limits<sup>1</sup> (*koṭi*) viz., (1) Birth and Death (2) Immortality and Annihilation, (3) Existence and Non-existence, (4) Phenomenon and Voidness, and that the extinction of its manifestation is the absolute truth. Nāgārjuna tells us that these four conditions are the following:—*hetu*, *ālambana*, *anantara*, and *adhipati*.<sup>2</sup> This classification into four varieties of conditions, we are told<sup>3</sup>, belongs to Sarvāsti-Vāda School of Hīnayāna Buddhism and its followers are characterised as co-religionists<sup>4</sup> (*svayūthyas*) by Bhāva Viveka and Candrakīrti. The central conception of the absolute in the schools of early Buddhism e.g., the Sarvāsti-Vāda School, is that "When all manifestations are stopped all forces extinct, remains the lifeless residue. It is impersonal, eternal death, and it is a separate element, a reality, the reality of the elements in their lifeless condition."<sup>5</sup> But the Sautrāntikas, on the contrary, denying the lifeless substance of Nirvāṇa maintain that "It is the absolute end of manifestations, the end of passion and life (*kleśajanmanoh kṣaya*) without any positive counterpart"<sup>6</sup>. It is, therefore, possible that Bhavya brings under the category of *janmarodha paramārtha* the views of the Sarvāsti-Vādins and those of Sautrāntikas.

*Samvṛti satya* (empirical truth) the author defines as the world as it appears to our eyes. This is again divided into empirical truth which is real (*tathya samvṛti* = T. S.) and empirical truth which is unreal (*mithyā samvṛti* = M. S.). T. S. is confined to those worldly objects which are capable of producing useful results. M. S. refers to those apparent objects which are incapable of being useful. This is again divided into *sakalpa* M. S. and *akalpa* M. S. *Sakalpa* according to the author

1. Śaracchandra Das, Tibetan Dictionary, p. 968.

2. Mādhyamika Kārikā. I. 2. (B. B. IV).

3. Th. Stcherbatsky : Buddhist Nirvāṇa. p. 194. n. 6. (Leningrad, 1927).

4. Prajñāpradīpa, p. 24. (B. I.) and Prasannapadā, p. 76 n. (B. B IV).

5. Th. Stcherbatsky, op. cit. p. 27.

6. *Ibid.* p. 29.

is the misapprehension of a snake in the rope (lying in the dark) while *akalpa* signifies the perception of double moon (in the sky by a man suffering from an eye disease). It must be admitted that the criterion on which such a distinction has been drawn by the author is difficult to explain satisfactorily. This much can, however, be said that in the former case the mistaken notion of a snake in a rope is considered to be *sakalpa* M. S., because it imposes the attributes of a snake which are absent there on the existing rope on account of some similarity between the snake and the rope; while in the latter case, the perception of double moon in the sky is called *Akalpa* M. S. because no imposition of anything that is absent is made on the existing moon, as in the former case, but simply a second moon is imagined.

In fine, Bhavya winds up his classification saying that all the truths can be condensed into two broad heads referred to above.

It is interesting to compare this classification with that of *Candrakīrti* in *Madhyamakāvatāra*<sup>1</sup>. According to him the absolute truth is only of one kind<sup>2</sup> and cognisable only by those who have right knowledge (*samyagdrśa*). The empirical truth is what ordinary people (*prthagjana*) think of. Since there is a distinction between the ordinary men of perfect sense-organs (*susthendriya*) and those of defective sense organs (*duṣṭhendriya*), he makes a similar distinction in the sphere of their knowledge. The sphere of knowledge relating to the laymen with perfect sense organs, *Candrakīrti* calls empirical truth of the world (*loka saṃvṛti*) or sound empirical truth *samyak saṃvṛti*, because it is true so far as the worldly affairs are concerned. But of the ordinary people with defective sense-organs, the cognitive activities, such as perception of hair in the sky and of the water in the mirage etc., are untrue even with regard to worldly affairs and so they go by the name of unworldly or unreal empirical truth (*aloka* or *mithyāsaṃvṛti*). It is worthy of note that among the conditions (*pratyaya*) of defects of sense-organs (*indriyopaghāta*) he includes the thesis (*siddhānta*) established by the unwise (*asat*) and fallacious inferences

1. Chapter VI. 23 and the following (B. B. IX) and the restored Sanskrit text of the 6th Chapter (in course of publication in the Madras Oriental Series No. 4, as a supplement to the Journal of Oriental Research, Madras, Vol. III, Part 4).

2. *Madhyamakāvatāra*, p. 119, L. 16.

(*anumānābhāsa*) and so on. Then speaking of examples of *aloka-saṃvṛti* in verse No. 26, he says that whatever is constructed by Tīrthikas being influenced by slumber of ignorance (*ajñāna middha*) according to their caprice and whatever is imagined in the mirage (by fools) are not at all true even from the wordly standpoint of view and therefore are illusory. We learn from his Bhāṣya thereon that the Tīrthikas referred to are Sāṅkhyas and others. It is not, however, easily ascertainable as to who are alluded to by Candrakīrti while using the term *anumānābhāsa* along with the conditions of defects relating to the mind. Probably he alludes there to the *svatantrānumāna* School of Mādhyamikas expounded by Bhāva Viveka whom he violently attacks in his Prasannapadā very often on the score that all the *anumānas* set forth by Bhavya to establish the absolute prove fallacious.

It is evident, anyhow, that Candrakīrti classifies *saṃvṛti satya* into two :—*tathya-saṃvṛti* and *mithyā-saṃvṛti* and brings under the latter category the views of the unwise (*asat* = Tīrthikas) which Bhavya includes probably in the category of *jātiparyāyavastu paramārtha* and that the *mithyā-saṃvṛti* is not brought into two classes again as is done by Bhavya in the present treatise. Now the question naturally arises as to the category in which the co-religionists, viz., Hīnayānists and Vijñānavādins<sup>1</sup> have been placed in this classification. Candrakīrti boldly asserts that all the Vādas of *ālaya-vijñāna*, *puṭgala*, 5 *skandhas*, and 18 *dhātus* are intentionally introduced by Buddha only as a means of realising the undefinable absolute (*anākṣara-tattva*) by the ordinary folk. It is to be finally pointed out from the above comparison that Candrakīrti betrays his fervent Buddhist faith by a categorical denial of even worldly reality to the Tīrthika views, whereas Bhavya is liberal in bringing them under the *absolute*.

For the Tibetan, I have made use of the Narthang Edition in the Śāntiniketan and Adyar Libraries. A copy of this was kindly sent to me by the General Secretary of the Asiatic Society of Bengal duly corrected after comparison with a more legible Narthang Edition accessible to him. The original Sanskrit text of the Madhyamārtthasaṅgraha has unfortunately been lost to us as is the case with many similar ancient Sanskrit works on Buddhist philosophy, and my humble effort has been to restore

1. *Ibid.* VI. 43.

from the Tibetan translation, the original in Sanskrit, as set forth below.

### ENGLISH TRANSLATION.

I offer my eternal salutations to those Buddhas (Jinas) who, although they have realised the truth of *anutpatti* (of *dharma*s), appeared in thousands of the empirical existences in this world through commiseration towards worldly affairs and who, even then, retained the pure wisdom.

I commence the teaching of the *dharma*s expounded by Buddhas to make known to the world the Double Truths in their real connotation.

Truths, in brief, are twofold *viz.*, empirical and absolute (*saṃvṛti* and *paramārtha*). The absolute is above expression.

It is divided as the Absolute that can be specified (*ṣaryāya*) and the Absolute which cannot be so specified (*aṣaryāya*). The former is again divided into *jāti ṣaryāya vastu paramārtha* (The absolute that can be specified as a kind of *jāti* = Production) and *janmarodha paramārtha* (The absolute which is the complete extinction of all manifestations). The visible world is produced out of four conditions (*ṣratyaya*) and has four limits (*koṭi*) viz., birth, death etc. and the complete extinction of it is called *janmarodha*. The *real absolute* (in the author's opinion) is above every possible determination and it is neither existent nor non-existent, (nor both at once, nor neither).

*Samvṛti* (empirical Truth) is what appears to our eyes. It is divided into real (*tathya*) and unreal (*mithyā*). The former is (confined to) those worldly objects which are capable of producing useful results and the latter refers to those apparent objects which are incapable of being useful. *Mithyā samvṛti* is again divided into *sakalpā* and *akalpā*. The former is (when) a misapprehension (arises) of a snake in a rope (lying in the dark), and the perception of a double moon (in the sky by a person suffering from eye-disease) constitutes the latter.

Thus, all the truth, in brief, is, therefore, taught as divided into two classes as said above. Having understood this teaching, one obtains all prosperity. May the summary of the essential principles of Mādhyaṃika system made by me procure to all beings what they desire.

---

# DATE OF MURAŅCIYŪR MUṬINĀKARĀYAR.

BY

DR. P. S. SUBRAHMANYA SASTRI, M.A., L.T.,

*Assistant Editor, Tamil Lexicon, University of Madras.*

*Murañciyū* *Muṭinākarāyar* is the author of the second stanza in *Puṇanūpūri*, one of the eight ancient anthologies in Tamil Literature. He blesses the Cēra king *Peruñcōṟṟutiyañ-cēralātan* with long life along with his able and sincere counselors unthwarted like the Himalayas and the Mt. Potiyil where the deer warm themselves with their young ones at the fire-triad on which *Agnihotra* is performed by Brāhmins both morning and evening. Before wishing him long life he refers to him as forgiving in nature as the earth, wide in his counsel as the sky, strong as the wind, fierce as the fire and sweet in his grace as the water, and to the vastness and fertility of his kingdom.

It is worth noting that, in this stanza, mention is made of the four Vedas<sup>1</sup>, the fire-triad<sup>2</sup>, and the debt<sup>3</sup> (to gods) in the shape of *Agnihotra*.

This *Muṭinākarāyar* is mentioned to have been one of the poets of the First Sangam by *Nakkīraṇār* in his commentary under the first sūtra of *Iṟaiyaṇār-Akaṇṇorūl*.

But the expression 'nī.....nīliyar' found in this second stanza of *Puṇanūpūri* stands against that conclusion. For the word *nīliyar* which means 'may live long' is in the potential mood (*viyañkōl*) and has here for its subject 'nī' (the second personal pronoun singular). *Tolkāppiyaṇār*, the author of *Tolkāppiyam*, (the earliest extant grammar of the Tamil language) who is mentioned by the same *Nakkīraṇār* to have lived in the Middle Sangam period definitely states that a verb in the potential

---

(1) *Vāḍal vētanerī*.

(2) *Muttī*.

(3) *Kāṭṭin*: cf. *Jāyamāno vāi brāhmaṇas tribhīr ṛṇavā jāyate, brahmacāryeṇa ṛṣibhyo yajñena devebhyah prajayā pitṛbhyah* (*Taittirīya-Samhitā*, 6).

mood cannot have for its subject either *the first personal pronouns* or *the second personal pronouns*<sup>1</sup>; while the author of *Naṇṇūl* who lived much later states that such a verb can have for its subject *all kinds of nouns and pronouns*<sup>2</sup>. This clearly shows that the use of *viyaṅkōḷ* verb with the first and the second personal pronoun for its subject was a later development. If so, Muṭinākarāyar should have lived later than Tolkāppiyaṇār. If it is a fact that the latter lived during the Middle Sangam, the former could not have lived during the First Sangam.

# GRAMMATICAL METAMORPHOSIS OF THE TAMIL NOUNS KAṬAI, VAYIN AND KĀLAI.

BY

DR. P. S. SUBRAHMANYA SASTRI, M.A., L.T.,

*Assistant Editor, Tamil Lexicon, University of Madras.*

The words *kaṭai*, *vayin*, and *kālai* were originally nouns, the first two denoting place and the last denoting time. Eventually they have become the seventh case-suffixes if they follow nouns and verbal participial suffixes if they follow relative participles. The process through which such a metamorphosis has come may be learnt from an examination of the following expressions:—

A.

- (1) மூன்றலங்கடையே  
Mūṇralaṅ-kaṭaiyē (Tol. Eḷut. 1 and 62).<sup>1</sup>
- (2) ரழவலங்கடையே  
Ra-la-valaṅ-kaṭaiyē (*ibid.* 30).
- (3) நவ்வலங்கடையே  
Na-v-valaṅ-kaṭaiyē (*ibid.* 72).
- (4) இயையாக்கடை  
Iyaiyā-k-kaṭai (Kuraḷ, 230).

B.

- (1) மொழிவயினான  
Moli-vayin-āṇa (Tol. Eḷut. 57, 143, 417).
- (2) ஆவயினான  
Ā-vayin-āṇa (*ibid.* 148, 200, 240, 284, 292, 296, 315, 320, 438).
- (3) பொருள்வயினான  
Poruḷ-vayin-āṇa (*ibid.* 481; Tol. Col. 95, 100).<sup>2</sup>
- (4) வயின்றொறும்  
Vayin-roṟum (Perum. 133)<sup>3</sup>.
- (5) வயின் வயிற்பெறுகுவிர்  
Vayin-vayir perukuvir (Ciṟu. 163)<sup>4</sup>.

---

1. Tol. = Tolkāppiyam ; Eḷut. = Eḷuttatikāram.

2. Col. = Collatikāram.

(9) செருக்கொடு நின்ற கலை  
Cerukkoṭu niṇṇa kālai (Porunar. 89).

In the first *three* examples of *A*, *kaṭai* means 'place' and is a noun, since it cannot be the seventh case-suffix after 'al' the negative particle.<sup>2</sup> The expressions *mūṇṇalaṅkaṭaiyē*, *raḷavalaṅkaṭaiyē* and *naṇvavalaṅkaṭaiyē* respectively mean 'in places other than the three', 'in places other than *r* and *ḷ*', and 'in places other than *u*.' One may doubt how the word *kaṭai* is construed as a noun in the seventh case in the absence of the seventh case-suffix. The answer is that the seventh and the second case-suffixes may be dropped in nouns even though such nouns come after the verbs which they qualify<sup>3</sup>. Hence in all the above cases the seventh case-suffix *kaṇ* is understood. The same is the case with 'iyaiyū-k-kaṭai' in *A* (4). *Iyaiyū-k-kaṭai* stands for *iyaiyū-k-kaṭai-k-kaṇ* where *kaṭai* is a noun denoting place and

1. Porunar. = Porunar-āṇru-p-paṭai.

2. 'am' in *al-aṅkaṭaiyē* is only a *cāriyai*.

3. *Aiyuṅ kaṇṇu m-allō-p poruḷ-vayin*  
*Mey-y-urupu tokūa v-iṇṇu y-āṇa*. (Tol. Col. 105).

has its seventh case-suffix dropped. But later on it seems that this rule was not paid due attention and the word 'kaṭai' itself was construed as the seventh case-suffix if it followed a noun<sup>1</sup> and a suffix of the verbal participle if it followed a relative participle<sup>2</sup>.

The same is the case with the word 'vayin'. In examples 1 to 3 under B it is clear that it is a noun since it is followed by the case-suffix *āṇ*. It must be noted here that *āṇ*, though an instrumental suffix, is used in the locative sense. In the examples 4 and 5 *vayin* is evidently a noun since the expression *vayin-rorum* and *vayin-vayin* means in every place. In the examples 'nyartinaṭ-t-tokai-vayin' and 'poruḷ-vayin', it is evident that *kaṇ*, the locative suffix has been dropped; but now the word *vayin* is taken to be the locative suffix since it follows the noun *tokai*.

The noun 'kālai' has the same history. In examples 1 to 3 under C, *kālai* is evidently a noun denoting time since it is followed by the case-suffix *āṇ*. The same is the case in example 4 since it forms the second member of the compound *paṇṇil-kālai* which means 'the occasion when good character was absent.' But in examples 5 to 9 under C the locative suffix *kaṇ* is evidently understood after *kālai*. In that case the words *teriyum*, *varum*, *tōṇrum* and *niṇṇa* are all relative participles qualifying the word *kālai* which stands for *kālai-k-kaṇ*. But now *teriyuṇkālai* etc. are taken only as verbal participles meaning *teriyuṇṇolūtū* etc. It seems that such a method of interpreting a relative participle followed by a noun in the seventh case with the case-suffix being understood, as a verbal participle was in existence even at the time of Tolkāppiaṇār<sup>1</sup>.

Hence the words *kaṭai*, *vayin* and *kālai* and similar words denoting place and time are now construed as the locative suffixes if they follow nouns and as the verbal participial suffixes if they follow relative participles, both the relative participle and such a noun together becoming a verbal participle, while originally they should have been nouns.

# ANCIENT BHṚGUS.

BY

A. PADMANABHAYYA, PLEADER, TIRUPATI.

## CHAPTER I.

### INTRODUCTORY:—

No word of apology is necessary to justify the claim of an account of the ancient Bhṛgus or Bhārgava sages—seers and singers *par excellence* upon the valuable time of the readers of this thesis.

The claim of this ancient mythical and mystic race upon the attention of the learned public arises primarily from the fact of their intricate and interesting connection with the early history and culture of all ancient civilized races—both Semitic and Āryan—a division which is purely conventional from the point of view of early culture. From a close study of the 10th Chapter of the book of Genesis of the Bible, the reader must find that the distinction is more apparent than real. Sumerian, the Phœnician and the Hittite are often a stumbling block.

The famous account of the excavations in the Sindh valley, of Sir John Marshall followed by an account of the ancient Asuras of our Literature by Mr. Banerjee Sastri, impels me to urge on the attention of scholars not only the claims of the Ancient Asuras, but also of their priests and seers, the ancient Bhṛgus—whose accounts abound in our Vedas, Epics and Purāṇic literature.

The Bhṛgus supply the connecting link between the Semitic and the Āryan element. Their account unravels many points of comparative mythology, religion and philology. In fact—the “Bhṛgu” will supply the key to understand many of the underlying strata of the early civilisation of the world, unearthed by the labours of Western Scholars in ancient Aegean area, Mesopotamia, Egypt and Persia. We shall also be in a position to understand many of the missing links in the chain of connec-

tion between the old pre-Āryan or proto-Āryan religion and the various religious beliefs of North and South India and their intimate connection with the culture and religion of ancient Iran.

Ragozin, in his *Vedic India*, shows the intimate relationship between the Dekhan and the Chaldean country and urges the theory of the conquest of Northern India by the Dravidians or the Turanian race, and their eventual entry into the Dekhan along with the Kolarians. But that scholar did not consider who these Dravidians are, and how they were related to the Āryans or the Iranians and does not assign to them any definite place among the Āryan or Semetic races.

Some historians indefinitely class these early Dravidians along with the *Dasyus* and aboriginal races—all with a view to give the later Āryan a greater prominence. The Dravidian races represent the pre-Āryan Iranian people and they are closely related to the ancient Asuras—a forgotten name. Remnants of its greatness being preserved, internal evidence in our sacred literature reveals to us their existence, and their once world-wide importance. These Dravidians are the first civilized race to enter our country by the sea along with the Asura Yadus and Ikṣvākus and the evidence of our literature identifies them with the ancient Bhṛgu—thus making possible, from the point of view of South Indian history, the equation Draviḍa = Asura = Bhṛgu. We shall try to amplify this equation by reference to the history of countries outside India in the sequel. The amplified equation will be Asura-Bhṛgu-Dravidia-Pelasgian-Phygian-Hittite Phoenician-Greek-Etruscan-Latin-Frank.

## CHAPTER II

### SOUTH INDIA.

The Bhṛgu in India, may now be said to present all the South Indian races placed under the common designation of *Agnikulas*. They are the Śātavāhanas, the Vākātakas, Kohls, the Ikṣvākus, the Nāgas, Kadambas, Pallavas, the Colas, Pāṇḍyas, Keralas and the Caḷūkyas who rose to prominence at some stage or other of South Indian History till the 12th Century A. D.

Fire is the God of the Bhṛgu, and Brahmā is their ancestor. This ancestry is not only apparent from the account of the Bhṛgu in the Epics but also from the inscriptions giving the genealogy of these races—particularly from the suffix *Varman*

appended to the names of the Kings of these races—which means nothing more than-Brahmā or fire.

The west coast of South India—is according to traditional account, the land carved out of the sea by Paraśurāma the noblest scion of the race. The Bhṛgus entered South India by the west coast. The traditional era Kollam in the Malabar country, accounts of many an ancient shrine in South India and traditional folklore, all point to the wanderings of this race throughout the length and breadth of South India from the banks of Narmadā to Kanyā Kumārī.

The Chief sources of our knowledge of the Bhṛgus are (1) Ṛg Veda (2) Atharva Veda (3) Purāṇas—particularly the Viṣṇu, Bhāgavata, Matsya and Kūrma (4) the Rāmāyaṇa (5) and the Mahā-Bhārata. The Bhṛgus are the collectors of a major portion of the Ṛg Veda; the Atharva is purely their own lore. The Viṣṇu-Purāṇa and the two epics, from the evidence in these works themselves, owe their compilation to this mystic race. External evidence is to be sought for in the histories of the Hittites, Medo-Persians, Etruscans and Latins, Greeks and pre-Greek races, and the races of the Aegean area, Asia Minor, Egypt, Palestine, Syria, Mesopotamia, Afghanistan and Baluchistan.

### III.

What is the cradle of this race? What is their connection with the Dravidian race?

The Ṛg Veda is the earliest relic of ancient Āryan literature. There are statements in that Veda which declare the existence of earlier traditions. According to the opinion of competent scholars, many portions of the Atharva Veda are even earlier than the Ṛg Veda. These statements lead us to the belief of the existence of a time, when the Āryan and the proto-Āryan were one—whatever that term may mean for the present.

The Purāṇas are the collections of the layman's learning or folklore and they must be Sanskritised versions of pre-Sanskrit accounts as borne out by the statement in the Matsya-Purāṇa—that the first branch of knowledge which emanated from Brahmā is the Purāṇa and this Purāṇa is the Ādi Brahmāṇḍa Purāṇa of which the Viṣṇu or Parāśarasamhitā is a redaction. The two epics, from their internal evidence, at their inception owe their origin to the inspiration given to their authors by Brahmā and their reputed authors are Bhārgavas. It is from the Purāṇas and

the epics therefore that we must expect to get a full account of their compilers.

Before dealing, therefore, with the Vedic and other evidence we shall deal with the Purāṇic evidence and try to trace the cradle of the race.

The Purāṇas, deal with the geography of what are called the seven Dvīpas. To understand the history of the Bhṛguś, we must locate some of these Dvīpas and among these Dvīpas, Plakṣa Kuśa Dvīpas—Śālmali and Krauñca show evident traces of their activities. The Kuśa Dvīpa and a portion of Plakṣa is their original cradle.

According to the Kūrma Purāṇa the Brahman, or, the first caste of the Kuśa Dvīpa are worshippers of Brahmā and are called Dravidians. Let us, therefore, try to locate the Kuśa Dvīpa first.

According to Ragozin<sup>1</sup> the Dravidians are Nāgas, worshippers of the sacred serpent, the symbol of the earth. According to Professor Monier Williams<sup>2</sup> the Dravidians or Dravidian races came from Central Asia, and their language shows they were Turanians. They are the Vrātya or out-caste Kṣattriyas. We have thus to find out what is this Nāga country and who are these Vrātyas. Vrātya, like Asura, assumed a degraded meaning only in later literature.

#### IV

#### KUŚA-DVĪPA.

In spite of the elusive nature of the ethnological details given for this Dvīpa in the various Purāṇas, there are sufficient materials whereon we could depend, and identify the same with portions of modern Persia. There is a remnant of the name of this Dvīpa preserved in the modern province of Kuzistan, on the Persian gulf. That it formed part of Modern Persia and extended therefrom as far as the Western limits of Baluchistan admits of no doubt.

Kuzistan is the ancient land of Elam—a country which played a very prominent part in the early annals of Babylon Chaldaea. It is in this country that Herodotus places the original cradle of the Phœnician race, and the Phœnicians are the

---

1. Vedic India, page, 308.

2. Indian Wisdom—page 312 note.

ancient Ikṣvākus whose connection with the Vāsiṣṭhas a branch of the Bhr̥gus is apparent from the Purāṇas and the Epics. The Bhr̥gus and Vāsiṣṭhas are descendants of Varuṇa and it is in Elam we have to locate Varuṇa, the Asura *par excellence*, the first God to whom worship was being paid by the proto-Āryans. More will be said about this later on. Suffice it to say for the present that Sushan, capital of Elam, is the city of Varuṇa according to the Matsya Purāṇa.

“सुषा नाम पुरी रम्या वरुणस्यापि धीमतः ।”

There is also an Elamite God referred to in one of the sculptural representations by Mr. C. W. Johns in his book on Babylon. A God catching his enemies in a net and beating them with a club reminds us of Varuṇa and his noose.

According to the Viṣṇu Purāṇa the island is so called from a clump of Kuśa grass situated in the island. The people are worshippers of Brahmā which is the same as fire or Īśāna as indicated by the other Purāṇas. The residents of Plakṣa and Puṣkara are also worshippers of Brahmā, and it appears to me that the scheme of the seven Dvīpas mentioned in the Purāṇas represents the ancient Scheme of Zoroaster and Ahurmazda—viz., the seven divisions of light peopled by those who follow the teaching of Ormuzd. The names of Kings and their sons are mostly names of the Fire God, Brahmā; the fire God, or, the Atharvan of the Bhr̥gus, is the Atar of the Zoroastrians Cyavana Bhārgava is the special protegee of the Aśvins. His descendants—the Raivatas founded Kuśasthalī (later Dvārakā) on the west coast of India. Very early Zoroaster is referred to by Berosus as one of the earliest Kings of Babylon and Ahurmazda of Zoroaster is probably the Mada Asura raised by Cyavana to fight Indra in the struggle to give the Aśvins a share in the Soma drink.

Triśaṅku is one of the earliest Ikṣvāku Kings according to the Purāṇas. Purāṇic accounts mention a Manu Priyavrata, or, Satyavrata, a Draviḍeśvara, as a hero of the flood. Triśaṅku is also known as Satyavrata and he is Tissanki mentioned in the accounts of the Hittites, as Tissenki or King of Paraśu or Persia in one of the earliest list of Hittite Kings<sup>1</sup>. The God of the flood according to the account in the Mahābhārata Vanaparva is Brahmā—the God of the Bhr̥gus. From a comparison of the

---

1. J. R. A. S. 1928 April A. H. Sayce.

flood account as given in the Indian, Persian and Babylonian accounts, one is certainly led to infer that the three accounts refer to the adventures of one and the same hero a Dravidian or Asura emperor, a protegee of Brahmā or Varuṇā the God of the Asuras. Sayce places the cradle of the Hittites in a land which he calls Kussara.

According to the Persian account, the great flood took place during the times of the mythical Jamgid (Djemshed). According to the Babylonian account, the hero of the flood is Sit Napistam in whom we may trace Yama or Yima or Engid the first mortal to be immortalised—Vaivasvata Manu. The Bhṛgu Jamadagni is a descendant of this hero. In fact the genealogy of the Bhṛgus as given in the Mahā-Bhārata includes Manu and Jamadagni in the list.<sup>1</sup> Paraśurāma, the last hero of the list is closely connected with Syamantapañcaka—the later Kurukṣetra. The ruby Syamanta connected with Śrī Kṛṣṇa and Satrajit is known in the Persian accounts as the Ruby of Shamshid and it may be Jamgid.

The Kuśikas and Bhṛgus are closely allied races and they are related to the Ikṣvākus in more than one respect. The designation of this island is said to be due to a clump of Kuśa grass found in the island. Kuśa is holy grass. Scholars impute the name of the island to the tribe of Susians and Cuthites. The Purāṇic writer had in his mind, the clump of sacred grass used in sacrifices to the fire God Brahmā. This grass is called in Persian history Baresma. The ancient land of Elam, is the home of the Phœnicians the sons of Cush and also of the Ikṣvākus, particularly of the line in which Rājārṣi Janaka was born. A clump of Kuśa grass is the symbol of a brother of this Janaka known as Kuśadhvaṇi. Rama's eldest son is called Kuśa from his maternal line. He was brought up by Vālmīki who is Kuśin. The Elamite Eri Aku is Āryaka, the ancestor of Kuntī, mother of Pāṇḍavas and her Nāga ancestry is apparent from the account of Bhīma and Pātāla in the Mahā-Bhārata.<sup>2</sup> The patron of Kuntī is Durvāsas, who is called *Kusaarani*. All the Kuru names in the Maha-Bhārata are mostly names of Nāgas and Nāga Kings and the account of the Bhārata is merely a traditional internecine struggle of Nāga and allied races in the

---

1. See Ch. 66 Adi Parva, Ch. 15 Vanaparva.

2. Adi. Ch. 128.

ancient land of Elam and Pātāla the kingdom of Vāsuki, and Śeṣa, the Nāga *par excellence*.

Another important race of this island are the Kuśikas—descendants of Gādhi and Viśvāmitra. The Kuśikas are admittedly related to the Bhr̥gus through Satyavatī, the daughter of Gādhi married to Bhārgava Ṛcika.

We shall next proceed to an account of the Plakṣa and after fixing the cradle proceed to the dispersion of this race towards the east and west and incidentally consider an account of Śālmali, and Krauñca Dvīpas and the colonies of the Kuśa Dvīpa.

## V

### PLAKṢA-DVĪPA.

According to the Viṣṇu-Purāṇa, this Dvīpa is named after a Plakṣa or holy Fig tree sacred to Brahmā—evidently a totem tree of the races residing therein. Medhātithi is the King of the country. Medhatithi is the son of Āṅgīrasa-Kaṇva. The details given in the Purāṇa give us sufficient data to identify the island of Plakṣa with the western portion of modern Persia, to the north of Kusistan as far as the middle of Trans-Caucasian country.

According to some other Purāṇas followed by Professor Dawson in his dictionary of Hindu mythology, the name for this land is Gomedha. It is also known as Śveta-Dvīpa according to the geographical account given in the Bhīṣma-Parva of the Mahā-Bhārata.

From Plakṣa proceeded the Bhr̥gu Phrygian and the Pelasgian. Pre-Greek Pelasgian is traceable to Plakṣa and not *vice versa*.

Now about the identity. The seven districts of the island as given in the Viṣṇu-Purāṇa are—

1. Śāntabhavya.
2. Sukhodaya.
3. Ānanda.
4. Śiva.
5. Kṣemaka.
6. Śīśira.
7. Dhruva.

Among these districts—Kṣemaka appears to be clearly ascertainable. Śema or Kṣemaka lies in Trans-Caucasia, where one Śemaka is the capital of the Khanat of Shirwan, and was known

to Ptolemy as Kamachia. Śiva is probably referable to a district of which Śivas (Sebastum) was probably the centre, situated on the river Kizil Irmak (ancient Halys). Dhruva is Troas. According to Lempriere's classical dictionary "Troas when taken for the whole Kingdom of Priam, may be said to contain Mysia and Phrygia Minor". The connection of Troas with Plakṣa-Dvīpa and the Bhṛguś will be traced hereafter through Phrygia and the Phrygians. Śīśira is traceable to the city of Kaisiriyeh capital of Capadocia, within 20 miles of which passes, the river Halys, or Kizil Irmuk. Among the rivers mentioned Amṛta is the river Sefid Rud falling into the Caspian sea. It is also called Amenda. The division Amenda is called after the ancient city of Anti<sup>1</sup> and appears also to be referable to the Goddess Amendph worshipped there. Amendph is a name of Ishtar. The river Śikhī is the upper portion of the river Tigris. Sukhodaya is the country of the tribe Sukhī mentioned in Assyrian history. The Bhāgavata Purāṇa mentions Śāntabhavya as situated in two parts. Nahvada shown therein is the country of Nahrain and Somaka is in the division shown in modern maps to the west of the Caspian Sea.

Now to come to the names Gomedha and Kumuda and Śweta as applied in whole or in part to this Dvīpa. The country of Gomedha is mentioned in the history of the ancient Assyrians. We read in the pages of the Historian's History of the World Mesopotamia page 375 "His son Shalmanesar about 1300 B. C. was one of the mightiest Assyrian Kings. He ruled over Mesopotamia westward to the Belikh at least if not to the Euphrates and assured to Assyria, the possession of northern tract between the Euphrates and the Tigris which was afterwards the province of "Gumathene" and "Sophene". One of the heroes of the famous Argonautic expedition is Cometes from whom probably the name Gometes or Cometes is derived. This tract in thus part of the ancient Median country conquered by the Assyrian Monarch from Media. Gomedha is Surabhi and the Kalpa tree and that is why probably the Fig tree is called the Fig of the Cow or Gomedha.

My idea is that Media is called after this Medi or Plakṣa—the Fig Tree. Medi is a Dravidian Telugu word which means a Fig Tree and even to-day there is a variety of the Fig Tree in

---

1. See old map in ruins.

outh India, called Brahma Medi or the Fig Tree of Brahmā. The statement in the Skānda Purāṇa that the (Fig) tree called Gomedha gave the name to the island is perfectly reasonable and after all it is merely a linguistic confusion. There is another Dravidian word for Fig (Atti) to which we have to make reference in the sequel. The Matsya Purāṇa mentions a division of the island called Kumuda. A scholar in the Journal of the Mythic Society finds fault with the Purāṇic writers and says there is confusion between Kumuda and Gomedha. He identifies Kumuda and Gomedha with the Commodorum of the Greeks basing his arguments chiefly on the precious stone Gomedha procured there. Kumuda is according to Matsya-Purāṇa a district of Gomedha, and the Purāṇic writer makes no confusion at all. Kumuda is a lily and northern Sushan, or the lily country, is in the south of Caspian and is a portion of Plakṣa or the Median country. Suṣan in Hebrew means lily. Hebrew, Aramiac, and Dravidian, are all allied languages and Kumuda is Sanskrit of the same. Susiana or Sushan is Kumuda. There are two Suṣans in Medo-Persia and one is only a colony from the other and both are countries of ancient Ikṣvākus who are allied to the Bhṛgus. The same writer in the mythic Journal of the Mythic Society, 1926, derives the word "Plakṣa" from Palasgian and identified the Dvīpa with the country in ancient Greece covered by Epirus, Macedonia, and Thessaly. The learned Scholar does not consider whence the Palasgians entered these countries. The real case is that the Palasgians entered Greece from Plakṣa-Dvīpa and the word Palasgian comes from Plakṣa or the Fig Tree. The descendants of the Palasgians, a race of Fire Worshippers, are brothers in blood to the Bhṛgus and Median Fire Worshippers had also a Fig totem. A Fig tree overshadowed the cave of the ancient founders of Rome in the Wolf's Cave and the great consternation felt when the Tree of Ramulus was destroyed is referred to by a writer of the art on Tree Worship in the Encyclopaedia Britannica, 13th Edition. Nathaniel under the Palasthenian Fig Tree is equally another case in point.

The Fig tree is certainly the totem of the Bhṛgus. The varieties of the *Ficus Religiosa* and *Ficus Indica* are both sacred trees for the Bhṛgus. They are popularly known as Aśvattha and Vāṭa and the names given to them by the lexicographer indicates to us the importance which this tree was wielding over the religious beliefs of the people. We read in the Mahā-Bhārata

Vanaparva, Chapter 115, the importance of these trees. Bhṛgu the father-in-law of Satyavatī directs the mother of Jamadagni to embrace the Udumbara fig tree to beget a religiously inclined son and asks the wife of Gādhi to embrace the Pippal or Aśvattha to beget a heroic son. In our sacred literature the Aśvattha is the tree of the Kṣatriyas and it is only later on it became particularly the Bodhi or the tree of the wisdom of the Buddhist; hence it is later on called also Vipra or the tree of the sage, though it is known as Kṣatriya tree. It is also called Satya namely the tree of the Satī or Kṣatriyas, or Asura Hittites whom the Egyptian records call Satī. It is also called Yakṣāvāsa the abode of the Yakṣas, the followers of Kubera. Yakṣas are Hyksos and their God is Kubera Nara-vāhana. Kubera is Hittite God and it is that God we find represented in the sculptures of Boghazkui Hatti standing on the shoulders of the priests.<sup>1</sup>

The Aśvattha thus represents the virile power of the Universal God and also His Omniscient Wisdom. That is why it is called Pippal. Pippal is traceable to Vipra, a Vedic word meaning "Inspiring". Vipras are a specially inspired people and the Mahā-Bhārata Vana-Parva particularly places the origin of the Vipras on the banks of Devikā, a river in the ancient land of Elam now called Tib.

अथ गच्छेत् राजेन्द्र देविकां लोकविश्रुताम् ।

प्रसूतिर्यत्र विप्राणाम्.....॥

Ancient Elam is thus the land of the Vipras and also of Varuṇa whose capital is Sushan, and who according to the conceptions of all religions,—Bhṛgu-Dravidian-pre-Āryan Medo-Persian, Assyrian, is the highest god. According to the Viṣṇu-Purāṇa, Pulastya is the finest king of Vīranagara on the river Devikā.

Another name for Plakṣa Dvīpa is Śveta or white. This designation is very important as this Purāṇic and Epic name finds ample corroboration in the history of Mesopotamia and the Hittites.

The designation of Śveta given in Ch. 12 of Bhīṣma-Parva of Mahā-Bhārata certainly refers to the ancient Kingdom of

1. See picture at page 112. Hittites. Story of a forgotten empire A. H. Sayce.

Ellipi, with its ancient capital of Ecbatana on the ruins of which arose the later Medo-Persian empire. The Historians' History of the World<sup>1</sup> says "North east of Assyria, and extending to the southern shores of the Caspian was the ancient Kingdom of Ellipi, with its capital Ecbatana, the Achmetha of the Bible. Of its fortunes we get a glimpse now and then in the course of Assyrian history." Now the word Ellipi in Dravidian means white and Śvetha-Dvīpa means, the land of white people. We have a reference to a white people in this country and also in the surrounding country of Cappadocia, whose inhabitants are called by the Greeks, the Leuco-Syri or the white Syrians, and these are admittedly, the ancient Hittites. The Goddess Lakṣmī is worshipped by the Phrygio-Cappadocians under the designation of Ma. She is the same "Bhārgavī"- "Ma" who is believed to have risen out of the sea, like "Apphiodite" and that sea must be the sea of Shirwan or Caspian Sea, later on Sanskritised into Kṣīra-Sāgara or the sea of milk.

It is from this country of Ellipi, probably Lebanon in Palestine is named. Lebanon is the country of Phœnicians, allied to the Hittites, and the Philistines. Lebanon is otherwise known also as Albion or white country, a name later on adopted by the colonists from Ellipi. Rome is alban and Britain is the island of Albion and we find Albania in the Crimean Peninsula.

In the Uttara Rāmāyaṇa we read of Rāvaṇa's defeat at the hands of the women of Śveta-Dvīpa. This land is the country of the Amazons of the Greek writers. This island is, according to the Epic, on the shores of Kṣīrodadhi or the sea of milk. The writer of the Bhāgavata-Purāṇa knew the ancient land of Elam and it is that which he calls Plakṣa. Plakṣa and Kuśa Dvīpas are interrelated and that is why we find one Sushan in the north and another in the south. The Bhāgavata-Purāṇa says that the people in the island of Plakṣa offer sacrifices to Ātman. Now the ancient Elamites<sup>2</sup>, offered worship to Lagamal and Ātman, the secret title of Susinak or Ishunak. Who this God Ātman is and how he is connected with Egypt, another land of Cush, we shall consider under a separate chapter later on. Another word which we have got to consider in connection with the tree totem of the Bhārgus is Atti (ॐ३). *Atys*, *Attis* or *Attes* in the Lydian, and

1. History of Persia, page 585.

2. See E. B. 9th Edition, Art on Elam.

Phrygian mythology is a youth beloved for his beauty by the Goddess Rhea, called there Agdistis. The story as told at Pessinus, the centre of the worship of the goddess, was that by Zeus she gave birth to a being born male and female and that the Gods displeased transformed this being into a tree from the fruit of which the daughter of the River God Sangarius bore a boy who grew up amongst herdsmen, marvellous for his beauty so as to win the love of Agdistis.<sup>1</sup> This account of the transformation of the son of Rhea into a tree is an indication of the worship of this tree totem in ancient Phrygia. This tree represents the male principle of life—as Phallus and is identical with Baal Peor, or Brahmā the Creator.

The holy fig tree is referred to in the Ṛg Veda (I—135-8). The vessels to hold the Soma juice are prepared from it to add virility or power. Mr. P. T. Srinivasa Iyengar in his *Age of the Mantras* at page 127 says “it is the symbol of the Śisna or Fire-drill and corroboration for this is to be found in Mr. Griffith’s *Atharvaṇa Veda*, Book V, Hymn 11, page 250. The beautiful Attys is Agni the young (Tanūnapāt) and Agni according to the literature and traditions of all countries is the producer of life. Fire represents not only individual life or soul but also cosmic or universal soul. The writer of the article on “Fire” in the *Encyclopaedia Britannica* 9th Edition has given a succinct and beautiful resume of all the aspects of the worship of this God and I cannot put the matter better than quoting the learned writers’ words. “For a long time through out all the world, the ancient naturalists who meditated on the greatest wonder of physiology supposed that the generation of fire by the friction of two woods, one of harder and the other of softer substance was the exact counter part of human generation. The heat thus involved was held to be of most subtle nature, a flash of the astral light, an intelligent substance. Primary fire impregnated primary water and the soul was born. Life was compared to a torch and no comparison is more true. Modern chemistry having proved that animal life was a constant burning of oxygen, the ancient myth was not far from truth when it said that Prometheus animated the figure of clay by putting into it a spark of fire. Man was thought to be an alloy of fire, earth, water in slightly different proportions. Fire, a constituent part

---

1. See account of Attys in *Encyclopaedia Britannica* 9th Edition.

of divine creation, became a soul when it was immersed in organic matter; it became the body when it was put into organic clay."

Attys thus represents the principle of generation and is equally the symbol of life and fire. The Atharvan Bhr̥gus are children of fire—the word Atharvan itself can be resolved into Athar-bene child of Athar or fire. In Semitic-Dravidian Ben or Pen means child. Attys thus represents the God Brahmā, the first and foremost ancestor of the Bhr̥gus according to the genealogy given in Chapter 66 of Ādi-Parva of Mahā-Bhārata. The word Attys added as a suffix to personal names in the ancient Lydian country and Phrygia, in the Purāṇic names—means the same thing as *Varmā* added to the names of kings in South India.

Thus far as regards the totem sacred tree of the Bhr̥gus.

The word Atty and Medi-Dravidian in origin must give us the clue to understand the existence of Phallic worship and the worship of the *Yoni* in places outside the country of its origin, viz., Plakṣa-Dvīpa and Kuśa-Dvīpa.

(To be continued.)

## NOTICES AND REVIEWS OF BOOKS.

THE RUKMINIKALYANA MAHAKAVYA OF SRI RAJACUDAMANI  
DĪKSHITA, Edited by the Pandits of the Adyar Library,  
Theosophical Society, Adyar, Madras.

This work, the publication of which has been begun by the Pandits of the Adyar Library, and of which two Sargas have now been printed with the commentary called *Mauktikamālīkā* of Śrī Bālayajñavedeśvara, is well worth perusal by all students of Sanskrit literature. It belongs to that fruitful period of "creative art" in Sanskrit literature, namely, the fifteenth to the seventeenth centuries after Christ close upon the dissolution of the great Vijayanagar Empire. This period witnessed a very healthy revival of Sanskrit learning under the patronage of the Viceroys of the Vijayanagar Empire, who, after the break-up of that Empire, set themselves up as independent rulers at Vellore, Penukonda, Gingee, Tanjore, Madura and other places. The renaissance was an all-round one, and comprised all the fine arts, religion and philosophy. Many were the famous personalities, who were the court poets of the chieftains, the most famous among them being Appayya Dīkṣita, under the patronage of Chinnabomma at Vellore. The author of this work, Rājacūdāmaṇi Dīkṣita, known also as Yajñanārāyaṇa Dīkṣita, lived at the court of king Raghunātha Naick of Tanjore. In the valuable introduction to this work written by Mr. T. R. Chintamani, M.A., now Senior Lecturer, Oriental Research Institute, University of Madras, interesting information is given as regards many other works of this author, his patron, Raghunātha Naick, his ancestry and his family connection with the other famous Dīkṣitas of that period. The date of another of his works known as *Tantraśikhāmaṇi*, a treatise on *Mīmāṃsā*, is said to be 1636 A.D. according to a verse in that work. The work is styled a *Mahākāvya*, and one should naturally expect that it will fulfil all the characteristics of a *Mahākāvya*, as described by *Ālaṅkārikas*. It follows the model of Śrī Harṣa's *Naiṣadhiya*, in manner of treatment and in style. One must admit that the poetry is highly artificial and difficult. However, the author shows himself as a master of the

Sanskrit language and a profound scholar in the Śāstras and in the technique of Sanskrit poetry. Though the first Sarga has 105 Ślokas and the second 73, the story is not carried far. Many works of this period remain unpublished, and the endeavour of the Pandits of the Adyar Library is praiseworthy, especially as they provide easy access for the students of Sanskrit literature to the valuable works of one of the many illustrious poets and philosophers of this period, who, while occupying distinction in temporal affairs, maintained their ideals of Brahminhood, and attained great distinction in philosophy and literature. The printing and get-up leaves nothing to be desired. I would suggest to the Editors that it will be very helpful if they would append short notes in English towards the end of the work.

K. BALASUBRAHMANYA AIYAR.

HISTORY OF PRE-MUSSALMAN INDIA (IN NINE VOLUMES) VOL. I  
PRE-HISTORIC INDIA BY PROF. V. RANGACHARYA M.A.,  
Professor of Indian History Presidency College, Madras,  
Huxley Press, Madras. vii + 247 pages. Price Rs. 5 or sh.  
7-6d.

The Volume under review is the first of a series of nine volumes which the author has planned, apparently on a very elaborate and ambitious scale. This volume forms a good introduction to the whole series, comprising as it does, a good deal of information regarding the geographical evolution of India, the appearance of the first man, the paleolithic age, the transition to the neolithic age, the neolithic age itself, the advent and use of metals, the civilization of the Indus valley; and finally the story of the entry of the Aryans.

In the first chapter the author refers to theories that are advanced by the geologist in accounting for the origin of the Earth's crust, with special reference to the Indian continent. The author here endorses the view of the geologist that South India is older than Northern India. In the second, we find references to theories regarding the first evolution of man. The author refers to the theories that regard Syria, Western Asia, Central Asia, Burma, Arctic Regions, Africa and India, as places where man first evolved. The author, agreeing with Sir Harry

Johnston, as may be naturally expected, says, that South India should be regarded as the place where man first originated. Sir Harry Johnston, in his "The Opening up of Africa" discusses the various theories regarding the birth-place of man and comes to the conclusion that the place of origin should be sought for either in Burma or South India. There seems to be a good deal of truth in this theory and probably we come upon certain definite proofs which will finally establish this thesis. In the next chapter, the author makes a rapid survey of the paleolithic remains in places like Madura, Trichinopoly, Salem, Mysore, Bellary, Cudappah, North-Arcot, Chingleput, Bhadrachalam, Cundlekhand, Dharwar, and few from Bengal. What little of the culture of the paleolith human being could be deduced from these remains, has been done by Bruce Foste and others and the author reproduces them all in the further portions of the chapter. It is also said that the germs of religious thoughts could be traced to those paleoliths. In the next chapter the origin of the so-called Dravidian is discussed. The theories of the Mongolian origin, of the Scythian, Turanian or Central Asian Origin, of the Semetic origin, of the Mesopotamian origin, of the Egyptian origin, and that of the Mediterranean origin are discussed. The last of these theories finds favour with the author in the next chapter. In chapter VI the author takes us through Neolithic sites in ancient India—sites like those found in Anantapur, Bellary, Karnool, Cudappah, Hyderabad, South Bombay, Gujerat, Kathiawar and Ceylon, and the author is of opinion that neolithic culture, wherever it is, is practically identical. The culture of the neolith takes up the major portion of the chapter. The origin and development of Dravidian Languages is also discussed in this chapter. The author refers to the conflicting views of Bishop Caldwell and Mr. R. Swaminatha Aiyar, but does not commit himself to any opinion on the question. In the chapter on the "Advent of Metals" the author refers to the so-called bronze, copper and iron ages and show how the bronze age was absent from India. The Indians discovered gold at a comparatively early age and were using it in various ways. In dealing with the Indus valley civilization and the discoveries in Mohenjo-Daro and Harappa, the author is careful enough not to express any view, *i.e.*, whether it is Aryan or Dravidian. The last chapter brings down the history of pre-historic India to the beginning of the Aryan immigration into India. After referring

\*. एतावानेव भागः आदर्शे उपलभ्यते ।

19. இயற்கைப் பொருளை யிற்றெனக் கிளத்தல்.  
*Iyarkai-p porulai y-irrena-k kiḷattal.*

Natural objects should be described by their distinguishing features.

Ex. nilam valitū (Earth is hard).  
 Nīr taṇṇitū (Water is cool).

20. செயற்கைப் பொருளை யாக்கமொடு கூறல்.  
*Ceyarkai-p porulai y-ākkamoṭṭu kūṟal.*

In a sentence describing the change which an object has undergone, the word denoting that object should be followed by the forms of the verb ' āku ' which means ' to become '.

Ex. Maṇ kuṭam āyirṟū (Earth became a pot).

21. ஆக்கந் தானே காரண முத்தறே.  
*Ākkan tāṇē kārāṇa mutarṟē.*

The verb ' āku ' is always preceded by reason, if the reason for the change is given.

Ex. Eṇṇey perṟamaiyāṇ mayir nalla āyiṇa.  
 (Hair became better on account of the application of oil).

22. ஆக்கக் கிளவி காரண மின்றியும்  
 போக்கின் றென்ப வழக்கி னுள்ளே.  
*Ākka-k kiḷavi kārāṇa m-inṟiyum*  
*Pōkkin ṟeṇṇa vaḷakki ṇ-uḷḷē.*

Expressions with the forms of the verb ' āku ' without giving the reason for the change are current in speech.

Ex. mayir nalla āyiṇa (Hair became better.)

23. பான்மயக் குற்ற வையக் கிளவி  
 தானறி பொருள்வயிற் பன்மை கூறல்.  
*Pāṇ-maya-k k-urṟa v-aiya-k kiḷavi*  
*Tāṇ-ari poruḷ-vayir paṇmai kūṟal.*

When a speaker is sure of the *tiṇai* of the object he is talking about, but not of the *pāl*, he should use a plural verb of the particular *tiṇai*.

Ex. Āṇmakaṇ kollō peṇṭāṭṭi kollō iṣtō tōṇruvār?  
 (Is it man or woman that appears there ?)  
 Orutti kollō palar kollō maṇalil viḷaiyāṭiṇār ?  
 (Is it one lady or many ladies that played on sands ?)  
 Oṇṟō palavō cey pukkaṇa ?  
 (Is it one or many that entered the field ?)

*Note 1.*—The need of this sūtra is this:—A person looks at an object or objects *at a distance*. He determines that it is a person, but cannot determine whether it is a male or a female. If he wants to ascertain it from another, what verb should he use in his question, *āṇpāl* verb or *peṇpāl* verb? This sūtra says that he should use *palarpāl* verb. Similarly if he determines that the object or objects at a distance are person or persons, but is not able to determine whether it is one or many, then too should he use the *palarpāl* verb. If, on the other hand, he determines that it is not a person or persons, but is not able to ascertain whether it is one or many, he should use a *palavīṇpāl* verb.

*Note 2.*—Iḷampūraṇar interprets the expression '*pāṇmayak-kurra*' in the sūtra to mean *āṇpāl peṇpāl mayakkurra*' and Nacciṇārkkiniyar '*āṇpāl peṇpāl mayakkurra*, *āṇpāl palarpāl mayakkurra*, and *peṇpāl palarpāl mayakkurra*', while the other two '*āṇpāl peṇpāl mayakkurra*, *āṇpāl palarpāl mayakkurra*, *peṇpāl palarpāl mayakkurra* and *onṇraṇpāl palavīṇpāl mayakkurra*'.

24. உருபென மொழியினு மஃறிணைப் பிரிப்பினும்

இருவீற்று முரித்தே சுட்டுங் காலு.

*Urupeṇa moliyinu m-aḥriṇai-p pirippinum*

*Iru-v-irru m-urittē cuṭṭuṇ kālai.*

When the speaker is not sure of the *tiṇai* of the object at a distance, he may use the word *urupū* (or its synonym) or the word *atu* when he denotes it.

Ex. *Kurriyō makaṇō tōṇrukiṇṇa urupū?*

(Is the form there, stick or boy?)

*Kurriyō makaṇō tōṇrukiṇṇa atu?*

(Is that stick or boy?)

*Note 1.*—This sūtra operates when there is confusion in *tiṇai*, while the previous sūtra, when there is certainty in *tiṇai* but confusion in *pāl*.

*Note 2.*—The expression '*urupeṇa moliyinum*' in the sūtra is interpreted by Iḷampūraṇar, Nacciṇārkkiniyar and Teyvaccilaiyār, to refer only to *tiṇaimayakkam*. But Cēṇāvaraiyar says that it refers to *āṇpāl peṇpāl aiyam* and *onṇraṇpāl palavīṇpāl aiyam* also. When there is only *āṇpāl peṇpāl aiyam*, the speaker may word his question '*āṇō peṇṇō atō tōṇrukiṇṇa ā!*' by using the word *āl* instead of '*urupū*' since he is sure that it is a person. As regards '*onṇraṇpāl palavīṇpāl aiyam*' it is unnecessary for the author to sanction it here, since the *a-riṇai* noun *urupū* may be taken either as singular or as plural according to context.

*Note 3.*—For the expression ‘*aṣṛiṇai-p-pirippū*’ in the sūtra, the three commentators Iḷampūraṇar, Cēṇāvaraiyar and Nacciṇārkkīṇiyar give the example ‘*onrō palavō cey pukka perram*’. Since *perram* is an *a.ṛiṇai* noun and hence may be taken both as singular and plural, the author need not sanction this usage. Teyvaccilaiyār, on the other hand, takes ‘*aṣṛiṇai-p-pirippū*’ to refer to the word ‘*atu*’. For the words in *aṣṛiṇai* which have different forms in *onraṇpāl* and *palavṇpāl* are *atu*, *avai*, *itu*, *ivai*, *utu* and *uvai*; since doubt may arise only about objects at a distance and since the words *itu*, *ivai*, *utu* and *uvai* are not generally used to denote them, *atu* and *avai* are the only two words that may be denoted by the expression ‘*aṣṛiṇai-p-pirippū*’ here. Teyvaccilaiyār has mentioned only *atu* since such doubts arise more generally with single objects.

25. தன்மை சுட்டலு முரித்தென மொழிப  
அன்மைக் கிளவி வேறிடத் தான.  
*Taṇmai cuṭṭalu m-urittenā molipa*  
*Anmai-k kiḷavi vēriṭat t-āṇa.*

The word *aṇmai*, denoting negation may take the gender of the ascertained object, though it (*aṇmai*) is used along with the word denoting the object other than the ascertained one.

Ex. (1) A-v-v-urupū kurri-y-allan, makan.

(That form is not a pole, but man.)

(2) *Atu kurri-y-allan, makan.*

(It is not a pole, but man.)

*Note 1.*—In the previous sūtra it has been said that, when one cannot definitely determine the nature of an object at a distance and doubts that it is one or the other, he may use the word ‘*urupū*’ or ‘*atu*’. For example he sees an object at a distance and is not able to ascertain whether it is a male child or pole and hence he questions either himself or another ‘*atu kurriyō makanō ?*’, or ‘*a-v-v-urupū kurriyō makanō ?*’. The next moment he decides that it is a male child. At once he may say ‘*atu* or *a-v-v-urupū kurri-y-aṇṇū, makan*’ or, ‘*atu* or *a-v-v-urupū kurri-y-allan, makan*’, since the doubt clears immediately after he says *atu* or *a-v-v-urupū*. If he says *aṇṇū*, after *kurri*, such a usage need not be sanctioned since it is regular. If he says ‘*allan*’ after *kurri*, it has to be sanctioned since the subject *atu* or *a-v-v-urupū* is neuter-singular and *allan* is masculine-singular. Such a usage is allowed since his doubt has been cleared and he

ascertains that the object is a male child immediately after he says the word *atu* or *a-v-v-urupū*.

*Note 2.*—The word *vēṛiṭattāṇa* is made up of *vēṛiṭattāṇ* the instrumental singular of *vēṛiṭam* and 'a' the *cāriyai* which it takes if it is at the end of a verse, as is sanctioned by sūtra 108. But it gives the locative sense here. *Iḷampūraṇar* takes '*vēṛiṭattāṇa*' along with the word '*taṇmai*' and interprets them 'the quality (found) in the object other than the first mentioned one'; while *Teyvaccilaiyār* takes it along with '*aṇmai-k-kiḷavi*' and interprets 'the word of negation used along with that which is other than the ascertained object'. Both take '*taṇmai*' to mean the nature of the ascertained object'. *Cēṇāvaraiyar* takes '*taṇmai*' to mean '*aṇmai-yin taṇmai*' and '*vēṛiṭattāṇa*' to mean the word denoting the object other than the ascertained one and gives the example '*ivaṇ kurri-y-aṇṇū, makaṇ*'. *Nacciṇārkkiniyar* agrees with *Iḷampūraṇar* in the interpretation of the sūtra, but gives '*ivaṇ kurri-y-allaṇ*' as an example. This example as also the example given by *Cēṇāvaraiyar* does not seem to be appropriate, since the doubt of the hearer is cleared immediately after he hears the word *ivaṇ* which is an *āṇṇāl* noun.

*Note 3.*—The importance of the particle '*um*' in '*cuṭṭalum*' clearly shows that such usage as '*atu* or *a-v-v-urupū kurri-y-allaṇ*' is rare and the general usage is '*atu* or *a-v-v-urupū kurri-y-aṇṇū, makaṇ*'.

26. அடைகினை முதலென முறைமுன்று மயங்காமை  
நடைபெற் றியலும் வண்ணச் சினைச்சொல்.

*Aṭai-ciṇai mutal-eṇa muraṇ-mūṇṇu mayañkāmai*  
*Naṭai-per riyalum vaṇṇa-c ciṇai-c-col.*

(In a group of words denoting a whole, its limb and the quality of the limb), the word denoting the limb invariably follows the adjective and preceeds the word denoting the whole.

Ex. *Ceṇ-kāl-nārai vantatū.*

(Red-footed crane came.)

*Perun-talai-c-cāṭṭaṇ vantāṇ.*

(Large-headed Cāṭṭaṇ came.)

*Note 1.*—The word '*mayañkāmai*' in the sūtra means *mayañkāmal* and is a verbal participle.

*Note 2.*—This sūtra enjoins the order of words denoting a whole, its part and the quality of the part. If the quality of the

*whole* is to be mentioned, the order to be adopted then does not come within the province of this sūtra. cf. *cen-nārai-k-kāl*.

*Note 3.*—The word ‘*vaṇṇam*’ in the sūtra denotes quality. It is the *tadbhava* of the Skt. *varṇa*. Nacciṇārkkīṇiyar thinks that *vaṇṇa-c-cīnai-c-col* is a technical name for the group of words denoting a whole, its limb and the quality of the limb.

*Note 4.*—The word ‘*naṭai*’ in the sūtra is taken by Iḷampūraṇar, Cēṇāvaraiyar, and Nacciṇārkkīṇiyar to refer to *speech* and not to *poetry*; but Teyvaccilaiyār takes it to refer to both.

27. ஒருவரைக் கூறும் பன்மைக் கிளவியும்  
ஒன்றனைக் கூறும் பன்மைக் கிளவியும்  
வழக்கி ஓகிய வுயர்சொற் கிளவி  
இலக்கண மருங்கிற் சொல்லா றல்ல.  
*Oruvarai-k kūṟum paṇmai-k kiḷaviyum*  
*Oṇṇanai-k kūṟum paṇmai-k kiḷaviyum*  
*Valakki ű-ākiya v-uyar-coṟ kiḷavi*  
*Ilakkaṇa maruṅkiṟ collā ṛalla.*

The use of honorific plural to denote one person or one object is allowed only in speech and not in poetry.

Ex. Yām vantēm; nīyir vantīr; ivar vantār.

*Note 1.*—The honorific plural even with respect to *aṣṟiṇai* is *palarpāl* and not *palavimpāl*. On seeing a fox, one may say ‘*nariyār vantār*’ and never ‘*nari vantaṇa*.’

*Note 2.*—Iḷampūraṇar and Nacciṇārkkīṇiyar think that the expression ‘*ilakkaṇa maruṅkiṟ collā ṛalla*’ is unnecessary since its purpose is served by the third line and hence it suggests that *uyartiṇai* may be used for *aṣṟiṇai* and *vice-versa* in certain cases. Cēṇāvaraiyar, on the other hand, thinks that the third line in the sūtra sanctions such a usage in speech and the fourth line prevents it in poetry. The use of *uyartiṇai* for *aṣṟiṇai* and *vice-versa* is taken by him by *tanninamūṭittal*, the mode covering the related points by implication.

28. செலவினும் வரவினுந் தரவினுந் கொடையினும்  
நிலைபெறத் தோன்று மந்நாற் சொல்லும்  
தன்மை முன்னிலை படர்க்கை யென்னும்  
அம்மூ விடத்து முரிய வென்ப.  
*Celaviṇum varaviṇuṇ taraviṇuṇ koṭaiyiṇum*  
*Nilai-ṭera-t tōṇṇu m-a-n-nār collum*  
*Taṇmai munṇilai paṭarkkai y-eṇṇum*  
*A-m-mū v-iṭaltu m-uriya v-eṇṭa.*

It is said that the four words *celavu*, *varavu*, *taravu* and *koṭai* are used in the first, second and third persons.

29. அவற்றுள்,

தருசொல் வருசொல் லாயிரு கிளவியுந்

தன்மை முன்னிலை யாயீ ரிடத்த.

*Avarruḷ,*

*Taru-col varu-col l-ā-y-iru kiḷaviyun*

*Taṇmai muṇṇilai y-āyī r-iṭatta.*

Of them the words *taravu* and *varavu* are used only along with the pronouns of the first and the second persons, *i.e.*, the verbs meaning *to give* and *to come* are respectively used, only when the recipient of the gift and the person approached are in the first or the second person.

Ex. Eṇakkū-t-tantāṇ (He gave it to me).

Niṇakkū-t-tantāṇ (He gave it to you).

Eṇ-ṇ-uḷai vantāṇ (He came to me).

Niṇ-ṇ-uḷai vantāṇ (He came to you).

30. ஏனை யிராண்டு மேனை யிடத்த.

*Ēṇai y-iraṇṭu m-ēṇai y-iṭatta.*

The remaining two (*i.e.*, *celavu* and *koṭai*) are used along with the third person.

Ex. Avaṇkaṭ ceṇṇāṇ (He went to him).

Avaṇkū-k-koṭū (Give it to him).

*Note 1.*—Iḷampūraṇar takes all the four words *celavu*, *varavu*, *taravu* and *koṭai* in the sense of *giving*; while Cēṇāvaraiyar and Nacciṇārkkīṇiyar take *celavu* and *varavu* respectively to mean *going and coming* and *taravu* and *koṭai* to mean *giving*.

*Note 2.*—Teyvaccilaiyār takes all the three sūtras, 28, 29 and 30, to be one. According to him the 28th sūtra deals with the opinion of the grammarians earlier than Tolkāppiyāṇār and the sūtras 29 and 30 deal with his own opinion. This view seems to be correct. One may then question whether it does not give room to *vākyabhēda* or sentence-split, since there are three complete sentences. It does not, since the three sutras are interpreted thus:—Of the four words *celavu*, *varavu*, *taravu* and *koṭai* which could be used with all the three persons in the

opinion of the grammarians, *taravu* and *varavu* are used along with the first, and the second, personal pronouns and the rest with the third person.

31. யாதெவ னென்னு மாயிரு கிளவியும்  
அறியாப் பொருள்வயிற் செறியத் தோன்றும்.  
*Yāteva n-enṇu m-ā-y-iru kīlaviyum*  
*Ariyā-p-poruḷ-vayir ceriya-t tōṇṇum.*

The two (interrogative) pronouns *yātū* and *evan* are generally used in questioning about unknown objects.

Ex. Irāmaṇ enṇa coṟkū-p-poruḷ yātū?

(What is the meaning of the word *Irāmaṇ*?).

Pacu enṇa coṟkū-p-poruḷ evan?

(What is the meaning of the word *pacu*?).

*Note 1.*—This sūtra sanctions the usage of both *yātū* and *evan* irrespective of the fact whether the object denoted by the word *poruḷ* is *uyartiṇai* or *aṣṟiṇai*.

32. அவற்றுள்,  
யாதென வருஉம் வினாவின் கிளவி  
அறிந்த பொருள்வயி னையந் தீர்த்தற்குத்  
தெரிந்த கிளவி யாதலு முரித்தே.  
*Avarttuḷ,*  
*Yāteṇa varūum viṇāviviṇ kīlavi*  
*Arinta poruḷvayi n-aiyan tīrtarḱū-t*  
*Terinta kīlavi y-āṭalu m-urittē.*

Of them, the interrogative pronoun *yātū* may also be used in sentences where some doubts are to be cleared regarding the particulars of an object whose general features are known.

Ex. I-m-maraṅkaḷuḷ karuṅkāli yātū?

(Among these trees which is *karuṅkāli*?)

Nam-m-eru taintaṇuḷ keṭṭa erutū yātū?

(Of our five bulls, which is the bull lost?)

*Note 1.*—From the previous sūtra one is inclined to think that *yātū* can be used only in questioning about *unknown objects*. This sūtra sanctions its use even in questioning about the *particulars of a known object*.

33. இனேத்தென வறிந்த சினேமுதற் கிளவிக்கு  
வினேப்படு தொகுதியி னும்மை வேண்டும்.  
*Inaitteṇa v-arinta cinai-mutar kīlavikkū*  
*Viṇai-p-paṭu toku ti-y-i n-ummai vēṇṭum.*

The particle 'um' should invariably be used after the *group of words* which qualify the verb, *i.e.*, immediately preceding the verb or the predicate where the subject of the verb is a *mutal* (word denoting a *whole*) or a *cinai* (word denoting a *part* of a whole) qualified by the word which mentions its exact number.

Ex. Paṇṇiru kaiyum pārpaṭa v-iyarri (Tirumu. 118)<sup>1</sup>.

(Having placed all the twelve hands so that they might be in their proper places.)

Cēra-cōla-pāṇṭiyar mūvarum kūṭinar.

(All the three kings Cēraṇ, Cōlaṇ, and Pāṇṭiyaṇ assembled.)

Kaṇ-ṇ-iraṇṭum kuruṭu (Both the eyes are blind).

Note 1.—Iḷampūraṇar reads in the sūtra *tokaiyiṇ*, while others *tokutiyiṇ*.

Note 2.—The word *vinai* in the sūtra should be taken to mean the *mutikkunñcol* or predicate.

Note 3.—Iḷampūraṇar and Teyvaccilaiyār interpret the expression *vinai-p-paṭu-tokuti* as the collection of words preceding the verb or predicate. Hence according to them the word *tokai* or *tokuti* means here a *collection*. But Cēṇāvaraiyar and Nacciṇārkkiniyar take it to mean the *number* which qualifies the verb or the predicate. Hence according to them the word *tokuti* means *number*. They, then according to their interpretation have to justify how the particle 'um' is used in the expression *paṇṇiru-kai-y-um pārpaṭa v-iyarri* where *paṇṇiru*, the word denoting number qualifies, not the verb *pārpaṭa* but the subject *kai*, and *um* is not found immediately after *paṇṇiru*. Cēṇāvaraiyar explains it thus:—The words *paṇṇiru* and *kai* denote the same object. Hence *um* is used after the word *kai*. He says so perhaps through the analogy of the expression *dvādaśa karāḥ* (twelve hands) where the word *dvādaśa* means not twelve, but twelve objects. It is doubtful whether the word *paṇṇiraṇṭu* in Tamil denotes twelve objects when it is followed by a noun. Hence the interpretation given by Iḷampūraṇar on the phrase '*vinai-p-paṭu tokuti*' seems to me better.

---

(1) Tirumu. = Tirumurukāṇṟuppaṭai.

*Note 4.*—It is advisable for the readers to note that the particle ‘*um*’ is not found in the sentences *nāṇmarai mutalvar vaṇṭār* (Brāhmīns versed in the four vedas came), *aīntalai nākam ōṭṭirri* (the five-headed cobra ran); for the words denoting number in such sentences do not qualify *mutalvar* or *nākam* the subject of the verb, but only *marai* or *talai* the adjunct of the subject.

34. மன்னுப் பொருளு மன்ன வியற்றே.  
*Maṇṇū-ṭ poruḷu m-aṇṇa v-iyarṛē.*

The same is the case even with words denoting *transient* objects.

Ex. I-v-v-ulakattiḷ oruvar celvamum nīlayāti.  
 (Wealth of none in this world is permanent.)

*Note 1.*—According to Iḷampūraṇar and Cēṇāvaraiyar the word *maṇṇū-ṭ-poruḷ* means *illā-ṭ-poruḷ* or non-existent objects. Hence they have given the sentence ‘*pavaḷa-k-kōṭṭu nīlayānai cāṭavākaṇaṇ kōyilulḷum illai*’ (the blue elephant with coral tusks is not found even in the temple of *Cāṭavākaṇaṇ*). Here there are three objections:—(1) They have to translate the sūtra thus:— ‘The same is the case when the non-existence of an object in a certain place or at a certain time is predicated.’ There is no word in the sūtra warranting the addition of the idea ‘in a certain place or at a certain time’. (2) ‘*um*’ in the example given by them is only *ecca-v-ummai* and not *muṇṇummai* as found in the examples of the previous sūtra. (3) The use of ‘*um*’ in the example given by them is sanctioned by the sūtra ‘*eccam ciṇaṭṭē . . . ummai-c-collē*’ (Tol. Col. 255) and hence this sūtra need not sanction it.

According to Nacciṇārkkīṇiyar and Teyvaccilaiyār, the word *maṇṇū-ṭ-poruḷ* means *transient objects*. But Nacciṇārkkīṇiyar says that ‘*um*’ after the word *maṇṇū-ṭ-poruḷ* in the sūtra suggests non-existent objects also. This is quite against the spirit of the sūtra since ‘*um*’ in this sūtra suggests *iṇaitteṇa v-aṇṭa ciṇai-mutar kīḷavi* mentioned in the previous sūtra. The examples given by them are respectively ‘*yākkaiyum nīlayāti*’ (even the body is not permanent), ‘*cakkaravartti celvamum nīlayāti*’ (the wealth of even the emperor is not permanent). But in those examples the ‘*um*’ after *yākkai* and *celvam* are only *ecca-v-ummai* and not *muṇṇummai* since they respectively suggest

that other objects also are not permanent and that the wealth of others also is not permanent.

Hence I have taken the word *maṇḍā-p-ḥoruḥ* to mean transient objects and *aṇṇa-v-iyarṇē* to mean that the *murṇummai* is used immediately preceding the predicate and after the *viṇai-p-ḥaṭutokuti* and suggested the example *'I-v-v-ulakattil oruvar celvamum nilaiyātū'* where *maṇḍā-p-ḥoruḥ* is *celvam*, *viṇai-p-ḥaṭutokuti* is *i-v-v-ulakattil oruvar celvam* and *um* after *celvam* is *murṇummai* and not *ecca-v-ummai*.

35. எப்பொரு ளாயினு மல்ல தில்லெனின்  
அப்பொரு ளல்லாப் பிறிதுபொருள் கூறல்.  
*E-p-ḥoru ḷ-āyinu m-alla til-l-eṇin*  
*A-p-ḥoru ḷ-allā-p pīritu-ḥoruḥ kūṇal.*

If one (a merchant) wishes to inform (a purchaser) of the absence of any commodity by using the expression *'allatīl'*, he should associate that expression with a word denoting any commodity (that he has), and not with that denoting the commodity asked for.

Ex. *'Paruppu uḷavō vaṇikīr?'* eṇṇu viṇāya-vaḷi *'uḷuntallatū illai'*, *'Kolḷallatū illai'* eṇṇu kūṇal vēṇṭum.

(When a purchaser questions, 'Oh merchant, have you dholli with you?', the merchant has to answer 'I have nothing other than black gram' if he has black gram with him, 'I have nothing other than horse-gram' if he has horse-gram with him, and so on.)

*Note 1.*—Iḷampūraṇar is of opinion that the expression *'allatīl'* in the sūtra means 'the object that he has not and *'pīritū-ḥoruḥ'* means *'ma-p-ḥoruḥ'* or similar commodity. But in the example he has given, he has made use of the expression *'allatīl'*. Cēṇāvaraiyar criticises him on four grounds:—(1) If Tolkāppiyāṇar has not intended the use of the expression *'allatīl'* in the merchant's answer, what harm is there if the merchant words his answer *'paruppu illai'* (there is no dholli) if he has not got dholli with him? (2) If *'allatū'* in *'allatīl'* means *'uḷḷatallatū'* the meaning of the word *allatū* is not clear and Tolkāppiyāṇar would not have framed his sūtra in such a way that the meaning may not be clearly understood. (3) If the word *'pīritū-ḥoruḥ'* in the sūtra refers only to a similar object, a merchant who is generally dealing in oil and dholli will be precluded from answering *'Eṇṇey-allatū illai'* (there is nothing other than oil), when he has no dholli at the time when a purcha-

ser asks for it, since *eṇṇey* is not a commodity similar to dholl. (4) If Tolkāppiyaṇār meant '*ina-p-poru!*' (similar object) by the term '*ṭiritū-poru!*', he might as well have used the word '*ina-p-poru!*' in the place of '*ṭiritū-poru!*' in the sūtra itself.

As regards the first ground in the criticism, Cēṇāvaraiyar may be informed that in the ordinary course of events merchants are not inclined to use such expressions as 'I do not have dholl' if they do not have it when the purchaser needs it. They generally answer 'I have this' by showing a commodity other than dholl'. This shows that they do not like to say '*illai*' (no). The third ground in the criticism of Cēṇāvaraiyar may be met thus:—Why should he not take '*eṇṇey*' as an '*ina-p-poru!*' (similar object) to '*ṭaruṭṭū*' (dholl)? Though one is a solid and the other is a liquid, yet are they not similar to each other in the fact that each one is a commodity that the merchant deals in? Why should Cēṇāvaraiyar take the term '*inaṁ*' in a restricted sense? The word '*allatū*' in the sūtra clearly means '*ina-p-poru!*'; for the '*aṇmai*' (negation) in the word '*allatū*' denotes *anyōṇyābhāva* and hence the word '*allatū*' means an object partly dissimilar and partly similar (to the object denoted by the word with which it is associated). For example *a-brāhmaṇaḥ* cannot denote a beast which is entirely dissimilar to a brāhmin, but can denote only a man who is other than a brāhmin. Evidently such a man is similar to a brāhmin in being a man and dissimilar to him in not being a brāhmin.

The fourth ground in his criticism may be met thus:—Since the word '*allatū*' suggests '*ina-p-poru!*', Tolkāppiyaṇār has not used '*ina-p-poru!*' in place of '*ṭiritū-poru!*'.

Nacciṇārkkīṇiyar gives the same meaning to the sūtra as Iḷampūraṇar and in the example he uses the word '*allatū*' like him. Teyvaccilaiyār interprets '*allatū*' in the same way as Cēṇāvaraiyar, but in the interpretation of the word '*ṭiritū-poru!*' he agrees with Iḷampūraṇar.

Since all the four commentators have used the expression '*allatillai*' in their examples, it is quite clear that, as regards the interpretation of the expression '*allatū*' in the sūtra, Cēṇāvaraiyar and Teyvaccilaiyār are correct.

36. அப்பொருள் கூறிற் சுட்டிக் கூறல்.  
*A-p-poru! kūṟiṭ cuṭṭi-k kūṟal.*

If, in the answer given by the merchant, the word denoting the object asked for by the purchaser, is used, it should be preceded by a demonstrative root or adjective.

Ex. 'Paruppūḷavō?' enṛa-vaḷi, 'i-p-paruppallatū illai' enṛū kūral vēṇṭum.

(When the merchant is questioned 'Have you dhol?', the answer should be 'There is no dhol other than this'.)

Note 1.—The need for this sūtra is this:—The merchant has the commodity asked for by the purchaser in stock; but the *quality* of the same commodity is not such as should be given to him without showing it to him and getting his consent. In such a case he has to use the expression 'allatil', but he may associate it with the word denoting the commodity asked for, (though it is against the sanction of the previous sūtra) if that word is preceded by a demonstrative element. The demonstrative element is evidently 'i' if the commodity asked for is near the seat of the merchant and 'a' if it is away from it.

37. பொருளொடு புணராச் சுட்டுப்பெய ராயினும்

பொருள்வேறு படாது தொன்ற கும்மே.

Poruḷoḷu puṇarā-c cuṭṭu-p-peya r-āyinuṁ

Poruḷ-vēru paṭṭa t-onṛā kuṁ-m-ē.

Even though the demonstrative element is not associated with the word denoting the commodity asked for, the sense conveyed will be the same.

Ex. 'Paruppū ḷavō vaṇikīr?' enṛuviṇāya-vaḷi, 'ivai-y-allatū illai' enal.

(When questioned 'Oh merchant, have you dhol? the answer may be 'There is nothing except these'.)

Note 1.—The need for this sūtra is this:—The 35th sūtra states that the expression 'allatil' should be associated with the word denoting a commodity other than that asked for by the purchaser. The 36th sūtra states that, if it is associated with the word denoting the object asked for, such a word should be preceded by a demonstrative element. The demonstrative element may be used in two ways:—(1) as a *part* of the compound word like *i-p-paruppū* and *a-p-paruppū* or as a demonstrative *adjective* like *inta-p-paruppū* and *anta-p-paruppū*; and (2) as a demonstrative *pronoun* like *ivai* and *avai*. In the former case there is no opportunity for any doubt to arise; and in the latter case since the plural pronouns *ivai* and *avai* denote not only the object asked for by the purchaser, but also other objects which

the merchant has in his possession, a doubt may arise whether such an expression as ' *wai-y-allatū illai* ' is a correct answer to the question ' *paruppi uḷavō* ?'. This sūtra sanctions the correctness of such an expression. It may be noted that all the three sūtras 35, 36, 37 deal with the use of the expression ' *allatil* ' in different ways. Sūtra 35 deals with it when the merchant has not got in stock the commodity asked for; sūtra 36 deals with it when he has in stock the commodity asked for, but is not satisfied with its quality; and sūtra 37 deals with it whether he has it in stock or no.

*Note 2.*—Iḷampūraṇar, Cēṇāvaraiaiyar and Teyvaccilaiyār have interpreted the sūtra in the same way as above. Cēṇāvaraiaiyar adds in his commentary that there are some who think that this sūtra sanctions the use of a demonstrative pronoun, when the object denoted by it is not expressed, but is in the mind of the speaker. For instance one learned in 'elephantology' (the science dealing with the nature, appearance etc. of elephants) may say on looking at the *foot-prints* of an elephant in a forest. 'This surely indicates that the elephant will one day become the king's vehicle'. Here what the word 'this' refers to cannot be understood by the hearer. But a close examination of sūtras 35, 36 and 37 clearly shows that such an interpretation is not quite appropriate.

*Note 3.*—Nacciṇārkkkiṇiyar has given an entirely different meaning to the sūtra. He splits the sūtra into two parts:—*cuṭṭu poruḷoṭū puṇarā āyinuṁ ākum; peyar poruḷoṭū puṇarā āyinuṁ (cuṭṭu-p) poruḷ vēru-paṭātū onrākum*. The former part means that the demonstrative element may be used without mentioning the object to which it refers. Ex. *Iṣtū ottaṇ*. (This is some one.) (Kalit. 61)<sup>1</sup>. The latter part means that a common noun though used in such a way that it cannot be easily understood to whom it refers, may be used to denote a particular object. In this interpretation the following points are to be carefully considered by the readers:—(1) When Tolkāppiaṇār has so worded his sūtras as not to give room to *vākyabhēda* or sentence-split, would he have combined two different ideas in one sūtra? (2) The order of words in the sūtra is completely inverted; the word *puṇarā* which seems to be a negative relative participle, while it is taken to be a negative verbal participle. (3) The meaning of the word *poruḷ* in the second line is taken to be

---

1. Kalit = Kalittokai.

'*cuṭṭu-p-porul*', the element *cuṭṭu* being added as an adjunct to the word *porul*. (4) This sūtra does not appear to have any relation to the previous sūtra.

Hence I think that the interpretation given by the other three commentators is sound.

38. இயற்பெயர்க் கிளவியுஞ் சுட்டுபெயர்க் கிளவியும்

வினைக்கொருங் கியலுங் காலுந் தோன்றின்

சுட்டுபெயர்க் கிளவி முற்படக் கிளவார்

இயற்பெயர் வழிய வென்மனார் புலவர்.

*Iyar-peyar-k kiḷaviyuṇ cuṭṭu-p-peyar-k kiḷavium*

*Viṇaikkoruṇ k-iyaluṇ kāian tōṇṇin*

*Cuṭṭu-p-peyark kiḷavi murpaṭak kiḷavār*

*Iyar-peyar valiya venmanār pulavar.*

If an *iyar-peyar* and a pronoun referring to it do not stand as logical subject and predicate, but take a predicate, after them or qualify different predicates, it is said by learned men that the pronoun is never used before the *iyar-peyar*, but only follows it.

Ex. Cāttaṇ vantāṇ; avarḱu-c- cōṟu koṭu.

(Cāttaṇ came; give him food.)

Cāttaṇ avaṇ vantāṇ.<sup>1</sup>

(Cāttaṇ he came.)

Note 1.—*Iyar-peyar* generally means common noun whose meaning cannot be understood from its derivation. cf. Tol. Col. 174.

Note 2.—The word *iyar-peyar* in the sūtra may be taken as a case of *upalakṣaṇa* i. e., *iyar-peyar* suggests *uyartiṇai-p-peyar* (proper names of persons and gods) and *aṣṟiṇai-p-peyar*.

Note 3.—Iḷampūraṇar, Naccīṇārkkīṇiyar and Teyvaccilaiyār have stated that this sūtra operates only when the *iyar-peyar* and the pronoun qualify different verbs. Cēṇavaraiyar alone thinks that it operates when both take the same predicate or qualify the same verb also.

Note 4.—Iḷampūraṇar states that there were some grammarians who took the word *iyar-peyar* in the sūtra to mean all nouns current in the world. But such a view may not be held

1. The use of the pronoun along with the noun which it refers to, between the noun and its predicate seems to have been current at the time of Iḷampūraṇar. cf. *Tanmai-c-collum aṣṟiṇai-c-collum* avai eṇṇu, *ṇiṭattin* (Tol. Col. 43, Iḷam.),

by Tolkāppiyanār since he classifies nouns as *iyar-peyar*, *cinai-peyar*, *cinai-mutar-peyar*, *murai-p-peyar*, etc. in sūtra 174 of *Peyariyal*.

*Note 5.*—This sūtra does not operate when the noun and the pronoun stand as logical subject and predicate. Hence the sentence ‘*Avan Cāttaṇ*’ (He is Cāttaṇ) is correct though the pronoun *avan* precedes the noun Cāttaṇ. It does not operate also when the pronoun does not refer to the noun mentioned. Hence the sentence ‘*Avanum Cāttaṇum vantār*’ (He and Cāttaṇ came) is not incorrect since the word ‘*avan*’ does not refer to Cāttaṇ but refers to another person.

39. முற்படக் கிளத்தல் செய்யுளு ஞரித்தே.  
*Mur-paṭa-k- kiḷattal ceyyul-u ḷ-urittē.*

(The pronoun referred to in the previous sūtra) may precede the noun which it refers to in poetry.

Ex. *Avan-aṇaṅku nōy-ceytā n-āyilāy vēlaṇ*  
*Viraṇ-miku-tār-c cētaṇ-pēr vāḷtti-mukaṇ-amarntū*  
*Anṇai y-alar-kaṭappan tāraṇi-y-i l-eṇṇai-kol*  
*Piṇṇai y-ataṇ-kaṇ vīlaivu.*

(Oh, lady beautified with rich ornaments! she has left you to suffer separation. Still why do you expect his garland of *kadamba* flowers with a smiling face, extolling the name of Cētaṇ who wears a garland on account of his victory with the help of his javelin ?)

Here the pronoun *avan* precedes the *Cētaṇ* found in the second line.

40. சுட்டுமுத லாகிய காரணக் கிளவியும்  
சுட்டுப்பெய ரியற்கையிற் செறியத் தோன்றும்.  
*Cuṭṭu-muta l-ākiya kāraṇa-k kiḷaviyum*  
*Cuṭṭu-p-peya r-iyarkaiyir ceyya-t tōṇṇum.*

The word commencing with a demonstrative root and denoting the reason is similar in its usage to the demonstrative pronouns and adjectives.

Ex. *Cāttaṇ-kai-y-eḷutu-mārū vallaṇ, ataṇāltantaḷ uvukkam.*

(Cāttaṇ writes a good hand and so his father appreciates him.)

*Note 1.*—In the sūtras 38 and 39 the pronoun refers to a noun. In this sūtra it is said that, even when the pronoun refers to the idea contained in a sentence, it should follow the sentence and should not precede it.

*Note 2.*—Iḷampūraṇar, Cēṇāvaraiyar and Naccinārkkinīyar have all given the example given above. Iḷampūraṇar thinks that the word *ataṇḍil* is a noun in the instrumental case, while Cēṇāvaraiyar and Naccinārkkinīyar take it as *iṭai-c-col*.

41. சிறப்பி னுகிய பெயர்நிலைக் கிளவிக்கும்  
இயற்பெயர்க் கிளவி முற்படக் கிளவார்.  
*Ciraṭṭṭi n-ākiya peyar-nilai-k kiḷavikkum*  
*Iyaṭ-peyar-k kiḷavi muṭ-ṭaṭa-k kiḷavār.*

The original name of a person also should not precede the name of distinction of the same person if both qualify the same verb.

Ex. Teyva-p-pulavar Tiru-vaḷḷuvaṇār kuṛaḷ pāṭiṇār.  
(The holy poet Tiruvaḷḷuvar composed kuṛaḷ.)

*Note 1.*—The word *viṇai-k- k-oruṇk- iyalum-vaḷi* has to be taken here from the sūtra 38.

42. ஒருபொருள் குறித்த வேறுபெயர்க் கிளவி  
தொழில்வேறு கிளப்பி னென்றிட னிலவே.  
*Oru-ṭoruḷ kuṛitta vēru-peyar-k kiḷavi*  
*Toḷil-vēṛuḷ kiḷaṭṭṭi n-onriṭa n-ilavē.*

Epithets denoting the same person or object cannot denote one and the same person or object if each takes a *different* predicate after it.

Ex. In the sentence

‘Maṇṇaṇ venṇrāṇ, Iḷantiraiyaṇ tirumpiṇāṇ’

[King won, Iḷantiraiyaṇ (name of king) returned.]

the predicates venṇrāṇ and tirumpiṇāṇ cannot refer to the deeds of the same person since their respective subjects maṇṇaṇ and Iḷantiraiyaṇ have different connotations, though they denote the same person.

*Note. 1.*—This sūtra suggests that, if different epithets denoting the same person take the same predicate, the whole may be taken as one sentence.

Ex. Viṭar-c-cilai poritta vēntaṇ vāḷi

Pūn-taṇ poruṇai-p-poraiyaṇ vāḷi

Māntaraṇ cēral maṇṇavaṇ vāḷi.

(Long live the king who engraved in the hill

Long live the lord of the river Poruṇai filled with  
flowers and cool water

Long live the King Māntaraṇcēral.)

# A NOTE ON VILVĒLI AND NELVĒLI.

BY

K. A. NILAKANTHA SASTRI, M.A.,

*Professor of Indian History and Archaeology,  
University of Madras.*

The Vēlvikuḍi grant is the earliest copper plate grant of the Pāṇḍyan kings so far known. It contains a valuable account of the achievements of the Pāṇḍyan kings of the seventh and eighth centuries A.D. This grant and the larger Śinnamanūr plates are the most trustworthy sources of our knowledge of the history of the kingdom in the extreme south of India for a period of nearly three centuries. It has not yet been possible to explain fully and satisfactorily all the events narrated in these charters. It is the object of this note to discuss one event in the reign of Arikēsari Asamasaman Śrī Māṇavarman C. 670-710 A.D.<sup>1</sup> This event is the celebrated battle of Nelvēli which is mentioned in ll. 53-54 of the Vēlvikuḍi grant in the words:<sup>2</sup>

Vilvēli—kkaḍar-rāṇaiyai Nelvēlic-ceru Venṇum.

The particular question that is first to engage our attention relates to Vilvēli. There are three ways in which this word has been understood by different writers. *First* as the name of a general. This is the interpretation originally proposed by Mr. Venkayya in his tentative summary of the Vēlvikuḍi grant given in his Annual Report<sup>3</sup> for Epigraphy (Madras) in 1908. He says that Māṇavarman Arikēsari Asamasaman defeated the army of Vilvēli at Nelvēli. He has been followed by other writers also.<sup>4</sup>

---

1. My *Pāṇḍyan Kingdom*, p. 41.

2. Ep. Ind. XVII, p. 300.

3. Pt. II, para 28.

4. Krishna Sastri *Ep. Ind.* XVII, pp. 293 and 306; also S.I.I. III, pp. 441 ff.; Dr. S. K. Aiyangar, *Beginnings of South Indian History*, pp. 258 and 268-9. *Tinnevelly Gazetteer*, Vol. I, p. 46. Also my *Pāṇḍyan Kingdom*, p. 51.

*Second* as the name of a place. This view is held almost alone by Mr. K. V. Subrahmanya Aiyar who, in tracing the campaigns of the Pallava king Narasimhavarman I against the south says: "The army that marched against the Pāṇḍyas came from the city of Vilvēli which is perhaps identical with Villivalam in the Chingleput District".<sup>1</sup> *Third* and last, as an adjective to the expression which follows: This is the suggestion first made, so far as I can trace, by Mr. K. G. Sankara.<sup>2</sup> "The passage only means: 'the army fenced in (*vēli*) by bowmen (*vil*),' and all guesses as to whether Vilvēli was a person or place are needless. We shall now consider each of these interpretations more closely.

If Vilvēli was the name of a person, who was he? Dr. S. K. Aiyangar<sup>3</sup> thinks that Vilvēli was a Pallava, because the Pallavas were also known by the name Villava. He refers us also to the hymn of Tirumaṅgai Ālvār on *Tirupparamēccuraviṇṇagaram* in which the Ālvār refers to a battle of Neṇmali, probably the same as Nelvēli. On the other hand, Mr. H. Krishna Sastri<sup>4</sup> thinks that Vilvēli was 'perhaps a Cēra.' As Mr. Krishna Sastri assigns no reason in support of his surmise, it is not possible to test its correctness. There seems to be almost nothing in its favour except the identification of Nelvēli with Tirunelvēli,<sup>5</sup> a town more within reach of the Cēras than of the Pallavas. But the identifications proposed by Dr. S. K. Aiyangar of Villavaṇ and Vilvēli, and of Neṇmali and Nelvēli, raise important questions which may be reserved for consideration later on. Meanwhile it may be observed that as the name of a person Vivēli lends itself to such diverse interpretations at the hands of scholars, and that it has so far received no epigraphical confirmation either as the name of a king or as that of a general commanding an army in a battle at Nelvēli or elsewhere. These circumstances may well raise a doubt as to whether Vilvēli is a personal name at all. It may also be observed that there is a serious difficulty from a grammatical point of view in treating

---

1. *Ancient Dekhan*, p. 40; also p. 123.

2. *Ind. Ant.* Vol. 51, p. 214. Mr. Krishna Sastri attributes this interpretation to Dr. S. K. Aiyangar *Ep. Ind.* XVII, p. 306 n. 6.

3. *Beginnings*, p. 268-9.

4. *S. I. I.* III, p. 447.

5. *S. I. I.* II, p. 364.

Vilvēli in the present context as a personal name. Our text, clearly and unmistakably, is:

Vilvēli-kkaḍaṟṟāṇaiyai. But, by a well-known rule of grammar, if Vilvēli were a proper name, the initial *ka* of the succeeding word should not be reduplicated into *kka*.<sup>1</sup> The reduplicated form is clear in the plates and there is not the slightest doubt as to the reading here; it is, therefore, necessary to interpret the passage in some other way and drop the assumption, if it is possible to do so, that Vilvēli is a personal name.

The idea that Vilvēli is a geographical name is not more easy to sustain. This is clear from the reluctance of scholars to accept the suggestion of Mr. K.V.S. Aiyar in this matter. Moreover, Villivalam is referred to in the Udayēndiram plates of Nandivarman as Vilvala,<sup>2</sup> a form very different from Vilvēli.<sup>3</sup>

This brings us to the last of the three views outlined above, which makes Vilvēli an adjective to the succeeding phrase and a part of the description of the army against which Arikēsari fought at Nelvēli. The line thus means: "Having defeated in a battle at Nelvēli (the) ocean-like army fenced in by bowmen." We have here, in fact, a reference to a disposition of forces in battle array which appears to have been common among the Ancient Tamils, and this will become clear from some references in classical and later Tamil literature.<sup>4</sup> Thus in the *Mullaip-p-āṭṭu* we read: *Pūndalai-kkundam-gutti-kkiḍukuniraittu vāṅguvil-araṇam-araṇamāka vērupal perumbaḍai nāppaṇ* (in 41-43), meaning, "In the midst of large and diverse forces which had for protection the enclosure of drawn bows and ornamented pikes planted on the ground, and shields arrayed in regular order." Again, in the *Jīvaka-cintāmaṇi*, stanza 279, we read in the description of a fight: *Vēl-miḍaında-vēliyum-piṇandu*, meaning: "(After) breaking through the fence bristling with lances." In this case, it is the lancers, not the bowmen that fence the army; it is, in other words, a *vēlvēli* in the place of a *vilvēli*. Lastly, Kambaṇ in his description of Guha in the *Rāmāyaṇa*<sup>5</sup> calls him:

1. See e.g. *Nannūl* Sec. 158, *Mayilamāthar* ed. Pandit Swaminatha Aiyar (1918). Also *Tolkāppiyam Eluttu*—153.

2. S. I. I. II, p. 369, l. 44.

3. Contra., *Ancient Dekhan*, p. 123.

4. I owe these references to Pandit M. Raghava Aiyangar and Mr. Vaiyapuri Pillai of the Tamil Lexicon.

5. St. 25 of the *Guha-p-paḍalam*.

"*ṭirṭiḍittan ēlaiyṇṇān*," that is to say, "One possessing an ocean (-like army) holding bows", which comes very close to the description in the Vēḷvikuḍi grant : *Vilivēli-kkadarrāṇai*. These quotations must suffice, it is possible to produce others, to convince us that it was usual for armies in those days to surround themselves by a ring of lancers or bowmen, who apparently bore the first shock of the enemy's attack. There is no difficulty, therefore in interpreting the line from the Vēḷvikuḍi grant in the light of this practice and to abandon once for all the attempts to identify Vilvēli with a person or a place.

We may now turn to the battle of Nelvēli and the identification proposed by Dr. S. K. Aiyangar. Whether Vilvēli is identical with Villavaṇ, and Villavaṇ is another name for Pallava, cease to be matters of any great consequence, if the view urged above is accepted. It may, however, be observed, in passing, that there does not seem to be sufficient support for taking Villava to be another name for Pallava. The lines of Tirumaṅgai Āḷvār on which this view rests are not altogether free from doubt. As they stand in the editions which are now current and as interpreted by the celebrated annotator Periyavāccāṇ Piḷḷai these lines indeed seem to identify Pallava and Villava. The text is:

*Pallavaṇ Villavaṇ enṇu ulakil  
ṭalarāy-ṭṭala-vēndar vaṇaṅgu-kaḷal—Pallavaṇ.*<sup>1</sup>

Here, undoubtedly, the author seeks to glorify the Pallava as superior in power to other kings who were subordinate to him, and one would normally expect the words before "*enṇu ulakil ṭalarāy*" to give examples of such subject kings as are collectively referred to as '*ṭalavēndar*'; and one can hardly resist, in the context, emending the first '*Pallava*' of the text into '*Vallava*', '*ṭa*' and '*va*' being orthographically so liable to be mistaken for each other. This slight emendation makes the passage very much straighter and more forceful than it is in its present form. For, then, the Cāḷukya and the Cēra (Villavaṇ) would be the examples of the kings subdued by the Pallava and obliged consequently to make obeisance to him. However that may be, it seems that more evidence is needed<sup>2</sup> than is

1. *Periya Tirumoli*, II 9, 1.

2. Dr. S. K. Aiyangar says that in St. 8 of *Periya Tirumoli*, II 9 *Pallava* is referred to as *Villavaṇ*. I am unable to see this.

furnished by this passage before one can accept that the Pallava was also called Villava.

The identification of Neṇmali with Nelvēli deserves more attention. The battle of Nelvēli is well-known in literature. Sundaramūrti in his *Tiruttoṇḍattogai* mentions this battle as the chief achievement of Niṇṇa-Śīr-Neḍumāra Nāyaṇār who may, with good reason, be identified with Arikēsari Māṇavarman of the Vēlvikuḍi grant.<sup>1</sup> Although the same fight is mentioned more than half a dozen times in the illustrative stanzas in the commentary to the *Iṇṇaiyaṇār-Ahaṇṇorūl*, the name of the enemy against whom Arikēsari fought on this occasion is unfortunately not once mentioned. As is well known, Sundaramūrti's list of the Śaiva saints furnished the basis of two works by Nambi Āṇḍār Nambi and Śēkkiḷār. Nambi, again, adds nothing to our knowledge about the battle of Nelvēli. Śēkkiḷār in his account of the life of Niṇṇa Śīr-Neḍumāra Nāyaṇār tells us that the foes of the Pāṇḍyan king came from a distant country seeking a fight with him and that they were the chief rulers of the northern country.<sup>2</sup> These indications though vague in themselves, may be of some value in deciding whether Neṇmali can be taken to be Nelvēli or not. Udaya Candra the celebrated general of Nandivarman Pallavamalla, fought 'a terrible battle' at Nelvēli against a Śabara king.<sup>3</sup> This battle of Nelvēli fought in the war of the Pallava succession by Udaya Candra against the Śabara king is different from and later than the fight in which Arikēsari Māṇavarman of the Vēlvikuḍi grant defeated his opponents.<sup>4</sup> There seems to be, however, no reason to suppose that Nelvēli of Udaya Candra's campaigns was not the same place as the scene of Arikēsari's victory. It must, however, be observed that the location of Udaya Candra's Nelvēli must depend on the identity of the Śabara chieftain Udayana. Mr. R. Gopalan observes;<sup>5</sup> "If the

1. See my *Pāṇḍyan Kingdom*, p. 53, ff.

2. See verses 3 and 7 of the life in *Periya purāṇam*; also Dr. S. K. Aiyangar—*Beginnings*, p. 276.

3. S. I. I. II, 367-8 and 372 and Gopalan *Pallavas*, p. 125.

4. See *Pāṇḍyan Kingdom*, pp. 51-2 and Dr. S. K. Aiyangar—*Beginnings*, p. 274.

5. *The Pallavas of Kāñcī*, p. 125. It will be seen that, rather inconsistently, Mr. Gopalan grants also that 'Nelvēli is probably identical with Neṇmali.' *Contra* Hultzsch, S. I. I. II, 364.

Śabaras are identical with the modern Sauras of the Ganjam and Vizagapatam District (*sic*) it would not be correct to identify Nelvēli where the Śabara king is said to have been killed with Tinnevely. It is, therefore, to be identified with some other place on the border of the Telugu districts."

Turning for a moment to Neṇmali made mention of by Tirumaṅgai Ālvār, we see that here the Pallava king is the victor and the enemy who suffered defeat was a Cēra (Villavaṇ).<sup>1</sup> It is not easy to decide who exactly the Pallava king was that is referred to and on what occasion this fight with the Villavaṇ took place. There are other incidents of a manifestly historical character mentioned by the Ālvār in this hymn. They are; (a) a victory against the Pāṇḍya (st. 2) who is said to have had a mountain fortress (*kuṇṇeyil*) (5); (b) A victory at Maṇṇai said to have been won of old (*muṇṇāl*) (3); (c) a victory against the Pāṇḍya near Karuvūr (7), the Pāṇḍya being mentioned here as the lord of the world (*ulakuḍaimaṇṇavaṇ Tennavanai*). Now, are these incidents to be treated as, all of them, relating to the reign of one Pallava ruler, possibly contemporary with the Ālvār? Or, are we to understand that Tirumaṅgai has just brought together some incidents in Pallava history to embellish his hymn in praise of a Pallava shrine?<sup>2</sup> There can not be the least doubt that, on the former hypothesis, the Pallava ruler referred to must be Nandivarman Pallavamalla. The mention of a powerful Pāṇḍya as the opponent of the Pallava, and the references to Maṇṇai and Kuṇṇeyil (which may be the Kālidurga of the Udayēndiram plates) may be taken to support this view. And an ingenious suggestion made by Pandit M. Raghava Aiyangar<sup>3</sup> enables us to treat Neṇmali of the Ālvār's hymn as a reference to Udaya Candra's victory against the Śabara chieftain. The suggestion is that, though Villavaṇ normally means the Cēra king, we may, in this context, take the word to mean a hunter (Śabara). If this view is accepted, then Neṇmali *does* come to be another form of the epigraphical name Nelvēli. But, as the careful reader must have guessed already, there are difficulties in the way. First there is the difference in the forms Neṇmali and

1. *Vidaittirai-villavaṇ Neṇmaliyil Veruva-cceru-vēl Valangai piḍitta Paḍaittirai Pallavarkōṇ—Periya Tirumoli*, II, 9, 8.

2. Compare Dr. S. K. Aiyangar *Ancient India*, pp. 410-11.

3. See *Ālvārkaḷ-kālanilai*, p. 101.

Nelvēli which is not easy to account for. Then we have the statement that Maṇṇai was an ancient battle (*muṇṇā!*) when the hymn was composed; and lastly the fact that the battle of Karuvūr is not mentioned in the incipitions. It should be remembered also that there is a large assumption underlying this part of the discussion *viz.*, that Tīrumaṅgai Aḷvār has, in this hymn, mentioned only the incidents in the reign of his Pallava contemporary.

At least two Nelvēlis appear to be mentioned in the Cōla inscriptions—one of them in Īṅgā-nāḍu (No. 213 of 195) and the other in Nelvēli-nāḍu a subdivision of Tenkarai Paṇaiyār-nāḍu in Cōla-maṇḍalam—(276 of 1916). Though not conclusive as an argument, the suggestion may still be made that Nelvēli which gave its name to a *nāḍu* might have been the celebrated Nelvēli of Sundaramūrti's hymn.

The upshot of the preceding discussion is, therefore, this. We have two battles of Nelvēli and one of Neṇmali. The earliest of these was a Pāṇḍyan (Arikēsari's) victory, possibly against the Pallavas. The second battle of Nelvēli was a Pallava success against a Śabara chieftain. The battle of Neṇmali was either the same as the latter or altogether another historical incident. The questions whether the two battles of Nelvēli were fought in the same place and whether Tīrumaṅgai's reference to Neṇmali does relate to the second battle of Nelvēli are too closely bound up with the identity of the Śabara chieftain Udayana for us to be able to answer satisfactorily in the present state of our knowledge about him.

# ANCIENT BHṚGUS.

BY

A. PADMANABHAYYA, B.A.,  
Pleader, Tiruṭpathi.

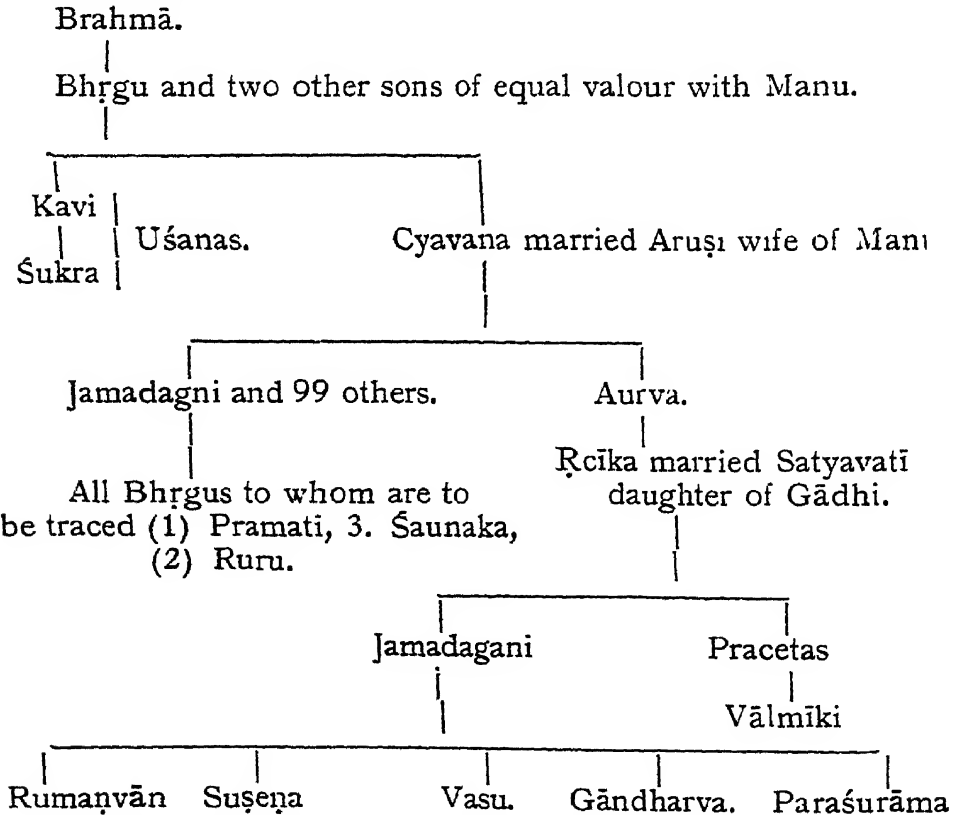

(Continued from page 67 of Vol. V. Part I.)

## CHAPTER VI.

It is now necessary for us to consider, an account of the Chief Bhṛgu leaders, as we find them in our sacred literature.

The Mahā-Bhārata and the Viṣṇu Purāṇa give the account in some detail.<sup>1</sup>

From the account given in the above works, the following geneological tree may be roughly formed.

- |    |     |          |          |                         |
|----|-----|----------|----------|-------------------------|

|    | "   | Amśa III | Ch. III, | Viṣṇu Purāṇa.           |

*Bhr̥gus—Āṅgirasas-Ātharvans—Their World-wide Influence.*

The Bhr̥gus are originators of the "Fire cult" and from "Fire cult" arose the worship of the Phallus and its counter part that of the *Yoni*, the *Puruṣa* and *Prakṛti*—representing the fatherhood and mother-hood of the God-head. The union of Father God and Mother Goddess represents production.

Varuṇa is the earliest God and he is the ancestor of the Bhr̥gus. Bhr̥gu according to the Brāhmaṇa literature is a Vāruṇi or descendant of Varuṇa and the Mahā-Bhārata calls all Bhr̥gus as Vāruṇeyas. The 'boundless Aditi' is the consort of boundless Varuṇa and this is the central basis on which the cult of the Bhr̥gus is based. Varuṇa combines in himself the two principles. He is the source of the Kṣatra or Virile power of the universe and he is the Māyī or Māyāvī and the sustainer or preserver and this Māyā or occult power is the female principle which represents the preservative and protective character of the God-head of which Viṣṇu is a later manifestation. One branch of these ancient "Fire worshippers" gave prominence to the "female" element of God-head or Aditi and it is this worship of Aditi which gave rise to the worship of the "Great Mother of Gods" in the Aegean area, a cult carried there from the Bhr̥gu-Phrygian-Hittite land. This fact is manifest from the symbolism employed for both aspects of the cult. Varuṇa-Brahma-Rudra are manifestations of the virile power of the Universe and their symbolism is the Phallus and the Bull, and Varuṇa the ancestor of the Bhr̥gus is therefore called *Go-pati* or the lord of the Cow or the Bull. The ancient *Go-tamas*, a branch of the Āṅgirasas of which Dīrghatamas, the son of Utathya and nephew of Bṛhaspati is a prominent representative, are the chief repositories of this cult. Dīrghatamas learnt this cult from the children of Surabhi according to the Ādi-Parvā of the Mahā-Bhārata and it is the *Go-vrata* referred to in the Matsya Purāṇa. The Mahā-Bhārata again refers in the Udyoga-Parva to Vipras practising this cult. This universal Cow-Goddess *Go* or Aditi is the guiding Goddess of Vāruṇi = Bhr̥gu = Jamadagni and Vāruṇi = Vasiṣṭha whose sacrificial Cow-Goddesses are Surabhi Kalmāṣa, Surabhi Śabala both meaning speckled or spotted and it is curious to find that the founder of Ilum-Troy should be guided by a spotted cow, a gift made to him by a Phrygian King, and Cadmus, the founder of Thebes in Boetia, should be guided by another Cow. It is interesting also to note the Iconic representation of Jamadagni

guided by Surabhī Kāmadhenu should be found in the country of Śrī Śailam in the Kurnool District of South India. The Greek Hera with Cow's horns, the Egyptian Isis with cow's horns, Zoroaster's respect for the Cow-earth Goddess Araimati, the mythical Pṛthu and the Cow, Brahmā and the earth Goddess often approaching him in the form of a cow show the importance of this cult. Its origin is in Go-Medha-Plakṣa, the ancient land of the Bhṛgu, and the places where we find it are the Colonies of the Bhṛgu. This cow or Go is the sacred Gāyatrī, the Mantra *par excellence*, the seer of which is the famous Ṛṣi Viśvāmitra related to the Bhṛgu-Ṛcika. Gāyatrī is probably traceable to a word which means "Fire Cow". The Āṅgīrasa Gautama is a worshipper of Gāyatrī according to the Devī-Bhāgavata and the curses levelled by him against the ungrateful Brahmins who violated his hospitality in a prophetic form shows the degeneracy to which this cult was reduced in its later mutilated manifestations. The Āṅgīrasa Gautamas represent the first original thinkers on the first principles of the God-head-Brahmā in opposition to ritualism and the originators of the Sāṅkhya Kapila and Gautama Nyāya systems of Philosophy later on presented to us in the degraded Epicureanism of the Greek and the Cārvāka-Lokāyatika system of Bṛhaspati, an Āṅgīrasa. Both the Epicureans and Cārvākas had good beginnings and became degraded only later on.<sup>1</sup> The Cārvākas represent the ancient Asura Bhṛgu magical powers. Cārvāka is a word traceable to the Fire God in the Minoan area and suspiciously suggestive of charites allied to Hephaestus, the Pelasgian fire God. Curiously enough the Mahā-Bhārata makes the Cārvāka, an ally of the Kurus, the representatives of the ancient Asuras. Bhṛgu-Āṅgīras Atharvans, have their parallel in the western area of Bhārgava influence—*viz.*, the Caberi, Curetes, Corybantes.<sup>2</sup> The Vasus<sup>3</sup> and the Pitris have their parallel in the Lares Manes of the Pelasgic-Latin—Etruscans with the Vestal vergins or Pitṛ Kanyās. Pitṛ Kanyā 'Go' is the wife of Śukra Bhārgava. Satyavati, the wife of Śantanu is a Pitriya Kanyā according to Harivaṁśa. She is the daughter of Uparicara Vasu. Kuntī is connected with Durvāsas. The Vasus are Pitṛs or Manes or Lares and Gods residing in "Fire".

1. See also Greek Pyrrhanism.

2. See Maha-Bharata Anus. Chap. LXXXV.

3. There are also eight Caberii like the Vasus—See Art : on Phœnicia E. B. 9th Edn.

Almost all the names mentioned in the genealogical tree are names applied either to the "Fire God" or priests of the "Fire God" in Medo Persian History. Brahmā or Baresma, Kavi and Ṛcika are names of priests mentioned by Sir William Rawlinson. Speaking of the religion of the Parsi community that writer says "Worship is conducted by priests called (1) Kavi (seers) Karapani (sacrificers) Ṛcika (wisemen). Brahmā according to the Purāṇas is the first or Adi Kavi, and it is he that gave inspiration to Vālmiki, (the son of Ṛcika, according to Viṣṇu Purāṇa), a hunter in his previous birth. Ṛcika, a hunter God, is mentioned in the Yajur Veda. Brahmā, the first poet is Jarat Tvaṣṭṛ or Sing-maker and Jarat Tvaṣṭṛ or Zoroaster is thus referable to Brahmā, the first ancestor of the Fire worshipping Zoroastrians. Yima or Yama is an early hero of the Zoroastrian epos; Yama, Djemshid are names from which Jamadagni is certainly traceable. Jamadagni and Djemshid are names which are traceable also in Ishmedagan of the adjacent Babylonian country identifiable with Śālmali Dvīpa of our Purāṇa. Urva or Aurva is a name also traceable in the early Babylonian Priest Kings.

These names are sufficient for us to say that Plakṣa and Kuśa, which cover Medo Persia, are the original place of the early Bhr̥gus.

We have now to see whether we can find the names of these mystic people in other countries. This leads us to the consideration of (1) "Caberii" (2) "Curetes" (3) "Corybantis", mystic mythical names connected with Fire-cult, which we find in the history of the Phœnicians, the Pelasgians, the Etruscans and the Greeks.

(1) *Caberii*.—Hephæstus is an early Greek fire God traced to the Pelasgic race. He is the lightning God and Homer says that Hephæstus was hurled from heaven by his father Zeus. It is said "wherever a Pelasgic race is found, most certain there the God is found associated with Caberii". Herodotus finds the Caberii in the Pelasgic settlements of Samothrace, and Imbros with its Itty Phallic emblem. Hephæstus is called the Cabirus *par excellence*".

Hence the equation is possible Cabirus = Kavi Hephæstus = Kavi or the best fire God.

“According to Pindar, this Hephæstus or Cabirus, is the lightning that has descended to the earth, and became the origin of all life and the first man”.

In Pelasgic Athens, Hephæstus occupied a very high place along with Athene. In the oldest Greek traditions Hephæstus and Athene would appear to be the parents of Erichthonus, the serpent God. Once it is admitted that Athens owes its origin to a Pelasgic fire worshipping race, we have a clue to the names—Hatti—Athene—traceable to Atty—the fire Fig emblem. Athene is thus a fire Goddess, probably the earth Goddess, who gave birth to Erichthonus the serpent or Nāga. Nāgas are fire-born and also earth-born. The two Asura religions, Jainism and Buddhism are of Nāga or Kṣatriya origin. The Kurus are certainly Nāgas as would appear from a comparison of the Kuru names with those of Nāgas given in the Mahā-Bhārata. Hence, Kuru, Nāga, Hittite, Bhṛgu are in a way synonymous. Cecrops the Nāga or Serpent King of Athens has suspiciously the characteristic of a Jain Tirthaṅkara. Jain Tirthaṅkaras have serpent emblems. Zeus Phratreus puts us in mind of Vrātya, the supreme God head mentioned in the Praśnopaniṣad and the Tāṇḍya Brāhmaṇa.

The common link to connect the Kurus, Nāgas, Hittites Phœnicians, Ikṣvākus are the “Curetis” identified with the Caberii.

(2) *Curetes* and (3) *Corybantes*.—

The Curetes are held to be synonymous with Corybantes. I suspect that the Krauñca Dvīpa of the Purāṇas is called after these corybantes and the symbolism of the double headed eagle of Eyuk near Boghaz Kieu Hatti represents this symbolism. It may be the same as the Phœnix or the double Phœnix representative of the Sun God or the Fire God, Bhānu referred to in Ch. 223 of the Vanaparva of Mahā-Bhārata as the son of Angiras.

Curetes are priests who brought up Zeus. Their influence like that of Caberii is seen in the Pelasgic area in some place names. The island of Crete is called after them Curetes. Cures is a town in Italy inhabited by the Quirites, an ancient tribe traceable to the Pelasgic Etruscans.

Surat and Barygaza (Broach) in India connect them through the Bhṛgu. Sūri is a word in Sanskrit meaning learned, a term which may without any hesitation be applied to the Bhṛgu-

---

1. See Enc. Britta. 9th Edition, Art on Fire.

Vipras. The Yadus accompanied Bhr̥gus and Purāṇic evidence is that Kuśasthalī founded by a descendant of Cyavana Bhārgava was later on occupied by Yādavas under Śrī Kṛṣṇa and Raivata a descendant of this Cyavana married his daughter to Balarāma. The Yadus are related to Sūra-Senas, which may mean leaders of Curetes. The Bhr̥gus are prominently connected with the Yadus. Chāndogyopaniṣad says that Śrī Kṛṣṇa Devakīputra is a pupil of Ghora Aṅgīrasa—a name synonymous or at any rate connected with the Bhr̥gus. Harivaṁśa mentions that Kṛṣṇa visited Paraśurāma before he attacked Śṛgāla Vāsudeva. In the Mokṣa Dharma Parva, it is Śrī Kṛṣṇa that relates to Yudhiṣṭhira the greatness of Śiva, when Bhīṣma pleaded his inability.

The Ghoras or Aṅgīrasas of which sage Durvāsas is the type, (he is called Ghora in the Mahā-Bharata Ādi-Parva) are probably the same as the Ghorbastae referred to in Persian History and are probably also related to the Corybantes.

Another ancient people directly connected with the Caberii are the ancient Phœnicians. The writer of the article on Phœnicia in the Enc. Britta. 9th Edition says regarding the religion of the Phœnicians.—“ Peculiar to Berytus is the worship of Poseidon and other sea-Gods, who are connected genealogically with Zeus Belus, a son of *El*, born beyond the Euphrates, and perhaps therefore connected with the Babylonian fish Gods. Berytus was also the Chief seat of the worship of the Caberii,<sup>1</sup> the seven nameless sons of Sydek, with their brother Eshmun, who is the eighth and the greatest of Caberii”. The learned writer of the article again says “The Phœnicians themselves regarded as not primitive the many Egyptian elements which were quite early introduced into the religion of the Caberii and especially of Eshmun. On the other hand, a figure allied to Eshman Taaut, the inventor of the Alphabet is certainly borrowed from the Egyptian Tehuti. So too Onka is probably the Anuka of Sais, and it is possible that the whole cycle of Gods who revealed and interpreted the sacred books is Egyptian, some of the latter have the form of a serpent”. Ethiopian Egypt called Kesh or Cush is a colony of the ancient Elam, or Kuśa Dvīpa, a fact which is established by archæological connections.<sup>2</sup>

1. Cf. Śyamanta Pañcaka, the pools of the Pitṛs of Paraśurāma.

2. See Enc. Britta. 13th Edition.

"The two lowest strata belong to the stone age, and the first is characterised by a thin fine pottery with yellow paste decorated with geometrical patterns, and animal or vegetable figures in black and brown red. Some of it is similar to the Pre-historic pottery of Egypt". The God of ancient Elam Susinak worshipped also under the secret title of Atmanu, at Nitum Dilvan, a God too sacred to be seen by mortal eyes, has its counter part in ancient Egyptian religion. The writer of the article on Ancient Egyptian Religion 9th Edition says "The Solar group consists of Ra, or else Mentu, and Atmu, and Shu. Mentu, and Atmu are only a division of Ra, into his chief phases, the rising and setting Sun, the Sun of the upper and the lower world. Both are solar divinities. Shu, the solar light, is the son of Ra, or Mentu or Atmu". The Bhāgavata corroborates this when it says that the people of Kuśa Dvīpa are worshippers of Ātman. It is curious that this God of Elam should be worshipped unseen at Chidambaram, in South India, otherwise known as *Tillaivanam* under its Elamite name Dilvan. Shuṣan the city of Varuṇa is in Elam and the description of the Egyptian God refers to Mitrā-Varuṇā, and the Phœnician Eshmun and eight Caberii are Nāga fire Gods referred to in our literature as Vasus. Elam is the country of Nāga King Vāsuki and of Āryaka, the ancestor of Kuntī, favoured with children by *Durvāsas*. Eshmun, the eighth Caberii reminds us of Bhīṣma of the Mahā-Bhārata. Bhīṣma is the eighth Vasu, born as son of Śantanu, the Kuru King. He is the disciple of Bhārgava Paraśurāma, as Droṇa and Karṇa, other adept bowmen referred to in the Mahā-Bhārata.

The Curetes are worshippers of Zeus (Palasgian) who has all the characteristics of the Proto-Āryan Varuṇa.<sup>1</sup> This Zeus has all the characteristics of the Vedic Varuṇa. The collapse of Zeus in the west and of Varuṇa in the east runs on parallel lines. Orphic hymns are traceable to "Ouvrva" a Bhṛgu. The above comparative account sufficiently familiarises us with the connection of the Bhṛgus and their cult and the relics of their existence is to be found in certain fetishes symbo-

---

On the Goddess in the Hittite City of Membij

According to Christian symbology the Dove is the emblem of Holy Ghost, representing the fire or spirit or God. The Dove is a sacred bird of the Syrians and their Goddess Semiramis like Śakuntalā was brought up by Doves. The Dove is a bird of good omen in the western countries and Asia Minor. In the semitic flood legend, it is this bird that indicated to Noah the setting of land. But curiously enough it is a bird of evil omen with the Ṛg Vedic Āryan<sup>1</sup> and it is mentioned as the bird of

---

1. Ṛg Veda, X, 164.

Yama or God of Destruction, may be Fire. But in the AEgean area it is the symbolism of love or Kāma which is also the product of Fire—Kāma is an important God in Atharva Veda. It symbolises the sexual craving of the "Great Mother" for production and the union with the Universal father is to be brought about by Fire. It may be that this was the original idea taken by the ancient Bhṛguś to their colonies and lost to us because in the Ṛg Veda prominence is given to Puruṣa and not to Prakṛti—Patriarchy in preference to Matriarchy. But Kālidāsa, a worshipper of the "*Universal Mother*" introduces Agni into the presence of Śiva in the form of a dove who talks to the God on love affairs.<sup>1</sup> The story of Śibi reveals Agni in the form of a Dove pursued by Indra, the hawk.

## CHAPTER VII.

### THE BOW SYMBOLISM AND DHANUR VEDA.

There is another symbolism of the ancient God Varuṇa the God of Bhṛguś by which is manifested his Kṣatra or power and which connects him with the ancient Assyrians. This symbolism travelled from Assyria to the southern most corner of South India a portion of the ancient Bhārgava country—Dhanush Koṭi and Kerala. It is the bow or Dhanus. The ancient Bhṛguś from Varuṇa—Rudra downwards to Paraśurāma are adepts in the art. Jamadagni, Ṛcika, Paraśurāma are mentioned in the Mahā-Bhārata as repositories of Dhanurveda or Archery and that is why Bhīṣma, Droṇa and Karṇa are mentioned as pupils of Paraśurāma.

It is the symbolism of "Bow" that establishes the identity of Varuṇa, Rudra or Śiva over and above the statements in the Mahā-Bhārata relied on by Mr. Pargiter in his ancient Indian Historical Tradition page 185 "Śiva who had the form of Varuṇa took Bhṛgu as his son"—basing his statement on Mahā-Bhārata Ānuśāsanika Parva, ch. 85.

Rudra's powerful bow is an oft repeated theme in the Veda. Varuṇa's bow is equally powerful. Scholars like Bloomsfield Maxmuller and Ragozin have shown us the all importance of Pre-Historic God Varuṇa and established his identity with

1. See "Kumāra Sambhava," Chap. IX.

- (1) Zeus (Palasgian) later on subordinated to Poseidon-Neptune.
- (2) Ahurmazda of Zoroaster.
- (3) Ashur-Assur of Assyria.
- (4) Varuṇa-subordinated to "Lord of Waters" and as Lord of a cardinal point.
- (5) Yahveh of the Jew.

Assyria gives us the key to solve the importance of the bow symbolism. The bow is the symbol of Ashur and a land of the bow is referred to in the Babylonian History.<sup>1</sup> In its wars with the South, Kish was often assisted by another Northern Kingdom, the reading of the name of which, and consequently its precise situation, is still uncertain. The name has been read as the "Land of the Bow". Thanks to the publishers of the New Standard English Dictionary who gave us an image of this God with the bow symbolism and connected him with the Heaven God Anu of the Babylonian and Yahveh of the Jew. Varuṇa's powerful bow is presented to King Janaka Videha of Ramāyāṇa. Varuṇa presents the bow Gāṇḍīva to Arjuna in the Bhārata. Asura Varuṇa, Ashur of Assyria are thus Gods of Janaka Videha, the descendant of Nimi, and of the Assyrian the descendant of Nimrod—the first founder of Assur. This symbolism travelled to the west coast of India as far as Dhanuṣkoṭi, or end of the bow. The Bhils of Rajaputana and Asirgarh and Turanmal in Bombay sacred to the great bowman Aṅgīrasa Aśvatthāmā, are middle posts. Kerala or Cera, the reputed country of Paraśu-rāma, adopts the bow symbolism in the flag of the Cera Kings—a fact amply supported by the existence of Villavars referred to by Mr. Kanakasabhai, in his "Tamils 1800 years ago." According to Purāṇic evidence Agastyas and Pulastyas are identical and Pulastya is the source of the Viṣṇu-Purāṇa who got the lore from Bhṛgu. According to Rāmāyāṇa, Agastya the son of Mitrā-Varuṇa is a famous Ṛṣi, who presented a bow to Śrī Rāma and eventually settled in the South. The Bhṛgu Dravidian Ṛṣis are later on stigmatised as Brahma Rākṣasas; the God Varuṇa is displaced and later Indra Parjanya husband of Sītā (the Furrow

---

1. See Assyria and Babylon :—Enc. Britta. 9th and 10th Edition —Assyria and Babylon Volume, XXVI. The land "ur" of the Chaldees is also noted for its long bow archers.

Goddess) in metamorphosed into Rāma, husband of Sītā, and is said to have killed Rāvaṇa Asura, the same as Varuṇa Rudra or his protegee. All this is attempted to be done by later sectarian bias to give prominence to one of the triune aspects of Varuṇa, as Protector Preserver namely Viṣṇu. The existence of many versions of the Rāmāyaṇa is proof positive of this. The original Rāmāyaṇa is lost to us and of its existence and of its relation to the worship of Varuṇa and Vāyu there is the internal evidence in the Rāmāyaṇa itself. Mahā-Bhārata in the Ādi-Parva refers to a Ramo-Pākyāna under the authorship of Uśanas. The Hari-Vaṁśa refers to a Rāmāyaṇa dramatised and enacted by the children of Śrī Kṛṣṇa, the Yādava. In fact the authorship of Rāmāyaṇa attributed to Vālmīki is called in question by Aśva-Ghoṣa in his Buddha Caritra who attributes it to Cyavana Bhārgava, the ancestor of the Raivatas, who are allied to the Yadus. Cyavana is a blind sage rejuvenated by the Dioscuri or Aśvins. The Dioscuri are Gods of the Bhṛguś and are clubbed with the Cabirii. They are found in all the countries wherever we find a Bhārgava race. As Gods of the sea farers and as Medicine Gods, they are closely associated with Varuṇa and Rudra. Though mentioned together they have separate names—Castor and Pollux in the West; Nāsatya and Dasra sons of the Eighth Āditya, Mār-tāṇḍa in the East.<sup>1</sup> They are Śūdras among the Gods probably because they are Medicine Gods. They represent the priest-hood of ancient Babylon, the Aspinu, and Śukra Bhārgava is a Sukhur or a priest of the Babylonian and Dioscuri probably means the Gods of the Curitis or Caberoi. The Ass or the Donkey is their vehicle and the name Dasra is also applied to the Ass. In the Ṛg-Veda<sup>2</sup> one Kṛṣṇa addresses these Gods as coming in a cart driven by the ass. An ass is always associated in the worship of Śrī Kṛṣṇa in the South and the apparent reason seems to be that it represents the Aśvins, the Gods of the Yadus, who came to our country along with the Bhṛguś from over the seas. One tribe of the Yadus are Dasarhas probably named after Dasra, one of the Aśvins. The Aśvins thus represent the God of the Asura Yadus—children of Asura-Madhu. Aśvins are always associated with a woman and the Dioscuri appearing with a woman (their wife or sister not known) is depicted on one of the Etruscan vases found in the excavations of one of their buried cities. Puru-

1. See Mahā-Bhārata Śānti-Parva, 208.

2. Ṛg-Veda, I, 34.9—VIII, 74.7.

ṣottama Kṣetra in the Kaliṅga country is probably a temple of the Dioscuri and their sister. Kaliṅgas are noted ancient sea faring people.

Paraśurāma's overthrow, the incidents of Tāṭakā, Mārīca, Dūṣaṇa, Subāhu, Khara, Śūrpaṇakhā are incidents, I believe relating to the overthrow of Aśvins the subordinate Gods of Varuṇa. Exigencies of space and time forbids me to enter at great length into the account in our two epics to show how the children of Varuṇa the Pulastyas and the Kurus, are said to have been worsted at the hands of the votaries of Indra. Indra Parjanya triumphing and recovering Sītā from Varuṇa (El Rupon) the Pulastya is the theme of the Rāmāyaṇa. Indra's son triumphing over Kurus is the theme of the Bhārata. The Kurus are curiously said in the Bhārata<sup>1</sup> to be the reanimated spirits of the ancient Pulastyas and the Yādavas are all said to be Asuras; the irony is both Rāma and Arjuna derive their power from the bows presented to them by Varuṇa.

*Ikṣvākus, Yadus—Kurus.*

The original cradle of these races having been traced along with that of the Bhr̥gus to the ancient Plakṣa and Kuśa Dvīpas it is but reasonable to expect an account of our Epics and the doings and history of their heroes in the countries represented by Kuśa and Plakṣa Dvīpas.

## CHAPTER VIII.

It is necessary that we consider here the account of Śālmali and Krauñca Dvīpas mentioned in the Purāṇas as it is necessary to know how the Bhr̥gus, from their central seat in Plakṣa and Kuśa, dispersed in various directions.

*Śālmali Dvīpa.*

Without entering into the details of geography and Ethnology, mentioned in the Purāṇas, we may identify this country with Kurdistan, Mesopotamia, Northern portion of Syria and some portion of Cappadocia on its western side as far as the Euphrates. According to the Purāṇas the island is so called from a Śālmali, or silk cotton tree. The discussion of the details, though interesting, will be wearying at this stage. Babylonia must be partly located in Kuśa and partly in Śālmali.

---

1. Ādi Aṃśāvatāra Parva.

The word *Sālmali* must give us the clue to the identity *Garuḍa* is according to the *Bhāgavata-Purāṇa* known as *Sālmali* *शाल्मलि*; or one sitting on *Sālmali*. But really *Sālmali* is not a tree but a country. The *Historians History of the World*<sup>1</sup> gives us a picture of an eagle headed man or God carrying in his hands a vessel, which to the Indian mythologist must certainly carry the idea that it is *Garuḍa*, the son of *Kāśyapa*, who according to both *Mahā-Bhārata* and *Rāmāyaṇa* is known as *Ariṣṭha Nemi*, the vessel in the hand denoting *अमृतकलश*. Another picture given at Vol. II, page 573<sup>2</sup> symbolises the defeat of Assyria at the hands of Medo Persia. These two pictures considered along with another at page 562 of *Enc. Britta*. 13th Edition Vol. II, page 562 will leave us no alternative but to accept that *Garuḍa* represents an Assyrian hero or Demi-God and is therefore symbolised in Assyrian monuments. *Garutmān* and *Suparṇa* are also mentioned in the mythology of the Zoroastrians. According to the Vedic evidence,<sup>3</sup> *Regozin's 'Vedic India'* *Suparṇa* or *Garuḍa* is the vehicle of *Varuṇa* and the wings of the disc represent the wings of *Garuḍa*. In later mythology when *Varuṇa* is displaced by *Viṣṇu* he is made the vehicle of *Viṣṇu*. Ancient Assyria comprises mostly modern Kurdistan. Kurdistan itself means the country of *Kadru*, the mother of the *Nāgas*, step brothers of *Garuḍa*. *Assur—Ashur—Ahura* is identical with *Varuṇa*. "Ashur was the God of the people of Asher. His peculiar symbol was the winged disc".<sup>4</sup> "The Asuras are noted for magic, medicine, sculpture, architecture, and military prowess. The ancient Persians not only succeeded to the empire of Ashur but absorbed and cherished its culture."<sup>5</sup>

*Nimrod* is the earliest eponymous Hero of this country and *Nimeṣa* is the son of *Garuḍa* and *Ariṣṭhanemi* is his father (*Mahā-Bhārata Udyoga-Parva*, Ch. 101). *Sālmali* is the name of a Kuru King, the founder of *Kurukṣetra*, according to the *Mahā-Bhārata*.<sup>6</sup> *Kurukṣetra* is the land of the *Kurus* and the *Kurus* are

the Nāgas. Almost all names of Kuru Kings are names of Nāgas which we find in the Astika-Parva of the Bhārata. Their connection with the Kurus is apparent from the fact that Astika, son of Jaratkaru and nephew of serpent King Vāsuki of Pātāla, is a pupil of Cyavana Bhārgava according to the Mahā-Bhārata.<sup>1</sup> In fact Utanka, the pupil of Veda extols the Nāgas Takṣaka and others as if situated on the banks of Ikṣumatī near Kurukṣetra. The Nāgas being related to Garuḍas, the country of Garuḍa being Assyria, interesting issues arise as to the situation of Kurukṣetra, the former Samanta Pañcaka of Bhārgava Paraśurāma, situated near the Naimiśa forest. Kurukṣetra is the sacred land near the river Sarasvatī on the banks of which is situate the Uttara Veda, or, Northern altar of Brahmā, the first ancestor of the Bhr̥gus.

The affinity of names and their accounts in the Babylonian Ellamite, and Assyrian History namely Sargon of Agade, and his vestal virgin mother, Semiramis, Derketo, the fish Goddess Birth and Death Story of Cyrus the great of Arshah and many other names and incidents, to Sūta Karṇa, Kuntī, Śakuntalā Ajāmiḍa, Pitṛkanyā Satyavatī, the daughter of Uparicara and Adrika, Vāsudeva, Śrī Kṛṣṇa, Kaṁsa and quite a number of similar names and incidents led me into an investigation of the matter and leads me to the belief that the great war of Mahā-Bhārata, if it has ever taken place at all, occurred in the ancient land of Elam on the banks of Aksu (same as Ikṣumatī) and what we have in India is only a colonial account. It is connected with the account of ancient Asuras and that is why we find no reference to it in the post-Vedic Brāhmaṇa literature except some names and the Purāṇas and the Epics being Asura Literature as seen from the statements found in the works themselves preserve the same in detail. The reverse theory of the Ellamite place names being colonial ones is not possible in the face of Epigraphical Evidence of the brick inscription of King Pukhia, of Tuschurmati. Mr. C. W. Johns in his book on Assyria, Cambridge Manual, page 12, says "A brick found at Tuschurmati, on the Aksu, a tributary of Adhan or Rhodanus, bears an inscription of Pukhia, son of Asiru, king of Kurushitu. It is written in Semitic." The name of King Pukhia reminds us of the Ikṣvāku King Pauṣya who along with Janamejaya, son of Parikṣit, appointed Veda, a pupil of Upamanyu, as his preceptor according to the Pauṣya-Parva of the Mahā-Bhārata. This Puṣya or Pauṣya is the

1. Cf. Babylonian Priest King Utug.

Ikṣvāku King Saudāsa for whose patronage Vasiṣṭha and Viśvāmitra so strenuously fought and which I believe lead to the famous Dasaragna war of the Ṛg Veda. Some miles to the south of this Tuschurmati<sup>1</sup> the map shows the ruins of a place called Kurustud. That this is a Kuru Settlement is amply born out by the statement in the Viṣṇu-Purāṇa, which mentions the Kurus and Āryakas as people residing in Plakṣa Dvīpa. Plakṣa and Kuśa Dvīpas together form the various Kuru countries, *viz.*, Deva Kurus, Uttara Kurus, Kuru proper including Kuru Jāṅgala. The Bhārata clearly supports this.

Naimiśa forest, is in Babylonian Elamite country and the curious story of its origin being due to a wheel (Nimi) sent by Brahmā to show the way to the Ṛṣis to select a sacred place for doing penance is nothing more than the winged wheel of Asur, or the wheel of Hammurabhi of Babylon, both preserving the memories of Nimrod, the son of Cush, according to the Jehovistic portion of the genealogy of nations. Critical students of the Bible find it difficult to find Nimrod to be the son of Cush. But the name of Nimrod occurs also in the book of Micah V 6 "Land of Ashur" "Land of Nimrod". The Purāṇic genealogy of Nimi and Kuśadhvaaja will solve the difficulty. Nimi is an Ikṣvāku, and the priest Kings of Assyria are called Isakku. Abraham and Isac are Ikṣvāku Bhārgava priests and Assyrian history gives ample testimony of the rule of the Ikṣvākus in Assur and Mittani from days of King Māndhātā and his ascetic son-in-law Subari. Euphrates is the land of Bharatas, (Eu—Water) the leader of whom is the famous Viśvāmitra and the destruction of the Yadus brought about by the curse of Viśvāmitra and Kaṇva at the holy place of Piṇḍarika is an event which must have occurred at the reedy mouths of the Euphrates. Piṇḍarika is a Nāga and a son of Viśvāmitra.

The Bhārata is a redaction of the Śaunakas who got the same from the Sūtas or Cuthites of Kuzistan Elam. The Śaunakas are Bhṛgu Priest Kings probably of Babylon known as Su-anna. It is probable that River Tigris is named after Sigrā the great-grand-son of Puṣya or Pukhia according to the genealogy of Viṣṇu-Purāṇa.

---

1. See map in the Atlas published in the last Volume of the 9th Edition of Encyclopaedia Britannica.

The date of Pukhia (Puṣya), contemporary of Janamejaya is placed during the period of the first dynasty of Babylon which scholars place about 2700 B. C. The attempt of scholars to fix the date of the Bhārata War is therefore a wild goose chase, and if it is to be fixed the traditional date of the Purāṇas appears to be correct namely the end of Dvāpara.

The Kurus, Yadus, and Ikṣvākus entered our country along with the Bhr̥gus. The events of the rule of the Raghus and Kosalas from Ayodhyā can have no historical basis. According to the account of the Rāmāyaṇa of Vālmiki, the Daṇḍakas cannot form part of the kingdom of Daśaratha. The statement in the Uttara Rāmāyaṇa that the Daṇḍakas are named after a Daṇḍa, brother of Ikṣvāku, a Bhoja king, and his being cursed by Śukra, a Bhārgava, supports the entry of Ikṣvākus into India along with the Bhr̥gus. The Bhojas like the Nimi Videha Ikṣvākus are children of Nimrod—mighty hunter Kings with their settlements on the coast at Bhoja Kataka and Mṛttikāvaṭī. Their children are the later Kadambas and Ikṣvākus whose inscriptions are being unearthed at Nāgārjuna Hill. They are related to the Agastyas whose leader Agastya married their princess Lopā-Mudrā. The relationship of these Bhojas and the family of the Yadus is amply testified to by the Purāṇas and the statement of Rāma in the Rāmāyaṇa addressing Vālī near Kiṣkindhā, and telling him that the forest and the spot of ground on which he was standing belongs to Ikṣvākus cannot be supported if Ayodhyā is the centre. The names of the children of Rāma and his brothers is traceable to the Ellamite country and Pātāla. Assyrian Ashur the city of Nimrod, is also known as Patialki.

Rāmāyaṇa is purely an esoteric work, blending in itself the events and incidents in the Babylonian or Assyrian accounts of the Epic of Gilgamish with the RAM-YASHT of Zendavesta. The following points deserve notice.

1. Uruk (Supari-well guarded) is the well guarded Ayodhyā.
2. Isdubar its King has an Ikṣvāku flavour about him.
3. Great prominence is given to dreams in Gilgamish epic. In Rāmāyaṇa the dreams of Bharata and Trijaṭā deserve notice.
4. Eabani is similar to Hanumān the Monkey with the body of a beast and the wisdom of a man.
5. Eabani is tempted by a harlot and brought to civilised life like R̥ṣyaśṛṅga, the son of Ruru, or, Deer. Eabani is the son of Goddess A-Ruru.

6. The entry of Gilgamish into limitless darkness and his coming to the seashore after seeing light and trees and passing by a tree and grove with precious stones for fruit is similar to the entry of the monkeys into the cave of Svayam Prabhā and exit therefrom to the seacoast.

7. Rammon is the wind god mentioned in the Gilgamish epic. Rāma exhibits the qualities of the Wind God or Mahā Bala in casting Mārīca many miles away with Vāyavya astra and by casting away Dundubhi's corpse to a great distance by the mere touch of his toe and by throwing down with one arrow seven big palm trees.

8. Sitna Pishtam in the Gilgamish epic cures Gilgamish by the use of a plant having power to prolong life. Lakṣmaṇa in the Rāmāyaṇa is cured by the use of a similar plant brought by Hanumān from Droṇagiri.

9. The tale of the Eagle trying to reach the Sun (Shamash) and dying in the attempt is similar to the fate which Sampāti in Rāmāyaṇa says was brought on him by trying to effect a similar feat.

10. The rejection of the love advances of Ishtar is the cause of trouble to Gilgamish and the rejection of the love of Śūrpaṇakhā is the cause of the trouble of Rāma.

The connection of Rāma with the Ram Yasht of Zendavesta carries the esoteric nature of the theme still nearer.

Ram is the wind God of the Zendavesta. According to Ṛg Veda the wind God or Vāyu is the first of gods, and he has the right to the first drink of Soma. He may be identical with Indra or Varuṇa, both sky gods. Rāma's characteristics as a Wind God we have already seen. He is a descendant of Raghu and as such a Rāghava. Raghu is traceable to a root meaning "swift goer". Rāma is the best Raghu or Raghma. Ragh in the Median country, the city of Zoroaster, is the seat of Raghus probably. Like the Ram of the Zoroastrians the allied Bhārgava races have their wind God.

Phœnician—Kolpia.

Hittite—Thesup.

Babylonian—Ramman or Bin.

The latter Assyrian mounts this idea in the wheel symbolism with wings. The South Indian Kohls have their Cokka-

liṅga or Soku Liṅga or Vāyu Liṅga. Soku is a Dravidian word meaning Wind. Marā the evil striker is seen in the word Marut as applied to the Wind God. Vālmiki before he became a sage was asked to utter the word Marā which was transformed into Rāma. But the point of interest for us is the connection of Ram with our Rāmāyaṇa. The wind God Ram was worshipped according to Zoroaster by Kareseswa and ever so many others. The Aṅgīrasa Bhārgava weapons presented to Rāma by Viśvāmitra which circumambulated him as servants 33 in number—are the sons of Ṛṣi Bhṛśāśva. (Identified with sons of Kṛśāśva in the Viṣṇu-Purāṇa.)

The 33 Gods are traditionally mentioned from the Ṛg Vedic days and the Buddhists connect Buddha also with the heaven of 33 Gods.

## CHAPTER VIII.

### *Krauñca Dvīpa.*

The country occupied by the five sons of Shem according to the 10th chapter of the book of Genesis are—

1. The country of Elam.
2. Asuur, Media, Persia, Babylon, Chaldæa.
3. Arphaxad or Arabia.
4. Lud-Lydia: Phrygia, Cappadocia, and Asia Minor.
5. Aram—the upper portion of the country between the Tigris and the Euphrates.

We may identify Krauñca Dvīpa with item 4 above. Apart from the results obtained from a discussion of the details given in the Viṣṇu and other Purāṇas, a statement in the Mahā-Bhārata Bhīṣma-Parva regarding Mæonia fully corroborates the identity. Lydia and the 3 countries mentioned with it show traces of Bhārgava influence in every respect. The flood account is connected with Babylon and Medo-Persia. A fire cataclysm is connected with this country and corroboration for both is found in the Dravidian Dekhanese country and in our epics. The destruction of the cities of the plain mentioned in the Bible, the scene of which still eludes the Biblical Archæologist, has its counter-part in the destruction of Daṇḍaka by the anger of Bhārgava Śukra in the Uttara Rāmāyaṇa. The Fire cataclysm of Catacomana in the Phrygia Mænian country with its lake Cœle has its counter part in the Veṅgināḍu (दम्बरहू)

or burnt country as its counter part in the Dekhanese Andhra country with the lake Kolleru. The Goddess of Ephesus, whose temple is said to have been founded by Androgus and to whom the bee is sacred has her counter part in Śrī Śailam with a bee Goddess Bhramarāmbikā. A pond near the temple called Paraśurāma tank shows the Bhārgava origin of the shrine. These coincidences point to the migration of a common race with common traditions and these are Agnikula Bhṛgu.

The Phrygian or Bhṛgu origin of Ilium has already been seen and it is strengthened by the representation in art, of Paris the Trojan Hero with a Phrygian cap. This is the ancient land of the Hittites and the proverbial wealth of the Phrygian Midas, the Trojan Priam, attributable to their worship of (Great Mother) Mā, or Bhārgavī is corroborated by the accounts in the Mahā-Bhārata of the proverbial wealth of the ancient Bhṛgu and their being rooted out by the avaricious Kṣātriyas to secure their wealth.<sup>1</sup>

The Phrygians are the oldest people in the world, and the Hittites and Palasgians from the Phrygian countries extended their migration to the Etruscan country a fact sufficiently strongly well established by the writings of the western scholars.<sup>2</sup> The ancient Franks are the remnants of the ancient Trojans and their Bhṛgu connection with their battle axes is seen in the account of this race in the Encyclopædia Britannica 9th Edition but curiously enough this portion is omitted in the 13th Edition.

It is also found by western scholars that the founders of Ilium proceeded from Elam or Kuśa Dvīpa. It must be the land of Kussar held by Professor Sayce to be the original country of the Hittites. Elam thus represents the cradle of the Bhṛgu, the Kurus, the Hittites, the Phœnicians, the Yadus, and the Ikṣvākus. The migration of the Bhṛgu must, I think, synchronise with the conquest of Babylon by the Kassites, a branch of the ancient Hittites. Kāśyapa took the entire land of Paraśurāma, the last Bhārgava, as a gift and unceremoniously drove him out of the country. This must have occurred about 2400 B.C.

---

1. See account of Bhārgava Aurva in the Ādi Parva of the Bhārata.

2. See Articles on Etruscans, Lydia, Phrygia, Cappadocia, and Asia Minor generally in the Enc. Britta. 9th Edition and 13th Edition.

## CHAPTER IX.

*EL-the name of God Head.*

Elam is the original land of the Bhrġus, the children of Varuṇa. Elam means, the land of El or God and Varuṇa is El, the common name for God-head among all the Semitic races. Bhrġu-Dravidian and Semetic both preserve the word and connects the common origin of both, Shem and Kṣema (Garuḍa) are the connecting links. Semitic -Ilu, El, Ilah, Allah, El-Elum meaning high, most high "Lord" are words applicable to Varuṇa, the "King" met with in the pages of Rġ Veda—the Semitic relationship of man to the God-head, being, that of servant and master. In the Mediterranean lands, the names Eleusis, Elopia, Eleusiania and the people who observe them, *viz.*, Celeans, Philiasians, Pheneatei, Lacædemonians, Parrhasians, and Cretans, and the name of Eleleus, a surname of Bacchus, to whom the fig was sacred, and the names Eleleis applied to the Priestesses indicates to us the all importance of this word "El". Allat is Moon Goddess and Helen of Troy received divine honor in some places. Dravidian "Alamaram" a name applied to the Ficus Indica sacred to Śiva means nothing more than "God's Tree", the God being Bacchus-Śiva-Eleleus. It is the name of this God that was uttered by the ancient Asuras referred to by Patañjali and the Brāhmaṇas. The meaning is not understood and is unjustly ridiculed. There cannot be a more fitting time to the Asura to call upon the name of his God than when pressed by the foe in the din of battle. "He layo, Helayo" is a mutilation of Eleleus by the later Vedic Sanskritists and the God of the Asuras is Varuṇa.

The earliest Dravidian language must be the language of Plakṣa and Kuśadvīpas or the Pehlevi, Aramiac. Ancient words in the Assyrian and Babylonian records are words of Dravidian import and Bishop Caldwell has sufficiently established the Dravidian connection of Elamite languages. He calls the Brāhmī Dravidian, Brāhmī, for obvious reasons. Phœnicians are the originators of the Alphabet and Brāhmī-lipi is based upon Aramiac, a language whose influence on the languages of all countries from India to Mediterranean is apparent from the histories of all the countries intervening. Paisācī language is the parent of all these languages along with Pushtu. "The "Nānāvātāyee" in the Pushtu which means "I have come in"

—the rule of Asylum gives the direct contradiction to its Āryan connection.

The Ethiopic or Cushite engineering works, remnants of which are found in Arabia and Baluchistan, built on the same models and with the same skill attributed to the Ghur Bastī—the ancient fire worshippers are evidences of the engineering skill of these ancient fire worshipping Dravidian Bhṛgus. Their skill in music, and the invention of the Bhārgava Vīṇā, their knowledge of astrology and astronomy is borne out by the abundance of this literature in South India unconnected with the North Āryan. Orphic lyre, Orphic songs, which gave inspiration to blind Homer gave similar inspiration to the blind Cyavana, the reputed author of Rāmācarita and the Ramopākhyāna of Uśanas.

There is a numerical sacred notation running through the cult and the history and literature of all these countries.

- 12 Etruscan Cities.
- 12 tribes of Israel.
- 12 Kings of Malabar.
- 12 Adityas.
- 12 Lucumo of Etruscan.
- 9 Gods of Etruscans.
- 9 Kadamba Kings.
- 9 Aṅgirasas.
- 9 Navaguas.
- 9 Kings of Padmāvati whose capital is Karavīrapura a Nāga settlement.
- (i) 24 letters of Gāyatrī on which Rāmāyaṇa is based with 24,000 Ślokas.
- (ii) 24,000 Ślokas of Mahā-Bhārata at one stage.
- (iii) 24 books of Iliad and Odissey

The claim of the mystic race of Bhṛgus upon the learned public is apparent and within the limited space allotted to me I have indicated the main lines. I have under preparation a more detailed account of the ancient Bhṛgus, which I hope to issue in a book form shortly.

---

## REFERENCES TO ANCIENT STORIES IN THE RĀMĀYAṆA.

BY

N. AIYASWAMI SASTRI, LECTURER IN SANSKRIT, VENKATARAMANA  
ĀYURVEDIC COLLEGE, MADRAS.

Maharṣi Śrī Vālmiki, the renowned author of the Rāmāyaṇa, is the pioneer in the field of Sanskrit poetry. The style of the Rāmāyaṇa is so unique, lucid and attractive that to the later Ālaṅkārikas it has served to illustrate perhaps almost all the principles of Sanskrit Literary criticism. The chief characteristic of the style of the Rāmāyaṇa consists in the narration of events and description in simple yet forcible language, interwoven with numerous similes and occasional metaphors and other figures of speech.

It is held in certain quarters that most of the similes found therein have no bearing upon old traditional stories but are merely taken from nature and things connected. A careful perusal of the Rāmāyaṇa will, however, reveal the fact that in many places Vālmiki compares his characters to the heroes of old known to him. The story of king Yayāti among others seems to have attracted Vālmiki ; for he has referred to most of the important incidents in Yayāti's life. The episode of Yayāti is narrated in the Mahābhārata I, 69—87. He was the second son of king Nahuṣa and had two wives, viz., Devayānī and Śarmiṣṭhā. When he grew old, Yayāti got Puru's (his son) youth in exchange for his old age. After enjoying worldly pleasures for a long time, he came to realise their worthlessness; and renouncing them, he went to Svarga through severe penance. The jealous Indra once asked Yayāti, " Was there anybody equal to him in penance." Yayāti being a truth-speaker, his reply was " Nobody". Since no vain man is fit for Svarga, the king was thrown down on the earth by Indra. Yayāti, however, regained Svarga as the result of association with wise and good men.

Turning to the Rāmāyaṇa, we find the holy Vasiṣṭha confiding to Śrī Rāma in the Ayodhyākāṇḍa the message of Daśaratha in regard to fasting, as preliminary to his coronation. It is

said there : " King Daśaratha, your father, will, with pleasure, instal you on the throne tomorrow even as King Nahuṣa installed his son Yayāti<sup>1</sup>.

Daśaratha when lying prostrate on earth, sorely afflicted with grief on hearing Kaikeyī's harsh words regarding the banishment of Rāma, is compared to Yayāti by Vālmīki when he was banished from heaven by Indra<sup>2</sup>. The same simile is repeated in connection with Vālin, when he fell down in the battle field struck by Rāma's arrows<sup>3</sup>.

Rāma, while seeking Kausalyā's permission to leave for the Daṇḍakas, asserts that he will return to Ayodhyā from the forest having accomplished his father's promise, just as Yayāti, in olden days, came back to heaven from the world of mortals<sup>4</sup>. The same comparison is repeated once again by Rāma in a different form, when requesting Kausalyā to permit him to go to the Daṇḍaks and bestow on him her benedictions<sup>5</sup>.

Sumantra on his return to Ayodhyā, leaving Rāma in the forest, is questioned in detail by Daśaratha about Rāma's doings and he (Daśaratha) says that he will retain his life taking solace in hearing about Rāma's activities, just as Yayāti did in the company of the holy wise men after his down-fall from heaven<sup>6</sup>.

Bharata, bemoaning his father's loss, in company with his ministers is compared to Yayāti, in company with the holy sages of the forest after his down-fall from the heaven<sup>7</sup>.

Sītā was carried away by Rāvaṇa from the Āśrama in the absence of Rāma. Rāma searched for her in the neighbouring

1. प्रातस्त्वामभिषेक्ता हि यौवराज्ये नराधिपः ।

groves, mountains, rivers and other places, but could not trace her ; and filled with profound sorrow, he was lamenting over his calamities past and present. Lakṣmaṇa, consoling him, says that such happenings are but natural in this world and that none is free from calamities, though they are freed from it in a short while. Yayāti the son of Nahuṣa, though he owned the world of Indra, was not yet free from calamities<sup>1</sup>.

Sibi is known to have sacrificed his own body in order to fulfil his promise to a dove which in fear of a vulture took shelter under him (*vide* Mahā-Bhārata III 133 and 200). Similarly king Alarka sacrificed his two eyes for a learned brahmin who begged of him. Kaikeyī is represented by sage Vālmīki to have alluded to these events in order to impress upon Daśaratha the sanctity of fulfilling the vow<sup>2</sup>.

Again Rāmā, in order to persuade his mother Kausalyā to allow him to go to the forest, is represented to have quoted Kaṇḍu and Paraśurāma as examples of virtue and implicit obedience to father's commands<sup>3</sup>. The former, learned and conscious of good and bad, killed a cow only to respect his father's command; while the latter for the very same reason beheaded his own mother. (*See* Mahābhārata III, 117.)

To justify the death of Vālin, who pleaded innocence, at the hands of Rāma, Vālmīki quotes a parallel in the anecdote of Māndhātā and the monk, wherein the former, for an offence which

1. लोकस्वभाव एवैष ययातिर्नहुषात्मजः ।  
गतः शक्रेण सालोक्यमनयस्तं समस्पृशत् ॥ III. 66, 7.
2. संश्रुत्य शैब्यः श्येनाय स्वां तनुं जगतीपतिः ।  
प्रदाय पक्षिणे राजा जगाम गतिमुत्तमाम् ॥  
तथा ह्यलर्कस्तेजस्वी ब्राह्मणे वेदपारगे ।  
याचमाने स्वके नेत्रे उद्धृयाविमना ददौ ॥ II. 14, 4 & 5.
3. ऋषिणा च पितुर्वाक्यं कुर्वता वनचारिणा ।

जामदग्न्येन रामेण रेणुका जननी स्वयम् ।  
कृत्ता परशुनारण्ये पितुर्वचनकारणात् ॥ II. 21, 33.

Vālin was guilty of, beheaded the latter on the plea that a king would be failing in his duty, if he did not punish wrong-doers<sup>1</sup>.

The story of Māndhātā is told in the Mahābhārata (III. 127, VII 62 and XII 28, 81), though this part of the story is not to be found therein.

In the Kiṣkindhākāṇḍa the poet introduces as dr̥ṣṭānta the episode of Viśvāmitra. Tārā, the monkey-queen prays forgiveness of Lakṣmaṇa on behalf of Sugrīva, on the plea that Sugrīva, as Viśvāmitra in company with Ghṛtācī, is not aware of the fact that the time for action has come and is in deep slumber—a luxury which has been denied to him for sometime past<sup>2</sup>.

The story of Purūravas and Urvaśī, which has a Vedic origin and is later on narrated in the Matsyapurāṇa, Viṣṇupurāṇa and other works, is alluded to by Vālmīki also. Rāvaṇa persuaded Sītā to yield to his wishes and meeting with repulse, speaks in the following vein, “O timid one ! having forsaken me, you will repent for your action, just as Urvaśī, who kicked her lover, did”<sup>3</sup>.

Śrī Rāma, while leaving for the Daṇḍakas, asks Sītā to remain at home on the plea that Daṇḍakā is inhabited by beasts of prey and life there will be very difficult. He also advises her to be of service to Kausalyā and his step-mothers and do at no time any harm to Bharata. Sītā, in trying to convince her lord of the necessity for taking her also with him to the Daṇḍakas, requests him to realise that she is an inseparable companion, ever in the service of her own lord, just as Sāvitrī was of her lord Satyavān, the son of Dyumatsena<sup>4</sup>.

Again in reply to the persuasion of Rākṣasīs in the Aśoka garden, Sītā declares that she can love Rāma alone and none else, just as Lopāmudrā loved none but Agastya, Sukanyā none but Cyavana, Sāvitrī none but Satyavān, Śrīmatī none but

1. आर्येण मम मान्वात्रा व्यसनं घोरमीप्सितम् ।

4. द्युमत्सेनसुतं वीरं सत्यवन्तमनुव्रताम् ।  
सावित्रीमिव मां विद्धि त्वमात्मवशवर्तिनीम् ॥ II. 30, 6.

Kapila, Madayantī none but Saudāsa, Keśinī none but Sagara and Damayantī Naiṣadha<sup>1</sup>—heroines and heroes reputed for their chastity and mutual love.

In addition to the above references and those of secondary importance like Indra killing Vṛtra, Namuci and Bala, Vālmīki alludes to anecdotes connected with Viṣṇu, Śiva and Guha. While Rāma is bewailing the carrying away of Sītā, Lakṣmaṇa consoles him, saying that he (Rāma) is sure to have his beloved Sītā safely restored to him, just as Lord Viṣṇu got back the goddess Earth by subduing Bali. Then again in the Sundarakāṇḍa, while the ideal Bhakta, Hanumān, assumes his gigantic form, he is compared by Vālmīki to Viṣṇu taking up his Viśvarūpa in order to measure the three steps given to him by Bali Cakravartin<sup>3</sup>. In the Yuddhakāṇḍa also, the same comparison is repeated in connection with the description of Kumbhakarna<sup>4</sup>.

Once again in the Sundarakāṇḍa, Hanumān reducing himself to his normal stature is likened to Viṣṇu throwing off his Viśvarūpa after accomplishing his purpose, *i.e.*, subduing Bali<sup>5</sup>. In the Yuddhakāṇḍa, Indrajit, while pacifying his father Rāvaṇa, boasts of his immeasurable and fierce valour being like that of Viṣṇu while on Bali's Yajñaśālā<sup>6</sup>.

Among the stories connected with god Rudra, the burning of Manmatha and the slaying of Tripurāsura are well known. These

1. लोपामुद्रा यथागस्त्यं सुकन्या च्यवनं यथा ।  
सावित्री सत्यवन्तं च कपिलं श्रीमती यथा ॥  
सौदासं मदयन्तीव केशिनी सगरं यथा ।  
नैषधं दमयन्तीव मैत्री पतिमनुव्रता ॥ V. 24, 11 & 12.
2. प्राप्स्यसे त्वं महाप्राज्ञ मैथिलीं जनकात्मजाम् ।  
यथा विष्णुर्महाबाहुर्बलिं बद्ध्वा महीमिमाम् ॥ III. 61, 24.
3. त्रिविक्रमं कृतोत्साहं नारायणमिव प्रजाः ॥ IV. 67, 3.  
विष्णोः प्रक्रममाणस्य तदा त्रीन् विक्रमानिव ॥ IV. 67, 25.
4. त्रिविक्रमकृतोत्साहो नारायण इवाबभौ ॥ VI. 65, 31.
5. तद्रूपमतिसंक्षिप्य हनूमान् प्रकृतौ स्थितः ।  
त्रीन् क्रमानिव विक्रम्य बलिवीर्यहरो हरिः ॥ V. 1, 198.
6. द्रक्ष्यन्तु मे विक्रमप्रमेयं  
विष्णोरिवोग्रं बलियशवाटे ॥ VI. 73, 7.

are also alluded to in the Rāmāyaṇa. In the Āraṇyakāṇḍa, Sītā, in reply to Rāvaṇa's attempt to win her over, says that if only Rāma had seen him while she was removed by force, he (Rāmā) could have burnt him instantaneously, just as god Rudra did Manmatha<sup>1</sup>. Again in the Sundarakāṇḍa, the burning of the city of Laṅkā by the quick-footed Hanumān is compared by Vālmīki to the burning of Tripura by god Rudra<sup>2</sup>.

Once again in the Yuddhakāṇḍa, Atikāya, one of the sons of Rāvaṇa, pierced by the arrows of Lakṣmaṇa, is said to resemble Tripura suffering the same fate at the hands of Rudra<sup>3</sup>. Rudra with his bow of Vedas is again mentioned to describe Rāma standing firm with his Kodaṇḍa in the midst of his army of Vānaras<sup>4</sup>. The death of Khara by the fire of Rāma's arrows is stated by Vālmīki to resemble the burning of Andhaka by Rudra<sup>5</sup>.

Regarding Guha (God Skanda), it may be noted that Vālmīki mentions him in two places. In the Yuddhakāṇḍa, Narāntaka, one of Rāvaṇa's sons, marching against the army of Rāma on a horse, with Prāsa in his hand, is described by Vālmīki as resembling Lord Guha on his peacock with his Śakti in his hand<sup>6</sup>.

1. यदि पश्येत्स रामस्त्वां रोषदीप्तेन चक्षुषा ।  
रक्षस्त्वमद्य निर्दग्धो यथा रुद्रेण मन्मथः ॥ III, 56, 10.
2. हनूमता वेगवता वानरेण महात्मना ।  
लङ्कापुरं प्रदग्धं तद्रुद्रेण त्रिपुरं यथा ॥ V. 54, 30.
3. रुद्रबाणहन्तं घोरं यथा त्रिपुरगोपुरम् । VI. 71, 74.
4. भगवानिव संक्रुद्धो भवो वेदमयं धनुः ॥ VI. 75, 36.
5. स पपात खरो भूसौ दह्यमानः शराग्निना ।  
रुद्रेणैव विनिर्दग्धः श्वेतारण्ये यथान्धकः ॥ III. 30, 27.

According to Tilaka Tīkā on the Rāmāyaṇa, this simile relates to the incidents which have been mentioned either in the Māhātmyagrantha of Śvetāraṇya, a holy place on the bank of the Kāveri or in the Kūrmottara Khaṇḍa Adhyāya 36. From the former we learn that Rudra killed Antaka in order to grant Mārkaṇḍeya a long life; the latter, how ever, states that Rudra put to death Antaka (Andhaka?) to save the royal sage, Śveta, who was performing a terrible penance in a mountain called Kalanjara.

6. गृहीत्वा प्रासमुल्काभं विरराज नरान्तकः ।  
शक्तिमादाय तेजस्वी गुहः शिखिगतो यथा ॥

Again in Kumbhakarṇa's battle with Hanumān, the former is represented to have dealt a blow to the latter on his chest by means of the Śūla, which Vālmīki compares to Kārtikeya's smiting Krauñca mountain with his Śakti<sup>1</sup>.

A closer examination of the Rāmāyaṇa may reveal more references to other ancient heroes. But it will be clear from the above (1) that ancient heroes and heroines *are* alluded to in the Rāmāyaṇa by Vālmīki and (2) that it is impossible to draw on this score a clear line of demarcation between the styles of the Rāmāyaṇa and Buddhacarita of Aśvaghoṣa, as suggested by Prof. K. A. Subrahmanya Iyer<sup>2</sup>. It will not be far from truth if we say that Vālmīki, while composing his poem, had access to the sources containing the needed information about the personages mentioned above.

# THE MADURAI CHRONICLES AND THE TAMIL ACADEMIES.

BY

T. G. ARAVAMUTHAN, M. A., B. L.,  
*Advocate, Madras.*

## I

Round the city of Madurai,<sup>1</sup> the capital of the Pāṇḍyan kingdom, have gathered a large number of legends which deserve study for the light they throw on the growth of tradition in the Tamil country.<sup>2</sup> The vast majority of these legends is religious in character, only a few being secular in type. Of the legends of the former class a very large number cluster round the temple of Śiva in that city and only a few relate to the temple of Viṣṇu which lies a little to the south of the temple of Śiva but within the limits of the city itself.

The temple to Viṣṇu at Madurai is dedicated to Him under the name of Sundara (or Saundara-rāja), and the legends which chronicle His activities are found embodied in a 'sthala-purāṇa' or 'local chronicle' known as the *Kūḍal Māhātmya*, which professes to be a portion of the 'Kṣētra-Māhātmya' section of the *Brahmāṇḍa-Purāṇa*. A Tamil version of it is the *Kūḍal Purāṇam*,<sup>3</sup> of the author or the date of which we happen to know little.<sup>4</sup>

---

1. The anglicised form is 'Madura'.

2. My erudite friend K. Ramaratnam-Aiyar, B. A., has done me the kindness of reading this paper in manuscript and has made numerous suggestions which I have thankfully adopted.

3. Ed. by T. K. Ramanuja-Aiyangar, 1929, and published as No. 52 of the publications of the *Śen-Tamil*, Madura.

4. The work mentions Rāmānuja (1017-1137 A.D.), the great ācārya of Vaiṣṇavism (*Kaḍavuḷ vaṇakkam*, 12) and cannot therefore be earlier than him. The only available manuscript having been copied 132 years back (*vide* Prefatory Note to the printed copy), we may presume that the work is at least a century and a half old.

The temple to Śiva is dedicated to Him under the name of the Lord Sundara and is considered one of the holiest of Śiva temples by the Tamil people. To the ardent devotee of Śiva the Lord appears to disport himself in mysterious ways: His activity, consisting as it does in the manifestation of His grace, is indeed but sport: such activities of His are therefore known to the devotee as the Lord's Sports. To the devotee who worships the Lord in His manifestation as Sundara at Madurai there are sixty-four Sports which stand out as of pre-eminent importance. Among these sixty-four are some which relate to the Acadmies in which, according to tradition, were gathered the poets of the earliest Tamil literature. The accounts of these Sports have therefore considerable interest to the student of south Indian history.

The sixty-four Sports of Śiva as Sundara have been duly chronicled in various *sthala-purāṇas* or 'local chronicles'. We are told of six different *sthala-purāṇas* in Sanskrit which narrate the Sports played by Śiva in Madurai. We know of a Sanskrit chronicle, the *Sāra-samuccaya*, which is said to be a section of the *Uttara Mahā Purāṇa*, but neither the major work nor the section of it dealing with Madurai is now traceable. Another of the Sanskrit chronicles, the *Hālāsyā Māhātmya*, has been very popular for some centuries. Three other *purāṇas* are known in Sanskrit,—the *Kadamba-vana Purāṇa* (otherwise called the *Nīpāranya Purāṇa*), the *Sundara-Pāṇḍya* and the *Aṣṭamī-pradakṣiṇa Māhātmya*,—but these three have little interest either to the lover of literature or to the student of history. None of these five chronicles contains any clue to its authorship or date. The *Śiva-Līlārṇava* of Nīlakaṇṭha-Dīkṣita, a great scholar of the middle of the 17th century A. D., is a poem of rare excellence, but it is of little value for our purpose as it follows the *Hālāsyā Māhātmya* very closely.<sup>1</sup> The *sthala-purāṇas* of Madurai which are found in Tamil are all probably translations,—rather adaptations,—from these Sanskrit chronicles. The *Kadamba-vana Purāṇa* has been rendered into Tamil verse under the title, the

---

1. My friend, Mr. Y. Mahalinga-Sastri, B.A., B. L., Advocate, who kindly examined the work tells me that the only deviations consist in the omission of the legend of the Unfailing Purse and in the splitting up of the legend of the Lord carrying earth into two legends,—that of the Lord carrying earth and that of His being beaten.

*Kadamba-vana Purāṇam*, by Vimanāda-panḍidar, a poet whose date is uncertain, but who is perhaps not earlier than the sixteenth century A.D. The *Sundara-Pāṇḍya* was done into excellent Tamil verse by an able poet, Anadāri, in the year 1563 A. D.<sup>1</sup> The *Aṣṭamī-pradakṣiṇa Māhātmya* was put into good Tamil prose by Rāmasvāmi-Piḷḷai, a scholar who lived about fifty years ago. These three works are of no greater value than their Sanskrit originals. The *Sāra-samuccaya* has been translated into fine Tamil verse,<sup>2</sup> and called the *Tiru-Ālavāy-Uḍaiyār Tiru-Viḷaiyāḍal Purāṇam*<sup>3</sup> (the 'Chronicle of the Sacred Sports of the Lord of Ālavāy'),<sup>4</sup> by a poet of no mean attainments, Perum-Paṇṇap-Puliyūr Nambi. The *Hālāsya Māhātmya* of Sanskrit has its counterpart in Tamil in the *Madurai Arupattu-nāṅgu Tiru-Viḷaiyāḍal Purāṇam* (the 'Chronicle of the Sixty-four Sports at Madurai of the Lord'), by Param-jyōti;<sup>5</sup> opinion is divided on the question as to which of them is the original and which the translation.<sup>6</sup> The dates of these two works will be discussed later on at some length, but it may be assumed for the present that the work of Perum-Paṇṇap-Puliyūr Nambi was earlier than Param-jyōti's. For reasons which it is now difficult to appreciate in full, Perum-Paṇṇap-Puliyūr Nambi's work receded into the back-ground when Param-jyōti's appeared: perhaps, the severe restraint of the former was less suited to the popular taste than the limpid flow, the haunting melody, the florid exuberance and the emotional surge of the latter.

The popular notions now current in the Tamil land about the Academies supposed to have been founded at Madurai for fostering the growth of Tamil literature being based less on the

---

1. See also Vidvan R. Raghava-Aiyangar in *ST* (1907 J-J.) iv. 371-5.

2. The book calls itself a translation (see stanza 23 of the Invocation).

3. MMU. V. Śāmināda-Aiyar has edited this work with his usual ability and thoroughness. (This is referred to hereafter as PPPN. *TVP*.)

4. This is one of the numerous names of Madurai.

5. This is referred to hereafter as PJ. *TVP*. I have used the edition of Ārumuḥa-Nāvalar (Madras, 1907).

6. Much valuable information is found collected in MMU. V. Śāmināda-Aiyar's Introduction to PPPN. *TVP*.

Sanskrit chronicles above mentioned than on their Tamil translations or counterparts, we cannot do better than make the Tamil chronicles the basis of a study into the legendary lore relating to those Academies. Of these Tamil chronicles the earliest being Perum-Paṇṇap-Puliyūr Nambi's we may start with an examination of his work.

## II

The *Tiru-Vilāiyādal Purāṇam* of Perum-Paṇṇap-Puliyūr Nambi starts with Invocations and Benedictions, an Apology by the author to his audience and a Decad of verses enumerating the miracles in the order in which they are narrated in the body of the work.<sup>1</sup> Then follows a History of the work, in which we are told how, when Parāśara,<sup>2</sup> Viśvāmitra, Nārada, Durvāsa and a number of other distinguished ṛṣis including Agastya had once gathered at Benares in the presence of the Lord Viśvanātha, Agastya was requested by his companions to narrate to them the Sports of Śiva on the banks of the Vegavatī (Vaihai). In one section, the 'Glory of the Land', Agastya eulogises the greatness of the country round about Madurai, and in the next section 'The Glory of the City', he speaks of the greatness of the city of Madurai, and he adds that he would tell them of the Sixty four Sports played by Śiva at the rate of sixteen in a *yuga*, and, in a third section, 'The Fruits of Study', he assures his audience that a perusal of the accounts of the Sports will confer innumerable blessings.

Then follow sixty-four Cantos in which Agastya narrates the sixty-four Sports: henceforward, each canto narrates a legend.

The first two legends relate the raising of a temple by Indra over a *liṅga* which stood in a forest, Indra's calling the *liṅga* the Lord Sundara,<sup>3</sup> and Indra's elephant ridding itself of a curse by worshipping the *liṅga*.<sup>4</sup>

1. In summarising the legends I have endeavoured to adhere as closely as possible to the Tamil of the original,—even in disregard of English idiom.

2. In view of the extensive use of Sanskrit words and names in the works of both Perum-Paṇṇap-Puliyūr Nambi and Param-jyōti, I have preferred the Sanskrit forms to the corresponding Tamil ones, except where the latter are more familiar.

3. Legend 1

4. Legend 2

In the next two cantos we gather that to a Pāṇḍya king, Malayadhvaja, who performed great austerities to obtain a son, the Lord Sundara gave a daughter, Taṭātakā who had three breasts,<sup>1</sup> that she became queen on her father's death, that she marched up to Kailāsa, conquering numerous kings on the way, that at sight of Śiva, the Lord of Kailāsa, her third breast disappeared, and that the Lord Śiva took her to Madurai, married her and became king of the country under the name of Sundara-Māra, and that the couple reigned for long as king and queen of Madurai.<sup>2</sup>

Then follow seven cantos in which are narrated how, after the marriage, the God Sundara danced in the Silver Hall to please Patañjali,<sup>3</sup> how He made Kuṇḍōdara eat up the hillocks of food left over after the wedding-feast<sup>4</sup> and drink up the Vaihai which flowed at His behest to slake that goblin's thirst,<sup>5</sup> how the Lord called the seven seas to Madurai to give His mother-in-law the benefits of a holy sea-bath,<sup>6</sup> how He called His father-in-law from the shades so that father-in-law and mother-in-law might take the bath together hand in hand,<sup>7</sup> how He had a son Ugra-Pāṇḍya, whom in due course He crowned under the name Jaṭila-varma,<sup>8</sup> and how, prescient that Indra, the sea and Mount Mēru would prove rebellious, the Lord presented His son with three weapons,— a discus to aim at Indra, a javelin with which to quell the sea and a club with which to strike down Mount Mēru, and how the Lord then disappeared into the temple with Taṭātakā.<sup>9</sup>

Then come three legends,— how the Lord once brought four great clouds together to hang over Madurai and drink up the seas which had been sent against the city and how they became four canopied halls and protected the city from the down-pour of torrential rains<sup>10</sup> and how as an Adept He once roamed about Madurai working strange miracles<sup>11</sup> and quickened a stone-elephant to life and made it munch sugar-canes.<sup>12</sup>

These are followed by a series of seven cantos in which are narrated certain Sports showing how great the Lord's interest was in Tamil literature.

12. Legend 14

Once upon a time the poets, being desirous of obtaining a great board on which they could seat themselves in due order in the Hall of the Academy, went up to the temple, with Kabilar, Nak-Kirar and Paraṇar at their head, and prayed the Lord Sundara to grant them a board on which they could all seat themselves without crowding. Sundara gave them a shining board, a cubit square, just wide enough to accommodate one person, and capable of sensing poetry. While the poets were remonstrating with Sundara for not having granted their request in the terms of their prayer, He having given them a board to seat only one whereas they had asked for a broad one whereon they could all find seats and could pursue their enquiries, a voice full of sympathy rose from the sky and told them that the board given by Sundara would know all true poets and would keep growing to accommodate them all. When it was taken to the Academy and laid right in the middle, Kīraṇ first took his seat thereon with eclat, and, finding that it grew in size, Kabilar followed and seated himself on it, and, it growing still, Paraṇar also took his seat. The other Academicians too, versed in the bunch of the three Tamils resplendent with the four-fold objects of human desire, took their places on the board and it kept on growing to accommodate every one of them. All the world praised the curious board for the sense it displayed in affording adequate accommodation and preventing squabbles. The learned poets deposited in the Academy, time and again, the works of classic Tamil which they strung together out of their convictions and in course of time the works became innumerable and the heaps grew till they touched the very sky. The Academicians then gathered together and in right friendly spirit disputed among themselves about the aptness of their respective works, and, finding that they could not easily vanquish one another, they agreed that they should examine their works and reject those that lacked lucidity and retain those alone that were good. On entering the Academy they found that all that literature had become mingled up and had got out of shape and could not be reduced to order and so they were struck with great grief. The lord in the plenitude of His grace appeared before them in the guise of a poet, asked them why they who were poets skilled in Letter,

Word, Theme,<sup>1</sup> Prosody and Rhetoric, having been happy so long should have then become downcast, and said, 'Tell us what has happened: it is such that We can find a remedy for it We shall think out one'. To that the poets replied, 'Oh poet of unrivalled poesy! If Thou wouldst string together in due order these bunches of the three Tamils which to us look confounded, we shall add Thee to our number making it forty-nine instead of forty-eight as now'. Sundara gladly strung them all in order in a moment, and, the Academicians adding Him to their number, He took His seat on the board, and they all pursued their enquiries into Tamil. Finding that the poets were perplexed for want of an understanding of 'Poruḷ' (Theme), He gave them a treatise thereon, beginning, 'Of five-fold Love', and he classified the poems to accord with that treatise. While the poets were engaged in appreciation of their respective poems which accorded with the treatise on 'Poruḷ', the jealous Kīraṇ said, 'Hard should it be to find a parallel to the flawless Fifth Composition among my works'. The Lord thereupon sang a song packed close with 'Poruḷ' and asked the assembled poets to comment on it: while the other poets stood approvingly silent, Nak-Kīraṇ, in his ignorance, pronounced it unsound. The Lord Sundara said in reply, 'Who knoweth not that thou hast ever been a prey to jealousy? If any one else amongst ye saith it is unsound, then shall I be content'. The poets remaining silent, a voice from on high spoke: 'Oh, ye learned! the Lord came as one amongst ye to compose all contentions: worship Him'. They all marvelled: Kīraṇ worshipped Sundara and craved pardon. The Lord, who had for long sat in the Academy under the name of Pēr-Ālavāyar of Madurai, vanished, and the *Poruḷ Adihāram* shone resplendent as Irāyaṇār's the Lord's *Poruḷ*.<sup>2</sup>

Once upon a time unknown, when a Pāṇḍya king was walking up and down with his queen in the moonlight on the terrace of his palace at Madurai, the breeze wafted to him the abiding fragrance of the tresses of his queen and he was bewitched by its indescribable sweetness. Asking himself if the frag-

---

1. I am painfully aware that the terms *Letter*, *Word* and *Theme* hardly represent the connotation of the terms used in Tamil grammars — *Eluttu*, *Śol* and *Poruḷ*. Even the ugly words *Orthography*, *Semasiology* and *Gnosiology* are not fair approximations.

2. Legend 15

rance was independent of the flowers that decked the tresses or no, he put together a thousand gold pieces into a purse and had it hoisted in front of the Academy and he had it notified that any one who came forward with a fine poem packed close with the apt answer to his question could take the purse. Poets kept coming to the king with poems, but the purse swung in its place. One day, a Brahman of the name of Darumi, pure, upright and devout, entering the temple and prostrating himself, told the Lord that so poor was he that he could not marry and his line was in danger of dying with him. The Lord Sundara composed a poem, gave it to Darumi and asked him to place it before the Academy and take the purse, and also advised him to seek His aid should any opposition arise. On Darumi taking the poem to the Academy and showing it to the Academicians, they appreciated it within themselves but would not show their appreciation openly. Darumi went back to the king and the Academicians followed him. The Pāṇḍya admitted that in the poem he found the apt answer to his question and he adjudged the prize to the poet who had composed the poem. Thereupon, Darumi went to the Academy to take down the purse, but the jealous Kīraṇ declared that the poem was not free from flaws, charged Darumi with incapacity to comprehend even the purport of words and asked him to fetch the poet who had composed the poem. Darumi appealing to Sundara, the Lord came in the guise of a poet, stood before the Academy, pervading the universe, and asked the Academicians who it was among them that had found fault with His poem. Kīraṇ replied that it was he. On the Lord asking that the flaw be pointed out, Kīraṇ said that if a head of hair was not properly dressed it would emit an evil odour. When Sundara asked him if he would apply the statement to the tresses of even goddesses, Kīraṇ replied that the sweetness of the tresses was due not to nature but to the attention bestowed on them. Sundara chiding him for his obstinacy and asking him if he held it true of even the tresses of His Consort, Gaurī, a prompt answer in the affirmative came from Kīraṇ. When Sundara revealed His identity by turning round and showing Kīraṇ the matted locks in which lay the Gaṅgā, Kīraṇ retorted, 'Frighten me not with Thy matted locks! The world doth know (the truth)'. Then Sundara opened His blazing third eye, but, nothing daunted, Kīraṇ said, 'Though flaming eyes be all around me, the flaw doth still remain a flaw'. Sundara

conjured him to give up his unseemly contrariness and asked, 'Knowest thou not that Our Dame is called Cit-puṣpa-keśī by the Vedas?'. Roasted by the flaming eye and suffering greatly, Kīraṇ called aloud for water, and unable to sustain the heat precipitated himself into a pool so that he might cool himself in its waters. The Lord Sundara vanished, and Darumi took down the purse and went his way praising the Lord.<sup>1</sup> At the intercession of the poets and on Kīraṇ composing an *andādi* poem in praise of Kailāsa and Kālahastī as he lay cooling himself in the pool, Sundara went with His Consort to Kīraṇ, helped him out of the pool and set him on the bank and disappeared. Kīraṇ went up to the Lord's temple and stood there for long in devout worship.<sup>2</sup>

Sundara being pleased with the unremitting devotion of Kīraṇ wished to improve Kīraṇ's knowledge of Tamil. His Consort reminded Him how once when they both were seated on Kailāsa, the celestials and the mortals, the ṛṣis, the yakṣas, the Adepts and the Nāgas had represented to Him that the north-east of the earth had got depressed and that the south-west, where stands Mount Podiyil, had got elevated, and how they had prayed that some one might be sent south so that he might restore equilibrium and how from the countless persons who stood around He had chosen Agastya and instructed him to go south and seat himself on Mount Podiyil (Malaya), how Agastya had then prayed that since he was being sent to the Tamil country he might be taught all about Tamil, how the Lord had then taught duly all the aphorisms dealing with Letter, Word and Theme, and how He had promised to teach him the purport of Tamil literature in the Kadamba forest wherein He lovingly dwelt. Thereupon Sundara thought that no one but Agastya could teach Kīraṇ the bunch of Tamil and that Kīraṇ should be filled with Tamil literature through Agastya: immediately Agastya appeared and, paying due obeisance to the Lord, entreated that he might be taught the rare aphorisms of Tamil. Sundara taught them to Agastya and asked him in turn to teach them all to Kīraṇ. Agastya having thus become better versed in Tamil than ever before taught it all duly to Kīraṇ, and went back to the Malaya Hill. When Sundara's Consort asked Him why He had not Himself taught Kīraṇ, Sundara replied that a preceptor should

instruct only those who paid amply, rendered services, were sympathetically inclined, were free from jealousy, had crushed untruth, were not disposed to cavil and had understood what was in the preceptor's heart, and that Kīraṇ having been guilty of irrepressible jealousy and of inordinate self-esteem, He could not in His own person play preceptor to Kīraṇ.<sup>1</sup>

The learned poets wrote commentaries on the aphorisms on Poruḷ which the Lord had formerly composed, but differences arose among them, for each had admiration for his commentary alone. Then, they agreed that they would place all the commentaries before the Lord and abide by His decision, and they told the Lord of their resolution. Thereto the Lord replied, 'Ye have spoken wisely. In this city doth live a devotee of ours, a merchant Uppūr-kiḷār. His son is but a boy, and is dumb to boot. Truth to tell, he is none other than Śaravaṇa-Guha. He is a peerless sage. He is called Rudra-Janman. Place your glosses before him and the one that he doth approve of is the true gloss: doubt it not'. The poets then asking Him, 'Being mute from birth, how shall he speak?', the Lord replied, 'At which gloss soever his hair doth bristle and his eyes grow wet, that is the true gloss: the rest are not. Despise him not, any of ye. Go ye in accord, place him on Our seat and beseech the boon'. So, the poets brought the dumb boy to the sacred Hall, seated him on the lion throne, burned incense and lights before him and set out the true glosses. On hearing those of Kīraṇ, Kabilaṇ and Paraṇaṇ, the boy was filled with joy and the hair on his body bristled and his eyes grew wet with tears. All present accepted those glosses as the ones which accorded with the divine author's mind, and for long days they praised the greatness of the Lord. The spell which had lain on the boy broke, and, after manifesting himself before the poets with six faces and twelve arms and riding a peacock, he vanished all of a sudden.<sup>2</sup>

Once upon a time a great poet of the name of Iḍaik-kāḍaṇ, a sweet companion of poets and chum of Kabilaṇ, sang a poem on a Pāṇḍya king and presented it to him, but the king pushed the poet aside and went his way. Greatly vexed, the poet wended his way to the shrine of the Lord Sundara and said, 'The Word is Thy Consort, and Thou art the Theme: so say the

Vedas. In insulting me a poet, the king hath insulted Thee and Thy Consort. Is it meet?'. Having spoken thus, the poet left the sacred presence. The Lord was startled at these words and wished to pacify Iḍaik-kāḍaṇ and his friend Kabilāṇ. So, He left the shrine with His Consort, and, proceeding northward with the Academicians, stayed on the southern bank of the Vaihai. While thus He stayed beyond the pale of the temple,—the Academy in full strength being with Him and also adoring ascetics and devas—the devotees of the Lord entered the temple before dawn for worship as was their wont but they found Him not in the temple. Dazed at it, they ran up to the king and informed him of how the Lord had betaken himself with the poets to the banks of the river, having deserted His sacred fane. Taken aback by the news, the king, with his queen and ministers, went afoot to the Lord and prayed to be told how he had so offended the Lord that He had abandoned His shrine. The Lord asked, 'How happened it that, thoughtless and impelled by thine arrogance, thou pushed and drove out the companion of Kabilāṇ (who hath sung an *andādi* on Us), though his poem was without flaw, whether in word or in theme? Though thou art learned, yet, like the low in mind, thou hast imputed flaws indiscriminately'. King and queen prostrating themselves and beseeching forgiveness, the Lord came back to the temple, accompanied by the Academicians and by Iḍaik-kāḍaṇ. The place where the Lord had tarried awhile to please Iḍaik-kāḍaṇ came to be known as North Ālavāy.<sup>1</sup>

The next legend narrates how the sea rose and advanced against Old Madurai, how Ugra-Pāṇḍya thereupon hurled his javelin at the sea, how it subsided instantly and kept submissively lapping the margins of his feet, and how he erected a lofty Hall for the Academy and remained in it for long amidst the laudations of the poets. The last stanza of this canto adds that the First and the Middle Academies were held in that Hall and that the Academy 'of the future' would be on banks of the Ganges.<sup>2</sup>

Then follow six cantos chronicling six miscellaneous miracles,—how once on a time the Lord cast curses about, His Consort to be born as daughter to a chieftain over fishermen, His son Skanda to be born as son to a merehant of Madurai and be

a congenital mute, and His Chief of Staff, Nandī, to be born as a shark, and how he plied fish-nets in the sea and took the fisherman's daughter to wife,<sup>1</sup> how He sold bangles and delighted the *vāṇiga* girls of Madurai,<sup>2</sup> how to a chieftain, Kāḍu-veṭṭi, He gave surreptitious access to His shrine, the Pāṇḍya king being that chieftain's enemy, and how He cut open a new gateway through the ramparts of the city and placed His Bull-seal on the gates,<sup>3</sup> how He appeared as a dealer in precious stones and presented a Pāṇḍya prince with the diadem needed for his coronation,<sup>4</sup> and how he mounted a turret on the ramparts and with an arrow called the Narasimha killed an ogre-elephant conjured up by the incantations of some Śramaṇas who had been incited by a Cōla king, how the carcass of the elephant was turned into the Elephant Hill and how as a memorial of the miracle of felling the ogre-elephant with the Narasimha-arrow the Lord installed Narasimha in the Elephant Hill.<sup>5</sup>

Now follow four cantos in which the story of the saint Māṇikya-vācaka is told at much length and with great pathos,— a Pāṇḍya king's prime minister turning devotee and being taught by the Lord<sup>6</sup>, the transformation of jackals into horses by the Lord to oblige the devotee,<sup>7</sup> the re-transformation of the horses into jackals,<sup>8</sup> and the carrying of baskets of earth by the Lord on His head for the sake of an old dame and for procuring the liberation of the devotee from the prison into which the king had thrown him.<sup>9</sup>

Following these are six cantos recounting six miracles,— how the Lord became an old man, then a youth and lastly a babe in an endeavour to console a girl who, though born and bred a Śaivite, had been married to a Vaiṣṇava,<sup>10</sup> how to satisfy a Pāṇḍya who apprehended that the Lord's dancing continuously in one mode would tire Him out the Lord changed the mode and danced contrariwise,<sup>11</sup> how to save a Pāṇḍya from incurring the infamy of a judicial murder the Lord revealed the true circumstances of an accidental death,<sup>12</sup> how He showed the path of salvation to a wretch who had been guilty of both incest and

parricide,<sup>1</sup> how He cut down limb by limb a young 'blade' who had so far forgotten himself as to make love to the wife of his aged preceptor,<sup>2</sup> and how in the days of king Dattan the Lord wrought a miracle from which the city got its name Madhura (Madurai) and how He turned a serpent, a magic cow and His Bull into three mounts named after them respectively<sup>3</sup>.

The next two legends concern the miracles which the Lord worked through the saint Jñāna-sambandha,— the saint curing a Pāṇḍya king of a malignant fever and transforming him from a hunchback into a really beautiful person<sup>4</sup>, and the saint getting the cantankerous Śramaṇas impaled after he had vanquished them in disputation<sup>5</sup>.

Another series of miscellaneous miracles follows,—how the Lord appeared as a General at the head of a huge army to save from disgrace a chieftain who had spent on temples and devotees the large sums of money which had been entrusted to him by his king, Vīra-māraṇ, for raising an army to repulse an invasion threatened by Śēḍibaṇ, king of hunters,<sup>6</sup> how He gave an unfailing purse to another Pāṇḍya king with the injunction that he should protect the Vedas,<sup>7</sup> how He settled a dispute about succession to some property,<sup>8</sup> how He taught the eight great *siddhis* to certain Yakṣiṇīs,<sup>9</sup> how as a water-carrier He served out water to the thirsty troops of a Pāṇḍya king (Vīra-Māraṇ) when they were engaged in battle with the forces of a Cōla king who had advanced against Madurai.<sup>10</sup>

The next canto tells us that, once upon a time, rains failing in the kingdoms of the Cēra, the Cōla and the Pāṇḍya, the three kings went together to Indra, that Indra took umbrage at the Pāṇḍya's independence but did not reveal his displeasure and sent the three kings back to earth with great honours, and that Indra made the clouds rain copiously on the realms of the Cōla and the Cēra while he denied rain to the Pāṇḍya's country.<sup>11</sup>

10. Legend 43.

11. At this point, are found a number of stanzas which, according to M. M. V. Śāmināda-Aiyar, the great editor of this work, are not to be found in some manuscripts. The purport of these stanzas is given below :

The Pāṇḍya worshipped Skanda at Tirup-Param-kunṇam and went ahunting on the Podiyil Mount. Finding the four great clouds wondering about, he captured and consigned them to prison at Kaṭṭu-Nallūr-irum-śirai. When the jealous Indra came to rescue them, the Pāṇḍya (Vīra-Māraṇ?) engaged him in battle, smote him with a discus and put him to rout at Taṇic-Śayam, and compelled him, in return for the liberation of the clouds, to send him prompt and regular rains.<sup>1</sup>

Two cantos follow narrating how, to fulfil the wish of a pious danseuse to have an idol of Śiva cast and consecrated, the Lord played alchemist,<sup>2</sup> and how to save a Pāṇḍya king from being driven from the throne by an invading Cōla, He fought on the battle-field, javelin in hand, and drove the Cōla to a watery grave.<sup>3</sup>

In the next canto we are told of the close of a Brahma-kalpa, the dawn of a new age, the birth of a new Pāṇḍya, his finding the temple unscathed by the incidents of the change from one kalpa to another, his raising a city round the temple, his appealing to the Lord to discover to him the ancient limits of the city, a serpent winding itself along the ancient bounds at the behest of the Lord and the city coming to be called Ālavāy in consequence.<sup>4</sup>

---

\* The Pāṇḍya went to Tirup-Param-kunṇam, sacred to Muruhaṇ (Skanda). A leaf, wafted down from a tree on the bank of a pool on the hill, fell where along the margin of the pool the earth and the water met, and the leaf turned immediately into a living thing which was half bird and half fish. The bird-half sought to fly and the fish-half sought to swim. The poet Kīraṇ sought to end this strife between bird and fish, but he was caught hold of by an ogre and consigned to the depths of a dungeon cut into the rock. At the bidding of Muruhaṇ, Kīraṇ sang a glorious psalm,— an *Ārrup-paḍai*, 'Putting the Pilgrim in the Way' to his Lord,— and, Muruhaṇ, mightily pleased, aimed his javelin at the hill and liberated Kīraṇ and then vanished into the shrine,—but not before he had commented that Kīraṇ had called him an old man in the psalm. Kīraṇ thereupon sang a poem on Muruhaṇ's victory over the hill and his perpetual youth and unfading beauty. Muruhaṇ declared that whoso chanted Kīraṇ's psalms would receive the boon he prayed for, and Kīraṇ returned to Madurai and recited the psalms before the Academy amidst applause. Then, Kīraṇ enquired what the Pāṇḍya had done to obtain rain '.

1. Legend 44.

2. Legend 45.

3. Legend 46.

4. Legend 47.

The next legend is the story of king Varaguṇa-Pāṇḍya,—how the king sought to atone for the sin of having unwittingly killed a Brāhmaṇa and to cast out the ghost which had possessed him in consequence, how the Lord encouraged the king with a promise, how he routed and pursued a Cōla who had dared march on Madurai, how the ghost abandoned the king on his entering the temple of Tīruv-Iḍai-Marudūr, how the king made his exit by the western gateway, how he stayed there for some time and had that gateway rebuilt, how he returned to Madurai and reigned in peace and how through the Lord's grace he obtained a vision of His world.<sup>1</sup>

Then follows a canto telling how when Varguṇa's son, to repulse the attack of a Cōla king, who along with allies such as the hunters, the Yavanas and the Karnāṭas had beseiged Madurai, threw himself at the feet of the Hero who had slain the magic-elephant, the Lord appeared before the walls of the city as an archer and put to rout the attacking forces with arrows on which He had impressed His sign, the Bull.<sup>2</sup>

In the next legend the Lord is said to have given a never-failing bag to a devotee who had spend his substance in feeding the Lord's devotees.<sup>3</sup>

Then comes a miracle relating that once on a time a Karnāṭa king drove the Pāṇḍya from his throne and subdued the Pāṇḍya country, became a convert to the religion of the Śramaṇas and oppressed those who followed the orthodox faith. A merchant, Mūrti, gave signal proof of his devotion to the Lord in defiance of the oppressor's ukases. At the decree of the Lord the usurper died suddenly, and Mūrti, being miraculously chosen king, re-established the orthodox faith.<sup>4</sup>

In the next canto we are told that once upon a time in a kalpa, two eminent poets, Kāri and Nāri, journeyed to Madurai from the north, took the wrong road and wandered about. Meeting a shepherd, they asked for the way to Madurai, but the shepherd insisted on being told first what the poets were going to Madurai for. On their protesting that it could be no concern of his, he retorted that he would not then tell them which way the city lay. The poets had then to say that they were going to the king with good poems in praise of him; the shepherd there-

---

1. Legend 48.

3. Legend 50.

2. Legend 49.

4. Legend 51.

upon taunted them with carrying poetry to a place crowded with the most eminent poets, and he insisted on a poem being recited before him. On the poets complying with the demand, the shepherd denounced them and, declaring that it was not their composition, recited the poem straight away. The poets thereupon promised him all the wealth that the king might shower on them if only he would tell them who it was that had taught him the poem, but he stipulated instead that a half of all their poems should be in eulogy of him. The moment the poets assented to the bargain the shepherd vanished. The poets, convinced that the shepherd was none other than the Lord Sundara, went up to His temple and made half their poems into hymns in praise of Him, and then went to the king with the other half.<sup>1</sup>

The next canto tells how once upon a time the Lord made a tiger give suck to a young deer in the Kadamba forest, how a merchant of Maṇavūr, who had gone westward in quest of wealth discovered, on the way back, a city with a great temple in it and told the king of the discovery, how at the king's request the Lord took the guise of an Adept and pointed out to him the boundary of the city by walking along it and how the king made the city his home.<sup>2</sup>

In the next four cantos we have the legend of the Lord playing four Sports on behalf of a bard Bhadra and his wife,—how, in response to Bhadra's appeal to help him vanquish a rival bard, the Lord appeared as a wood-cutter and sang a song of ineffable sweetness and how the rival took to his heels when he heard that Bhadra had refused to accept that master-songster for a pupil as he was not proficient enough to be accorded the high privilege of being Bhadra's disciple,<sup>3</sup> how the Lord sent Bhadra with a commendatory note to the Cēra king of that time who received him with high honours and piled on him the most costly gifts,<sup>4</sup> how the Lord gave Bhadra a board on which to stand when singing psalms in His praise<sup>5</sup> and how the Lord made the Pāṇḍya king award the palm to Bhadra's wife in a musical contest, though the king had arranged for the contest for the express purpose of spiting himself against Bhadra and his wife.<sup>6</sup>

---

1. Legend 52.

2. Legend 53.

3. Legend 54.

4. Legend 55.

5. Legend 56.

6. Legend 57.

In the seven succeeding cantos we have a varied collection of legends,—how through a curse the dozen sons of a Veṅṅāḷa were born as pups to a boar and sow, how the couple lost their lives at the hands of a Pāṇḍya king and how the Lord played mother to the orphan pups,<sup>1</sup> how through the Lord's grace they were born again as human beings and were brought up on the Boar Hill and in due course were made ministers to the Pāṇḍya king,<sup>2</sup> how the Lord taught to a black-bird the *mṛtyuñjaya mantra*, powerful even against death,<sup>3</sup> how there was a drought in the days of a Pāṇḍya king of the lineage of Ugra, how the king grew eager for great wealth to support sacrifices and maintain worship so that there might thereafter be no failure of rains, how at a suggestion from the Lord the king advanced against Mount Mēru, how when it refused to yield up the treasures hidden in its entrails the king struck it down with his club and incised on it his insignia, the fish and the club, and how thereupon the Mount disgorged the treasures,<sup>4</sup> how a young man who was taking his orphan cousin to Madurai with a view to marrying her there in pursuance of her father's wishes, was bitten to death by a cobra at Tirup-Purambiyam, how the saint Jñāna-sambandha resurrected him and had him married to the cousin with no witnesses but a well, a *vanni* tree and the idol of the temple of Tirup-Purambiyam, and how when doubts came to be cast, years later, on the fact of the marriage, the Lord made the well, the tree and the idol appear at Madurai and bear testimony to the marriage,<sup>5</sup> how through piety a crane forswore fish and starved and how the Lord vouchsafed salvation to it and to all its kind,<sup>6</sup> and how at the beginning of the first of the four yugas of the fifth mahā-yuga of this Brahma-kalpa the Lord assumed the guise of a preceptor at the request of the Ṛṣis and taught them the four Vedas and the six Aṅgas in Madurai.<sup>7</sup>

The sixty-four Sports having been thus narrated at length, the work closes with some verses in which the 'Fruits of Study' of the work are enumerated.

## LITERARY NOTES.

BY

K. BALASUBRAHMANYA IYER, B.A., B.L.,  
*Advocate, Madras.*

शशिनमुपगतेयं कौमुदी मेघमुक्तं

जलनिधिमनुरूपं जड्हुकन्यावतीर्णा ।

इति समगुणयोगप्रीतयस्तत्रपौराः

श्रवणकटु नृपाणामेकवाक्यं विवदुः ॥ *Raghu. VI. 55.*

The above is an apt illustration of Kālidāsa's characteristic poetic genius in weaving into the fine texture of exquisite verse the subtle references to Śāstraic thought and scientific truth which often elude the superficial reader. It occurs in the context, wherein the assembled citizens of the capital city of the Vidarbha king are said to have given expression to their rejoicings at the happy union in wedlock of princess Indumatī with prince Aja, in the great Svayamvara that was held at the court of that king. Mightily pleased with the absolute worthiness of the ultimate choice of a husband by the princess, the citizens voiced forth their heart-felt felicitations thus: "The moonlight has united with the moon freed from the cloud; the daughter of Jahnu (Gaṅgā) has flowed down into the ocean of like nature." The general import of the stanza is fairly clear, namely, that the princess and her husband are quite worthy of each other in every respect by the equal excellence of their qualities of head and heart, and, hence, their marriage evokes the hearty appreciation of the citizens. The exact significance of the expression "*Ekavākya*" (एकवाक्य) however, it is a little difficult to understand. In his cryptic commentary, Mallinātha renders it as *Avisamvādivākya* (अविसंवादिवाक्य), i.e., non-divergent sentence, and the translator in the Poona edition of the *Raghuvamśa* translates it as "unanimous opinion". One can well see that this elucidation of the meaning of the expression fails to bring out the full effect suggested therein, and the significance of the verb

"*Vivavruḥ*" is also missed. Moreover, the first half of the stanza consists of two sentences, and it seems to be an apparent contradiction of language to say that the citizens gave expression to one sentence. Hence, it stands in need of probing further to find out the hidden meaning and suggestion.

The phrase "*Ekavākya*" (एकवाक्य) or, more accurately, *Ekavākyatva* (एकवाक्यत्व) is a well-known term of art in the science of *Mīmāṃsā*, which connotes the rule that, where there are two sentences which are inter-dependent on account of the inter-relation of the underlying idea conveyed by them, they together form one sentence conveying one complete idea. This is known to the writers of the *Mīmāṃsā Śāstra* as the 'Nyāya' of *Ekavākyatva* (एकवाक्यत्व). Thus Kumārila Bhaṭṭa defines it in the following stanza:

स्वार्थबोधे समाप्तानामङ्गाङ्गित्वव्यपेक्षया ।

वाक्यानामेकवाक्यत्वं पुनः संहस्य जायते ॥

"Two sentences, each conveying its complete sense, join together to form one sentence by reason that they are inter-dependent as component parts."

If we apply the principle of this rule to the two sentences in the first half of the stanza, it will be seen that, though they appear as two separate sentences conveying two ideas, still, in the context, their ultimate import is only one complete idea, namely, that the bride has chosen a husband worthy of her and that he has obtained a bride worthy of him in every respect. This idea is conveyed by the citizens in the form of two figures of speech which are indicated in the two separate sentences. But the real idea portrayed by these two similes is only one. Hence, by applying this principle of *Ekavākyatva* the poet is justified in saying that the citizens, though they apparently gave expression to their rejoicings in two separate sentences, still, really uttered only one sentence. If we examine a little more carefully the two sentences, we can realise also how their inter-dependence, *Parasparākāṅkṣā* (परस्पराकाङ्क्षा) has been indicated by well-chosen words therein. The first beginning with "*Śaśinam*" (शशिनं) connotes the idea that prince Aja was all along waiting for, and, at last, obtained, a bride worthy of him. This idea naturally provokes the thought in the mind of reader whether the converse is also true, and the second beginning with

"*Jalanidhim*" (जलनिधि) hits that off and conveys that the princess, in her turn, was waiting for a worthy husband and had the good fortune of getting one in the prince. The adjective "*Megha-muktam*" (मेघमुक्त) is used in the first sentence to qualify the word "*Śaśinam*" (शशिनं) signifying the prince. Hidden by the cloud, the moon was waiting for the approach of the moonlight and now freed from it, the moon stands united with the moonlight. In the other sentence, the word "*Jahnukanyā*" (जह्नुकन्या) is used in relation to Gaṅgā signifying the princess, with the deliberate purpose of conveying the idea to the reader that, in her long course through the plains to reach ultimately her lord, the ocean, the mighty river was for a time intercepted by the Ṛṣi Jahnu, and, then, freed from him, flows into the ocean. It may be that the words, "*Kaumudī*" (कौमुदी) and "*Jahnukanyā*" (जह्नुकन्या) both denoting the princess in the context, are used as *kartas* in the two sentences. Still, by the qualifying epithet, "*Megha-mukta*" (मेघमुक्त) in relation to *Śaśi* (शशी) in the first sentence, the *Ākāṅkṣā* (आकांक्षा) is established, as the ultimate import (तात्पर्य) of the first sentence, namely, that it is the moon which stands to gain by the union, suggests the necessity for the second sentence which clearly conveys that the river, signifying the princess also stands equally to gain by the union. Therefore, the first sentence and the simile contained therein naturally run into the second sentence and simile contained therein, and the two together form, as it were, the component parts of one sentence and one idea, namely, that the bride and bridegroom are worthy of each other to be united in wedlock. That this is the central idea desired to be conveyed by the poet is fairly certain from the following verse referring to the same prince and the princess.

परस्परेण स्पृहणीयशोभं

न चेदिदं द्वन्द्वमयोजयिष्यत् ।

अस्मिन् द्वये रूपविधानयत्तः

पत्युः प्रजानां वितथोऽभविष्यत् ॥ (Ragh. VII. 14.)

The reader will now readily appreciate how the bald and prosaic Mīmāṃsā rule of interpretation has been made to subserve the ends of poetic art, so as to evolve a fine poetic conceit.

# MADRAS MUSEUM PLATES OF BHAKTI-RĀJA

BY

T. N. RAMACHANDRAN, M.A.,

*Archaeological Assistant, Government Museum, Madras.*

This copper plate grant appears to have been found somewhere in the vicinity of Nuzvid and was in the possession of the Zamindar of Nuzvid till 1873, when, according to the "Catalogue of the copper plate grants in the Government Museum, Madras" (1918), it was presented to the Madras Museum by the Zamindar. As early as 1871 it came to the notice of that veteran archæologist, Sewell, whose remarks on this grant are found on pp. 26-27 of his "Lists of Inscriptions and Sketch of the Dynasties of Southern India" (1884). But curiously enough this important grant has not yet been published.

The grant consists of three plates strung together by a ring going through holes on the left-hand sides of these plates. The ends of the ring (now cut) are soldered to the bottom of an oval seal, 2" × 1", with the figure of a man engraved on it. What this figure represents is not clear. It is in the act of walking or dancing with the hands lifted up to the level of the neck. Similar figures can be seen on the copper issues of the Cōḷa king Rājārāja I (985—1012 A. D.). Except the first plate, which has writing on its inner side, the other two have writings on both the sides. They measure  $8\frac{1}{2}" \times 4"$ . The rims of these plates are slightly raised, and the plates themselves are consequently well preserved.

The writing is legible. The lines do not run straight but often overlap, so much so that they have to be carefully followed. The writing too has not been cut sufficiently deep and in some places the letters are faint. The language used is throughout Sanskrit except for a few lines (40-44) written in old Telugu language which speak of the boundaries of the village granted. The script employed is old Telugu, most of the letters having almost assumed their present shape. The whole grant, which is done in 51 lines, can be said to consist of 24 verses in Sanskrit and four lines (40-44) of prose in Telugu.

The *anusvāra* is always used for the corresponding nasal, e.g. *prasanna*, *Gaṁgā*, *Caṁdra*. The vowel "ē" has no top stroke as at present. *Da* and *ḍa* are done almost in the same way but the latter has, as in the Rajahmundry Museum plates of Annadēva, the son of Bhakti-Rāja, a greater curve. *Ba* is distinguished from *bha* by a top stroke in the latter. Almost all the letters have the top stroke or the *talakaṭṭu*.

*Repha* is indicated by a stroke usually called "*velaṭṭali gilaka*." The letter following *anusvāra* is doubled in certain places. The *anusvāra* is sometimes found in places where it is not necessary e. g. *Vaṁrṇanīyam* (in line 15) and is sometimes omitted where its presence is necessary e.g. *ṇṛpāṇā(m)* (in line 50). Sometimes consonants get doubled e. g. *sūryya* (in line 8), *bhargga* (in line 10); *bāndha-vīyyam* (in line 20). *Ḷa*, *ṣa* and *ka* retain the *Cālukyan* form (line 4.). Sometimes *bha* is used for *pha* (lines 20 and 24) and *ba* (line 19); and *ṭa* for *ḍa* (line 24).

The contents of this grant may be summarised as follows, fuller details being given under translation of the text (p. 140-3):—

In the line of the sun there appeared several kings like Manu, Bhagīratha, Ikṣvāku, Kakutstha, Raghu, Rāma, Arīkāla and Karīkāla and Nalla-Bhīma. After Nalla-Bhīma came Dānabhūpa alias Dōhatta-Nārāyaṇa who was succeeded by his son Sōma-nṛpāla. Sōma-nṛpāla's son was Gaṅgādhara who married Irugāmbā, the daughter of Kāmabhūpa and sister of Vēṅga-bhūpati of the lunar race. To Gaṅgādhara was born Bhaktirāja, called a Cōḍa, who also bore the name Kāmārāja after his maternal grandfather. This Bhaktirāja was a great devotee of Śiva. He was like the Gaṇḍabhēruṇḍa to his inimical lions and bore the title Rāyavēśyābhujāṅga which indicated his sovereignty. While he was engaged in conquering neighbouring kingdoms, in the course of one of his marches, he came upon Viśvanātha, a celebrate-sage of the Kauśika-gōtra and a great Śaiva teacher, at Śrī Parvata (Śrī Śailam,) whose disciple he forthwith became. And he granted to him a village called Kaṇḍvakolnu in Śaka 1277, on Monday, in the month of Kārttika (Monday, 21st October, 1355 A.D.).

This inscription is of much historical interest, as it discloses the genealogy of an almost unknown line of local chiefs, who call themselves Cōḍas of the solar race and who appear to have flourished in the country now bounded by the Gōdāvarī and

Vizagapatam districts during the fourteenth and the early part of the fifteenth centuries. Thus they appear to have flourished immediately after the Redḍi kings of Koṇḍaviḍu. The information regarding these Cōḍas has been culled from the following inscriptions:—

- No. 145 (S. I. I., Vol. 5, p. 55)
- No. 1347 ( „ „ 4, p. 474)
- No. 1348 ( „ „ „ „ )
- No. 254 (M. E. R., 1905)
- No. 293 ( „ „ 1920)
- No. 16-A ( „ „ 1917-18)
- No. 865 (S. I. I., Vol. VI, p. 334),

and from the Rajahmundry Museum plates of Annadēva Cōḍa published in J. A. H. R. S., Vol. I., No. 4, pp. 172-189.

From these inscriptions we learn that these Cōḍas were quite distinct from the several other Cōḍa families that ruled in several parts of the Āndhra country like the Telugu Cōḍas of Nellore, the Velanāṭi Cōḍas and the Rēnāḍu Cōḍas. In the earlier part of the fourteenth century the Telingaṇa appears to have been the scene of severe internecine struggle for individual supremacy. Close on the heels of the downfall of the Kākatīyas, the central power had waned considerably and from inscriptions<sup>1</sup> we learn that many principalities arose like those of the Nāyaks of Piṭhāpuram etc., who held great military posts under the Kākatīyas. In about this time several powers like the Gajapatis (*i.e.*, Gāṅgas of Kālīṅga), the Redḍis of Koṇḍaviḍu, the Velamas of Dēvarakoṇḍa and Rācakoṇḍa, the Karṇāṭas of Vijayanagara and the Muhammadan powers like the Bahamanis tore the country into shreds by frequent fights amongst themselves for individual supremacy. In this juncture the Cōḍas of our grant come to light and power.

From the Rajahmundry Museum plates of Annadēva we learn that they took part in these fights, joining one side or the other as the case may be, to effect a “balance of power.” The plates say that Annadēva helped the Turuṣka (Firoz Shah Bahamani ?) against the Kannaḍa kings and inflicted a severe defeat on the latter. Though all the inscriptions of these Cōḍas speak of them in eulogistic terms they do not appear to have had

---

1. A. S. P. P., Vol. I, part 2 :—Anitalli's Kaluvacēru inscription.

larger territory or sovereign power at any time. So their position should have been of Maṇḍalēśvaras or chieftains.

As regards their religion almost all the inscriptions are agreed in calling them devotees of Śiva, and they made pious gifts to the temples of Śiva at Dākṣārāma, Mahānandīśvara, Tripurāntaka, Śrīśaila, Paṭṭisa and Benares etc., and to brāhmins of deep learning like Viśvanātha, the donee in the grant under description.

The genealogy of this family, as gathered from our grant, is as follows :—

After a mythological pedigree consisting of names like Manu, Bhagīratha, Ikṣvāku, Kakutstha, Raghu, Rāma, the names of Arikāla and Karikāla, are given. After Karikāla there were several kings, the foremost among them being Nalla-Bhīma. Then came Dāmabhūpa alias Dōhatta Nārāyaṇa, then his son Sōmanṛpāla and after him Gaṅgādhara, the latter's son. After Gaṅgādhara came Bhaktirāja, the donor of our grant. He had various birudas of which the most important are Gaṇḍabhēruṇḍa, and Rāyavēśyābhujāṅga. He was also known by the name of Kāmarāja or Kāmabhūpa, the name by which he is referred to in the Rajahmundry Museum plates of Annadēva. When we compare this genealogy with the one given in the Rajahmundry grant, we get the following connected table:

(1)	(2)
MADRAS MUSEUM GRANT.	RAJAHMUNDRY MUSEUM GRANT.
Nalla-Bhīma	.....m. Annamāmbā
↓	↓
Dāma-bhūpa m. Lakṣmī	Ēruva-Bhīma m. Prōlāmbikā
↓	↓
Sōma-nṛpāla m. Sūrāmbikā	Dāma-nṛpāla m. Lakṣmī
↓	↓
Gaṅgādhara m. Irugāmbā (of the lunar race, daughter of Kāmabhūpa and sister of Vēṅga- bhūpati.)	Sōma-bhūpa m. Sūrāmbikā
↓	↓
	↓
	Kāmarāja <i>alias</i> Bhaktirāja m. Annamāmbā
	↓
	Annadēva m. Irugāmbikā
	↓
	Virabhadra

Nalla-Bhīma of (1) would correspond to Ēruva-Bhīma of (2) and is, therefore, identical with the great warrior-chief Ēruva, about whom there are some cātu verses in Telugu, praising his valour<sup>1</sup>. Mr. V. Appa Rao thinks that Mailama-Bhīma was perhaps another name<sup>2</sup> of his. But this cannot be, for we learn from grant (2) (lines 15-16) that his mother was known as Annamāmbā and not as Mailama. We can easily concede that he had the name Nalla-Bhīma which probably reflected on his complexion or good rule. His wife was Prōlāmbikā. His son was Dāmabhūpa or Dāmanṛpāla who married Lakṣmī. Both the grants agree with regard to Dāmabhūpa, Sōmabhūpa and Gaṅgādhara and their wives. Gaṅgādhara's wife was Irugāmbā, the daughter of Kāma-bhūpa and the sister of king Vēṅga-bhūpati. No. (2) gives Gaṅgādhara the title Arigaṇḍaragaṇḍa, and calls Bhaktirāja as Kāmarāja after his maternal grand-father. The name Bhaktirāja is explained by No. (2), as having been given to Kāmarāja, the name by which he was known from childhood, for his extreme devotion to Śiva (Candracūḍa). His wife, according to no. (2), was Annamāmbā and their son was Annadēva who married Irugāmbikā. And Annadēva's son was Virabhadra with whom our knowledge of this family comes to a close for the present.

Our grant is silent about the military exploits and other activities of Bhaktirāja, as it concentrates only on the religious persuasions of the king. Fortunately the Rajahmundry plates give us ample information about his military and civil activities<sup>3</sup>. He built a town and named it Kāmapurī after his own name. It also bore the name of Kalyāṇa and was as it were the crest-jewel of the Āndhradēśa. Even as a youth he conquered the valorous Yavana chiefs like Boggara and others<sup>4</sup> in the vicinity of the

---

1. V. Prabhākara Sastri, *Cāṭupadyamanimanjari*, p. 76 (Ed. 1913).

2. J. A. H. R. S., Vol. I, No. 4, pp. 174-5.

3. It is to be regretted that facsimiles of these plates have not yet appeared. For much of my information regarding these Cōḍas I rely on the readings given in J.A.H. R. S., Vol. I, No. 4, pp. 182-187.

4. M. E. R., 1912, part II, p. 86.—In this report the word *bōggurādi* occurring in line 23 of Annadēva's plates (J. A. H. R. S., Vol. I, No. 4) has been interpreted as the name of a place called *bōggarādi*, changing the *di* into *ḍi*. But what we find in the inscription is *bōggurādi-yavana* meaning Bōggara and other Yavanas. The passage itself runs thus:—“*Prāmtē yuvaiva Gulapūṇḍi-purasya Śūrān yō Bōggarādi yavanādhipatiṇ ajaiṣī*” (lines 22-23).

town of Gulapūṇḍi (?Gunupūṇḍi). On the east he defeated the Gajapati king at the battle of Pañcadhāra (?Pañcadhāra) and installed on the throne the lord of Koppula. Near the town of Bharanipāḍu he conquered a king called Śiṅga and in a pitched battle near the town of Pedakoṇḍa vanquished the demon-forces (probably Muhammadan forces) under Dabaru Khan and others. At the town of Sūravara he easily defeated the great hero Anna-vōta whose identity becomes clear from the Vanapalli plates of Anna Vēma dated Śaka 1300, published in *Epigraphia Indica*, Vol. III, pp. 59-60. He was the grandson of Prōla, and son of Vēma who built a hall and steps at Śrī Śailam, and a brother of Anna Vēma, the donor of the Vanapalli plates. He was therefore of the Koṇḍaviḍu Reḍḍi family.

Besides the gift mentioned in this grant, Bhaktirāja is said to have given away two other villages, Ātukūru and Āmudālapalli at the instance of Pōlidēvayya<sup>1</sup>. The capital before his time appears to be Mummaḍi Prōlavaram, (probably Murumaṇḍa Pōlavaram in the Godavari district) and Bhaktirāja should have, therefore, built a new capital and called it Kāmapurī. But when we come to the time of his son Annadēva we learn that his capital was Mummaḍi Prōlavaram and not Kāmapurī<sup>2</sup>.

About the activities of Annadēva, both military and religious, we have luckily ample records. Thus from the Rajahmundry Museum plates we learn all about his military exploits. He commanded a large force, and, ably assisted by his son Vīra-

1. Śrīnātha, *Śivarūtrimūhūtmjam*, canto I, verse 16 :—

2. M. E. R., 1912, p. 86.

Annadēva's wife was Irugāmbikā of the solar race, the daughter of Śrī Cakravartī and sister of Pinnuṇḍī, probably a brother of Uṇḍirāja. These Uṇḍirājas also claim the solar race as theirs and are said to belong to the Harita-gōtra. They appear to have been allies to our Cōḍa chiefs in their hours of need. The Rāvulaparti copper plate grant of Uṇḍirāja records the grant of Rāvulaparti surnamed Uṇḍīśapura to brahmans. The king's capital is said to be Sūravaram (one of the two villages of this name in Bhadrachalam Taluk, Godavari Dt.) near which we learnt that Bhaktirāja defeated Annavōta. It is dated Śāka 1304 and would fall in the reign of Bhaktirāja, as the earliest date known for Annadēva is Śāka 1310<sup>1</sup>. This grant gives their genealogy as follows :—

Dēvarāja of the Sūryavaṁśa and  
the Harita-gōtra  
Uṇḍīśa m. (B1) mmidēvī  
|  
Tammarāja m. Vīramadēvī  
|  
Uṇḍirāja m. Rudramadēvī of the  
Mānavyasa-gōtra and probably  
of Cālukyan blood.

1. M. E. R., 1905, No. 254.

From an inscription in Simhācalam, Vīzagapatam district, published in South Indian Inscriptions, Vol. VI, No. 865, dated Śaka 1325, we hear of a Kūnabhūpāla or Kūnaparāja of the Harita-gotra and son of king Cakravarti (line 5). If we remember that Irugāmbikā, the wife of Annadēva was the daughter of Cakravarti and the sister of Pinnuṇḍi (Rajahmundry Museum plates of Annadēva, lines. 42-43—*Śrī Cakravartitanayām Irugāmbikām—Pinnuṇḍibhūpa-sahajām* . .) of the Harita-gotra it goes without saying that Kūnabhūpa was Irugāmbikā's brother, either identical with Pinnuṇḍi (Pinnuṇḍi meaning only the "junior Uṇḍi"), or a brother of the latter.

Though we have ample materials concerning these Uṇḍi-rājas we are unable to determine the exact political relationship of Uṇḍirāja to the contemporary Redḍi chiefs Anna Vōta or Anna Vēma of Koṇḍavīḍu, who were powerful in this part of the country about the time of this inscription.

Annadēva was also a great devotee of Śiva and is said to have made many gifts to brahmans and temples<sup>1</sup>. He covered with gold the temple of Virabhadra at Gōmukhagiri and gilding the pinnacle of the temple of Bhīmeśvara at Dākṣārāma he converted it into a jewel in the crown of the Āndhra country. He made a gift of cows to brahmans of Paṭṭisa on the bank of the Gōdāvarī and gave away a village called Uttamagaṇḍa-Cōḍānnadēvavaram at a spot called Pinna-sāni-saṅga. And lastly he appears to have given several villages to God Viśvēśvara of Benares, his family deity.

Nothing more is known about Annadēva's son, Virabhadra than that he was associated with his father in the latter's military activities. The earliest date that we get for Annadēva is Śaka 1310<sup>2</sup> and the latest date happens to be Śaka 1335<sup>3</sup> or 1336<sup>4</sup>. Subsequent to Śaka 1336 we do not hear either of Annadēva or his son Virabhadra.

While thus it is easy to assign these Cōḍas to the fourteenth and the beginning of the fifteenth centuries, it is still more easy to follow their military activities, as meaning nothing more than

1. S. I. I. Vol. V, No. 145; Vol. IV, Nos. 1347-48, M. E. R., 1905, No. 254; 1920, No. 293.

2. M. E. R., 1905, No. 254.

3. S. I. I., Vol. V, No. 145.

4. J. A. H. R. S., Vol. I, No. 4, p. 181.

a feeble attempt made by a small power with far-reaching ambitions, that took advantage of the disruption in the country caused by the Narapatis (the Kaṁāṭa kings), the Gajapatis (Gāṅgas of Kaḷiṅga) and Aśvapatis (the Muhammadans) and other minor chiefs constantly fighting against each other for individual supremacy.

The gift itself shall now be examined. The king happened to reach in the course of his military marches, Śrī Parvata (Śrī Śaila), the holy of the holies for the Śaivites, where he came under the spiritual influence of a great celebrate-sage called Viśva-nātha or Viśvēśvara, who had Śrī Parvata as his head-quarters and was renowned both for his saintliness and learning. We find some of his inscriptions in the temple of Cālukya Bhīmēśvara, and it appears that he was a great guru with a large number of disciples that aided him in spreading Śaivism in the Telugu country.

He was like a second Śiva, observing, as a bachelor, the Naiṣṭhika-vratas prescribed, having controlled the senses, and came of the Kauśika-gōtra. Such spiritual dignity and sincerity of purpose the king discerned in the sage that the moment he saw him he became his disciple and was so devoted to him from thence that he felt that unless he made some gifts (dānas) to the sage, the only deserving person in his eyes to receive them, the members of his illustrious family or race which counted kings like Rāma, Arikāla and Karikāla etc., could not be considered to deserve their superior birth in that noble race. This resolve he translated into action by giving to the sage a village called Kaṇḍvakolnu in the Śaka year 1277 arrived at by the chronogram, *munī* (sages), *i.e.* 7, *ṛṣi* (sages) *i.e.* 7, *nētra* (eyes) *i.e.* 2, and *Candra* (moon) *i.e.* 1, on Monday, in the month of Kārttika (= Monday, 21st October, 1355 A.D.). The cyclic year would then be Manmatha.

The boundaries of the village are then stated in old Telugu. To the east of it was a big anthill; to the south-east a low land with tamarind trees; to the south a stream; to the south-west an elevated ground with fig trees and Nandikambha or a pillar supporting or bearing the figure of Nandī (bull); to the west a stream coming from a dale; to the north a paddy-pit (probably low ground to keep or collect paddy in) and to the north-west Bommeḍamukkulu?

# MADRAS MUSEUM PLATES OF

FIRST PLATE : SECOND SIDE.

# MADRAS MUSEUM PLATES OF BHAKTIRĀJA.

SECOND PLATE: FIRST SIDE,

None of the boundaries mentioned above appear to be the names of other villages or places of interest. They are merely fields, streams and other places probably of local interest and their inclusion in this grant is just to make the grant familiar to the people, to whom the common places mentioned, which would otherwise be insignificant, were probably too familiar. For this reason these boundaries are called "well-known" (*prathita sīmānam*-line, 44).

The inscription finishes with the usual Vyāsa ślōkas, "Svā-dattām etc." and with the verse "Sāmānyō'yam, etc." found in almost all donative records which emphasise in clear terms that the grant should be respected by all in every way.

## TRANSLATION.

*Verse 1.* May the lord, the white Varāha (*i. e.*, the boar incarnation of Viṣṇu) protect me, who lifted up the earth, of colour as black as the clouds, on his tusk thinking that she was dissimilar to him in colour (*i. e.*, not his equal in caste to be spoused by him)<sup>5</sup>.

*Verse 2.* May Gajānana (the elephant-faced god) protect (me), by whom God Paramaśiva and his consort Pārvatī, the world-parents, consider themselves to be possessed of a good and illustrious son.

*Verse 3.* The tiny digit of the moon, the nector in whose rays have been drunk by the gods, shines (*i. e.*, prospers) like the cow used in the performance of agni-rites (agnihōtra) which has been milked of its milk by the sacrificer for ablution (havis).

*Verse 4.* May the sun and the moon, that carry in their rays heat and cold respectively give victory to the world of kings who treasure most the elevation of their souls or who care most for self-respect, so that their fame arising out of their valour may appear (*i. e.*, spread).

*Verse 5.* Of the kings, in the line of the sun, the first was Manu, who, during the deluge (praḷaya) was protected by Viṣṇu appearing as a fish that landed him safely in the world-boat.

---

1. Read "Kaḍvakolnu".

2. The last *pāda* is deficient by one *mātrā*.

3. Read "viīrṇam".

4. Read "pālanīyō".

5. This second meaning is suggested by the terms *asavarṇā* and *Udavaḥat*.

MADRAS MUSEUM PLATES OF BHAKTIRĀJA.

THIRD PLATE : SECOND SIDE.

MADRAS MUSEUM PLATES OF BHAKTIRĀJA.

SEAL.

*Verse 6.* To this family (sūrya-varṇśa) belongs Bhagīratha, by whom, after conquering (*i.e.*, pleasing) Śiva by severe penance, the river Gaṅgā, the jewel on the head of Śiva was dragged to the world.

*Verse 7.* Kings like Ikṣvāku made this race famous, by whose valour (*i.e.*, valorous assistance) the sovereignty of Indra became wide or large.

*Verse 8.* This race need not be further extolled. It will suffice if we say that to it belonged several kings such as :—Kakutstha who rode on Indra himself, the latter carrying the former on his back as a bull, the heroic Raghu who made the thunderbolt weapon of Indra useless, and Rāma, the slayer of the ten-headed demon Rāvaṇa, who built a dam across the seas.

*Verse 9.* Then was born Arikāla, and Karikāla came after him. The latter surpassed his ancestors by his wonderful exploits.

*Verse 10.* He (Karikāla) bathed everyday with the waters of the river Gaṅgā fetched for him by various kings that passed these waters from hand to hand (*i.e.*, the waters were collected in pitchers and were passed on from the Ganges by hand by the various kings that ruled between the Ganges and Karikāla's kingdom). In the construction of a dam for the river Kāvērī (when its waters overflowed its banks) he engaged all the kings to effect a suitable blockade. He received or upheld or supported the friendly reverence of his leige, Bhōja-rāja (probably a Vākāṭaka) who wished to assure him that he would be his vassal and ally. With ease he broke (*i.e.*, blinded) the eye (*i.e.*, the third eye) on the fore-head of the Pallava king (*i.e.*, Trilōcana Pallava) by stamping on the latter's forehead with the first finger of his leg.<sup>1</sup>

*Verse 11.* By several good kings such as Nalla-Bhīma of this race to which Karikāla also belonged, the earth was ruled and as a result of their virtuous rule prospered or was honoured.

*Verse 12.* To Dāmabhūpa alias Dōhatta-Nārāyaṇa, the husband of Lakṣmī was born Sōma-nṛpāla who made the lotus-like hands of the subordinate kings assume the forms of buds in front of their foreheads (*i.e.*, they worshipped him with their hands folded in añjali).

---

1. For an account of the tradition see Dr. N. Venkataramanayya, *Trilōcana Pallava and Karikāla Cōla*, p. 10.

*Verse 13.* To him, the husband of Sūrāmbikā, was born king Gaṅgādhara, who, when the day dawned made the sun optional to the gods and the brahmans (*i.e.*, he was like the sun unto them so much so that the need for the real sun was not so much felt).

*Verse 14.* The venerable Irugāmbā, daughter of king Kāmabhūpa of the lunar race and sister of king Vēṅga-bhūpati, became his wife.

*Verse 15.* To king Gaṅgādhara, through her, (was born) Śrī Bhakti-rāja who was as it were a Kalpa tree (wish-giving tree) of the world. He was a great devotee of the gracious lord of the universe, Lord Śiva, and was ruling the kingdom being revered by other kings.

*Verse 16.* On seeing him who bore the title Gaṇḍabhērūṇḍa (a mythical bird), in battles the inimical lions (*i.e.*, the foes are compared to lions) stop roaring and take to their heels.

*Verse 17.* This king alone deserves the title Rāyavēśyābhujāṅga (*i.e.*, a viṭa who sports with the harlot who in this case is sovereignty or *rājyalakṣmī*), for all the kings leave modesty or (self-respect) and serve him with pleasure.

*Verse 18.* This king, while engaged in conquering neighbouring kingdoms, in the course of his march, came to Śrī Parvata where he saw Śrī Viśvanātha, the reservoir of fame and virtue, the son of Manmatha or the god of love (*i.e.*, he was of handsome appearance), the milch-cow Kāmadhēnu of the Kali era, who had made Śrī Parvata as his head-quarters.

*Verse 19.* Then he, Bhaktīśa (Bhaktirāja), bowed before him (Viśvanātha), who was a bachelor of the Kauśika-gōtra and who looked like another Śiva himself, and became ardently devoted to him.

*Verse 20.* In the Śaka year 1277 denoted by the chronogram, *munu* (the sages), *i.e.* 7, *ṛṣi* (the sages) *i.e.* 7, *nētra* (eyes) *i.e.* 2, and *candra* (moon) *i.e.* 1, on Monday, in the month of Kārttika (A. D. 1355, Monday, 21st October), the Cōḍa king, Bhaktīśvara, of spotless fame, gave away with joy to Viśvēśvara, the austere mendicant, (naiṣṭhika-brahmacārī or yamī) a complete village called Śrī Kaṇḍvakolnu, along with eight kinds of wealth (aṣṭaiśvarya) and eight kinds of enjoyment (aṣṭabhōga).

*Lines 40-44* contain the boundaries of the village granted.

The boundaries of this are: In the east Peddapuṭṭa, *i.e.*, big ant-hill, in the south-east (āgnēya) Cintājōru-pallamu, *i.e.*, low-lying land with tamarind trees, in the south vāngu, *i.e.*, a stream, in the south-west mēḍitāpa or elevated ground with fig trees and Nandikambha or pillar bearing a bull (nandī) relief on it, in the west a stream from a dale; in the north a paddy-pit (probably low ground to keep paddy in) and in the north-east Bommeḍamuk-kulu ?. (These are) the boundaries.

*Verse 21.* Thus having given away the village of well-known boundaries, the king felt that, by his gift having gone to a person that deserved it, the members of his race deserved their births in his race.

*Verse 22.* By the fame of the gift of the village called Śrī Kaḍvakolni spreading, let this grant, the royal order enjoined or issued by Bhaktibhūpa, spread or become popular till the kalpas, *i.e.*, for ever.

*Verse 23.* He who dishonours land gifted away either by himself or by others, he shall be born as a worm in dung for 60,000 years.

*Verse 24.* This ordinary gift of kings which is as it were the bridge of Dharma (*i. e.*, which enables one to cross the ocean of life) should be protected and honoured by you in time. Rāmacandra thus requests, again and again, all those kings that are to come.

---

## REVIEW.

SOUTH INDIAN PORTRAITS IN STONE AND METAL by T. G. Aravamuthan, Advocate madras. Published by Messrs. Luzac & Co., London. Crown  $\times$  16 Vo. pp. i-xv + 96. Price 5 sh. or Rs. 3 nett.

This is a very interesting brochure from the pen of Mr. T. G. Aravamuthan, who is also a prominent contributor to our Journal. Mr. Aravamuthan is a scholar of repute, and has attained already great distinction in the pursuit of historical studies and research, especially, in South Indian History and Tamil literature. The present work is, as mentioned in the preface, a complement to another book entitled "Portrait Sculpture in South India," which is being published by the India Society, London. The subject forms a very fascinating study, though it is not commonly pursued by scholars and historians. Indeed, it has been assumed by superficial critics and observers that there is very little portrait sculpture in South India. A perusal of this work will show how portrait sculpture has been a persistent art through out South Indian History. It will also remove the impression that portrait sculpture is an art which the Hindus did not cultivate and had even an aversion to. The author has taken great pains to produce illustrations of various statues, in stone and metal scattered throughout southern India, and has also given a short account of the persons whom they can be said to represent. Unfortunately, as usual in this country, in many cases, the individual who is represented in the sculpture is not specifically mentioned underneath the statue. Hence, too often, we have to investigate whom the portrait is likely to represent. After a brief survey of the many sculptures in stone and metal found in temples and other places, the author comes to the conclusion that nowhere in India has the art had so persistent a life as in South India, or such a creditable record of achievement. Nowhere else has the art drawn its inspiration more from the fondest beliefs and the deepest convictions of the people. We must congratulate Mr. T. G. Aravamuthan on this work and on the opening up of a new field of investigation in South Indian History which

will amply repay the efforts of scholars and is likely to yield more beneficent results than the barren investigation of dates and the records of forgotten dynasties. Mr. Aravamuthan commands a virile pen, and presents his conclusions in an impartial and sound manner, without undue emphasis or sweeping generalization. We await with interest the publication of his other books which may throw a great deal more light on this fascinating subject.

K. BALASUBRAHMANYA IYER.

---

#### OBITUARY NOTICE.

We deeply regret to announce the death of Professor P. T. Srinivasa Aiyangar, Professor of Indian History, Annamalai University, on the 16th of June, 1931. He was for a good number of years Reader in Indian History in the Madras University. He had a long and brilliant record as a professor and was a scholar of great repute in English and in History. In the world of research scholars, he holds a distinguished place, and he was the author of many works, which were the result of laborious study and research. He was a very prominent contributor to our Journal, and many articles from his vigorous and literary pen have already appeared in the volumes of this Journal. Recently, he began to contribute a series of articles on the "Saka Pallavas in Indian History." Unfortunately, the series has not yet been finished, and in his death, the Journal has sustained a great loss. His writings were marked by originality of thought and vigour of expression. His death has created a void in the field of South Indian scholarship and research. We beg to express our heartfelt sympathy to the family of the deceased Professor in their sad bereavement.

---

Though there are three complete sentences here, yet they may be taken in sense as one sentence, Viṭar-c-cilai poṛitta vēn-taṇ, Pūn-taṇ-poruṇai-p-poṛaiyaṇ Māntaraṇ cēral maṇṇavaṇ vāli.

*Note 2.*—If different actions of the same person or object have to be mentioned and also different epithets denoting the same, the predicates should be mentioned at the end, of which all but the last one should be indeclinable past participles and the last should be a finite verb.

Ex. Maṇṇaṇ Iḷantiraiyaṇ veṇṇṇu tirumpiṇāṇ.

(King Iḷantiraiyaṇ returned after victory.)

43. தன்மைச் சொல்லே யஃறிணைக் கிளவியென்று  
எண்ணுவழி மருங்கின் விரவுதல் வரையார்.  
*Taṇmai-c collē y-aḥriṇai-k kiḷavi-y-eṇṇu*  
*Eṇṇu-vali maruṅkiṇ viravutal varaiyār.*

It is not prevented to count an *aḥriṇai* noun along with the first personal pronoun.

Ex. Yāṇum eṇ eḥkamum cārum.

(My weapon and myself are sufficient.)

*Note 1.*—The above meaning is given by Iḷampūraṇar and Teyvaccilaiyār; Cēṇāvaraiyar and Nacciṇārkkiniyar give a different meaning (*i.e.*) when the subject is a first personal pronoun and an *aḥriṇai* noun, the predicate is in the first person plural. If the latter interpretation is correct, the sūtra

*Avarṇu!*

*Paṇmai y-uraikkun taṇmai-k kiḷavi*

*Eṇṇiyaṇ maruṅkiṇ ririṇavai y-uḷavē*

(Tol. Col. 209.)

is unnecessary since it conveys the same meaning. Besides sanction is necessary to count *aḥriṇai* nouns along with first personal pronoun, since one is generally inclined to count like objects. Hence the interpretation given by Iḷampūraṇar and Teyvaccilaiyār is, in my opinion, correct.

*Note 2.*—Cēṇāvaraiyar's interpretation of this sūtra is clearly seen from his commentary under the sūtra 'Viyaṅkō i-eṇṇu-p-peyar tiṇai-viravu varaiyār.' (Tol. Col. 45.)

*Note 3.*—It is worthy of notice that sanction is not accorded anywhere in Tolkāppiyam to count an *aḥriṇai* noun and a second personal pronoun, nor for using the predicate in the second person plural (*i. e.*) such expressions as "nīyum niṇ-paṭai-k-kala-

mum cāṭir (your army and yourself are sufficient) have not received sanction at the hands of Tolkāppiyāṇār. Iḷampūraṇar states that the use of the word 'maruṅku' which serves no purpose in this sūtra suggests the sanction of such usage. Cēṇāvaraiyar says in his commentary under Tol. Col. 45. that such expressions are sanctioned in the last sūtra of Collatikāram in Tolkāppiyam.

44. ஒருமை யெண்ணின் பொதுப்பிரி பாற்சொல்  
ஒருமைக் கல்ல தெண்ணுமுறை நில்லாது.  
*Orumai y-enṇiṇ potu-p-piri pāṛ-col*  
*Orumai-k k-alla t-enṇumurai nillātu.*

The words (*oruvan* and *orutti*) which respectively mean one man and one woman and have each a suffix denoting the *pāl* or gender-number are not used in counting.

*Note 1.*—*Orumai-y-enṇiṇ potu-c-col* or the word which denotes a single object and is common to both *āṇpāl* and *peṇpāl* is *oruvār*. *Orumai-y-enṇiṇ potu-p-piri-pāṛ-col* or the words which separately denote one man and one woman are respectively *oruvan* and *orutti*. In counting, one has to say *oruvār*, *iruvār*, *mūvār*, *nālvar* etc., and not *oruvan*, *iruvār*, *mūvār* etc., nor *orutti*, *iruvār*, *mūvār* etc.

*Note 2.*—Iḷampūraṇar and Teyvaccilaiyār have given the above meaning to the sūtra. Cēṇāvaraiyar and Nacciṇārkkīyār, on the other hand, have taken the sūtra to mean that the words *oruvan* and *orutti* which are *orumai-y-enṇiṇ-potu-p-piri-pāṛ-col* are used only in connection with the number denoting *orumai* and not with the numbers denoting *irumai*, *mummai* etc. (i.e.) the suffixes *ṇ* denoting *āṇpāl* and *i* denoting *peṇpāl* are used only in connection with the number denoting single object as *oruvan* and *orutti* and not with those denoting more than one; hence the words *iruvan*, *irutti*, *mūvan*, *mutti* etc., cannot be used. There are six defects in this interpretation :—(1) They take the expression *orumai-y-enṇiṇ potu-p-piri-pāṛ-col* to denote the suffixes *ṇ* and *i* instead of the words *oruvan* and *orutti*. (2) They take the expression *enṇumurai* to mean in respect of the numbers *irumai*, *mummai* etc., instead of the natural meaning 'while counting'. (3) Such an interpretation of the word *enṇumurai* is not suited to the context; for both the sūtras that precede and follow this sūtra deal with the use of expressions while counting. (Cf. the words *enṇu-vali* in Tol. Col. 43 and *enṇu-p-*

*peyar* in Tol. Col. 45.) (4) They have to take that this sūtra suggests that *oruvar* is used in counting and not *oruvan* or *orutti*, which, Iḷampūṇar and Teyvaccilaiyār think, is the direct meaning of the sūtra. (5) Besides Cēṇāvaraiyar has to find an explanation for the use of the singular verb *nillāti* as the predicate of the word *potu-p-ṭiri-ṭār-col*, which, according to his interpretation, is plural in number since it denotes the two suffixes *ṇ* and *i*. (6) Lastly their statement that the words *iruvan*, *irutti*, *mūvan*, *mutti* etc., cannot be used is against the ordinary rules of science; for the use of a suffix or suffixes may be prohibited in certain places only if there is a chance of its or their being used in those places on the authority of another sūtra (cf. *Prāptasyaiva niṣēdhaḥ*). Here, there is no possibility for the suffixes *ṇ* and *i* which denote singular number to be used in words *iruvan*, *irutti*, *muvan*, *mutti* etc. since their bases denote objects more than one.

Hence the interpretation given by Iḷampūṇar and Teyvaccilaiyār is direct, unlaboured and sound.

45. வியங்கோ ளெண்ணுப்பெயர் திணைவிரவு வரையார்.  
*Viyaṅkō ḷ-eṇṇu-p-peyar tiṇai-viravu varaiyār.*

It is not prohibited to connect *uyar-tiṇai* nouns and *aṣṟiṇai* nouns by 'and' if both of them have a verb in the potential mood as the common predicate.

Ex. Ā-v-um āyaṇ-um celka.

(Let the cows and the shepherd go.)

*Note 1.*—Iḷampūṇar and Teyvaccilaiyār have given the above interpretation; while Cēṇāvaraiyar and Nacciṇārkkīṇiyar, on the other hand, state that this sūtra sanctions the use of one verb in the potential mood when the subject consists of both *uyartiṇai* and *aṣṟiṇai* nouns. Since no other sūtra sanctions the counting of *uyartiṇai* and *aṣṟiṇai* and since *viyaṅkōḷ-viṇai* or verb in the potential mood has the same form whether it denotes *uyartiṇai* or *aṣṟiṇai* (cf. Tol. Col. 222), the interpretation of Iḷampūṇar and Teyvaccilaiyār is sound.

*Note 2.*—Cēṇāvaraiyar condemns Iḷampūṇar's interpretation of this sūtra on four grounds:—(1) Even though in expressions like *ā-v-um āyaṇ-um celka*, *ā* (cows) and *āyaṇ* (shepherd) are respectively *aṣṟiṇai* and *uyartiṇai*, still they may be connected by 'and' on account of their having the relation of 'the grazer and the grazed'. Similarly in other expressions such rela-

tions may be found. (2) Iḷampūraṇar himself quotes ‘*yānai, tēr, kutirai, kālāl erintān*’ (he routed elephants, chariots, cavalry and foot-soldiers) under Tol. Col. 291 as an example where *uyartiṇai* and *aṣṟiṇai* nouns qualify the same predicate *erintān* which is not in the potential mood. There is no sūtra which sanctions that *uyartiṇai* and *aṣṟiṇai* nouns may be connected by the word ‘and’ when they take a common predicate in the indicative mood. (3) Tolkāppiyaṇār himself states that *eṇṇu-t-tiṇai-viravu-p-peyar* or nouns belonging to *uyartiṇai* and *aṣṟiṇai* counted together take the *aṣṟiṇai* verb in Tol. Col. 51. Hence he may have thought, in this sūtra, of the predicate and not of the subject. (4) Since expressions are found in plenty where *uyartiṇai* nouns in third person are counted together with *aṣṟiṇai* nouns, Tolkāppiyaṇār could have said ‘*uyartiṇai-c-collē y-aṣṟiṇai-k kiḷavi*’ instead of ‘*taṇmai-c-collē y-aṣṟiṇai-k kiḷavi*’ in Tol. Col. 43, so that the use of all *uyartiṇai* nouns and pronouns whether they are in the first person, second person or third person with *aṣṟiṇai* nouns taking the common predicate might have been sanctioned.

As regards the first objection, we may ascribe some relation or other between two objects. When the sūtra may be taken to sanction directly that the *uyartiṇai* nouns and *aṣṟiṇai* nouns may be connected by ‘and’, why should we resort to ascribe some relation between them to sanction such a usage? The second objection is not a serious one. Cēṇāvaraiyar himself says that the use of *uyartiṇai* and *aṣṟiṇai* nouns taking a common predicate which is not in the potential mood is to be taken by *tanniṇa-muṭittal*. What harm is there if Iḷampūraṇar takes such expressions by the same principle *tanniṇa-muṭittal*. The third objection does not seem to be sound. Even though in Tol. Col. 51 Tolkāppiyaṇār says about the predicate, still he need not have mentioned anything about the predicate in this sūtra; for the previous sūtra decidedly deals with the counting of objects. Hence there is no harm by taking that this sūtra deals with the subject of the verb in the potential mood. (4) The fourth objection may be met thus:—It must be clearly noted that according to Tolkāppiyaṇār a verb in the first person is always *uyartiṇai* and hence can never be used along with *aṣṟiṇai* subject. Hence there came the necessity for the sūtra Tol. Col. 209 which says that a verb in the first person plural may be used if the subject is made up of a pronoun of the first person connected with an

*aṣṛiṇai* noun. The sanction of such a use of the verb in the first person plural arises only when the counting of a first personal pronoun and an *aṣṛiṇai* noun is sanctioned. Hence is the need of the expression *taṇmai-c-collē* in the sūtra Tol. Col. 43.

46. வேறுவினைப் பொதுச்சொ லொருவினை கிளவார்.  
*Vēru-viṇai-p potu-c-co l-oru-viṇai kiḷavār.*

A predicate denoting the *species* of an action is not used along with a noun connected with its *genus*, (*i.e.*) the predicate denoting the genus of the action itself should be used.

For instance the word *aṭicil* means an eatable which is *uṇṭatū* or that is swallowed without the action of the teeth, *tiṇṭatū* or that is masticated, *parukuvatū* or that is drunk like water and *nakkuvatū* or that is licked like viscous fluid. Hence one should not use expressions like *aṭicil uṇṭāṇ*, *aṭicil tiṇṭāṇ*, *aṭicil parukiṇāṇ* and *aṭicil nakkīṇāṇ*; but one should use *aṭicil ayinṇāṇ*, *cōrū* (rice) *uṇṭāṇ*, *ūṇ* (flesh) *tiṇṭāṇ*, *nīr* (water) *parukiṇāṇ* and *tēṇ* (honey) *nakkīṇāṇ*. Similarly the word *aṇi* means an ornament which is *kavippatū* or that is placed over like the crown, *kaṭṭuvatū* or that is tied like flowers to the hair, *ceṇip-patū* or that is put on like bracelets and *pūṇuvatū* or that is hung like garlands, necklaces etc. Hence one should not use expressions like *aṇi kavittāṇ*, *aṇi kaṭṭiṇāṇ*, *aṇi ceṇittāṇ*, and *aṇi pūṇṭāṇ*, but should use *aṇi aṇittāṇ*, *muṭi* (crown) *kavittāṇ*, *pūvai* (flowers) *kuḷalir* (tuft) *kaṭṭiṇāṇ*, *tōḷvalai* (armlets) *ceṇittāṇ*, and *mālai* (garlands) *pūṇṭāṇ*.

Similarly the word *iyam* means a musical instrument which is *koṭṭuvatū* or that is beaten, *ūtuvatū* or that which is blown and *eḷuppuvatū* or that which is provided with strings. Hence one should use *iyam iyampīṇār* etc.

*Note 1.*—Cēṇāvaraiyar takes the word ‘*micaintār*’ in the same category as ‘*ayinṇār*’. Nacciṇārkkīṇiyar remarks that both of them cannot be taken to denote the action of eating in a general sense and ‘*uṇṭār*’ should be used in their place. This shows that such restrictions were not carefully observed in later literature.

*Note 2.*—It is learnt from the commentary of Iḷampūraṇar that *orūu-viṇai* is another reading in the place of *oru-viṇai* in the sūtra.

47. எண்ணுங் காலு மதுவதன் மாபே.  
*Eṇṇuṇ kālu m-atu-v-ataṇ marapē.*

The same rule (as is mentioned in the previous sūtra) should be observed when eatables of different nature are counted, (*i.e.*) the verb giving the general sense should be used.

Ex. Cōruṇ kariyūm ayinrār.

(They ate rice and meat.)

Yāluṇ kuḷalum iyampinār.

(They played upon yāl and pipe.)

*Note 1.*—This rule, too, gradually fell into disuse. For the verb *uṇ* is used as one giving general sense in *Puṛanānūṛu*. cf. *Ūṇ-ruvai kari cōru uṇṭu*. (Having taken in meat, chutney, vegetables and rice.) (*Puṛanā*. 14, 14.)

*Note 2.*—*Teyvaccilaiyār* reads *eṇṇuṇ-kālai* in place of *eṇṇuṇ-kālum*. The latter reading seems to be better since the use of the particle '*um*' is appropriate.

48. இரட்டைக் கிளவி யிரட்டிற் பிரிந் திசையா.

*Iraṭṭai-k kiḷavi y-iraṭṭir-pirin t-icaiyā.*

There are certain words whose roots are always reduplicated.

Ex. Carukū eriyuṇkālai curu-curu-t-t-atū.

(Dried leaves produced a hissing sound when being burnt.)

Pakaivar koṛu-koṛu-t-t-ār.

(Enemies bubbled with anger.)

Aracaṇ mukam kaṛu-kaṛu-t-t-atū.

(The king's face became very black.)

*Note 1.*—*Iḷampūraṇar* reads '*Iraṭṭu-p-pirinticaiyā*' in place of '*Iraṭṭir-pirinticaiyā*'.

*Note 2.*—It is worthy of note that the *iraṭṭai-k-kiḷavi* referred to in this sūtra is a word denoting noise, feeling or quality.

*Note 3.*—The difference between *iraṭṭai-k-kiḷavi* mentioned here and *aṭukkū* mentioned in *Tol. Col.* 411, 424, 425 etc. is that, in the former, the root is doubled like *curu-curu-t-t-atū*, *kaṛu-kaṛu-t-t-atū* etc. and in the latter the whole word is doubled like *kaṇṭirē kaṇṭirē*, *pōyirru pōyirru* etc.

49. ஒருபெயர்ப் பொதுச்சொ லுள்பொரு ளொழியத்

தெரிபுவேறு கிளத்த றலைமையும் பன்மையும்

உயர்திணை மருங்கினு மஃறிணை மருங்கினும்.

*Oru-peyar-p potu-c-co l-ul-poru l-oliya-t*

*Teriṭu-vērū kiḷatta ṛalaimai-y-um paṇmai-y-um*  
*Uyartiṇai maruṅkiṇu m-aṣṛiṇai maruṅkiṇum.*

If in certain expressions *uyartiṇai* and *aṣṛiṇai* words have to be used to denote a group made up of different kinds of persons or objects, those that denote the pre-eminent or the majority are used. For instance one uses the word *pārppaṇa-c-cēri* (the residence of Brahmins) to denote a place where Brahmins and members of other communities reside, of whom the Brahmins are considered superior. Similarly the word *kamukan-tōṭṭam* to denote a garden containing *kamukū* (areca-palm) and other trees. Since *kamukū* is considered to be superior to other trees in the garden, the word *kamukan-tōṭṭam* is chosen. The word *eyiṇar-nāṭū* (the land of hunters) is used to denote a country where *eyiṇar* are in majority. Similarly the word *oṭu-v-aṅ-kāṭū* (forest containing *oṭu* trees) is used to denote a forest which abounds in round-leaved-discous feather-foil trees.

*Note 1.*—Teyvaccilaiyār takes the line ‘*uyartiṇai maruṅkiṇu m-aṣṛiṇai maruṅkiṇum*’ found in this sūtra to the following sūtra.

50. பெயரினும் தொழிலினும் பிரிபவை யெல்லாம்  
 மயங்கல் கூடா வழக்குவழிப் பட்டன.  
*Peyariṇun tolilinum piriṭavai y-ellām*  
*Mayaṅkal kūṭā vaḷakku-vaḷi-ṭ paṭṭana.*

Nouns and verbs (belonging both to *uyartiṇai* and *aṣṛiṇai*) denoting different objects or actions should be counted together only according to usage.

Ex. Pāṇarun kūttarum viṛaliyarum vantaṇar.

(Pāṇars, kūttars and viṛaliyars came.)

Ponṇun tukiru muttum.

(Gold, corals and pearls.)

(Puṛanā. 218.)

Āṭuvārum, pāṭuvārum, nakuvārum kūṭiṇar.

(Dancers, songsters and those that are merry assembled.)

Uṇṇaṇavum, tiṇṇaṇavum, parukuvaṇavum, nakku-vaṇavum eṇakku-kkoṭuttāṇ.

(He gave me eatables that can be swallowed, masticated, drunk and licked.)

*Note 1.*—Teyvaccilaiyār, instead of taking the line *uyartiṇai maruṅkiṇum- aṣṛiṇai maruṅkiṇum* to this sūtra might have read it in the previous sūtra and taken its idea here also by the

principle of *anuvṛtti*. He takes the word *eṇṇuñkāl* here from the following sūtra. Instead of doing so he might have taken *eṇṇuñ-kālum* from Tol. Col. 47.

*Note 2.*—The above meaning belongs to Teyvaccilaiyār. Iḷampūraṇar, Cēṇāvaraiyar and Naccinārkkiniyar, on the other hand, have given a different meaning. (*i.e.*) It is no mistake if nouns common to men and women and verbs denoting action common to them both are used to denote either of them. Such expressions should have been sanctioned by usage. For example in the expression '*vaṭukar-aracar āyiravar makkaḷai y-uṭaiyar*' (hundred *vaṭuka* kings have children), the word *vaṭukar* which generally means men and women of *vaṭuka* caste here refers to only *vaṭuka* men by the association of the word *aracar*. Hence the word *vaṭukar* is here named *peṇ-ṇ-oli-miku-col* (word which applies to men alone to the exclusion of women). Similarly in the expression '*toṭiyōr koy-kulai y-arumpiya kumari ṇālal*' (young jasmine sprouting on account of its being plucked by those who wear bracelets), the word *toṭiyōr* which should generally mean men or women wearing bracelets here refers to only women wearing bracelets since men are not generally used to wear them. Hence the word *toṭiyōr* is here named *āṇ-oli-mikucol* (word which applies to women alone to the exclusion of men). In the sentence '*ivar vālkkai-p-paṭṭār* (these persons have become house-holders), the word *ivar* refers to only women since the expression *vālkkai-p-paṭutal* is generally applied to women. Similarly in the sentence '*ivar kaṭṭil ēriṇār*' (this person ascended the throne), the word *ivar* refers to a man since women were not generally used to ascend the throne in Tamil land.

Teyvaccilaiyār thinks that the above examples may come under *cārpu* mentioned in the sūtra

*Avarṛul,*  
*Viṇai-vērū paṭūm pala-poru l-oru-col*  
*Vēru-paṭu viṇaiyinu m-iṇattinuñ cārpinum*  
*Tēra-t tōṇṇum poruṭeri nilaiyē. (Tol. Col. 53.)*

Teyvaccilaiyār's meaning to this sūtra seems to be better for two reasons:—(1) There is no other sūtra sanctioning the counting of like objects. (2) The following sūtra best fits in after this, since it deals with the nature of the verb which stands as the common predicate of *uyartiṇai* and *aṣṟiṇai* nouns.

*Note 3.*—The examples given by Iḷampūraṇar to this sūtra are ‘inru i-v-vūr-p peṛram-ellām pāl kaṛakkum’ (To-day all the cattle of this village give milk); ‘inru i-v-v-ūr-p peṛram ellām ulavu oḷintāṇa’ (To-day all the cattle of this village are relieved of ploughing). Cēṇāvaraiyar remarks that those examples are incorrect; for, the word peṛram in the former example cannot but refer to cows on account of its association with the word *kaṛakkum*, since the power of giving milk always rests only with cows, and the same word in the latter example cannot but refer to bulls on account of its association with the words *ulavu oḷintāṇa*, since the task of ploughing always rested only with bulls. In case cows also are sometimes used for ploughing fields Cēṇāvaraiyar’s condemnation as regards the second example may not be accurate.

51. பலவயி னு னு மெண்ணுத்தினை விரவுப்பெயர்  
அகறினை முடிபின செய்யு ளுள்ளே.  
*Pala-vayi n-ānu m-enṇu-t-tiṇai viravu-p-peyar*  
*Aṣṛiṇai muṭiṇa ceyyu ḷ-ul-ḷ-ē.*

If *uyartiṇai* and *aṣṛiṇai* nouns are connected by ‘and’ and take a common predicate, the *aṣṛiṇai* predicate is generally used in poetry.

Ex. Kaṭuñ-cinatta kol-kaḷiṇum  
Kaṭaḷ-pariya kali-māvum  
Neṭuñ-koṭiya nimir-tērum  
Neñcuṭaiya pukaṇ-maravarum-eṇa  
Nāṇkuṭaṇ māṇṭa tāyiṇum.

(Though the four parts (of the army) consisting of fiery war elephants, swift and daring horses, lofty chariots with long flags and bold and willing warriors were great).

Here the predicate *māṇṭatu* is *aṣṛiṇai* while the subject consists of *uyartiṇai* noun *maravar* and *aṣṛiṇai* nouns *kaḷirū*, *mā* and *tēr*.

*Note 1.*—The word *pala-vayin-āṇum* (in many places) in the sūtra suggests that there may be a few places where the *uyartiṇai* predicate may be used.

Ex. Pārppār tavarē cumantār piṇippaṭṭār  
Mūttā r-iḷaiyār pacu-p-peṇṭi r-eṇṇivarkaṭkū  
Āṛra vali-vilaṅki nārē piṇappiṭai-p  
Pōṛri y-eṇa-p-paṭu vār. (Ācārakkōvai, 64.)

(Great are they among human beings who give way to the brahmins, ascetics, load-bearers, the sickly, the elders, the youngsters, cows and women if they meet them on their way).

Here though the word *pacu* which is *aṣṛiṇai* is one of the nouns forming the subject, yet the predicate *eṇa-p-paṭuvār* is in *uyartiṇai*.

*Note 2.*—This sūtra also suggests that the demonstrative pronoun which refers to *uyartiṇai* and *aṣṛiṇai* nouns mentioned before may, in many places, be *aṣṛiṇai* one and in some places *uyartiṇai*.

- (1) Ex. Vaṭuka r-aruvāḷar vāṇ-karu nāṭar  
Cuṭu-kāṭu pēy-erumai y-eṇṇivai y-ārūm  
Kuṟu-kā r-aṟivutai y-ār.

(Wise persons do not approach these six:—vaṭukar (Telugu people), aruvāḷar (a Tamil tribe) karunāṭar (Canarese people), cremation ground, goblins and buffaloes).

Here the word *vai* which is *aṣṛiṇai* refers to *vaṭukar*, *aruvāḷar*, *vāṇ-karu-nāṭar*, *cuṭu-kāṭu*, *pēy* and *erumai* of which *cuṭu-kāṭu* and *erumai* are *aṣṛiṇai*, and *vaṭukar*, *aruvāḷar* etc. are *uyartiṇai*.

- (2) Ex. Pārppā r-aṟavōr pacu-p-pat tiṇi-p-peṇṭir  
Mūttōr kuḷavi y-eṇum ivarai-k kai-viṭṭū.

(Cilap. Vañciṇa-mālai).

(Having deserted brahmins, righteous persons, cows, married women, old persons and children).

Here the word *ivarai* refers to *pārppār*, *aṟavōr*, *pattiṇi-p-peṇṭir*, *mūttōr* which are *uyartiṇai* and *pacu* and *kuḷavi* which are *aṣṛiṇai*.

*Note 3.*—The word '*pala-vayin-āṇum*' in the sūtra modifies the predicate *aṣṛiṇai-muṭṭiṇa*, in the meaning given above. The same is the opinion of Cēṇāvaraiyar and Teyvaccilaiyār. Iḷam-pūraṇar, on the other hand takes it as an adjunct to the subject *eṇṇu-t-tiṇai-viravu-p-peyar*. Hence he says that the predicate is *aṣṛiṇai* when the subject is, in most cases, made up of *uyartiṇai* and *aṣṛiṇai* nouns and in a few cases made up of *uyartiṇai* nouns alone. The example which he gives for the latter case is:—

Tuṭiyaṇ pāṇaṇ paṟaiyaṇ kaṭampaṇ-eṇṇū  
I-n-nāṇ k-allatū kuṭi-y-u m-illai. (Pura. 335)

Here the *aṣṟiṇai* noun *nāṇkū* refers to *uyartiṇai* nouns *tuṭiyan*, *pāṇan*, *paraiyan* and *kaṭampan*, each of which refers to a low caste among Dravidians of Ancient India. Cēṇāvaraiyar is of opinion that Iḷampūraṇar's example is not happy since the *aṣṟiṇai* word *nāṇkū* was used in consideration of the *aṣṟiṇai* noun *kuṭi* which follows it.

Naccinārkkiniyar takes the word *pala-vayin-āṇum* as an adjunct to both the subject and the predicate. Since his purpose is reached by taking it as the adjunct to the predicate alone, the opinion held by Cēṇāvaraiyar and Teyvaccilaiyār seems to be the correct one.

52. வினவேறு படுஉம் பலபொரு ளொருசொல்  
வினவேறு படாஅப் பலபொரு ளொருசொலென்று  
ஆயிரு வகைய பலபொரு ளொருசொல்.  
*Vinai-vēru paṭṭum pala-poru ḷ-oru-col*  
*Vinai-vēru paṭṭa-p pala-poru ḷ-oru-col-enru*  
*Ā-y-iru vakaiya pala-poru ḷ-oru-col.*

*Pala-poruḷ-oru-col* or words having different meanings are of two kinds:—(1) those which take different verbs after them and (2) those which take the same verb after them.

Ex. Mā pūttatū.

(The mango tree put forth flowers.)

Mā oṭṭirru.

(Horse ran.)

Mā niṇratū.

(Mango tree stood or Horse stood.)

*Note.*—If the verb is such that can be used with all such words, it is not possible for us to determine the particular meaning in which it is used.

53. அவற்றுள்,  
வினவேறு படுஉம் பலபொரு ளொருசொல்  
வேறுபடு வினையினு மினத்தினுஞ் சார்பினும்  
தேறத் தோன்றும் பொருடெரி நிலையே.  
*Avarruḷ,*  
*Vinai-vēru paṭṭum pala-poru ḷ-oru-col*  
*Vēru-paṭu vinaiyin m-inaittinuñ cārpinum*  
*Tēra-t tōṇrum poruṭeri nilaiyē.*

Of them the meaning of *vinai-vēru-paṭṭum-pala-poruḷ-oru-col* is clearly determined by *vēru-paṭu-vinai* or distinguishing

verbs, *iṇam* or the words of its class used along with it or *cārpu* or context.

(1) Ex. *Mā pūttatū.*

The word *mā* which means mango tree, horse, beetle, goddess Lakṣmī etc., denotes in this example the mango tree on account of its association with the verb *pūttatū* which means 'put forth flowers.' It is only the mango tree that can put forth flowers.

(2) Ex. *Mā-v-um marutam-um ōṅkiṇa.*

The word *mā* here cannot but refer to the mango tree since it is connected with the word *marutam* which denotes a kind of tree by the copula 'um'.

(3) Ex. *Mā-marutta malar-mārpiṇ* (Pura. 7).

(By having wide chest (which enables) the goddess Lakṣmī to forsake others).

That the word *mā* here refers to Lakṣmī is learnt from *cārpu* or context.

*Note 1.*—The word *viṇai* in the sūtra refers to not only the verbs that stand as predicates, but also to nouns that stand as such.

Ex. *I-m-mā vayiram.* (This mango tree is of strong-fibre.)

*Note 2.*—The word *cārpu* in the sūtra which means context will do; the mention of *vērupaṭu-viṇai* and *iṇam* have been added in the sūtra only for the sake of clearness.

54. ஒன்றுவினை மருங்கி னென்றித் தோன்றும்  
வினைவேறு படாஅப் பலபொரு ளொருசொல்  
வினையுந் காலக் கிளந்தாங் கியலும்.

*Onṛu-viṇai maruṅki n-onṛi-t tōṇṛum*  
*Viṇai-vēru paṭā-p pala-poru ḷ-oru-col*  
*Niṇaiyuṅ kālai-k kiḷant-ān k-iyalum.*

Words having different meanings should be clearly mentioned with proper adjuncts to enable the reader to understand its exact meaning, if they are followed by non-distinguishing verbs.

Ex. *Mā-maram vīntatū.*

(The tree *mā* fell down.)

*Mā-vilaṅkū vīntatū.*

(The animal *mā* fell down.)

*Note 1.*—Iḷampūraṇar, Nacciṇārkkkiṇiyar and Teyvaccilaiyār take the first line in this sūtra (i.e.) *onṛu-viṇai maruṅki n-onṛit-*

*tōṇrum* as a separate sūtra and the other two lines as one sūtra. Iḷampūraṇar's meaning for the former is that words having different meanings cannot definitely denote one object if they are followed by non-distinguishing verbs. For example if one says '*mā vīṇtatū*' which means *mā* fell, the hearer cannot understand whether the speaker intends by the word *mā*, the tree *mā*, the beast *mā*, the beetle *mā* or the goddess Lakṣmī. If we take this interpretation, it is evident that there is no need for this sūtra.

Nacciṇārkkkiṇiyar on the other hand, says that this sūtra means that, if words having different meanings are followed by non-distinguishing verbs they, in association with certain other factors, denote specific objects. For instance if one says '*mā vīṇtatū*', the hearer may understand what the word *mā* denotes if he takes into consideration the place and the time of stating that sentence. If so, it is evident that, since this idea is conveyed by the word *cārpū* in the previous sūtra, this sūtra is not necessary. Teyvaccilaiyār interprets this sūtra more or less in the same way as Nacciṇārkkkiṇiyar. The only point of difference between them is that, according to the former the word '*piṇa-collōṭū*' is understood before the word '*oṇri*' and according to the latter '*kālam iṭam mutaliyavarroṭū*' is understood before it.

According to Iḷampūraṇar '*oṇri-t-tōṇrum*' means 'appear without being distinguished' and according to the other two it means 'exist distinguished by being associated with other words or the time and place of speaking. All the three take '*tōṇrum*' to be a finite verb. Cēṇāvaraiyar on the contrary takes it to be a relative present participle qualifying the word '*viṇai-vēru-paṭāa-p-pala-poruḷ-oru-col*' in the next line.

The meaning given to the second and the third lines by Iḷampūraṇar, Nacciṇārkkkiṇiyar and Teyvaccilaiyār is the same as that given by Cēṇāvaraiyar for all the three lines.

From the foregoing reasons it may be evident that Cēṇāvaraiyar's view that the three lines should be taken as one sūtra is sound.

55. குறித்தோன் கூற்றந் தெரித்துமொழி கிளவி.

*Kurittōṇ kūṇṇan terittu-moḷi kiḷavi.*

The idea of the speaker or writer should be definitely expressed.

Note 1.—'*Kurittōṇ kūṇṇan*' is the subject in the sūtra; the predicate is *ātal-vēṇṭum*, which is understood; and '*terittu-moḷi*'

*kiḷavi* is the subjective compliment of the predicate and it may be taken as a *vinai-t-tokai* formed of the words *terittu-moḷinta* and *kiḷavi*.

*Note 2.*—Iḷampūraṇar, Cēṇāvaraiyar and Naccinārkkīṇiyar have given the above interpretation to the sūtra. But Iḷampūraṇar seems to take *kūrṛam* to mean 'idea', while Cēṇāvaraiyar and Naccinārkkīṇiyar take it to mean 'difference'. Besides '*kūrṛant*' seems to be in the nominative case according to Iḷampūraṇar, while it is, in the opinion of the other two, objective case governing *kurittōṇ*. And according to them both *kurittōṇ* seems to be the subject and *terittu-moḷi* the predicate. In that case *terittu-moḷi* should be considered the contracted form of *terittu-moḷika*, which is rare and the word *kiḷavi* means words.

*Note 3.*—Teyvaccilaiyār takes *terittumoli-kiḷavi* as the subject and *kurittōṇ-kūrṛam* as logical predicate and *kūrṛam* to mean 'intention not expressed'. He adds that '*um*' and '*ān*' are understood in the sūtra. The example he gives is 'Cēval-aṅkoṭiyōṇ kāppa' (may the cēvalbannered protect) (*Kuruntokai*, 1.) where, he says, the word *cēval*-which is applied to male horse, cock etc., here means cock since the author wants to describe the God *Murukan* who is cock-bannered. But it seems to me that it is the context that determines that the word *cēval* refers to cock. Hence this example may come under the sūtra 53. Iḷampūraṇar's interpretation seems to be the best if we consider why this sūtra is placed after the previous three sūtras.

56. குடிமை யான்மை யிளமை மூப்பே  
அடிமை வன்மை விருந்தே குழுவே  
பெண்மை யாசே மகவே குழவி  
தன்மை திரிபெய ருறுப்பின் கிளவி  
காதல் சிறப்பே செறற்சொல் விறற்சொலென்று  
ஆவறு மூன்று முளப்படத் தொகைஇ  
அன்ன பிறவு மவற்றொடு சிவணி  
முன்னத்தி னுணருங் கிளவி யெல்லாம்  
உயர்திணை மருங்கி னிலையின வாயினும்

*Kuṭimai y-āṇmai y-iḷamai mūppē*  
*Aṭimai vaṇmai viruntē kuḷuvē*  
*Peṇmai y-aracē makavē kuḷavi*  
*Taṇmai tiri-peya r-uruppiṇ kiḷavi*  
*Kātal cirappē cerar-col virar-col-enrū*

*Ā-v-arū mūnru m-ulappata-t tokar*  
*Anṇa pīravu m-avarroṭu civaṇi*  
*Munnatti n-uṇaruṇ kiḷavi y-ellām*  
*Uyar-tiṇai maruṇki nilaiyiṇa v-āyiṇum*  
*Aṣṛiṇai maruṇkiṇ kiḷantāṇ k-iyalum.*

The eighteen words *kuṭimai* (status of a family, family), *āṇmai* (manliness, man), *iḷamai* (youth, young man or woman), *mūppū* (old age, old person), *aṭimai* (slavery, slave), *vaṇmai* (strength, strong ally), *viruntū* (feast, guest), *kuḷū* (collection, crowd), *peṇmai* (feminine quality, woman), *aracu* (kingship, king), *makavu* (son-hood, daughter-hood, son, daughter), *kuḷavi* (childhood, child), *taṇmai-tiri-peyar* (noun denoting the change of quality), *uruppiṇ-kiḷavi* (words pertaining to organs like *kuruṭū* blindness, blind person), *muṭam* (lameness, lame person etc.), *kātar-col* (terms of endearment), *ciṇappu-c-col* (terms of honour), *ceṇar-col* (terms of hatred, anger etc.) *viṇar-col* (terms of valour) and similar ones take *aṣṛiṇai* verbs even when they denote *uyartiṇai* objects.

*Note 1.*—The particle ‘*um*’ in the word *nilaiyiṇa-v-āyiṇum* suggests that the above words are *aṣṛiṇai* when they denote abstract qualities and that they are *uyartiṇai* when they denote the objects having those qualities.

*Note 2.*—Cēṇāvaraiyar says that the words *kuṭimai*, *āṇmai*, *iḷamai*, *mūppū*, *aṭimai*, *vaṇmai*, *peṇmai*, *uruppiṇ-kiḷavi*, *ciṇappu-c-col*, *viṇar-col* are only *aṣṛiṇai* and can denote *uyartiṇai* only when they are *ākupeyar*. *Ākupeyar* is the name given to a noun which means in a sentence an object related its ordinary meaning in the figure metonymy or synecdoche. *Ākupeyar* has its place only when the meaning of a word does not suit with the predicate which follows it. Before the predicate is used, it is not right to say that a word denotes something connected with its original meaning. Hence Cēṇāvaraiyar’s view is not correct.

*Note 3.*—The need for this sūtra is this:—The words *kuṭimai*, *āṇmai* etc., are *aṣṛiṇai* in form but denote *uyartiṇai* objects in certain cases. In such cases the sūtra:—

*Viṇaiyir rōṇrum pāl-aṇi kiḷaviyum*  
*Peyariṇ rōṇrum pāl-aṇi kiḷaviyum*  
*Mayaṇkal kūtā tam-mara piṇavē. (Tol. Col. 11.)*

demands that *uyartiṇai* verbs should be used. But this sūtra says that *aṣṛiṇai* verbs also may be used,

57. கால முலக முயிரே யுடம்பே  
 பால்வரை தெய்வம் வினையே பூதம்  
 ஞாயிறு திங்கள் சொல்லென வருஉம்  
 ஆயீ ரைந்தொடு பிறவு மன்ன  
 ஆவயின் வருஉங் கிளவி யெல்லாம்  
 பால்பிரிந் திசையா வுயர்திணை மேன.  
*Kāla m-ulaka m-uyirē y-uṭampē*  
*Pāl-varai teyvam viṇaiyē pūtam*  
*Ñāyirū tiṅkaḷ col-l-eṇa varūum*  
*Ā-y-ī r-aintoṭūṅ pīravu m-anna*  
*Ā-vayin varūuṅ kiḷavi y-ellām*  
*Pāl-pirin t-icaryā v-uyar-tiṇai mēṇa.*

The ten words *kālam* (god of time), *ulakam* (world), *uyir* (soul), *uṭampū* (body), *pāl-varai-teyvam* (Supreme God), *viṇai* (fate), *pūtam* (elements:—earth, water, light, air, space), *ñāyirū* (sun), *tiṅkaḷ* (moon), *col* (Goddess Sarasvatī) and similar ones do not take *uyartiṇai* verbs (i.e., *āṇpāl*, *peṇpāl* or *palarpāl* verbs) after them but take only *aṣṛiṇai* verbs.

Ex. *Ulakam pacittatū.*

(The world suffered from hunger.)

*Uyir ceṇratū.*

(Soul departed.)

*Ñāyirū paṭṭatū.*

(Sun set.)

*Tiṅkaḷ utittatū.*

(Moon rose.) etc.

*Note 1.*—The word *kālam* is the *tat-sama* of the Sanskrit word *kāla* which means *yama*, the God of death; *ulakam* is the *tadbhava* of *lōka* which means people; *uyir* and *uṭampū* respectively denote here the soul and the body of human beings. According to *Teyvaccilaiyār col* means *Vēda*; but *Vēda* is not *uyartiṇai*; hence as is thought by *Iḷampūraṇar* and others it means only *Sarasvatī*.

*Note 2.*—The need for this *sūtra* is this :—In the previous *sūtra* it is said that the words *kuṭimai*, *āṇmai* etc., which sometimes denote *uyartiṇai* objects and sometimes *aṣṛiṇai* qualities, may take *aṣṛiṇai* verbs even when they denote *uyartiṇai* objects. The following *sūtra* '*Ninṛāṇ kicaitta l-ivaṇi-yal p-inṛē*' suggests that they may also take *uyartiṇai* verbs as '*aṭimai vantāṇ*' without any change in the form of the words *aṭimai* etc. But the

<sup>1</sup>तैमिरिकस्तिमिरप्रभावेन स्वहस्तधृतधान्या<sup>2</sup>दिभाजनान्तरे केशादि....<sup>3</sup> परिवर्तमानं पश्यति । तदपसरणेच्छया पुनः पुनस्तस्मिन् भाजने विपरी-

# STUDIES IN THE IMAGERY OF THE RĀMĀYAṆA.

BY

K. A. SUBRAHMANYA IYER, M.A., (LOND.)

*Head of the Department of Sanskrit, Lucknow University.*

(Continued from page 350 of Vol. IV.)

It is a remarkable fact that in spite of the antiquity and the age long reputation of the Rāmāyaṇa as a 'Kāvya', writers on Alaṅkāraśāstra have not turned to it for preference for their illustrations. Not that references to the Rāmāyaṇa are totally absent in works on Alaṅkāraśāstra. The work is frequently mentioned, together with the Mahābhārata as a source from which a poet might borrow his subject matter. The history of Sanskrit literature also shows to what extent it has been so used by poets right up to modern times. It is, however, true to say in a general manner that the Rāmāyaṇa plays a comparatively small part in the thousands of ślokas which are given as illustrations of the different theories of poetics in the Alaṅkāraśāstra. Whether it be the Alaṅkāra or the Rīti or the Dhvani or the Vakrokti system, it is from the later classical literature, from the works of authors like Kālidāsā, Bhāravi and Māgha that critics primarily draw their examples, and not from the 'Ādikāvya'.

It is not that the Rāmāyaṇa cannot furnish illustrations of the Alaṅkāras. The best proof of it is that the commentators do occasionally point out different Alaṅkāras in the verses of the Rāmāyaṇa. But they only point out the well-known ones and do not say anything which has a historical value.

The most recent study of the *form* of the Alaṅkāras from the historical point of view is found in Mr. Diwekar's "Les fleurs de rhétorique dans l'Inde" p. 35-53 (Paris, 1930). The author draws attention to those ornamental devices for which the poet seems to have a preference and those which he holds to be the poet's own invention. Among the former, he mentions the repetition of syllables which form part of different words: **वानराणां नराणां च पुरस्यान्तः पुरस्य च ;** the repetition of similar sounds in a verse or in a stanza: **परिकुपितं पितरं पाति पातीतः ;**

# STUDIES IN THE IMAGERY OF THE RĀMĀYAṆA.

BY

K. A. SUBRAHMANYA IYER, M.A., (LOND.)

*Head of the Department of Sanskrit, Lucknow University.*

(Continued from page 350 of Vol. IV.)

It is a remarkable fact that in spite of the antiquity and the age long reputation of the Rāmāyaṇa as a 'Kāvya', writers on Alaṅkāraśāstra have not turned to it for preference for their illustrations. Not that references to the Rāmāyaṇa are totally absent in works on Alaṅkāraśāstra. The work is frequently mentioned, together with the Mahābhārata as a source from which a poet might borrow his subject matter. The history of Sanskrit literature also shows to what extent it has been so used by poets right up to modern times. It is, however, true to say in a general manner that the Rāmāyaṇa plays a comparatively small part in the thousands of ślokas which are given as illustrations of the different theories of poetics in the Alaṅkāraśāstra. Whether it be the Alaṅkāra or the Rīti or the Dhvani or the Vakrokti system, it is from the later classical literature, from the works of authors like Kālidāsā, Bhāravi and Māgha that critics primarily draw their examples, and not from the 'Ādikāvya'.

It is not that the Rāmāyaṇa cannot furnish illustrations of the Alaṅkāras. The best proof of it is that the commentators do occasionally point out different Alaṅkāras in the verses of the Rāmāyaṇa. But they only point out the well-known ones and do not say anything which has a historical value.

The most recent study of the *form* of the Alaṅkāras from the historical point of view is found in Mr. Diwekar's "Les fleurs de rhétorique dans l' Inde " p. 35-53 (Paris, 1930). The author draws attention to those ornamental devices for which the poet seems to have a preference and those which he holds to be the poet's own invention. Among the former, he mentions the repetition of syllables which form part of different words : वानराणां नराणां च पुरस्यान्तः पुरस्य च ; the repetition of similar sounds in a verse or in a stanza: परिकुपितं पितरं पाति पातीतः;

the use of rhyme consisting in the repetition of the same word at a definite place in the verse, the use of Arthālaṅkāras like Upamā, Rūpaka, etc. The author is of opinion that we can see in the Rāmāyaṇa the development of the Alaṅkāras, Upameyopamā and Ananvaya. Among the devices which he considers Vālmīki's own invention, Mr. Diwekar mentions the combinations of Śabdālaṅkāras and Arthālaṅkāras, the particular kind of rhyme called Śrīkhalāyamaka :

Rāvaṇaṃ bhaja bhartāraṃ bhartāraṃ sarvarakṣasām. And even the use of such expressions as (1) the repetition of the word 'क्व' in order to indicate difference between two things (2) नैतच्चित्रम् .

It must be said in regard to the above that it is possible to establish preference by mere counting, whereas one feels a certain diffidence when it comes to attributing to the poet the invention of particular devices. Form is something which is meant to be the same in all writers. A good deal of the work of commentators consists in pointing out the same forms in the Alaṅkāras of the different writers. Poetic theory also assumes that the form of imagery is the same in the case of all writers. Indeed, poets are expected to conform themselves to the definition of the forms given in the Alaṅkāraśāstra. If one analyses the Alaṅkāras of the Rāmāyaṇa one is likely to come across practically all the Alaṅkāras which have been defined and analysed in the Śāstra. Some may, of course, be found more frequently used than others, but that is due to the inherent nature of the Alaṅkāras themselves. In these circumstances, to say about a particular Alaṅkāra that it is the invention of Vālmīki requires a good knowledge of contemporary and antecedent literature. The most that one can perhaps say is that the Rāmāyaṇa is the earliest known work in which a particular Alaṅkāra occurs and I take it that this is what Mr. Diwekar means when he calls a particular Alaṅkāra an invention of Vālmīki.

Things are slightly different when it comes to the *contents* of an Alaṅkāra. Here it is that even poetic theory and ancient tradition expect a poet to show his originality and power of invention. Also, the contents of an Alaṅkāra can, in some cases, come only out of individual minds, specially gifted minds. When Kālidāsa says : मणौ वज्रसमुत्कीर्णे सूत्रस्येवास्ति मे गतिः, one feels that not everybody could think of such a comparison. It does

not require a genius to invent the particular form of Alaṅkāra called Upamā. Perhaps it would be difficult for most of us to speak for half an hour continuously without introducing Upamā into our speech. Such Upamā would perhaps not be poetic, but to say of an Upamā that it is poetic or not poetic is to make a distinction in contents and not in form.

When one feels diffidence in attributing a particular form of Alaṅkāra to the inventive power of Vālmīki, what to say of such expressions as the repetition of क, and the use of नैतच्चित्रम्? I feel that these have always been part of the everyday speech of the people and do not depend upon a genius for their existence.

As was said before, Mr. Diwekar's study is an attempt to determine the part which the Rāmāyaṇa has played in the evolution of the forms of Sanskrit imagery. The series of articles of which this is the last, has been a study of the contents of the imagery of the Rāmāyaṇa. In the previous articles, an attempt was made to determine the particular occasions on which images appear in abundance and the particular objects which are brought in to describe particular things. In the present article, I wish to do no more than make a few observations on the relation between content and form in the imagery of the Rāmāyaṇa.

It is not always possible to establish a relation of cause and effect between form and image. One can, however, establish certain associations, certain contents which always appear together with certain forms.

Mr. Diwekar has already pointed out the occurrence of continued metaphors in the Rāmāyaṇa (p. 48). He has, however, said nothing about their contents. To me, they seem worthy of observation. A continued metaphor is a comparison involving complete identification between two things and their parts. The standard of comparison must, therefore, be something complex, something having parts. Certain complex things have therefore become fixed in the Rāmāyaṇa and, as will be shown, persist in the later literature also.

It is but natural that the immense ocean, with its ever surging waves and the inexhaustible life within it, should occur to the poet when anything complex had to be described. Thus the grief of Daśaratha at the departure of Rāma to the forest is compared to the ocean. Once the identification between the ocean and grief was made, it had to be followed up, to be justi-

fied so to speak and the result is that we get a series of identifications of the parts of both. Daśaratha declares to Kausalyā that it is impossible for him to cross the ocean of grief. This ocean has sighs for waves and whirlpools; it is muddy with the current of tears; its fishes are the throwing about of arms in despair; its roar is weeping; its weeds are dishevelled hair; its mare (*Vadvā*) is Kaikeyī; it is the result of Daśaratha's tears; the words of the Kujā (Mantharā) are its crocodiles and its coasts are extensive, as it would last as long or Rāma is banished.<sup>1</sup> The simple identification of grief and ocean is common enough. Even the English expression "plunged in grief" is a reminder that grief can be thought of as a collection of water. What is noteworthy in the above example is the attempt to push the identification to its logical conclusion, even at the risk of seeming artificial. The ocean appears again and again in such complex metaphors. Thus, Śūrpaṇakhā asks Rāvaṇa "Why do you not protect me when I am plunged in the ocean of grief, inhabited by crocodiles in the form of chagrin and waves in the form of trembling"?<sup>2</sup> On another occasion, it is the sky which is identified with the ocean. We are told that Hanumān flew across the sky which was a veritable ocean. The moon in the sky corresponds to the lotus; the sun to Kāraṇḍava; the stars Tiṣya and Śravaṇa to Kādamba birds; clouds to weeds; the star Punarvasu to big fish; Lohitāṅga to crocodiles and Airāvata to big islands<sup>3</sup>. The

sky, like the ocean, strikes one by its complexity and it is, therefore, perfectly intelligible that the two are identified as wholes as well as in their parts. An equally intelligible identification is that of the army of the gods with the ocean. In this identification, the weapons Śakti and Tomara are the fishes, scattered arms are the weeds, horses are frogs, elephants are turtles, Rudra and Āditya are the big crocodiles; the Maruts and the Vasus are the snakes; chariots, horses and elephants are its water currents and infantry, the sandy shores<sup>1</sup>. The above examples are sufficient to prove the frequency with which the ocean appears in continued metaphors in the Rāmāyaṇa. Nor is it confined to the Rāmāyaṇa. It occurs in the later literature also. For instance, Aśvaghoṣa says in his 'Saundarānanda' that the Buddha crossed the ocean of evils in which Upādhi was the water, Ādhi, the water-animals, anger, intoxication and fear, the waves.<sup>2</sup> Again, he says in his 'Buddhacarita' that the Buddha will make the world cross the ocean of sorrow by means of the boat of knowledge. In this ocean, the diseases are the foam, oldage, the waves, and death the current.<sup>3</sup>

Sometimes it is the river which takes the place of the ocean. We are told that the battle ground is like a river. The dead heroes are the banks; broken arms, the great trees; streams of blood, the water; death, the ocean to which it leads; liver and spleen, the mud; scattered entrails, the weeds; broken limbs and heads, the fish; the vultures, swans; the herons, the Sārasa birds and human fat, the foam.<sup>4</sup> Following Vālmīki, Aśvaghoṣa says

in his Buddhacarita that the thirsty world will drink from the river of Dharma, having the current of wisdom, banks in the form of firm conduct, cool through Samādhi and having Cakra-vākas in the form of vows.<sup>1</sup>

It is not only collections of water like the ocean and the river which appear in continued metaphors. Sometimes, it is fire which takes their place. The simple metaphor 'fire of sorrow' is almost a common place in Sanskrit literature and there is, therefore, nothing surprising in its occurring in continued metaphors. Thus Kausalyā says that the fire of sorrow, fanned by the separation of Rāma, fed by the fuel of lamentation, having offerings in the form of weeping and smoke in the form of anxiety and tears etc., will consume her in the absence of Rāma<sup>2</sup>. As in the Rāmāyaṇa, so in later literature also, fire continues to appear in continued metaphors. Thus, in the Buddhacarita, we are told that Rāhula, son of the Buddha, being burnt by the fire of sorrow, to which separation from the Buddha added fresh fuel, whose smoke was sighs and flame, despair, goes to see him outside and inside the palace.<sup>3</sup> In another

सोऽन्तःपुरं चैव पुरं च कृत्स्नम् ॥ B. C. IX. 29.

passage, Rāma himself is compared to fire. In this state arrows are his sparks, and bow and dagger, his fuel.<sup>1</sup>

Another object which plays an important part in continued metaphors in the Rāmāyaṇa as well as in later literature is the snake. Kumbhakarṇa asks Rāvaṇa: "O king ! who brought you the snake in the form of Sītā, whose chest is its coils, anxiety concerning whom is its poison, whose smile is its fangs and whose fine fingers are its fine heads ?"<sup>2</sup> Vālmiki seems to have a preference for the five-headed snake on such occasions. Lakṣmaṇa, in his anger, looked like a five-headed snake with arrows for tongue, its string for coils and his own lustre for poison.<sup>3</sup> Similarly in the Saundarānanda, Nanda says to the Buddha : "I have been bitten in the heart by the snake in the form of love, having evil for hood, destruction for glance, blunder for fangs and ignorance for poison; give me, therefore, an antidote, O great physician !"<sup>4</sup>

The army itself is a sufficiently complex thing to appear in such metaphors. The clouds, we are told, with banners in the shape of lightning and emitting a roar in the form of thunder-bolt like an army of monkeys ready for battle.<sup>5</sup>

1. शरार्चिषमनाधृष्यं चापखड्गेन्धनं रणे ।  
रामाग्निं सहसा दीप्तं न प्रवेष्टुं त्वमर्हसि ॥ R. III. 37. 15.
2. वृतो हि बाह्वन्तरभोगराशि-

5. तडित्यताकाभिरलंकृताना-  
मुदीर्णगम्भीरमहारवाणाम् ।  
विभ्रान्ति रूपाणि बलाहकानां  
रणोत्सुकानामिव वानराणाम् ॥ R. IV. 28. 31

The above examples do not exhaust the list of objects which appear in complex metaphors. In the beautiful description of the rainy season occurring in the *Kiṣkindhākāṇḍa*, we are told there is music in the forests. In this music, the buzzing of bees is the *Vīṇā*; time is marked by the cries of monkeys and the roar of clouds corresponds to the sound of *Mṛdaṅga*.<sup>1</sup> Music appears again in the indignant speech of *Rāvaṇa* when he hears that *Rāma* has come to *Laṅkā* to fight him. He says: "I shall descend on the stage of the battlefield and play my lute in the form of my bow, with the bow in the form of arrows."<sup>2</sup> In the description of the rainy season referred to above, the sky is identified with a lover. In this identification, gentle breeze forms the sigh, the reddish hue of sunset corresponds to sandal paste and the pale clouds to the pale face of the lover.<sup>3</sup> In an equally beautiful description of the autumn occurring also in the *Kiṣkindhākāṇḍa*, the night is identified with a woman. The moon is her face, the stars are the eyes, and the moonlight her clothes.<sup>4</sup> More prosaic is an identification of *Rāma* with a tree, the flowers and fruits being *Sītā* and the branches being *Sugrīva*, *Jāmbavān*, *Kumuda*, and *Nala*.<sup>5</sup> More striking perhaps is the comparison between mountains and *Brahmacārins*: the clouds are the *Kṛṣṇājina*, being dark in colour; streams are the sacred thread,

1. षट्पादतन्त्रीमधुराभिधानं प्लवङ्गमोदीरितकण्ठतालम् ।

being bright and flowing; the caves being filled with air by the wind corresponds to the taking in of breath or *Prāṇāyāma* <sup>1</sup>.

The above examples are sufficient to show the kind of objects that figure in continued metaphors and the historical interest which they have in view of their persistence in later times. The association of form and contents which we find in the above example is the most striking of all in the *Rāmāyaṇa*.

Summing up the results of this study, we have found that imagery comes forth more spontaneously and in greater abundance in descriptions of nature and in speeches made by the different characters when they are under the stress of some emotion. The objects to which persons, or ideas, or situations are compared are chiefly drawn from nature. Though *Vālmīki* has incorporated into his work much popular imagery which was due to the inventive faculty of no particular writer, there is also in the imagery of the *Rāmāyaṇa*, much that could have been the creation of individual minds. The contents of *Vālmīki*'s imagery persist to a very great extent in later works, whose works can therefore be better understood with reference to the *Rāmāyaṇa*. To determine the exact relation between *Vālmīki* and the later writers is a separate study which can be undertaken now that *Vālmīki*'s imagery has been analysed.

## NOTES ON SOME DRAVIDIC PLANT-NAMES

BY

L. V. RAMASWAMI AIYAR, M.A., B.L.,

*Maharaja's College, Ernakulam.*

In his Forlong Lectures for 1929 (printed in BSOS, Vol. V, Part IV), Prof. Jules Bloch adverting to the lists given by Caldwell, Gundert and Kittel, of possible Dravidian words borrowed by Sanskrit, observes very justly that "these lists are at once too large and too narrow. Too large because the majority of cases brought forward even in Kittel's Preface to his *Kannāḍa Dictionary*, do not stand discussion, when they are worth it. Too narrow, because Kanara and Tamil do not suffice to identify a Dravidian form, and the other languages belonging to the same family ought to be taken into account. A second point is the difficulty of distinguishing which language is the borrower, which the lender. Moreover, there may be intermediaries between both or a common origin to elements they both have." Some of the limitations pointed out by Prof. Bloch always confront the student of Dravidic etymologies who attempts with the help of the data are available for him, to reconstruct the base-forms of Dravidian words. But these limitations become perplexing in those cases where we have to consider if a given set of inter-allied Dravidic forms bearing striking structural and semantic parallelisms to words of other linguistic systems of India, are original in Dravidian or not. The problem of the lexicological connections of Dravidian words with foreign forms is extremely intricate; for, we find that as even the earliest extant Tamil literary texts had begun to suffer in a greater or lesser degree the influence of Sanskrit vocabulary, there is considerable difficulty in tracing the native or foreign character of certain words. Moreover, complications are introduced by the 'Austic' problem also.

The only tests that might in such instances enable us in envisage possibilities are the following:—

(a) Whether the forms in question are ancient and widespread among the different dialects of Dravidian, and (if so) whether their relationship to one another is based on normal and regular sound-changes, and then whether the source-form (as reconstructed) could be resolved, according to Dravidic principles of word-formation, in such a way that the radical portions could be shown to be cognates of elementary Dravidic bases;

(b) Whether the conclusion formulated as a result of the above test is to any extent confirmed by the analysis of the etymology of the foreign form or forms which show parallelism in structure and meaning to the Dravidian words. If these latter and the Dravidian words are at the same time found to be native in the respective language-families to which they belong, the parallelisms may be fortuitous.

The scheme as formulated above seems indeed very simple and straight, but the actual difficulties encountered in the application of these tests are very many indeed:—

(i) The lesser dialects of Dravidian especially of central and north India, having for centuries been under the influence of powerful language-systems have in many instances replaced the native Dravidian forms by borrowed foreign words. The native words presumably once current in the past are no longer recoverable in view of the entire absence in these dialects of literary texts or of other linguistic data relating to the past condition of these speeches.

(ii) The lesser dialects of north and central India, besides, have not yet been as intensively investigated as they will have to be, if rare nuggets of indigenous native forms probably preserved in sub-dialects and local speech-varieties have to be unearthed.

(iii) The application of the Dravidic principles of word-formation, while undoubtedly of help to us in studying the etymologies of a good portion of our word-stock, fails us completely in the case of a certain number of what we consider to be original Dravidian forms.

(iv) Indo-Āryan etymological studies have also proved within recent years to be more complicated than we hitherto believed them to be. Barring the large number of undoubtedly genuine Aryan words, there does exist a portion of Indo-Aryan vocabulary, which recent scholarship has shown to be explicable only

along lines different from what Sanskrit lexicologists with an extra-strong Indo-European bias used to follow rather naively (as we can now see) in the last century.

The discussion of the few following Dravidic plant-names would be illustrative of some of these difficulties confronting the Dravidist.

# I TAMIL "ARTOCARPUS."

Tam. *palā*, *palavu*, *pilā*<sup>1</sup> (commonly 'Artocarpus integrifolia' or jack).

Mal: *pilā-vu*, *plāvu* (jack-tree).

Tulu : *pela*, *pila* (jack-tree), *peja* (Artocarpus pubescens).

Kannāḍa: *halase*, *haḷasa*.

Tulugu: *panasa*.

Kūvi: *panha*.

No connected forms are available in Gōṇḍī, Kurukh or Brāhūī, so far as we can ascertain from the existing lists.

## Forms of Tamil, Tulu and Malayāḷam.

Tamil *palā* and *palav* with the meaning 'jack-tree' occur in the most ancient Tamil texts.

cf. Puṛaṇāṇūru, verse 109, l. 5: திருச்சுளைப் பலவின் பழமூழ்க் கும்மே (the sweet-pulped jack-fruit will ripen); verse 129, l. 4: திருச்சுளைப் பலவின் மாமலைக் கிழவ (he of the great mountain where the sweet-fruited jack grows).

Aiṅgurunūru, verse 214, l. 1: பலவின் கொழுந்துணர் நறும் பழம் (the sweet ripe fruit of the jack-tree).

Paṭirruppattu, verse 61, l. 1: பலாஅம் பழுத்த பசும்புண்ணரியல் (honey exuding from an over-ripe jack-fruit, red like a stained wound).

Śilappadigāram, Kāḍugāṅkāḍai, line 84: வாழையுங் கழுஞ் தாழ்குலைத் தெங்கு மாவும் பலாவு . . .

The fruit of the common jack-tree being a very popular delicacy in the southern and the western parts of the Madras

1. Another Tamil word for "jack-tree" is *pūgal*. Cf. Maṇimēgalai, Kolaikkalakkāḍai, *kēḷi-p-pūgal*. *Pūgal* in modern parlance commonly denotes the creeper 'Momordica charantia.' Possibly both meanings are from the base *pūg-* (connected with *pūy-* 'to be spread' which means 'to spread regularly,' 'to be rooted,' 'to be extended') *pūgal* with the probable meaning 'a climbing plant' occurs in verse 16 of Puṛaṇāṇūru also.

Presidency<sup>1</sup> the terms *palā*, *palavu* usually denote this variety of 'Artocarpus'; but other fruit-trees of a similar kind also appear to have been named '*palā*' with qualifying words to indicate the particular species or variety.

cf. Tamil *īra-ppalā*, *ātti-ppalā*.

In Malayālam, *kaṭa-ppilāvu* or *vilātti-ppilāvu* denotes 'Artocarpus pubescens' known otherwise as *āññili* (Tam. *aymi*).

Tamil literary *palā* and *palavu*, Tamil colloquial *pilā* and Malayālam *pilāvu* are directly connected with Tuḷu *pela*, *peja* and Koḍagu *pela*.

Tuḷu *pela* means 'Artocarpus integrifolia' or the common jack, while *peja* denotes the wild variety 'Artocarpus pubescens.' Koḍagu *pela* denotes the common jack-fruit only.

The -e-, -i- of the radical vowel in the Tuḷu and the Koḍagu forms and the -i- of the Tamil colloquial and the Malayālam forms appear to be the result of the loss of accent in the first syllable owing to the extra accent thrown on the second syllable with the long vowel.

This long vowel in the second syllable found in all forms except Tamil *palavu* is peculiar.

In this connection, the following analogies may be compared:—

<i>naṛā</i> , <i>naṛ-ai</i> (honey)	—	<i>naṛavu</i>
<i>niḷā</i> (moonlight)	—	<i>niḷavu</i>
<i>kaḷā</i> (wortleberry)	—	<i>kaḷavu</i>
<i>viḷā</i> (wood-apple)	—	<i>viḷavu</i>
Mal. <i>cuṛā</i> , <i>ciṛā</i> (shark)	—	<i>cuṛavu</i>

cf., for the peculiar final long vowel, Tamil *kaḍā* (male) Mal. *kīḍa* also. The final long vowel should be regarded as original in these forms and -v- of the alternative words as the dorsal glide, as -vu-forms do not generally give rise to -ā finally. This is probably confirmed by the fact that in some of these instances with final -vu we find the immediately preceding vowel

---

1. The three favourite fruits (முப்பழம்) of the Tamil country. famed from of old, are those of the plantain, mango and the jack. Of these, the fruit of the jack-tree which grows in abundance on the west coast and in the riparian regions of the Tamilnād, had been in ancient times probably the most popular in view of the qualifying epithets like *iñ-julai* (sweet-pulped), etc. occurring in the classical texts.

to be alternatively long:—*naṛāvu* (honey) *niḷāvu* (moonlight), *cuṛāvu* (shark), etc. The long *-ā-* is certainly peculiar in the above words. Among these, *viḷā* (wood-apple) and *kaḷā* (wortle-berry) may be foreign; but the other words appear to be native Dravidian. *-ā-* never appears as a formative suffix in Tamil; can it possibly represent the root *ā* (to become) compounded with *naṛ-* (to be pleasant, sweet), *niḷ-* (to be steady), *cuṛ-* (to turn round), etc. ?

Thus the original among these forms would appear to be *palā* which, as we should expect, is attested in the most ancient Tamil texts, significantly enough, by the side of *palav-* in the oblique cases.

#### *Kannaḍa and Telugu forms.*

Kannaḍa *halasa* and *haḷisa* are supposed to be *tadbhavas* from Sanskrit *panasa*. Kannaḍa *haḷasina haṇṇu* denotes the fruit of the common jack or 'Artocarpus integrifolia.'

Telugu *panasa* is applied to both the common jack-fruit and to the bread-fruit, as in Sanskrit.

So far as Kūi-Kūvi is concerned, Winfield does not give any forms at all, but Schulze in his vocabulary of Kūvi words gives the form *panha* as equivalent to 'jack-fruit' and *buddha panaha* for 'pine-apple.' These forms *panha* and *panaha* are apparently connected with *panasa*, the change of *-s-* to *-h-* being common in Kūvi.

#### *Sanskrit panasa.*

Now, the Sanskrit forms *palasa*, *panasa*, are applied to the 'jack-fruit' as well as to the 'bread-fruit', more often to the latter than to the former. The terms occur only in Epic Sanskrit. Besides the two meanings given above, the lexicographers equate *panasa* with 'a thorn' also (cf. Kannaḍa *pane* 'a pointed tooth'). The lexicographers give a third form फलस with the meaning 'jack-fruit' or 'bread-fruit.'

Are these forms native Indo-Āryan? Fick in his *Vergleichendes Wörterbuch der Indo-Germanischen Sprachen* attempts, though with hesitation (p. 109 Vol. III), to connect Skt. *panasa* with the Indo-European roots *pā* 'to feed', *pa* 'to drink' and suggests a hypothetical base *pan* from which *panasa* on the one hand, and Sanskrit *pata* with the meaning 'fat' may have been derived. He also mentions Greek *panios* (fulness) as being connected with the Sanskrit word. These derivations and cognates are extremely doubtful.

Monier Williams would consider *panasa* to be original, and पलस and फलस to be its variants. He too is not certain about its derivation but he hesitatingly suggests the root *pan* 'to be worthy of admiration', as being the possible source from which पनस was derived.

The Pāli Text Society Dictionary confronts *panasa* with Latin *penus* and Lithuanian *pēnas* 'fodder', on the supposition that the term may be native Indo-Āryan.

The derivation of *panasa* seems on the whole to be extremely uncertain.

The Sanskrit terms occur only in late Sanskrit; and denoting as they do the names of tropical flora, one should be very cautious, in the absence of definite and unequivocal evidence about the native Indo-Āryan character of the words, in ruling out the possibility of their being borrowings. The significations of tropical fruits should certainly have been evolved in India, and possibly the forms themselves were adopted from non-Āryan speeches.

*Sanskrit palasa, panasa and the Dravidian forms.*

Kittel (p. XXIII of his Preface to Kannaḍa Dictionary) makes the following observations: "Gundert thinks that the Skt. words are related to Dr. *pala* 'much' 'many'". His leading idea is not easily conceivable. Does he think of the numerosness of fruits on a jack-tree? May it be suggested that perhaps Dr. (Kannaḍa only) *pane* 'a pointed tooth' is at the root of the terms, referring to the jack-fruit as covered with nail-like points (cf. Skt. *Kaṇṭaka-phala*).

One point may be preliminarily noted. The group *palā*, *palavu*, *pela* of Tamil, Tulu, Malayālam and Koḍagu are different from Kannaḍa *halasa* in as much as the final *-sa* here is clearly extra-Dravidian. There is a little doubt that the Kannaḍa, Telugu and Kūvi forms are adaptations from Indo-Āryan and therefore, *not directly* connected with the forms of Tamil, Malayālam, Tulu and Koḍagu.

This of course does not necessarily preclude the possibility of *palā* (according to Gundert) or *pane* (according to Kittel) being at the back of I. A. *panasa*; these views will have to be discussed separately.

Kittel's suggestion about Kannaḍa *pane* (pointed tooth) as being at the root of Sanskrit *panasa* is probably far-fetched

especially because *pane* with this meaning exists *only* in Kannaḍa. Tamil and Malayāḷam *pana* means 'palmyra', and as we shall see below, this word offers difficulties of its own, in the matter of etymological derivation.

Gundert's suggestion of the Dravidian origin of *philāvu* as indicative of the 'numerousness' of the fruits on a jack-tree, is, like many another similar suggestion of his, too naive to command scientific approval.

The question of the Dravidian origin of Indo-Āryan *palasa*, *panasa* from *pala* etc., can be seriously raised only when we can be sure of the native character of Dravidian *palā* etc., for, if the Dravidian words themselves are borrowings from a third source, which in the circumstances may be Kolarian-Austrian, the possibility of the Indo-Āryan words being also loans from that third source will have to be considered.

The position, therefore, seems to be this:—

(a) It is possible that the Indo-Āryan words have been borrowed from or influenced by non-Āryan speeches.

(b) So long as the Dravidian forms are not conclusively proved to be native in this family, nothing could be said about the possible influence exercised by them on the formation of the Indo-Āryan forms.

*Are the Dravidian forms borrowings?*

If the jack-fruit on account of its delicacy was considered as the fruit *par excellence*, the word for 'fruit' may very well have been applied to this variety; but the probable proto-base for 'fruit' differs from *palā* structurally to a certain extent. The Dravidian words for 'fruit' are:—

- |           |   |  |
|-----------|---|--|
| Tamil :   | <i>pal-am</i> ,   |  |
| Kannaḍa : | <i>paḷa</i> , <i>paṇṇu</i> , <i>haṇṇu</i> .                                     |  |
| Tel :     | <i>paṇḍu</i> .  |  |
| Tuḷu :    | <i>parndu</i> —   | -r- of Tuḷu corresponds to -l- of Tamil-Kannaḍa (as in <i>bāra</i> , <i>vālai</i> , etc.). |
| Kūvi :    | <i>paṇḍu</i> .  |  |
| Gōṇḍi :   | <i>kaiā</i> —but cf. <i>paṇḍ</i> —(to become ripe).                             |  |
| Kurukh :  | <i>pañj-kā</i> (fruits)—cf. <i>pān-</i> (to ripen) and <i>kañj-ka</i> (fruits). |  |
| Brāhūi :  | ? <i>bēr</i> (plum)?  |  |

Now, some of these words may remind us of IA *phala* on the one hand, and of a number of Austric forms on the other; but Professor Jules Bloch (*BSOS*, Vol. XXVI) has already adverted to the almost insuperable difficulty of giving any satisfactory explanation regarding the possibility of mutual relationship among these forms.

So far as the Dravidian forms for 'fruit' are concerned, they appear to be very ancient. Gōṇḍi *kaiā*, Kurukh *kañjka* appear to be derived from a base connected with south Dravidian *kāy* (fruit), etc. The other forms are all inter-related. The character and origin of the Tamil-Mal-Kannaḍa sound -l- being uncertain and elusive, it is difficult to reconstruct the older base; probably it was *paḍ-*, on the analogy of Tamil *ēl-*—Tel. *ēḍu* (seven) Tamil *kōli*—Tel. *kōḍi* (fowl), Tamil *kalugu*—Tel. *kaḍugu* (to wash), etc.

However this may be, what we have to note here specially is that Dravidian *palā* (jack-fruit) does not contain the sound -l- or -ḍ-, and that, therefore, it may not be related to the Dravidian base meaning 'fruit'.

The Austric forms (as given by Prof. Rivet in his *Océanien et Sumerien* p. 39) are the following: *pala*, *palo*, *pelo*, *plo*, *blo*, *bla*, etc. All of them show medially the lateral -l-; so also does Indo-Āryan *phala*. But whether, indeed, Dravidian *palā* is related to either of these sets and what exactly may have been the course or direction of relationship, are problems that form part of the wider question of vast language-movements in South Asia in an ancient past of which we have at present only hazy notions.

(a) The forms *palā pela*, etc. of Tamil, Mal., Tuḷu and Koḍagu are very ancient and do not appear to be borrowings from Skt. *panasa*, etc. which occur only in epic Sanskrit.

(b) The forms of Kannaḍa, Tel., Kūi and Kūvi are, on the contrary, directly connected with these Skt. forms.

(c) The question of the relationship of Dr. *palā*, etc. to IA *phal* on the one hand and to the Austric forms on the other, remains purely hypothetical in the present state of our knowledge.

## II Tamil *pan-ai*, 'Borassus flabelliformis

Tam. *pan-ai*, *penṇ-ai* (palmyra).

Mal. *pana* (palmyra).

Tuḷu *pane*, *pane* (palmyra), *pan-oli* (leaf of palmyra).

No other Dravidian dialects show related words, and it is remarkable that these dialects have other later forms<sup>1</sup> (Tamil *tāli*, Tuḷu *tarā*, etc.) to denote 'Borassus flabelliformis'.

*Peṇai* and *peṇṇai* both appear in the ancient Tamil texts. The term *panai* is used commonly in the ancient classical texts as a measure of height or of girth and it is also referred to as supplying banners to ancient chiefs. These usages may be compared to similar ones in Mahābhārata and other Sanskrit poems. We find in the Tamil texts numerous other references to the use of the parts of the familiar Borassus tree,—cf. Pura-nānūru, Verse 295, Patirrup-pattu, Verses 40, 58, 66, 67.

Malayālam *pana* commonly signifies the 'Borassus' tree but other palms are also denoted by specialised terms: *āna-ppana* (Corypha), *iram-bana* (Caryota urens), *Kūṭappana* (another species of Corypha).

Kannāḍa and Telugu do not show *pana* or any connected forms denoting 'palm' but Kannāḍa has a word *pane* which means 'pointed tooth' with which we have already compared one of the meanings of Sanskrit *panasa*, viz. 'a thorn'.

Gundert connects the word with *pani* (drop, cold, dew) and naively explains *pana* (palmyra) as the "oozing tree" referring thereby to the country liquor which is extracted from it. The derivation of *pana* directly from *pani* is impossible in Dravidian, as *pani* itself appears to be a characteristically formed Dravidian derivative with final *-i*. If *pani* and *pana* are connected, they may be so basically, but of this base, we do not and cannot, so far as we can see, have a clear idea.

Is Kannāḍa *pane* with the meaning 'pointed tooth' native Dravidian? (Late Sanskrit *panasa* has the meaning 'thorn' according to the lexicologists. Are these terms related? If so, how?) Has Kannāḍa *pane* any relationship to Tamil *panai*?<sup>2</sup>

1. *Vide* my discussion of Dravidian *tāl-* in *JBORS*, June 1931. Kurukh *pun-man* 'a species of plum tree' and *panēra* 'a kind of plum with a small stone' appear to be forms connected with Kurukh *pānnā* 'to ripen' (of fruits).

2. Prof. Przyluski has pointed out, in one of his most interesting and suggestive papers, the existence of a set of "Austrian" forms: *panah*,

III Dr. Brinjal, '*Solanum melongena*'.

Tam.: *vaḷudunai, vaḷudanaḷ, vaḷudalai*.

Mal: *vaḷudana, vaḷidina*.

Kannaḍa: *badane, badani*.

Tuḷu<sup>1</sup> *badane*.

Koḍagu: *baldane*.

Telugu: *vaṅkāya*.

[Gōṇḍi *sēpa* and Kūi *sēja* appear to be different.]

The Tamil words are not found in the ancient Śaṅgam texts. In modern parlance, the term *kattari-kkāy* is used in Tamil, though Malayāḷam employs only *vaḷudana, vaḷudina* to denote the 'egg-plant.' The presence of this form in Malayāḷam from very early times shows that it is not a comparatively new word in Malayāḷam or Tamil.

Kannaḍa and Tuḷu *badane, badane*<sup>1</sup> are supposed to be adaptations from late Sanskrit or Prākṛit. The Telugu form appears to be very closely related to Sanskrit *vaṅga* or to a M I A form connected with modern Hindu *baiṅgan*, Bengali *began*, Marāṭhi *baingān* (brinjal-coloured).

Structurally Tamil *vaḷudane* and *vaḷudalai* do not appear to be native.

The suggestion that the native base *vaḷ-* (to thrive, grow) may be the source of these forms is of no value; for, whatever part the native base *vaḷ-* and *vaḷund-* may have played in the introduction of *-l-* in *vaḷudalai*, it should at most be restricted to phonetic contamination or semantic confusion, arising from folk-etymology. The uncommon structure of the Tamil words and the wavering character of the sounds in the final syllables point to a foreign origin for these words; the Tamil terms cannot be dissociated in origin from the other Dravidian and Indo-Āryan forms given above.

---

*pnoh*, *bana* with the meanings 'bow', 'arrow', 'to shoot arrow' etc. In South India, bows and arrows are made of the *Borassus* or *panai*-tree. Is it possible that there may have been some remote relationship here? And is Kannaḍa *pane* 'pointed tooth' in any way connected?

1. Tuḷu *kudane, kudane* is the name of another variety of *Solanum*; it is curious that the difference in structure is denoted by a seeming change in the prefix [*badane* 'brinjal' *kudane* 'solanum pubescens']?

The Indo-Āryan forms of today are all without a medial dental which, excepting Telugu, the Dravidian forms show. Tri-kāṇḍaśēṣa records late OIA *vāliṅgaṇaḥ* and Medinī has *vātigah*; the Dr. forms with the medial dental appear to be related to these. The question, however, whether Dr. *directly* adapted the words from I A is not an easy one to solve, in view of what is stated below.

The modern Indo-Āryan forms are derivatives of *vāṭimgana* (Chatterji's *Origin and Development of the Bengali language*, p. 510); but *vāṭimgana* itself is a rare word that cannot easily be explained on an I A basis.

Recently it has been suggested that *vāṭimgana* may be related to the Austric compound word (Pre-Āryan and Pre-Dravidian, Introduction, p. XXVIII) formed of *bah* or *buah* (fruit) and *tiung*, *tiung*, *ting* (brinjal) of the Semang dialects.

If so, in view of the absence of evidence to show that the Dravidian words were adapted from I A, we cannot rule out the postulate that Tamil *vaḷudunai* or *vaḷudalai* together with Kannaḍa and Tuḷu *badane*, may be directly connected with Austric groups like *bah* and *ting*; while the source of the Telugu word may be the Indo-Āryan *vaṅga*.<sup>1</sup>

The cerebral continuative -ḷ- of the Tamil-Malayālam forms might have been introduced in the process of adaptation and naturalisation of the foreign form in Tamil.

We would like to emphasise here that, in view of the postulate recently made of direct contact between Dravidian and Austric on the mainland of India, it is quite possible that the forms of Tamil, Kannaḍa and Tuḷu, which (be it noted) reproduce the initial bilabial, the medial dental and the nasal at the end, may have been directly adapted from Austric<sup>2</sup> instead of through the Indo-Āryan *vāṭimgana*; but for this no proof is available, even as there is no proof to show that the Dr. words are *directly* related to I A. On the other hand, the structure of the Telugu word indicates that it may have been a direct borrowing from Indo-Āryan.

---

1. Amarsimha gives *vārtāki*, *bhaṇḍāki*, *vaṅgana* and *vaṅga* as synonyms for the 'egg-plant'. Their derivations are all uncertain.

2. The Indian 'Kolarian' dialects show only I A loans like *bāgan*, *baigan*.

# CONQUESTS OF KULÖTTUNGA III.

BY

S. R. BALASUBRAHMANYAN, B.A., L.T.

*Chidambaram.*

I

It is proposed to consider the chief conquests of Kulōttunga III and to point out with the help of the historical introductions of the king that there were during his reign *three* distinct Cōla campaigns against the Pāṇḍyan kingdom.

*The first campaign:* An inscription of his 3rd year (165/02 *see* Appendix) contains the usual panegyric without any historical data. The earliest reference *definitely* known to the interference of Kulōttunga III in the Pāṇḍyan war of succession seems to be found in the inscription of the 8th year (320th day) of his reign found at Tirumayānam (260/25). His inscription at Chidambaram in his 9th year (457/02) gives the following particulars of the campaign in the Pāṇḍyan country. Vikrama-Pāṇḍya applied for help. By the Cōla army (that was sent to his help) Vira-Pāṇḍya's son fell, Ēlagam fell, the Maṛavā army (of the Pāṇḍya) fell, the Singhalese soldiers entered the sea after their noses had been cut off, Vira-Pāṇḍya was forced to beat a retreat. Madura and the crown were secured, a pillar of victory was planted; Madura, the crown and the (Pāṇḍya) country were bestowed on the Pāṇḍya who sought his help.<sup>1</sup>

---

1. “ஏழகம்பட மறப்படைபட”—The place of Ēlagam fell. This is how Hultzsch construes it. But in another inscription in another context occurs the expressions மறப்படை and ஏழகம்படை. Evidently they were sections of armies or commands of the Pāṇḍyan army. Dr. S. K. Ayyangar uses the expression *Māra* army (மாற or மாறன்) implying the Pāṇḍya (South India and her Muhammadan Invaders p. 12). The reading is மறப்படை not மாறப்படை or மாறன்படை. ‘*Marappadai*’ may be the army of the *Māravas* as explained by Hultzsch.

This may be considered as the first campaign of Kulōttunga III; It was evidently to help Vikrama-Pāṇḍya against Vīra-Pāṇḍya in the civil war.<sup>1</sup>

*The second campaign:* An inscription of the 11th year (and 118th day, 458/02) refers to the return of Vīra-Pāṇḍya and the renewing of the war against Vikrama-Pāṇḍya owing to Vīra-Pāṇḍya's desire to wipe out the disgrace of defeat.<sup>2</sup>

In later inscriptions further particulars are given of this second campaign. The Cōḷa king met Vīra-Pāṇḍya at Neṭṭur. Vīra-Pāṇḍya's crown was secured. His queen was sent to the Cōḷa Royal household (harem?). The defeated Pāṇḍya and Cēra rulers were made to sit at the foot of his throne and acknowledge the Cōḷa supremacy.<sup>3</sup>

There is great difficulty in deciphering this part of the historical introduction. Reference is made to the Pāṇḍya ruler twice in this part of the text. The earlier part has been quoted above. The term 'முடி வழங்கி' would imply that the Vīra-Pāṇḍya was made to acknowledge his supremacy and he was crowned. Later on there is reference to the Cōḷa king accepting gifts from (another ?) the Pāṇḍya, who held the title 'Lord of the Solar race'—"பருதிசூல பதியென்னும் திருநாமந்தரித்த பாண்டியற்கு" and his bestowing presents, robes and jewels on the said Pāṇḍya. It is suggested that the Pāṇḍya referred to in the

1. The Tirukkolambudur inscription (1 of 1899) of the 4th year of the Kulōttunga III refers to all these features of the campaign above referred to. Hence it should have taken place between the 3rd and the 9th year of his reign. We do not know if Dr. S. K. Ayyangar is right when he suggests, in connection with this inscription, that the campaign was conducted by "Kulottunga III as *heir-apparent*" (P. 11 of South India.) The absence of the reference to the Madura campaign in inscriptions of this 3rd year (cf. 165/02) and the mention of it in his later records should fix the campaign under discussion *in the reign of Kulōttunga III* but it may be as *coregent* with Rājādhi-Rāja II.

2. "மீண்டதற்பின் எடுத்து வந்து பரிபவத்தால் எதிர்த்த வீரபாண்டியனை முடித்தலை கொண்டு".

3. "நெட்டுரில் எதிர்த்த வீரபாண்டியனை முடித்தலை கொண்டு அமர் முடித்து மடக்கொடியை வேளம் ஏற்றி திரு விழந்த தென்னவனும் சேரலனும் வந்திரஞ்ச அரியணையின் கீழிருப்ப அவர்முடிமேல் அடி வைத்துப் படி வழங்கி முடி வழங்கி" (66 of 1892—Text slightly altered. Inscription of the 19th year of Kulōttunga III).

earlier part may be Vīra-Pāṇḍya and that in the latter part Vikrama. It seems likely that Vīra-Pāṇḍya was recognised (and crowned?) as the Madura Viceroy and consequently the cause of Vikrama-Pāṇḍya was abandoned by the Cōḷa king. In the light of this we may infer that Vikrama-Pāṇḍya with his own resources and relying on his own efforts made war and drove out Vīra-Pāṇḍya from Madura. This success of Vikrama-Pāṇḍya may be taken to be reflected in inscriptions 42 and 43 of '06, which refer to the flight of Vīra-Pāṇḍya and his relatives seeking refuge in Travancore in the 16th year of Kulōttuṅga III. In this reconstruction the difficulty is to explain Kulōttuṅga's change of front and the possibility of Vikrama's success by his single-handed efforts. We must leave it to the future for more light on this point. But as a tentative hypothesis it may be mentioned that the object of Kulōttuṅga III was not so much the restoration of Vikrama-Pāṇḍya, as the aggrandisement of his power. The disputed succession at Madura gave him the chance. This hypothesis receives further strengthening by his third campaign which will be discussed later.<sup>1</sup> We shall also point out in the following pages how, in certain points, we render the passage differently.<sup>2</sup>

---

1. Hultzsch and other later writers have overlooked this difficulty in the interpretation of the text, though literally the translation may be considered correct. His translation runs thus:—“(He) took the crowned head of Vīra-Pāṇḍya, who, after (the Cōḷa king) had returned, started because (he felt his) disgrace and faced (him) at Neṭṭūr. (He) put an end to the war and caused his (*viz.*, the Pāṇḍya's) young wife to enter (his) harem?. When the Tennavaṇ (*i.e.* the Pāṇḍya king), who had lost his fortune and the Ceralan (*i.e.* the Cēra king) came (to the Cōḷa king) bowed (to him) and sat down at the foot of (his) throne, (he) placed (his) feet on the crown of the former, granted (him) land, granted (him) a crown, and gave the Pāṇḍya permission (to go), and to the Villavaṇ (*i.e.* the Cēra king) who (formerly had) distributed crores (he) bestowed riches (on him) in public and gave (him) to eat from the royal plates.

To the Pāṇḍya who bore the glorious name of 'chief of the family of the Sun' (he) granted great treasures, robes and vessels (set with) brilliant jewels etc.”—(S. I. I. III, Part II, Page 218. No. 88).

2. See also Dr. S. K. Ayyangar's South India pp. 12 and 13 and Professor K. A. Nilakanta Sastri's The Pandyan Kingdom pp. 134—6 and p. 138.

*The third campaign:* Let us consider the last campaign of his reign. The historical introduction of two inscriptions (nos. 163 and 166 of the list of inscriptions of the Pudukkottai state) in the 31st and 34th year of Kulōttuṅga's reign respectively contains fuller account of his wars and conquests. Unfortunately, some portions are built in or mutilated, so that a complete copy of the text is hard to get. The text published in this paper is secured by using the above two incomplete records. A summary of the passage in English is also given at the end. If any reliance can be placed on the correctness of the sequence of events in the historical introduction, the following is the order of events:—But it seems probable that the Kāñci campaign might have been later than the 2nd Madura campaign.

(1) First Madura campaign.

(2) Recovery of Kāñci and his wars against the kings of the north—the Veṅgi country.

(3) Second Madura campaign.

(*Battle of Neṭṭūr*).

(4) Conquest of *Īlamanḍalam* (Ceylon).

(5) Conquest of Koṅgu country (and Magadhai maṇḍalam).

(6) Third Madura campaign.

Vikrama-Pāṇḍya might have tried to regain strength and revive the Pāṇḍyan greatness. Perhaps Vikrama also attempted to throw off the Cōḷa shackles and recover the Pāṇḍya country from Cōḷa control. This led to a great Cōḷa campaign—the third of the reign—described fully and graphically in the two inscriptions of the Pudukkottai state.

Kulōttuṅga captured *Maṭṭiyūr* and *Kalikkōṭṭai*.<sup>1</sup>

The army of Maṇavās and that of Ēḷagam were defeated and captured as prisoners of war.<sup>2</sup>

Then the large Cōḷa army besieged the fortified city of Madura and captured it. The Cōḷa king came round the city and worshipped the presiding deity of the place. Then Kulōt-

1. “மட்டியூரையும் கழிக்கோட்டையும் வளைந்து” We have taken these events as part of the 3rd Madura campaign—*Maṭṭiyūr* seems to be in the region of the modern Tirumeyyam Taluq of the Pudukkottai State—*Vide* Inscriptions (Text) of the Pudukkottai State Nos. 244 and 361.

2. “மறப்படையுடன் ஏழகப்படை சிறைப்பட”.

tuṅga III held a grand Durbar at Madura. The Pāṇḍi-maṇḍalam was renamed *Cōḷa-Pāṇḍi-maṇḍalam*; The name of Madura was given up. It was renamed (*Muḍittalai-koṇḍa-Cōḷa Puram*). He himself took the title of '*Cēra-Pāṇḍya-Tambirāṇ*'. The term Pāṇḍyan became a thing of the past (பாண்டியம் or பண்டியம்—old). To the *Bāṇa* (bard) who sang his praises of the conquest of Madura was given the title of *Pāṇḍya*. A street and festival were instituted in his name; and pillars of victory inscribed with an account of his achievements were planted in all directions. In all later inscriptions the Cōḷa king calls himself "Tribhuvana-cakravartī Tribhuvana Vīra-dēva who took Madura Īlam, Karuvūr and the crowned head of the Pāṇḍya and performed the anointment of hero and victor".

These are the details of the triumph of Kulōttuṅga III celebrated at Madura about the 30th year of his reign. This humiliation should have wrangled in the minds of Jaṭāvaman Kulaśekhara and his more famous successor Māra-varman Sundara Pāṇḍya I. Viewed in this light, there seems to be some justification for the war of the latter early in his reign (*i.e.* before his third year of accession—322 of 1927-28)—against the Cōḷa king to retrieve the name and fortunes of the Pāṇḍya house.<sup>1</sup>

It is not the insult of Kulōttuṅga's durbar at Madura after the battle of Neṭṭūr but that held after the 3rd campaign with such provocative ostentation that might have caused the Pāṇḍyan war. We do not agree with the interpretation of Dr. S. K. Ayyangar given on page 13 of his book, "Seating himself upon the throne with his queen he placed his feet upon the crowned head of the vanquished Vīra-Pāṇḍya 'which had been cut off on the field of battle' according to the inscription as if to say that that was to be the fate of those who would not acknowledge his authority"—but that of Hultzsch, *viz.*, that Kulōttuṅga placed his foot on Vīra-Pāṇḍya's crown, may be accepted.<sup>2</sup>

The Ceylonese chronicle seems to support the triple campaign of this reign. The ceylonese forces under the orders

1. I have suggested the possibility of a 3rd Madura campaign in my essay on Kopperuñcinga but this hypothesis seems to gain strength by the two Pudukkottai inscriptions mentioned above. I am indebted to the Pudukkottai Durbar for a copy of the Inscriptions.

2. *Vide* Dr. S. K. Ayyangar's South India pp. 13 and 14 and Prof. K. A. Nilakantha Sastri's "The Pāṇḍyan Kingdom" p. 135 and note 5, p. 136, p. 145 and p. 146 and note 1.

of Nissankamalla, the successor of Parākrama Bāhu the Great, are said to have invaded the Pāṇḍya country *thrice* (Mysore Gazetteer, new edition p. 1178, Vol. II, part II).<sup>1</sup>

## II

## TEXTS OF INSCRIPTIONS

## 1. 165 of 1902—3rd year—Tirumānikuḷi.

புயல் பெருக<sup>2</sup> வளம் பெரு(க்)கப் பொய்யாத நான்மறையின் செயல் வாய்ப்பத் திருமகளும் ஜயமகளும் சிறந்துவாழ வெண்மதி பொற்குடை விளங்க வேல் வேந்தரடி வணங்க மண் மடந்தை மன மகிழ<sup>3</sup> மனுவின் நேறி<sup>4</sup> தழைத்தோங்கச் சக்கரமுஞ் செங்கோலுந் திக்களைத்துஞ்செல நடக்க<sup>5</sup> கற்பகாலம் புவி காப்ப பொற்பமைந்த முடி சூடிச் செம்பொன் வீரசிம்மாசனத்துப் புவன முழுதுடையாளோடும் வீற்றிருந்தருளிய etc.

## 2. 457 of 1902—9th year (88th day)—Chidambaram.

Text same as No. 1 up to முடி.

.....முடி புனைந்து விக்ரம பாண்டியன் வேண்ட<sup>6</sup> விட்டதண்டால் வீர பாண்டியன் மகன் பட ஏழகம்பட மறப்படை படச் சிங்களப் படை மூக்கறுப்புண்டு அலைகடல் புச வீர பாண்டியனை முதுகிடும் படி தாக்கி மதுரையும் அரசங் கொண்டு ஜயஸ்தம்பம் நட்டு அம் மதுரையும் நாடும் அடைந்த பாண்டியற் களித்தருளி மெய்ம்மலர்ந்த வீரக்கொடியுடன் தியாகக்கொடி எடுத்துச் செம்பொன் வீரசிம்மாசனத்துப் புவன முழுதுடையாளோடும் வீற்றிருந்தருளிய etc.

## 3. 458 of 1902—11th year (118th day)—Chidambaram.

.....முடி புனைந்து தண்டொன்றால் வீர பாண்டியன் தன் மகனை மூக்கரிந்து கொண்டு விக்ரம பாண்டியற்கு கூடல் மாநகர் குடுத்து

1. The editor of the new edition of the Mysore Gazetteer has expressed the difficulty in unravelling this mystery of the Pāṇḍyan invasion of the Cōḷa country under Māravarman Sundara Pāṇḍya I. He says :—"He (Mar. S. Pāṇḍya) was apparently an ambitious and perhaps even an *unscrupulous* prince, who at an opportune moment turned without any moral rectitude against his own protector..... The actual circumstances which led up to this event still remain to be cleared up." (Mysore Gazetteer, new edition, p. 1185, Vol. II, p. II.) The reconstruction attempted above, if correct, will solve this puzzle and help us to depict the character of Māravarman Sundara Pāṇḍya in a better light.

2. வாய்த்து. 3. மனங்களிப்ப. 4. நீதி. 5. தனித் தனித்துஞ் செல நடக்க. 6. வேண்டி.

மீண்டதற்பின் எடுத்து வந்து பரிபவத்தால் எதிர்த்த வீர பாண்டியனை முடித்தலை கொண்டமர் முடிவில் ஜயஸ்தம்பம் நட்டபின் வாகைப் பெரு வீரக்கொடி தியாகக்கொடி உடன் எடுத்து செம்பொன் வீர சிம்மாசனத்து புவன முழுதுடையாளோடும் வீற்றிருந்தருளிய etc.

4. 66 of 1892—19th year—Srirangam.

Text of this inscription is indicated in the margin in No. 5 —(below)—but ends thus:—

தியாக வீரக் கொடியெடுத்து வாகை வீரக் கழல் கட்டித் திக் கெட்டுமேவல் கேட்ப்ப சக்கரவெற்பில் புதழெறிப்பச் செம்பொன் வீர சிம்மாசனத்துப் புவன முழுதுடையாளோடும் வீற்றிருந்தருளிய etc.

5. Nos. 163 and 166 of the Pudukkottai Inscriptions (probably) in the 31st year and in the 34th year of Kulōttunga III found at *Scranur* (Tirumeyyam Taluq) and at *Kudumiyāmalī* (also in the same Taluq) respectively:—

### III

#### A SUMMARY OF THE HISTORICAL INTRODUCTION

While the clouds were abundant, and the country prospered; the reign of the commands (authority) of the tiger and that of discus prevailed, the laws of Manu and the sceptre flourished in all directions while the Goddess of Fortune rejoiced to be united with the king, the cruel Kali perished, the cool white parasol overshadowed the earth to the end of aeons, and the king put on the crown of the solar race;

The king covered with gold the *Edir-Ambalam* of the Lord, instituted the *caitrā* festival, built the Gopura and the Tribhuva-naviśvaram for the Goddess, (அரிவையார்?) instituted the *Vaikāśi* and *Āvaṇi* festivals, and constructed the temple for the Lord resembling the Holy mountain and covered the Rājādīśvaram shrine with gold;

He despatched matchless elephants, performed heroic deeds, prostrated to the ground the kings of the north, entered Kāñcī after his anger had abated and levied tribute from the whole of the northern region (or to his heart's content).

He subdued the warlike *Vadugas*, brought under his sway the *Veṅgi-maṇḍalam*, entered the city called Uraṅgai or Turaṅgai (பொன் மழை பெய்துறங்கை), cut off, with the help of his single army, the nose of the son of the Pāṇḍya king, took the Tamil-famed Madura, and gave it to Vikrama-Pāṇḍya, when unable to suffer the disgrace of defeat Vira-Pāṇḍya came again, and fought at Neṭṭūr, he caused him to lose his crown (not cut off his head) after defeat, (Hultzsch has translated this differently) sent the queen (மடக்கொடியை) of the Pāṇḍya king to his royal household (வேளம் harem?), he was pleased to place his feet on the heads of the kings of the Pāṇḍya and the Cēra

(or Kērala) who sat at the foot of the throne, he gave the Pāṇḍya gifts and the crown (படி and முடி) and told him to go; Then when the Cēra king begged for mercy and made presents to the Cōḷa king, he gave large gifts separately to the Cēra and received the submission of *Vīra-kēralan*. (“He cut off a finger of Vīra-Kērala” does not seem to fit in with the context.)

To the Pāṇḍya who bore the glorious title of (பருதிசூல பதி) Lord of the solar race, he gave great treasures, robes and jewels set with precious stones.

Then after (setting fire to ? and) conquering Ceylon (Īla-maṇḍalam) he invaded the Koṅgu country, fought so fiercely that the land suffered misery and its king begged for peace and then he assumed the title of *Karuvūr-Cōḷa-Kēralan* and had himself crowned as victor and hero.

Then he fought successfully against his enemies (we do not know who—the lines are mutilated)—at Maṭṭiyūr and Kalik-kōṭṭai (மட்டியூரும் கழிக்கோட்டையும்). Then his ocean-like army surrounded the outer walls of Southern Madura, and captured the city, he caused defeat (and death ?) to the Pāṇḍya (தரைப்படர் மண் வழங்கி), had the country ploughed with asses, bestowed the name of Cōḷa-Pāṇḍya on the Pāṇḍyan and himself put on the crown of the Cōḷa called *Tribhuvana Virar* and circumambulated the big city of Madura worshipped the Lord with presents of jewels, caused the *Pāṇḍi-maṇḍalam* of the Pāṇḍya to be renamed *Cōḷa-Pāṇḍya-maṇḍalam*, the city of Madura to be ‘Muḍittalai Koṇḍa Cōḷa Puram’, He took the title of *Lord of the Cēras and the Pāṇḍyas* (சேரபாண்டியன் தம்பிரான்) the term Pāṇḍya (so far as it applied to the ruler of the south) to become a thing of the past (Here is a play on the word Pāṇḍya, the king and Pāṇḍu or Paṇḍu—old); and on the bard (பாணன்) who sang the praise of the victor-king,—he bestowed the title of Pāṇḍya, he caused a big street and festivals to be instituted in his name and worshipped the God when taken out in procession. He covered with gold the shrine of Tiruvālavāy (Sundareśvara?) and made it resemble a mountain of gold, he granted to the Lord of Dance (புலியூர் ஆடும் அம்பலவாணற்கு) the revenue and tribute levied from the Cēra Pāṇḍya (or Cōḷa Pāṇḍya) country,.....  
.....gave gifts to Brahmins and caused pillars of victory with inscriptions eulogising his glory to be planted in all directions etc. In the 34th 51st day of king Kō-p-Para-Kesari-Varman

Tribhuvunacakravartī Tribhuvanavīradēva who took Madura, Karuvūr, the crowned head of the Pāṇḍya and celebrated Virābhiṣeka (anointment of hero) and Vijayābhiṣeka (anointment of victor) etc.

[*N. B.*] The Tribhuvanam inscription of Kulōttuṅga III (190—192 of 1907) refers to his building activities. The temple of Hālāhalāśya at Madura is among those temples mentioned to have been built by this king. This is confirmed by the two inscriptions from the Pudukkottai state referred to above.

# TIRU-MURUKĀRRU--P-PAṬAI AND KATHOPANIṢAD.

BY

P. S. SUBRAHMANYA SASTRI, M.A., PH. D.,  
Asst. Editor, Tamil Lexicon.

The word *ārru-p-paṭai* is derived from the word *āṛu* (way) and the root *paṭu* (to direct), and hence means a poem wherein a poet or a dancer directs another to go to a patron of learning to receive presents when he meets him on his return from the same patron.

The fact that such a poetic composition existed before the time of Tolkāppiyaṇār is seen from his statements

கூத்தரும் பாணரும் பொருநரும் விறலியும்  
ஆற்றிடைக் காட்சி யுறழத் தோன்றி  
பெற்ற பெருவளம் பெருஅர்க் கறிவுறீஇ  
சென்றுபய னெதிரச் சொன்ன பக்கமும்.

*Kūttarum pāṇarum porunarum viraliyuni*  
*Āṛṇṇitai-k kāṭci y-uṛala-t tōṇṇi*  
*Perra peruvālam perūar-k k-aṛiv-uṛi*  
*Cenṇu-paya u-etira-c conṇa pakkamum.*

(Tol. Poruḷ. 91.)

and

முன்னிலை சுட்டிய வொருமைக் கிளவி  
பன்மையொடு முடியினும் வரைநிலை யின்றே  
ஆற்றுப்படை மருங்கிற் போற்றல் வேண்டும்.

*Munṇilai cutṭiya v-orumai-k kiḷavi*  
*Panmaiyoṭṭu muṭiyiṇum varai-nilai y-inṇē*  
*Ārru-p-paṭai maruṅkiṇ pōṛṇal vēṇṭum.*

(Tol. Col. 462.)

The poem is named *pānar-ārru-p-paṭai*, *kūttar-ārru-p-paṭai*, *porunar-ārru-p-paṭai*, *virali-y-ārru-p-paṭai* etc. according as the poet describes a *pāṇan* (bard), *kūttan* (dancer), *porunan* (dancer at battle-field or threshing floor), *virali* (female dancer) etc. directing another of the respective class to go to the same patron from whom he or she has received presents.

But the poem *Tiru-murukārru-p-paṭai* does not receive its name in the same way. Here a poet is directed by Nakkīraṇār, the author of the poem, to go to God Murukan at the shrines of Tiru-p-parāṅkuṇṇam, Tiru-c-cīr-alai-vāy (Tiruchendur), Tiru-v-āviṇaṇ-kuṭi (Palni), Tiru-v-ērakam (Udupi), Paḷa-mutircōlai probably (Aḷakar-kōil) etc. and worship Him if he wants to reach 'the final goal' (eternal bliss).

The lines that convey the sense 'if you want to reach the final goal' are:—

சேவடி டுருஞ் செம்ம லுள்ளமொடு  
நலம்புரி கொள்கைப் புலம்பிரிந் துறையும்  
செலவுநீ நயந்தனை யாயின்.  
*Cē-v-aṭi paṭaruṇ cemma l-uḷḷamoṭu*  
*Nalam-puri koḷkai-p pulam-pirint t-urāiyum*  
*Celavu-nī nayantanai y-āyin.*

What is the exact idea that these lines convey is the point in question? The meaning given by Naccīṇārkkīṇiyar, the learned commentator, is 'If you desire (*nī nayantanai-y-āyin*) to go (*celavu*) with your mind (*uḷḷamoṭu*) refined (*cemmal*) by your having done meritorious deeds (*nalam puri koḷkai*) which will enable you to reach the Holy Feet (*cē-v-aṭi-paṭarum*) that cannot be seen through the senses (*pulam pirintu urāiyum*).'  
The prose order according to him is this :—*Pulam pirintu urāiyum, cē-v-aṭi paṭarum, nalam puri koḷkai, cemmal uḷḷamoṭu, celavu nī nayantanai-y-āyin.*

He is to be congratulated on having intuitively found out that the main idea of the lines is 'if you desire to win eternal bliss'. But there are some weak points in his interpretation:—(1) He does not seem to have found any word in the lines which means 'final goal'. (2) He splits the second line into two parts *நலம்புரி கொள்கை* (*nalam-puri-koḷkai*) and *புலம்பிரிந்துறையும்* (*pulam-pirint-urāiyum*) and takes the latter to mean 'being away from the cognisance of sense-organs' and makes the relative participle *urāiyum* qualify the word *cē-v-aṭi* found in the first line; the former part *நலம்புரி கொள்கை* (*nalam-puri-koḷkai*) is taken to mean 'the doing of meritorious deeds' and is considered to be the cause of reaching *cē-v-aṭi* and the refinement of the mind, and hence is taken after *cē-v-aṭi paṭarum* and before *cemmal-uḷḷamoṭu*; and the relative participle *paṭarum* is taken to mean 'which stands as the reason to reach' (*paṭar-vataṅku-k-kāra-*

*namāna*). (3) The word *celavu* is taken to mean 'going'. (4) The place whereto he should go is not mentioned. The reason for this difficult construction of Nacciṇārkkīṇiyar seems to be that he thought that the ideas—(1) that the Holy Feet of God are non-cognisable to senses, (2) that the mind is purified by meritorious deeds and (3) that the Holy Feet are reached by meritorious deeds—are expressed in these lines.

But a comparison of the lines with the following stanzas in Kathopaniṣad—

यस्तु विज्ञानवान् भवति समनस्कः सदाशुचिः ।

स तु तत्पदमाप्नोति यस्माद्भूयो न जायते ॥ (iii, 8.)

तद्विष्णोः परमं पदम् । (iii, 9.)

सा काष्ठा सा परा गतिः ॥ (iii, 11.)

enables us to interpret them without adopting the strained construction resorted to by the commentator. The expressions *cē-v-aṭi*, *cemmal-uḷḷamoṭṭu* and *celavu* respectively give the same sense as परमं पदम्, समनस्कः and गतिः. Hence the word '*celavu*' here does not mean 'going', but means 'final goal' (*parā gatiḥ*). The expression '*nalām<sup>1</sup>-purī-kolḥkai-p-pulam-pirinturaiyum*' which means 'which is different from the region (*svarga*) where the fruit of his meritorious deeds (*puṇya*) alone are reaped' conveys in a different way the idea which is similar to that conveyed by 'यस्माद्भूयो न जायते' which means 'from which he never returns'. Hence the meaning of the three lines of *Tirumurukārru-p-patai* is 'If you desire to reach, with a pure heart, the final goal which is the residence of the Holy Feet and which is different from Heaven (*svarga*) wherein one enjoys the fruit of one's meritorious deeds alone'.

Besides, the above lines of Kathopaniṣad clearly show that Mahāmahopādhyāya Dākṣiṇātya Kalānidhi V. Swaminatha Aiyar has rightly chosen the reading பிரிந்து (*pirintu*) in the second line in preference to the reading புரிந்து (*purintu*) found in some editions and manuscripts.<sup>2</sup>

1. *Nalam* means *nal-vṇai-p-payan*.

2. (a) *Tirumurukārrupatai*, V. S. Iyer Edition.

(b) *Paṭiṇorāntirumurai*, Centilvēlu Mudaliar Edition.

(c) *Nacciṇārkkīṇiyar*, Commentary under Tol. Poruḷ. 91 Bhavanandam Pillai Edition.

It may also be noted here that, as the word *cē-v-aṭi* of *Tirumurukārru-p-paṭai* is identical with परमं पदम्, so also the word அந்நிலை (*a-n-nilai*) in—

நில்லா வுலகத்து நிலைமை தூக்கி

அந்நிலை யனுகல் வேண்டி.

*Nillā v-ulakattu nilaimai tūkki*

*A-n-nilai y-aṇukal vēṇṭi.* (Perumpāṇ.<sup>1</sup> 466-7.)

(Desiring to reach that goal after carefully considering the transitoriness of earthly objects)—is evidently identical with तत्पदम् of Kāthopaniṣad. The demonstrative root ‘a’ in *a-n-nilai* refers to the object in the mind of the speaker. It is called *neñcarī-cuṭṭi* by Tamil scholars.

It is a source of gratification to find that the most important Upaniṣadic thoughts are imbedded in the minds of Nakkīraṇār and others and that they find a natural expression in their Tamil works.

1. Perumpāṇ = Perum-pāṇ-ārru-p-paṭai.

HISTORY OF GRAMMATICAL THEORIES IN TAMIL  
AND  
THEIR RELATION TO THE GRAMMATICAL  
LITERATURE IN SANSKRIT\*.

BY

P. S. SUBRAHMANYA SASTRI, M.A., PH. D.,  
*Asst. Editor, Tamil Lexicon.*

INTRODUCTION.

It is my idea to present, in this thesis, the important grammatical theories in Tamil Language available from the written works of Tamil Grammarians and modern Tamil scholars in their historical setting and their relation to the Grammatical literature in Sanskrit and to discuss them on their merits and in reference to the evidences that may be collected from literary works and inscriptions.

The Grammarians mentioned in Tamil Language are:—

(1) Agastya with his twelve disciples Tolkāppiyaṇār, Ataṇkōṭṭācāṇ, Turālīṇkaṇ, Cempūṭcēy, Vaiyāpikaṇ, Vāyppiyaṇ, Paṇampāraṇ, Kaḷārampaṇ, Avinayaṇ, Kākkaipāṭiṇiyaṇ, Naṛrat-taṇ and Vāmanaṇ who are said to have lived in the pre-Christian Era.

(2) Iḷampūraṇar otherwise known as Uraiyaṇācīriyar, probably of the 10th century, the earliest known commentator on Tolkāppiyam, the learned treatise on Tamil Grammar written by Tolkāppiyaṇār.

(3) Puttamittiraṇār of the 11th century, the author of Vīracōliyam.

(4) Peruntēvaṇār of the 11th or 12th century the commentator on Vīracōliyam.

(5) Kuṇavīraapaṇṭitar of the 13th century, the author of Nēminātam.

(6) Pavaṇantī of the 13th century, the author of Naṇṇūl.

(7) Mayilainātar, probably of the 14th century, the earliest commentator on Naṇṇūl.

---

\*Thesis approved by the Madras University for the Ph. D. degree.

(8) Cēnāvaraiyar, Teyvaccilaiyār and Naccīnārkkīṇiyar, the well-known commentators on Tolkāppiyam (whose dates are not exactly known).

(9) Cuppiramaṇiya-tiṭcitar of the 17th century, the author of Pirayōkavivēkam.

(10) Vaittiyanāta-tēcikar of the 17th century, the author of Ilakkaṇaviḷakkam.

(11) Cuvāmināta-tēcikar of the 17th century, the author of Ilakkaṇakkottū.

(12) Caṅkaranamaccivāyappulavar of the 17th century, a commentator on Naṇṇūl.

(13) The Rev. C. J. Beschi of the 18th century, the author of Tonṇūlviḷakkam.

(14) Civañāṇa-muṇivar of the 18th century, the author of Tolkāppiyamutaṛcūttiravirutti and Ilakkaṇaviḷakka-c-cūrāvaḷi.

(15) A few other commentators on Tolkāppiyam and Naṇṇūl.

Of them, Agastya and his disciples except Tolkāppiyaṇār, Paṇampāraṇār, Ataṅkōṭṭācāṇ and Avinayaṇār are known to us only from stray references found in the works of others. Paṇampāraṇār has written the *pāyiram* or the introductory stanza to Tolkāppiyam. There, it is mentioned, that Tolkāppiyam was written by Tolkāppiyaṇār after a careful study of the earlier treatises on Tamil grammar, on the model of Aindra-Vyākaraṇa, dealing with the Tamil Language current both in literature and usage from Tīrupatī on the north to Cape Comorin on the South; and that it was first read in the court of a Pāṇṭiyaṇ king for recognition before the grammarian Ataṅkōṭṭācāṇ. Mayilainātar, in his commentary on Naṇṇūl, mentions that a treatise on Grammar was written by Avinayaṇār and it was commented upon by Irāca-p-pavittira-p-pallavataraiyaṇ. But neither the treatise nor the commentary is available at present. The earliest treatise on Grammar that is available at present is only Tolkāppiyam. The later treatises are Vīracōḷiyam, Naṇṇūl, Ilakkaṇaviḷakkam, Pirayōkavivēkam, Ilakkaṇakkottū, Tonṇūlviḷakkam, Tolkāppiyamutaṛcūttiravirutti and Ilakkaṇaviḷakka-c-cūrāvaḷi.

The author of Vīracōḷiyam improves upon Tolkāppiyam and mentions a few points with reference to the literature of his time which are not found in it. The author of Naṇṇūl has incorporated almost all those contained in Tolkāppiyam and Vīracōḷi-

yam omitting a few, added a few points more and has given expression to them as concisely as possible. In doing so he has not generally followed the important principle observed by Tolkāppiyaṇār that one sūtra should have only one *vidhēya* or logical predicate with reference to one *uddēśya* or logical subject and this mars the beauty of his work. The author of Ilakkaṇaviḷakkam, after making a critical study of Tolkāppiyam and Naṇṇūl, has selected sūtras from them both, given most of them as they are found there and modified the rest a little. Hence he may be treated more as a commentator on Tolkāppiyam and Naṇṇūl than an author of a separate treatise. Pirayōkavivēkam is a treatise by itself where the author imports the technical expressions and theories of Sanskrit Grammar. The author of Ilakkaṇakkottu summarises in a few sūtras the ideas contained in the works of his predecessors. Hence he may be taken as an author of a compendium rather than an independent work.

The author of Toṇṇūlviḷakkam incorporates most of the sūtras found in Naṇṇūl, but modifies them wherever he differs from it. But in commentary on the same he has made very good use of the literature available to him.

Tolkāppiyamutarcūttiravirutti is an elaborate discussion on the first sūtra of Eluttatikāram of Tolkāppiyam, where the author avails himself of the opportunity to discuss the important views on Phonology and Accidence expressed by Tolkāppiyaṇār, by his commentators (Uraiyācīriyar), Cēṇāvaraiyar and Nacciṇārkiṇiyar, and the author of Naṇṇūl, with the aid of his ripe knowledge both of Tamil and Sanskrit.

Ilakkaṇaviḷakkaccūṛāvaḷi is only a criticism on the views of the author of Ilakkaṇaviḷakkam where he differs from the author of Naṇṇūl.

I may also mention here that Tolkāppiyaṇār has worked out a beautiful Tamil Grammar on the models of Sanskrit Prātiśākhya, Yāska's Nirukta, Pāṇini's Śikṣā and Pāṇini's Grammar or that of his predecessors without doing the least violence to the genius of the Tamil Language. It is also said by Paṇampāraṇār that he based his work on Aindra-Vyākaraṇa; but tradition says that all the eight treatises on Sanskrit Grammar including Aindra were ousted by Pāṇini's Aṣṭādhyāyī. The only reference which connects Indra with Sanskrit Grammar is found in Patañjali's Mahābhāṣya where it is said that he studied Sanskrit Grammar

word by word under Bṛhaspati for 1000 celestial years and was not able to complete it.<sup>1</sup>

There is striking correspondence between Kātantra and Tolkāppiyam in respect of arrangement of topics and use of technical terms such as *vibhakti* = *vēṇṇumai*, *dirgha* = *neṭil*, *hrasva* = *kuṇṇil* etc. From this Dr. Burnell<sup>2</sup> seems to infer that Tolkāppiyaṇār followed Kātantra and Prātiśākhya which, according to him, represented the Aindra School, instead of Pāṇini's Grammar and also conjectures that Tolkāppiyam may be assigned to the 8th century after Christ.<sup>3</sup> But from inscriptional and other evidences it is generally believed that the works of Sangam period could not have been produced later than 5th century A. D. and some of them like *Puraṇānūṇṇu* and *Paṭiṇṇuppattū* could be taken to the beginning of the Christian Era, and Tolkāppiyam is earlier than all of them. Consistently with this widely prevalent belief, it could hardly be held that Tolkāppiyaṇār had for his model the Kātantra Grammar which is said to belong to the first century after Christ.<sup>4</sup>

An attempt is made in this thesis to show that Tolkāppiyaṇār adapted not only the Sanskrit Grammatical terms and the arrangement, but also *many of the Sanskrit grammatical theories*. For instance, his account of the origin of speech-sounds and the function of case-suffixes is a close reproduction of what is found in old Sanskrit Grammars; while, however, in the treatment of compounds, and the initial and the final sounds of words, he appears to have made certain alterations and adaptations to suit the requirements of Tamil language. On the other hand, the authors of *Vīracōḷiyam* and *Pirayōkavivēkam* have imitated Pāṇini's Grammar in declension, conjugation and word-formation to such an extent that they have completely distorted the perspective through which the linguistic phenomena of the Tamil Language should be analysed and evaluated. They have also incorporated in their works a close translation of Vararuci's *Kārikās* on Sanskrit compounds.

It will also be seen from the following pages that the other grammarians like the authors of *Naṇṇūl* and *Ilakkaṇaviḷakkam*

1. *Bṛhaspatiḥ Indrāya divyam varṣa-sahasram pratipadoktānām śabdānām śabda-pūrāṇam provāca, nāntam jagāma.*

2. B. A. S. p. 8.

3. B. A. S. p. 55 f.n.

4. B. S. G. p. 83.

have, in general, followed Tolkāppiyaṇār, though, here and there as in the case of accent and *aḷaṭṭai*, they agree with the author of Vīracōḷiyam.

For the sake of convenience, I have divided, in this thesis, the period from the Pre-Christian Era to the present day into three:—Ancient, Medieval and Modern, Ancient representing the period extending from the Pre-Christian Era to the 5th century A.D. (*i.e.*) the end of Sangam Period, Medieval, the period from the 6th century A.D. to the 14th century A.D. and Modern, the period from the 15th century A.D. upto the present day.

### I. SPEECH-SOUNDS.

1. 1. *How speech sounds are produced*:—Tolkāppiyaṇār says in the sūtra—

*Unti mutalā muntu-vali tōṇri-t*  
*Talaiyinu miṭarriṇu neñciṇu nḷaii-ṭ*  
*Pallu m-italu nāvu mūkkum*  
*Aṇṇamu m-uḷaṭṭa v-eṇmurai nḷaiyāṇ*  
*Uruppur r-amaiya neripṭa nāṭi*  
*Ellā v-eḷuttuṇ colluṇ kālai-ṭ*  
*Pirappi ṇ-ākkam vēru-vē r-iyala*  
*Tirappata-t teriyuṇ kāṭci y-āṇa.* (Tol. E. 83.)

that air which starts from navel comes out as different speech-sounds by passing through the eight parts—chest, neck, head, hard palate, teeth, tongue, lips and nose, and undergoing different modifications therein. This is more or less the translation of the following Kārikās of Pāṇini's Śikṣā:—

*Mārutastūrasī caran mandraṇ janayati . . . . . svaram |*  
*Kaṇṭhē mādhyandinayugam . . . . .*  
*Tāram tārtīyasavanam śīrṣaṇyam jāgatānugam |*  
*Sōdirṇō mūrdhnyabhikāṭō vaktram-āpadya mārutaḥ |*  
*Varṇāṇ janayatē . . . . .*  
*Aṣṭāu sthānāni varṇānām uraḥ kaṇṭhaḥ śīras-tathā |*  
*Jihvāmūlaṇca dantāśca nāsikōṣṭhāu ca tālu ca ||*

It may be noted here that *jihvāmūlam* is translated as 'nā' or tongue, while it really means the root of the tongue.

Besides it is said in Pāṇini's Śikṣā that 'h', when it is in company with any one of the five nasals and four semi-vowels, is 'chest-sound' but that, when it is alone, it is guttural.

*Cf. 'Hakāram pañcamairiyuktam antasthābhiśca saṇyutam |*  
*Uraṣyam tam vijānīyāt kaṇṭhyam āhurasaṇyutam ||*  
 (P. Ś. 16.)

Though Tolkāppiyaṇār has not stated 'h' among Tamil sounds, he has mentioned the chest as one of the organs of speech probably because the air which finally comes out as speech-sound passes through it.

But the other grammarians from Iḷampūraṇar downwards have not correctly understood the significance of the mention of chest, neck and head. Iḷampūraṇar says in his commentary on the sūtra—

*Mellelut tārūm pīraṇṇi n-ākkam*  
*Colliya paḷḷi nilaiyiṇa v-āyṇum*  
*Mūkkiṇ vaḷi-y-icai yāppura-t tōṇrum.* (Tol. E. 100.)

where it is said that the nasals have for their organ of production, nose also besides their respective organs of production, that the voiceless consonants are produced by *talai-vaḷi* or the air when it passes through the head, and that the semi-vowels are produced by *muṭarṇu-vaḷi* or the air when it passes through the neck. This statement of his is probably due to the fact that, of the eight organs mentioned by Tolkāppiyaṇār in Tol. E. 83, all but chest, neck and head have been mentioned as organs of production in sūtras 84 to 100. But he does not seem to have noted that *neñci* or chest mentioned in Tol. E. 83 is left out.

The author of Vīracōliyam mentions the same eight organs<sup>1</sup> as Tolkāppiyaṇār, but does not say anything as Iḷampūraṇar does about the places where *valliṇam*, *melliṇam* and *iṭaiyiṇam* are produced. But his commentator Peruntēvaṇār says that the voiceless consonants are produced at the chest, *āytam* at the head, vowels and semi-vowels at the neck and the nasals at the nose.<sup>2</sup> The author of Naṇṇūl closely follows Peruntēvaṇār in all respects.<sup>3</sup>

- 
1. *Unti-mutal-eḷuṇ kārru-p-pīraṇṇ-ura muñ-ciramum*  
*Pantamali-kaṇṇaṇ tamu-mūkkum-ur-r-aṇṇam paḷ-l-uṭaṇē*  
*Muntum-ital-nā moli-y-uṇupṇāku muyaṇci y-iṇ-āl*  
*Vantu-nikaḷu m-eḷutteṇṇu-colluvar vāṇutalē.* (V. C. 6.)
  2. *Ivaṇṇuḷ, urattai valliṇamum, ciṇattai āytamum, kaṇṇattai*  
*uyyirum iṭaiyiṇamum, mūkkai melliṇamum, poruntum-ṇa-k-*  
*koḷka.* (V. C. 6, Comm.)
  3. *Nīrai-yuyir muyaṇciyi n-uḷvaḷi turappa*  
*Eḷum-aṇu-t tīraḷ-uraṇ kaṇṇa m-ucci*  
*Mūkkur r-ital-nā-p paḷ-l-aṇa-t toliliṇ*  
*Vēvṇē r-eḷuttoli y-āy-varal pīraṇṇē.* (Na. 74.)

The author of *Ilakkaṇaviḷakkam* improves upon Tol. E. 83 by adding that the sound has emanated from *udāna* which is made to rise by the will of the person.<sup>1</sup> This clearly shows that he has in his mind the *Kārikā*—

*Ātmā buddhyā samētyārthūn manō yuñktē vivakṣayā |*  
*Manah kāyāgnim āhanti sa prērayati mārutam ||*

which precedes '*Mārutastūrasī caran* etc.' in Pāṇini's *Śikṣā*, and agrees with *Ilampūraṇar* that *valliṇam* is produced at the head, *melliṇam* at the nose and *iṭaiyṇam* at the neck<sup>2</sup> and differs from Naṇṇūlār in saying that *āytam* is produced at the chest<sup>3</sup> instead of at the head. This is perhaps due to his having known that the Sanskrit 'h' is produced at the chest when it is in company with any one of the five nasals and semi-vowels; but since *āytam* must invariably be followed by a voiceless consonant, it is more appropriate to say that it is produced in places just near the places of production of the respective voiceless consonants. This point will be dealt with at great length in 1.55.

C. J. Beschi follows Naṇṇūlār *in toto*<sup>4</sup>.

From all this it is evident that the Tamil Grammarians with the exception of *Tolkāppiyaṇār* have not recognised the true distinction between the *ābhyantara-prayatna* and the *bāhya-prayatna* mentioned by Pāṇini and other Sanskrit Grammarians. They have not also recognised that the classification of vowels, explosives, semi-vowels and fricatives is due to their distinction in *ābhyantara-prayatna* and that the classification into voiceless and voiced is due to the difference in the condition of the vocal

*Avvali,*

T. V. 3. Comm.

chords and certain concomitant factors which come under *bāhyaṣṛayaṭna*<sup>1</sup>.

It may be useful to note in this connection that the tension of the vocal chords and the accompanying vibration and musical clang or voice correspond to the *bāhyaṣṛayaṭnas* of the voiced consonants, viz., *saṃvāra*, *nāda* and *ghōṣa*, while the flaccid condition of the vocal chords and the accompanying non-vibration and breath correspond to the *bāhyaṣṛayaṭnas* of the voiceless consonants, viz., *vivāra*, *śvāsa* and *aghōṣa*.

At the end of the third section in *Eluttatikāram*, *Tolkāppiyāṇār* states in two sūtras—

*Ellā v-eluttum veḷippaṭa-k kiḷanti*  
*Colliya paḷli y-elutaru valiyir*  
*Pirappoṭu vituvali y-uralcci vāra-t*  
*Takattelu vali-y-icai y-arirapa nāṭi*  
*Aḷapir kōṭa l-antaṇar maraittē. (Tol. E. 102.)*  
*Aṣṭiva nuvalā t-eluntupurat t-icaikku*  
*Meyteri vali-y-icai y-aḷavu-nuvaṇ riciṇē.*

(*ibid.* 103.)

that the theory of speech sounds and modifications which sound undergoes within the body may be learnt from the scriptures of the Brahmins and that he has dealt with here only the articulated speech-sounds that come out of the mouth. Here it is evident that he refers to the four phases of speech-sound, *parā*, *paśyantī*, *madhyamā* and *vaikharī* described in Sanskrit Grammar, *parā*, being that phase of the *śabda-brahman*, the undifferentiated primordial sound manifested at *mūlādhāra* or sacral plexus, *paśyantī* being that phase which is manifested at the navel and which is cognisable to Yōgins, *madhyamā* being that phase which is manifested at the heart and *vaikharī* being that phase which is manifested out of the vocal organs as the articulated sound. These four phases are clearly suggested by the following *Rk* mentioned by Patañjali in the first *āhnika* of his *Mahābhāṣya* :—

*Catvāri vākparimitā padāni*  
*Tāni vidur brāhmaṇā yē manīṣiṇaḥ |*

- 
1. *Samvṛtē kaṇṭhē nādaḥ kriyatē. (Tai. P. II; 4.)*  
*Vivṛtē śvāsaḥ. (Tai. P. II. 5.)*  
*.. Kaṇṭhasya khē vivṛtē samvṛtē vā āpadyatē*  
*śvāsatām nādatām vā. (R. V. P. 13, 1.)*

*Guhā trīṇi nihitā nēṅgayanti*

*Turīyam vācō manuṣyā vadanti ||*

(M. B. i. 3. 24 and 25.)

Hence the three sūtras, Tol. E. 83, 102 and 103 clearly show that Tolkāppiyaṇār had studied Sanskrit Śikṣā, Prātiśākyas and grammar, and had adopted in his work those points which would suit Tamil Language.

1.2. *Classification*:—Speech-sounds are first classified into primary and secondary in almost all the treatises on Tamil Grammar. They are respectively called *mutal-eluttū*<sup>1</sup> and *cārpeḷuttū*<sup>2</sup> by Naṇṇūlār and his successors. The name *cārpeḷuttū* may have been suggested to them by the expression '*cārntu-varaṇ maraṇ*' in the first sūtra in *Eluttatikāram* of Tolkāppiyam.

1.21. *Primary sounds* : 1.211. *Definition*:—Primary sounds are those which have only one definite place of production in vocal organs for each of them. That this is the idea of Tolkāppiyaṇār is inferred from his statement that secondary sounds are found only in the company of primary sounds and cannot have a separate place of production.<sup>3</sup>

1.212. *Number of primary sounds*:—The primary sounds are, in the opinion of Tolkāppiyaṇār, thirty<sup>4</sup> in number consisting of 12 vowels<sup>5</sup> and 18 consonants<sup>6</sup>. The author of *Viracōḷiyam* mentions *āytam* between vowels and consonants and hence

- 
1. *Uyiru m-uṭamṭum-ā muppatu mutalē.* (Na. 59.)
  2. *Uyirmey āytam uyīraḷaṭu orṭaḷaṭu*  
*A ∴ kiya iu aiau ma ∴ kāṇ*  
*Taṇi-nilai pattuṇ cārpeḷut t-ākum.* (Na. 60.)  
*Moli-k-kā raṇam-ā nāta-kā riya-v-oli*  
*Eluttatu mutal-cār p-eṇa-v-iru vakaittē.* (I. V. 3.)
  3. *Cārntu varī ṇ-allatu tamakkīyal pīla-v-eṇa-*  
*Tērntu-velī-p paṭutta v-eṇai mūṇrun*  
*Tattaṇ cārpiṇ piṇappoṭu civaṇi*  
*Otta kātciyir ṇammīyal p-iyalum.* (Tol. E. 101.)
  4. *Eluttena-p-paṭuṭa*  
*Akara-mutal*  
*Ṇakara v-iṇuvāy muppa ∴ tenpa*  
*Cārntu-varaṇ maraṇ mūṇralaṇ kaṭaiyē.* (ibid. 1.)
  5. *Aukāra v-iṇuvāy-p*  
*Paṇṇi r-eluttu m-uyir-eṇa molipa.* (ibid. 8.)
  6. *Ṇakara v-iṇuvāy-p*  
*Paṭiṇeṇ eḷuttu mey-y-eṇa molipa.* (ibid. 9.)

according to him the primary sounds seem to be thirty-one.<sup>1</sup> The author of Nēminātam follows him in this point.<sup>2</sup> But all the other grammarians repeat the opinion of Tolkāppiyaṇār.

It seems to me that the authors of Vīracōliyam and Nēminātam have gone wrong in having included *āytam* among primary sounds, since its pronunciation varies according to the consonant that succeeds it. This point will be dealt with at greater length in 1.55.

1.213. *Classification of primary sounds*:—Primary sounds are classified into vowels and consonants, of which the vowels are produced by opening the mouth, which is seen from the expression '*aṅkāntū iyalum*' in Tol. E. 85 and *avarṛōraṇṇa* in Tol. E. 86, etc. The vowels and the consonants will be dealt with in detail after secondary sounds are defined and numbered (*i.e.*) in 1.3 and 1.4.

1.22. *Secondary sounds*: 1.221. *Definition*:—Secondary sounds are those which depend for their pronunciation upon the preceding or succeeding consonants. This is evident from Tolkāppiyaṇār's statement '*cārntū varin allatū tamakkū iyalpila*' in Tol. E. 101.

But Naṇṇūlār does not seem to have understood the full significance of this definition of Tolkāppiyaṇār. He seems to have mistaken *kurṛiyal-ikaram* and *kurṛiyal-ukaram* for 'i' and 'u' shortened to half a *mātrā* each. According to Tolkāppiyaṇār the places of production of *kurṛiyalikaram* and *kurṛiyal-ukaram* are not always the same as those for 'i' and 'u', but change according to the preceding consonant.

Mayilainātar says that *cārpeluttū* is that which is other than *mutal-elettū* and which is used along with another sound.<sup>3</sup> An old commentator on Naṇṇūl says that *cārpeluttū* is one which has

1. *Arinta-v-eluttam-muṇ paṇṇirantāvi-ka l-āṇa-kam-muṇ*  
*Piṇanta-patiṇettū meṇ-natu-v-āytam peyarittitai-y-ām*  
*Murintaṇa-yam-muta l-āru naṇṇa namaṇa-v-eṇṇu*  
*Cerintaṇa-melliṇaṇ cepṇāta-valliṇan tēmoliyē.* (V. C. 1.)

2. *Āvi yakara-muta l-āṇirantām-āytam-itai*  
*Mēvūn kakara-mutaṇ meṇkal-ā—mūvāruṇ*  
*Kaṇṇu muṇaimaiyār kāṭṭiya-muṇ pattoṇṇu*  
*Naṇṇumutal vaiṇṇāku naṇṇū* (N. N. E. 1.)

3. *Mutaleluttām-taṇmai avarṇiṇk-iṇmarayāṇum, cārppir-rōṇrutal-*  
*āṇum iṇṇattum cārṇākaṇē koḷḷavēṇṇum-eṇpatū.* (Na. 59. M.)

undergone modification by one part of it combining with another part or by being preceded or succeeded by another sound.<sup>1</sup>

The author of *Ilakkaṇaviḷakkam* agrees with *Mayilainātar*.

*Caṅkaranamaccivāyar* says that *cārpeḷuttū* is that which is used only in combination as vowel-consonant, which comes in company of *mutaleḷuttū* as *āytam* or *mutaleḷuttū* modified as the rest. He adds that it may also be defined as a sound found only in words.<sup>2</sup>

*Civañāṇamuṇivar*, on the other hand, agrees with *Tolkāp-piyaṇār* and elaborately criticises in his *Tolkāppiyamutar-cūttira-virutti*, the definition given by the commentators of *Naṇṇūl* and the author of *Ilakkaṇaviḷakkam*.

1.222. *Number of secondary sounds*:—The secondary sounds are, in the opinion of *Tolkāppiyaṇār*, three in number consisting of *kurriyal-ikaram* (roughly translated as shortened 'i'), *kurriyal-ukaram* (roughly translated as shortened 'u'), and *āytam*<sup>3</sup>, and each of them has half a *mātrā* for its quantity.<sup>4</sup> *Iḷampūraṇar* mentions under *Tol. E. 1*, that they are 226 in number consisting of *kurriyal-ikaram*, *kurriyal-ukaram* and *āytam*, 7 *uyir-aḷapeṭai* and 216 vowel-consonants. According to the author of *Vīracōḷiyam* they are 11 in number consisting of 7 *aḷapeṭai* (one corresponding to each of 7 long vowels), *kurriyal-ikaram*, *kurriyal-ukaram*, shortened 'ai' and shortened 'au'.<sup>5</sup>

1. *Tammoṭu tām cārntum, iṭam cārntum, paṇṇukkōṭṭū cārntum, vikārattāl varutaliṇ.* (Na. p. 40- f.n.)

2. *Uyirmeṇ, uyirum meyyum kūṭippīṇattalāṇum, āytam . . . avarriṇ-iṭaiyē cārntuvarutalāṇum eṇaiya tattamutaleḷuttū-ṇiripū vikārattūṇ pīṇattalāṇum cārpeḷuttūyīṇavōka-kkoḷka . . . orumōḷiyai-c-cārntu varutalē tamakkilakka-ṇamōkavutaimaiyir cārpeḷuttūyīṇa-v-eṇakkōṭṭalum-ām-eṇka.*

(Na. 60. C.)

3. *Avaitūm,*

*Kurriya l-ikaram kurriya l-ukaram*

*Āytam-eṇṇa*

*Mupṇār pulḷiyu m-eḷuttō r-aṇṇa.* (Tol. E. 2.)

4. *Auvaiya-ṇilaryu m-eṇai mūṇṇē.* (ibid. 12.)

5. *Iruti-mey-nīnkīya v-irōṇil-aintu kuṇiṇēṭil-ēl*

*Ākaram-vakaratti ṇōṭiyaint-auvām yakarattiṇōṭṭū*

The author of Nēminātam mentions both in his text and commentary 244 secondary sounds consisting of 7 *uyir-aḷapeṭai*, *kurriyal-ikaram*, *kurriyal-ukaram*, shortened 'ai', shortened 'au' 216 vowel-consonants (*ka*, *kā*, *ki*, etc.), 6 shortened voiceless consonants, 6 nasals, and the shortened 'y', 'l', 'v', 'ḷ' and &. <sup>1</sup>

Naṇṇūlār mentions 369 secondary sounds consisting of 216 vowel-consonants, 8 *muṟṟāytam*, 21 *uyir-aḷapeṭai*. 42 *orṟaḷapeṭai*, 37 *kurriyal-ikaram*, 36 *kurriyal-ukaram*, 3 shortened 'ai' 1 shortened 'au', 3 shortened 'm' and 2 shortened *āytam*. <sup>2</sup> He explains them thus :—Since there are 12 vowels and 18 consonants, the number of vowel-consonants is  $18 \times 12 = 216$ . <sup>3</sup> Since there are 6 voiceless consonants which can follow *āytam*, since *āytam* is substituted in sandhi for consonants as in *av + kaṭiya = aṣkaṭiya* and since it is inserted in certain words for the

# THE MADURAI CHRONICLES AND THE TAMIL ACADEMIES.

BY

T. G. ARAVAMUTHAN, M.A., B.L.,

*Advocate, Madras.*

*(Continued from page 124 of Vol. V part II.)*

## III

Perum-Parrap-Puliyūr Nambi's Chronicle of the Sacred Sports of Madurai would be dismissed by the sober historian as having very little value as raw material for history were it not that the work had been designed, obviously, to exalt the fane at Madurai above all others dedicated to the lord Śiva by making its divine denizen the hero of numerous miracles, to make Madurai the scene of those miracles and to associate the kings of Madurai as closely as possible with the miracles wrought by the Lord,— a three-fold purpose which was inspired by the circumstances that the city was the capital of the Madura country, that the country was ruled over by the Pāṇḍyas and that the principal temple of Madurai is esteemed among the holies of south India. It is the chronicler's attempt to associate the Pāṇḍyas of Madurai with these legends that invests his work with some interest to the historian and compels him to look for some strands of history, however fine and difficult of perception in the wearisome web of the chronicler's fancy.

The chronicle contains very little material which is useful to the historian: it does not even proceed on a chronological basis. It mentions only eight sovereigns of the Pāṇḍya line Malayadhvaja,<sup>1</sup> Taṭātakā,<sup>2</sup> Ugra,<sup>3</sup> Datta,<sup>4</sup> Vīra,<sup>5</sup> Mūrti,<sup>6</sup> Varaguṇa<sup>7</sup> and Varaguṇa's son,<sup>8</sup> and of these the first three are clearly mythical, the fourth and the fifth are shadowy, and the last is not even mentioned by name. Two places in th

6. Legend 51

7. Legend 48

8. Legend 49

Pāṇḍya country are specially mentioned, Old Madurai<sup>1</sup> and Maṇavūr,<sup>2</sup> but very little is said about them. One of the legends discovers a miraculous reason for the river Vaihai flowing along the outskirts of the city.<sup>3</sup> Other legends have been fabricated for furnishing plausible explanations of such place-names as Madurai,<sup>4</sup> Nāṇ-māḍak-Kūḍal,<sup>5</sup> Ālavāy,<sup>6</sup> North Ālavāy,<sup>7</sup> the Serpent, the Cow and the Bull Mounts,<sup>8</sup> the Boar Mount<sup>9</sup> and the Elephant Mount,<sup>10</sup> Uttara-kōśa-maṅgai,<sup>11</sup> Kaṭṭu-Nallūr-irum-śirai and Taṇic-Śayam<sup>12</sup> : the chronicler turns etymologist but instead of seeking for explanations of the names in linguistic facts he weaves frivolous romance round and round the names. The chronicler's lack of inventiveness is responsible for the Lord figuring in miracles which are tediously monotonous in *motif*: the Lord gives a board to the Academicians<sup>13</sup> and another to Bhadra<sup>14</sup>: He gives a purse to Darumi,<sup>15</sup> an unfailing purse to a Pāṇḍya<sup>16</sup> and an unfailing bag to another devotee<sup>17</sup> : Māṇikya-vācaka is made to squander his king's monies<sup>18</sup> and a chieftain commissioned by his king to raise a force of mercenaries is made to do likewise<sup>19</sup> : the legends in which the Lord shows His grace to some orphan pups,<sup>20</sup> to a black-bird<sup>21</sup> and to a heron<sup>22</sup> are quite similar in conception : in as many as three legends the prime *motif* is metamorphosis<sup>23</sup> : if transfiguration has a part to play in only one legend,<sup>24</sup> the *motif* of a curse and transformation in consequence is found in as many as three.<sup>25</sup>

Many of the miracles narrated in this chronicle fall into groups or 'cycles'. Two miracles are intended to establish the surpassing holiness of the fane of Madurai by associating Indra and his elephant with it.<sup>26</sup> In nine the principal figure is practically king Sundara who is identified with Lord Sundara of the sacred temple of Madurai.<sup>27</sup> The minor figures in these miracles are a Pāṇḍya king, Malayadhvaja,<sup>28</sup> and his daughter, Taṭātākā,

who becomes king Sundara's consort,<sup>1</sup> and Ugra, the son of king Sundara by this Pāṇḍya princess. Ugra becomes the hero of another miracle<sup>2</sup> and has a subsidiary place in two others.<sup>3</sup> In two miracles the hero is an adept,— but he is none other than the Lord Sundara.<sup>4</sup> A cycle of seven legends<sup>5</sup> clusters round an Academy at Madurai: in these the Lord himself occupies the centre of the stage and the minor characters are Agastya,<sup>6</sup> Nak-Kīraṇ,<sup>7</sup> Kabilāṇ,<sup>8</sup> Paraṇar,<sup>9</sup> Rudra-Janman,<sup>10</sup> Iḍaik-kāḍaṇ<sup>11</sup> and Darumi.<sup>12</sup> Perhaps, an eighth legend also relates to the Academy, for Nak-Kīraṇ seems to figure in it prominently.<sup>13</sup> Two cycles of legends relate to two great hymnalists of Tamil Śaivism,— Māṇikya-vācaka<sup>14</sup> and Jñāna-sambandha.<sup>15</sup> We have two more cycles,— one of four miracles relating to Bhadra a bard,<sup>16</sup> and another of two miracles relating to the children of a boar.<sup>17</sup>

Perum-Parrap-Puliyūr Nambi has been quite disdainful of chronological details. With reference to most of the miracles he vouchsafes to us nothing more definite than that they occurred 'once upon a time': this phrase is as common, indeed, in his chronicle as it is in children's tales. Nor does he marshall the miracles in chronological order: he narrates them as they come to him: he tumbles them out pell mell. Two instances should be enough: the Māṇikya-vācaka cycle<sup>18</sup> is interposed between two series of miracles each of which happened 'once upon a time':<sup>19</sup> two of the miracles of the cycle of Jñāna-sambandha are related in the middle of the work<sup>20</sup> and the third miracle is relegated almost to the end.<sup>21</sup> Perum-Parrap-Puliyūr Nambi was not a chronicler of events but a vendor of miracles: to the miracle-monger the vagueness of undetermined antiquity has naturally a greater fascination than the precision of dated history.

Still, scattered about in these legends, we have occasional hints about the periods to which some of the miracles could be

roughly assigned. The hints are few and vague, and when closely scanned they prove less useful than they appear at first sight. Such as they are, they have to be accepted and turned by the historian to such purpose as he can.

The chronicle makes mention of various potentates and peoples: kings like the Cōla,<sup>1</sup> the Cēra,<sup>2</sup> the Cēdi-rāya<sup>3</sup> and the Kāḍu-veṭṭi,<sup>4</sup> and peoples like the Karṇāṭas,<sup>5</sup> the hunters,<sup>6</sup> the Śramaṇas,<sup>7</sup> the Yavanas<sup>8</sup> and the Turks.<sup>9</sup> None of them, however, is mentioned with that fulness which is necessary for the historian: it is impossible, on the strength of these references, to determine the sequence of the miracles.

The chronicler tells us, for instance, that, in the reigns of four different Pāṇḍyas, the Cōla kings invaded the Pāṇḍya country and advanced upon the capital city of Madurai, and that on each occasion the Lord Sundara played a miracle and saved the city from falling into Cōla hands.<sup>10</sup> The only historical event of antiquity which could be suggested as affording a basis for these legends is the Battle of Kūḍal (Madurai) of which Nak-Kīrar, the poet of the Śaṅgam collections, makes mention in one of his poems: Paḷaiyaṇ-Māraṇ defeated Kiḷḷi-Vaḷavaṇ who had encamped with a large army just outside the walls of Kūḍal.<sup>11</sup> But we can now discover no circumstance which would enable us to decide whether Paḷaiyaṇ-Māraṇ and

Other interpretations of these lines are possible but not probable.

his victory at the Battle of Kūḍal are referred to in any of the four legends.<sup>1</sup>

At the very start we may decide, for the present purpose, to leave wholly of account the numerous legends which contain no clue for determining their place in a chronological scheme and do not even stand related to some other legend the place of which atleast in a system of chronology is beyond cavil. Such legends can be shoved in and out as suits the fancy of the chronicler: they cannot help us to fix either their own sequence or the relative positions of the legends between which they are thrust in.<sup>2</sup>

The first of the chronological hints is to be found early in the chronicle: Śiva is said to have played these sports at the rate of sixteen in a yuga.<sup>3</sup> The yugas being four and the Sports being sixty-four, the arithmetic of the chronicler is flawless, but we have yet to verify if the Lord was so regular in playing at the game of miracles as the arithmetic of the chronicler would require. The statement, however, seems clearly to imply that the sixty-four miracles were worked out in four successive yugas, that is, within the space of a Mahā-yuga.

The scene of all the Sports of the Lord having been Madurai, it follows that the discovery of the *liṅga* of the Lord at Madurai and the raising of a temple over it<sup>4</sup> and the worshipping of the *liṅga* by Indra's elephant<sup>5</sup> must have been the very earliest of them.

The next legend, in the chronicle, is about the birth of a princess to a Pāṇḍya king, Malayadhvaja,<sup>6</sup>— a princess who in

1. There are those who would find only one Nak-Kīrar among the personalities of the Śāṅgam age and would make him the commentator on Iṟaiyaṇār's *Ahaṇ-Poruḷ*: they assume also,— as is done by others as well,— that he was the author of the *Pāṇḍik-Kōvai*. The contemporary Pāṇḍya king of this Nak-Kīrar would then be the Neḍu-Māraṇ of the *Pāṇḍik-Kōvai*. But it is surprising that though this Neḍu-Māraṇ is credited in that poem with numerous victories, the Battle of Kūḍal does not figure among them. It must follow that the Nak-Kīrar who eulogised the Pāṇḍya of the Battle of Kūḍal is different from the Nak-Kīrar of the days of Neḍu-Māraṇ.

2. The Legends of this class are Nos. 12-4, 23-5, 31-6, 40-2, 45, 50, 58-9, 60, 63.

3. In the section on 'The Glory of the City'.

4. Legend 1

5. Legend 2

6. Legend 3

due time became the consort of the Lord,— but apart from the fact that numerous kings are said to have preceded that king there is no hint as to the period in which he flourished. We cannot therefore, presume that chronologically this legend followed immediately after the first two miracles.

To the difficulties which result from the absence of any chronological indications whatsoever are added the difficulties which flow from the indefiniteness of such chronological hints as are given and the further difficulties resulting from the abandonment of the chronological scheme suggested early in the chronicle that the miracles were worked out at the rate of sixteen in a yuga. A legend which appears late in the chronicle relates to the discovery of the temple of Madurai by a human being and the determination of the bounds of the city, but these events are said to have taken place 'once upon a time'.<sup>1</sup> We are therefore left to depend merely on our own estimate of the probabilities. The discovery of the temple having first been made by Indra and then by his elephant the next step obviously is its discovery by men and the marking out of the city-limits:<sup>2</sup> this legend may therefore be taken to be the third in chronological sequence. From this miracle it must have been a long way indeed to the miracle of the re-determination of the ancient limits of the city:<sup>3</sup> but we find it placed at the dawn of a new age after the close of a Brahma-kalpa. Obviously, the earlier legend must stand assigned to atleast the Brahma-kalpa which had just then come to a close. These miracles must therefore have taken place in different Brahma-kalpas and any chronological scheme for the miracles must therefore be framed as much in terms of Brahma-kalpas as in terms of mere yugas. This is not a solitary instance of the miracles being dated expressly in terms of kalpas: the legend of the poets Kāri and Nāri is assigned to an indefinite time in an indefinite kalpa<sup>4</sup> and the legend of the Lord teaching the Vedas to the Ṛṣis is placed at the beginning of the first of the four yugas of the fifth Mahā-yuga of this Brahma-kalpa.<sup>5</sup> In these legends the chronicler negatives unequivocally the suggestion already referred to,— that all the sixty-four miracles were performed within the limits of one Mahā-yuga. The only

---

1. Legend 53 (1)

2. Legend 53

3. Legend 47

4. Legend 52

5. Legend 64

way of reconciling these different statements is to assume that in a Mahā-yuga or cycle of four yugas the Lord works out the full tale of the sixty-four miracles, and that as Mahā-yuga succeeds to Mahā-yuga the Lord patiently repeats over and over again the same sixty-four miracles. However much these assumptions might accord with or be necessitated by the tenets of certain theological schools, they have no value whatsoever to the historian. Nor do the assumptions help us to understand why the chronicler should speak of different kalpas when all the miracles could be boxed up into one Mahā-yuga. Perhaps the stanza in which the miracles are sought to be compressed into the limits of a cycle of four yugas is after all an interpolation, but, even so, the task of the chronologist does not become easier, for he has then to go roaming over numerous kalpas in hopes of discovering clues which would help to settle the sequence of the miracles. We are thus driven again to rely on our sense of probabilities for determining the sequence.

The discovery of the temple and the fixing of the city-limits were perhaps followed immediately by the Lord assuming the sovereignty of Madurai as king Sundara: the cycle of miracles connected with king Sundara<sup>1</sup> would then have to be placed next after the miracle which, we have already seen, must have been the third.

Immediately after these must be placed the miracle of the quelling of the sea, for it happened in the days of Ugra-Pāṇḍya, the son of king Sundara.<sup>2</sup>

Two other miracles,—the defeat of Indra<sup>3</sup> and the overthrow of Mount Mēru,<sup>4</sup>—must, *prima facie*, be assigned to this same period, the chronicler not having suggested that some one other than Ugra-Pāṇḍya was the Lord's chosen instrument in working out these miracles.<sup>5</sup> When, however, the chronicler came to the narration of the two legends, he failed to link up the former with Ugra<sup>6</sup> and he made it clear that the latter was worked in the days of a descendant of Ugra.<sup>7</sup> We are not in a position to determine the reasons which induced the chronicler to dissociate the miracles from Ugra: perhaps, the chronicler took it that the three gifts of the Lord

---

1. Legends 3-11

2. Legend 21

3. Legend 44

4. Legend 61

5. Legend 11

6. Legend 44

7. Legend 61 (1)

were gifts to Ugra's dynasty and not to Ugra alone and that they were not to be exhausted by Ugra. This is not the only difficulty in fixing the chronological position of these two miracles. In the account of the former miracle we have an incident,—that of Nak-Kīraṇ composing the *Tiru-Muruhu-Ārrup-paḍai*,<sup>1</sup>—which suggests that the legend may have to be associated with the cycle of tales about the Academy and classed chronologically with them, but as the incident is not found narrated in some of the manuscripts the implied association looks improbable. Further, we have a stanza in this canto which imputes this miracle to the reign of a Vīra-Māraṇ (that is, 'Hero-Pāṇḍya'<sup>2</sup>), but it is open to considerable doubt whether the word *Vīra* is used here as a proper name or as a mere adjective: if it is a proper name, the miracle cannot be attributed to the period of Ugra-Pāṇḍya in the face of a specific ascription to Vīra-Māraṇ. In connection with another legend too we have a similar doubt as to whether it could be attributed to Vīra-Pāṇḍya,<sup>3</sup> but in a third legend the poet has made it absolutely clear that he refers to a king who bore the name Vīra-Māraṇ.<sup>4</sup> We are thus forced to determine the sequence of the miracles concerning the Academies and those which could be referred to the days of Vīra-Pāṇḍya.

The legend of the quelling of the sea<sup>5</sup> closes with two interesting stanzas,—the penultimate one chronicling how after the victory the Lord had a Hall built for the Academy and how he remained in it among the hallelujahs of the poets, and the last stanza stating that the first two Academies were housed in that Hall and that the 'future' Academy would be on the banks of the Gaṅgā—traditionally equated to the Golden Lily Tank in the temple of Madurai. Except for this solitary reference to three Academies, nowhere else in the chronicle do we find the faintest suggestion of more than one Academy: the last stanza speaking of the 'future' Academy becomes very much suspect in consequence. We have already seen that the legend of the victory over Indra<sup>6</sup> contains an account, according to some manuscripts, of how Nak-Kīraṇ came to compose his *Tiru-Muruhu-Ārrup-paḍai*. The chronological position of this

---

3. Legend 39 (2)

5. Legend 21

V - 26

2. Legend 44 (42)

4. Legend 43 (5)

6. Legend 44

miracle will be determined if only we can arrive at correct findings on two questions of fact,— whether the stanza about the three Academies and the stanzas about the composition of the *Tiru-Muruhu-Ārrup-paḍai* are genuine,— that is, whether the chronicler had three Academies in mind and whether Nak-Kīraṇ is to be assigned to the period of the miracle of Indra's defeat.

If we admit the genuineness of all these stanzas, we admit three Academies but we do not know to which of them Nak-Kīraṇ belonged: for aught we can gather from this chronicle he might have belonged to any one of the three. If we decide against the genuineness of all the stanzas, we have evidence of only one Academy, but that Academy does not stand related chronologically either to the legend of Indra's defeat or to the tale of the composition of Nak-Kīraṇ's hymn on Muruhaṇ. To reject the stanza relating to the three Academies, while accepting the stanzas about the *Tiru-Muruhu-Ārrup-paḍai*, would lead to the miracle of the victory over Indra being linked up with the other legends about the Academy and possibly also with the legend of the quelling of the sea. To accept the former and reject the latter would lead to the result that while three Academies are admitted it is impossible to show that either Nak-Kīraṇ's poetic effort or Indra's defeat is chronologically related to any of the three Academies.

It may perhaps be worth pointing out at this stage that none of these four possibilities squares with the popular beliefs now current about the Tamil Academies, based as they are largely on the Preface to the Comment on Iṟaiyaṇār's *Ahaḥ-Poruḷ*. The possibility which takes us nearest to the popular beliefs is the first,— namely, that all the stanzas are genuine. But, even so, there is no reason to allot Nak-Kīraṇ to the last of the Academies and there is not even a distant allusion in the Comment on Iṟaiyaṇār's *Ahaḥ-Poruḷ* to the story of the composition of the *Tiru-Muruhu-Ārrup-paḍai*.

Apart from arguments based on the account of the Academies in Iṟaiyaṇār's *Ahaḥ-Poruḷ*, it must be noted that the stanza mentioning the three Academies runs counter to the whole tenor of the chronicle: nowhere else does the chronicle contemplate more than one Academy. The story of Nak-Kīraṇ composing the *Tiru-Muruhu-Ārrup-paḍai* looks wholly out of place in the legend in which it is found embedded in some of the manuscripts: no connection can be traced between this story and the

main legend. The circumstance that the stanzas recounting the incident are not to be found in some of the manuscripts is not devoid of significance. Even more significant is the fact that none of the later chronicles,—not even that of Param-jyōti,—mentions the incident. These considerations compel us to arrive at a finding against the genuineness of the stanzas in question. They are obviously interpolations by a much later hand. We have to conclude that the chronicler had only one Academy in mind, that he did not know of three Academies and that he said nothing about Nak-Kīraṇ having written the *Tiru-Muruhu-Arrup-paḍai* or about the circumstances surrounding its composition.

It follows therefore that from the account of the legend of the sea<sup>1</sup> must be omitted the last stanza foreshadowing the Academy of the 'future' and that from the account of the legend of the victory over Indra<sup>2</sup> must be excised all reference to Nak-Kīraṇ and his hymn. Once the interpolations are removed, it becomes patent that the chronicler has let fall no hint, however faint, as to the relative chronological positions of the two miracles.

Two circumstances, however, cannot be ignored. Indra's defeat has to stand removed by some distance of time from the overthrow of Mount Mēru,<sup>3</sup> a miracle which has been specifically assigned by the chronicler to the days of a descendant of Ugra.<sup>4</sup> It is impossible to find for the former miracle a place lower down, as will be evident from the discussion that follows. The limits being thus fixed, we cannot do better than place Indra's defeat<sup>5</sup> immediately after the quelling of the sea.<sup>6</sup>

If we assumed that in the legend of the victory over Indra<sup>7</sup> the chronicler used the word *Vira* as a noun and not as an adjective, we shall have to associate with it the two other legends allotted to the reign of a Vira-Pāṇḍya,—namely, the legend of the general who misapplied military funds to building temples<sup>8</sup> and the legend of the Lord doling out water to soldiers engaged in a fierce battle.<sup>9</sup> But the assumption being unwarranted, the sequence is not established.

9. Legend 43

We may now ask ourselves what the position is of the miracles dated in the different kalpas. The legend of the poets Kāri and Nāri<sup>1</sup> may be placed among the earlier of them, and the miracle of the redetermination of the bounds of Madurai may come next as it is placed at the dawn of a new kalpa.<sup>2</sup> The miracle of the ṛṣis being taught the Vedas<sup>3</sup> is located early in the kalpa now current; so, just immediately before it we may place the legend of the overthrow of Mount Mēru:<sup>4</sup> this arrangement removes the miracle sufficiently from the days of Ugra-Pāṇḍya.

The account of the quelling of the sea<sup>5</sup> would seem to contain another chronological hint: in the penultimate stanza we are told that Ugra built a Hall for the Academy. In the first legend<sup>6</sup> of the Academy-cycle we learn that the Academicians desired to be seated in due order in the Hall of the Academy and that when they obtained the board which could sense poetry they laid it in the middle of the Hall. The miracles of this cycle must therefore be later than the miracle on the conclusion of which the Hall of the Academy was built. How much later the miracles must be cannot now be easily determined: that Ugra built a Hall for an Academy cannot lead us to the inference that Nak-Kīraṇ and his contemporaries belonged to his age. In one of the legends of the Academy-cycle,—that of Iḍaik-kāḍaṇ,<sup>7</sup>—the Lord is said to have deserted His temple and betaken Himself to a place north of it which came to be called North Ālavāy: it follows then that the temple which the Lord temporarily deserted must have already been known as Ālavāy. The name Ālavāy, as has been already noticed, had come to be applied to Lord Sundara's permanent habitat, in the legend of a serpent helping a Pāṇḍya to rediscover the limits of Madurai.<sup>8</sup> We have therefore to assign the legends of the cycle of the Academy,<sup>9</sup> or, at any rate, the legend of Iḍaik-kāḍaṇ,<sup>10</sup> to a period later than the one in which the name Ālavāy arises.<sup>11</sup>

One of the picturesque figures of the Academy is Rudra-Janman, and the circumstances which led to his birth are set out

- 
- |               |               |                  |
|---------------|---------------|------------------|
| 1. Legend 52  | 2. Legend 47  | 3. Legend 64     |
| 4. Legend 61  | 5. Legend 21  | 6. Legend 15     |
| 7. Legend 20  | 8. Legend 47  | 9. Legends 15-20 |
| 10, Legend 20 | 11. Legend 47 |                  |

in a legend.<sup>1</sup> This legend, foreshadowing as it does the advent of Rudra-Janman, must be earlier than the legends dealing with the Academy: and as we know of no miracle which could be placed earlier in this kalpa we may rank this legend next in order of time to the legend of the ṛṣis being taught the Vedas.<sup>2</sup>

In the first of the legends<sup>3</sup> of the Māṇikyā-vācaka cycle, the Hall of the Academy is mentioned among the principal buildings of Madurai: the legends of this cycle must therefore be dated later than those of the Academy.<sup>4</sup>

That some other miracles, however, came between the two cycles seems to be evident.

Another of the interesting personalities sketched in the Chronicle is Jñāna-sambandha.<sup>5</sup> The chronicler makes him out to have been a contemporary of Vāgīśa or Tīru-Nāvukku-Araśu,<sup>6</sup> who has referred, in one of his numerous hymns,<sup>7</sup> to the legend of the Lord securing a purse of gold for Darumi.<sup>8</sup> This legend, and, therefore, the other legends with which it forms a cycle,—the cycle of the Academy,<sup>9</sup>—must be earlier than Jñāna-sambandha. But in the last of the Māṇikyā-vācaka legends<sup>10</sup> the chronicler makes the Pāṇḍya king who was Māṇikyā-vācaka's master allude to a miracle performed by Śiva for the saint Śīrut-tonḍar.<sup>11</sup> This saint is said to be referred to by Jñāna-sambandha<sup>12</sup> in one of his hymns as his contemporary.<sup>13</sup> The legends of the Jñāna-sambandha cycle must therefore be placed before those of the Māṇikyā-vācaka cycle.<sup>14</sup>

Hymn பைங்கோட்டு on Tiruc-Sem-Kāṭṭam-guḍi.

13. Legends 37, 38, 62

14. Legends 27-30

The chronicler assigns two of the miracles to the kali yuga—that of a Cōḷa king being consigned to a watery grave<sup>1</sup> and that of Varaguṇa being given a peep into the world of Śiva.<sup>2</sup> They may therefore be ranked among the latest of the Sports. Another of the legends being dated in the reign of Varaguṇa's son,<sup>3</sup> it may be placed next in chronological sequence.

In working out this sequence we have confined ourselves to a consideration of the materials found in the Chronicle.<sup>4</sup> The order of a few more of the legends might be determined if we took note of some facts not contained between the two covers of the Chronicle,— facts of history the chronology of which is fairly well settled,— but for our present purpose, it is unnecessary to embark on that enquiry. We have succeeded in bringing no more than thirty-five out of the sixty-four legends into this chronological sequence and there can be no concealing the fact that our deductions are based more on a consideration of probabilities than of fully verified facts.<sup>5</sup>

---

1. Legend 46 (32)

2. Legend 48

3. Legend 49

4. Except where mention is made of Darumi being referred to by Tiru-Nāvukku-Araṣu in one of his hymns. The chronicler refers in the legends of the Māṇikya-vācaka cycle to the various hymns composed by Māṇikya-vācaka. It is not therefore inappropriate to settle the sequence of one of the legends by reference to the hymn of Tiru-Nāvukku-Araṣu.

5. When revising the proofs I notice that I could have emphasised my contention about the chronological ineptitudes of Perum-Pārārap-Puliyūr Nambi by drawing attention, in due place, to the fact that the reign of Ugra-Pāṇḍya is said to have extended over a period of sixteen years of the gods (Legend 11, st. 4).

## IV

The chronicle of Param-jyōti narrates sixty-four legends most of which are almost identical in tenor with those narrated by Perum-Parrap-Puliyūr Nambi. Some miracles chronicled by Perum-Parrap-Puliyūr Nambi are omitted by Param-jyōti, and some others are split into distinct miracles,<sup>1</sup> and many of the legends are told with considerable variations.

A distinctive feature of Param-jyōti's chronicle requires special mention: the miracles are narrated by him in strictly chronological sequence and not in the haphazard fashion of

Perum-Parrap-Puliyūr Nambī. In narrating each legend Param-jyōti takes care to mention the name of the Pāṇḍya king in whose reign each miracle is assumed to have been worked, and he records, almost invariably, the relationship which that king bore to his predecessor and successor: it is thus possible to deduce from his chronicle a full succession-list of the Pāṇḍya dynasty and also a chronological scheme showing the order in which the miracles were performed by the Lord.<sup>1</sup>

<sup>1</sup>No king's name mentioned.

<sup>2</sup>No king's name mentioned, but the context requires the Sport to be so assigned.

<sup>3</sup>The relationship of this king to the previously named king is not mentioned, but this king is clearly the previous king's immediate successor.

In all other cases, each king is the son of his predecessor (No. 3 is a queen and is the daughter of No. 2. No. 4 is Siva himself.)

<sup>4</sup>Contemporary of Karikāla-Cōla.

<sup>5</sup>Contemporary of Sri-Rāma.

For our present purpose it is unnecessary to describe or summarise Param-jyōti's chronicle at length,<sup>1</sup> nor even is it necessary to set out how far each of his sixty-four legends differs from those of Perum-Paṇṇap-Puliyūr Nambi: it should be enough to point out the extent to which variations appear in the accounts of the legends relating to the Academies.

The fifty-first legend in Param-jyōti's chronicle states that when Vamśa-śēkhara Pāṇḍya was king, Brahmā performed ten aśvamēdha sacrifices at Benares, and that accompanied by his consorts Sarasvatī, Sāvitrī and Gāyatrī, he went to the Ganges for a bath. Sarasvatī having tarried on the way listening to the ravishing music of a Vidyādhara lady, Brahmā took his bath along with his other two wives. Sarasvatī remonstrating vehemently with Brahmā for not having waited for her, he pointed out to her that she was the party at fault and he laid on her the curse that she shall expiate her presumption by endless births in the world in human form. On Sarasvatī submitting that it was too hard a lot for Brahmā's consort, Brahmā was mollified, and he said, 'Out of the fifty-one Primary Letters making up your body, the forty-eight from *ā* to *hā* shall be born as forty-eight scholars: the Lord of Ālavāy (wherein dwell the three Tamils), being the Lord of even the letter *a* which associates with all the other letters and transmutes them according to their

Wilson, in *JRAS*, (1836), iii. 199-242; and in *The Mackenzie Collection, a Descriptive Catalogue* (Madras Reprint, 1882), 45-7, 208-9; J. H. Nelson, *The Madura Country*, iii. 1-55; E. H. Brookes, in *Madras Review* (1900) vi. 61-66, 143-153, 253-265, (1901) vii. 82-93.

Succession Tables will be found in the following: W. Taylor, *op cit.*, passim; R. Sewell, *Lists of Inscriptions and Sketch of the Dynasties of South India*, (1884), ii. 214-221; Sir W. Elliott, *Coins of Southern India*, (1886) 128-3; M. Seshagiri-Sastri, *Tamil Literature*,

respective characteristics, will take the shape of a scholar, ascend and occupy the gem-set seat in the Academy, become the forty-ninth scholar, stand in the heart (of each of the other forty-eight), reveal the truth to them and protect their poesy'. The forty-eight letters were accordingly born as human beings: they became deeply versed in many branches of learning: they critically studied Sanskrit and the eighteen other languages and they attained an unrivalled mastery of Tamil. They wore not only gem-set jewels but also the holy *rudrākṣa*: they covered themselves with holy ashes: they worshipped Śiva with not only their strings of hymns but with garlands of fragrant flowers. Having gone from land to land vanquishing rivals they came to the fertile country watered by the Porunai (Tāmrarparṇī) and advanced towards Madurai, the city blessed by the sceptre of the Pāṇḍya. The Lord appeared as a great scholar and asked them who they were: the forty-eight replied that they were scholars and were going to the land of the Porunai. The scholar invited the forty-eight to Madurai to worship the Lord, took them to Madurai and made them worship the Lord Sundara and then vanished. The Lord descending from on high, the scholars worshipped Him again and lauded Him in strings of psalms, and then went up to the Pāṇḍya king. Convinced that the forty-eight were patterns of scholarship and rectitude, the king loaded them with presents and built for them a Hall of Academy to the north-west of the temple of the Lord. Scholars who were natives of the land, jealous at the favours thus heaped on the forty-eight Academicians, engaged in disputations with them but were completely vanquished: scholars of other lands too were easily worsted. The Academicians then went up to the Lord who was the author of the Original Treatise and said, 'Many are they who come to us and engage us in disputations: so give unto us an Academical board with which we might weigh their scholarship'. The Lord appeared before them in the guise of a scholar, and, holding out a board to them, said, 'Here is a board two spans square: it is stainless like your intellects keen: it has magical qualities: for every one who is hoary with learning like you it will grow a cubit and afford a seat: thus will it be a measuring yard'. The forty-eight went round the temple with the board, entered the Academy and, setting the board down, worshipped it: Nak-Kīrar then seated himself on it; and Kabilar and Paraṇar followed him, and after them the rest of the Acade-

micians, and the Board kept growing till it accommodated all of them. The forty-eight engaged themselves in literary compositions. Their works were so uniform in the wealth and the richness of thought, in the maturity of expression and in the graces of poesy that hard indeed was it to distinguish the work of one poet from that of another, and in course of time differences arose among the forty-eight about the authorship of the respective pieces. The Lord then appeared before them, examined the various works and allotted them among the forty-eight with unerring accuracy. The forty-eight were so grateful that they invited the Lord to join them in the Academy and He acceded graciously to the request. While these forty-nine were engaged in further literary activities, Vamśa-sēkhara had his son Vamśa-cūḍāmaṇi crowned and then he departed this life. In this chronicle the legend closes here: it contains nothing whatsoever about Iraiyaṇār's work on *Poruḷ*.

The next legend tells how Vamśa-cūḍāmaṇi made provision for a garden where flowers could be grown for the Lord Sundara and also a garden where *campaka* flowers could be raised for the Lord, how the Pāṇḍya had the Lord decked with *campaka* flowers and how in consequence the Lord came to be called Campaka-Sundara and the king came to be called Campaka Pāṇḍya. Then follows the story of Darumi obtaining the purse of gold, with some variations from the tale as narrated by Perum-Paṇṇap-Puliyūr Nambi. None of the deviations is of any importance except that the question propounded to Nak-Kīrar about the fragrance of a lady's tresses refers to the tresses of Nak-Kīrar's patron deity Nāna-pūm-kōḍai of Kalahasti and not to those of Gaurī or Cit-puṣpa-kēśī of Madurai.

The next legend narrates how Nak-Kīrar was helped out of the tank by the Lord: the only variation of importance is that the poems sung by Nak-Kīrar to mollify the Lord were not only the *andādi* on Kailāsa and Kalahasti but also the poems known as the *Kōbaṇ-Piraśādam*, the *Perum-Dēva-Pāṇi* and the *Tiru-Eḷu-kūṟru-irukkai*.

In the next legend we have the tale of Kīraṇ being taught grammar: the only additions of note are that Agastya is said to have been accompanied by his wife Lōpāmudrā when he went on his southern expedition and when he appeared before the Lord in response to the summons to teach grammar to Nak-

Kīrar, and that the Treatise taught by the Lord to Agastya and then by the Lord to Nak-Kīrar was the Original Treatise.

In the following legend we have the story of Rudra-Jaṇmaṇ, but the version in this work differs in a few essential particulars from that adopted by Perum-Paṛṛap-Puliyūr Nambi: the scholars composed poems and not commentaries on Irāiya-ṇār's grammar: the Lord had to adjudicate on the merits of the poems and not the commentaries: the mute youth bore no name: his parents were known as Dhanapati and Guṇaśālinī: nothing is said of his being Śaravaṇa-Guha: the Academicians seated him on the academical board and not on a lion-throne.

In the next legend, that of Iḍaik-kāḍaṇ, the only two important additions are that there was a long interval between Campaka-Pāṇḍya and Kulēśa-Pāṇḍya, the king of the times of Iḍaik-kāḍaṇ, that a number of kings ruled over the Pāṇḍya country in the interval and that Kulēśa was well versed in both literature and grammar.

---

# THE TAITTIRĪYASARVĀNUKRAMAṆĪ OF YĀSKA.\*

BY

DR. C. KUNHAN RAJA, M. A., D. PHIL., (OXON.)

*Reader in Sanskrit, University of Madras.*

Till now, only one work of Yāska was known and that is the Nirukta. Wherever there is a reference to Yāska, it was taken as a reference to the author of the Nirukta. There are many references to Yāska in the Bṛhaddevatā. Many of them cannot be traced to the Nirukta; many of them are opposed to the statements in the Nirukta. Yet no one has shown that there might be another Yāska, or another work of Yāska.

Recently I came across a work<sup>1</sup> which gives a large number of quotations from the Sarvāmukramaṇī of the Taittirīyasaṃhitā by Yāska. No such work was known till now. The Sarvānukramaṇī of the Vājasaneyisaṃhitā by Kātyāyana alone is known and not of the Taittirīyasaṃhitā by Yāska. None of these quotations is traceable to the Sarvānukramaṇī of the Vājasaneyisaṃhitā.

There is a reference to Yāska in Piṅgala's Chandassūtras.<sup>2</sup> This reference is traceable to its source through one of the quotations found in the work which I came across.<sup>3</sup> I give below all the quotations from the Sarvānukramaṇī of the Taittirīyasaṃhitā by Yāska found in this work.

इति ॥<sup>8</sup>

In 1, 2, 4 and 5, Yāska is mentioned as the author of the Sarvānukramaṇī of Yajurveda. In 3, 8, 10, 14, 15 and 17 there is a reference to the author of the Sarvānukramaṇī of Yajurveda; but it is not specified who the author is. In 16, there is a reference to the Sarvānukramaṇī of Yajurveda. In 6, 7, 11, 12, 13 and 18 there is a reference to the author of the Sarvānukramaṇī of “that” (तत्). And in 9, there is mention of Yāska as the author of the Sarvānukramaṇī of “that” (तत्). In all these cases तत् refers to the Taittirīya-śākhā, as in all the seven cases the Taittirīya-śākhā is mentioned in the immediately preceding passage, as :—

1. Adyar Library Transcript p. 149.
  2. *Ibid.* p. 156.
  3. *Ibid.* p. 157.
  4. *Ibid.* p. 158.
  5. *Ibid.* p. 179.
  6. *Ibid.* p. 183.
  7. *Ibid.* p. 191.
  8. *Ibid.* p. 201.

तैत्तिरीयाश्च द्विपदा विराज इत्याहुः ।

यथाह तत्सर्वानुक्रमणीकारः ।<sup>1</sup>

From 16, it is found that Yāska knew the works of Śaunaka. The statement of Yāska in 9—according to Krauṣṭūki, it is Skandhogrivī; it may be Urobṛhatī also—is referred to by Piṅgala<sup>2</sup>.

The above quotations are found in the Adyar Library copy<sup>3</sup> of Pettā-śāstrin's work mentioned in para 2 supra.

In the introductory stanzas<sup>4</sup> which Mādhavabhaṭṭa, son of Veṅkatārya, adds to the various Adhyāyas in his Bhāṣya of the R̥g-veda, he mentions Yāska and some of the references cannot be traced to the Nirukta. The references are:—

1. त्वान्नु क्षत्रियोँ अव सूक्तं वृद्धोपदेशतः ।  
मत्स्यानां जालवद्धानामार्षं यास्कोऽब्रवीदिति ॥<sup>5</sup>
2. एवं च हुतभागग्निः प्रयाजेष्विति मन्यते ।  
तमेव प्राग्वषट्कारात् ज्ञेयं यस्ककुलोद्भव ॥<sup>6</sup>

There are many references to Yāska in the Bṛhaddevatā. I give below all the references, with my own remarks—

1. चतुर्भ्य इति तत्राहुर्यास्कगार्ग्यरथीतरौ ।<sup>7</sup>

This quotation follows the questions—कतिभ्यस्तु कर्मभ्यो नाम जायते । Various opinions are given. नवभ्य इति नैरुक्ताः and then the above quotation follows. Here Yāska is contrasted with the Nairuktas. The view ascribed to Yāska is not found in the Nirukta.

2. पुरुषादःपदं यास्को वृक्षेवृक्ष इति त्वृचि ।<sup>8</sup>

1. Adyar Library Transcript p. 201.

2. Cf. quotation above, n. 2. p. 215.

3. XXXIV. A. 1. There is a transcript in Devanāgarī. XXXVIII. H. 17 to which the above references are given.

4. These Kārikās are being published by me from the University of Madras.

5. Kārikā. V. i, 28.

6. Kārikā. VII. v, 9.

7. I. 26.

8. II. 6.

Here it is said that the word पुरुषादः was explained by Yāska as two words in R̥g-veda X, 27-22. But there is nothing in the Nirukta to justify the criticism. पुरुषान् अदनाय is the explanation of Yāska in the Nirukta<sup>1</sup>.

3. मयन्ते यास्ककात्थक्याविन्द्रस्येति तु भागुरिः ।<sup>2</sup>

This has reference to R̥g-veda I. 22. 1—4. Yāska says nothing about these R̥ks in the Nirukta.

4. शुनासीरं यास्क इन्द्रं तु मेने ।<sup>3</sup>

Here Yāska is said to have explained शुनासीर as इन्द्र. There is nothing in the Nirukta to suggest such an opinion for Yāska, the author of the Nirukta. This is his explanation: शुनासीरौ । शुनो वायुः । सु एत्यन्तरिक्षे । सीर आदित्यः सरणात् ।<sup>4</sup> This corresponds to what Bṛhaddevatā gives just before the opinion assigned to Yāska:

वायुः शुनः सूर्य एवात्र सीरः

शुनासीरौ वायुसूर्यौ वदन्ति ।<sup>5</sup>

This is the opinion which Bṛhaddevatā ascribes to the commentators. And then the opinion of Yāska is given:—

शुनासीरं यास्क इन्द्रं तु मेने ।

This does not agree with Nirukta.

5. यास्कस्तु पूषणं मेने ।<sup>6</sup>

This is with reference to R̥g-veda V. 42. 14, which is not explained in the Nirukta.

6. यास्कस्तृचं त्वेतं मन्यते वैश्वदेवतम् ।<sup>7</sup>

This is with reference to R̥g-veda VIII. 65. 10-12, which are not explained in the Nirukta.

7. आचार्यः शौनको यास्कः ।<sup>8</sup>

1. II. 6.

2. III. 100.

3. V. 8.

4. X. 40.

5. V. 8.

6. V. 40.

7. VI. 87.

8. VII. 38.

This is with reference to R̥g-veda X. 36. 32-14, which are not considered in the Nirukta.

8. अन्त्यं यास्कस्तु मन्यते ।<sup>1</sup>

Here, R̥g-veda X. 59. 4 is assigned to Nirṛti. The next is assigned to Asunīti:—

असुनीतेः स्तुतिः परे ।<sup>2</sup>

Then we find in the Bṛhaddevatā the statement:—

दृचे त्वानुमतं पादमन्त्यं यास्कस्तु मन्यते ।<sup>3</sup>

The last pāda in R̥g-veda X. 59. 6 is:—

अनुमते मृळया नः स्वस्ति ।

According to the statement in the Bṛhaddevatā, Yāska assigns this pāda to Anumati. But this stanza is not explained in the Nirukta.

9. संवादं मन्यते यास्कः ।<sup>4</sup>

This is with reference to R̥g-veda X. 95. Yāska says nowhere in Nirukta that this is a Saṃvādasūkta.

10. ऐन्द्राग्रं मन्यते यास्कः ।<sup>5</sup>

This is with reference to R̥g-veda X. 161, which is not noticed in the Nirukta.

11. बह्वीनां सन्निपातस्तु यस्मिन् मन्त्रे प्रदृश्यते ।

आचार्यौ यास्कशाण्डिल्यौ वैश्वदेवं तदाहतुः ॥<sup>6</sup>

This may be compared with Yāska's statement:—

...यत्तु किञ्चिद्बहुदैवतं तद्वैश्वदेवानां स्थाने युज्यते ।<sup>7</sup>

12. इयं शुष्मेभिरित्येतां मेने यास्कस्तु सप्तमम् ।<sup>8</sup>

Yāska assigns this mantra to Sarasvatī as a River. His words in the Nirukta are:—

....यदेवतावत्तदुपरिष्ठाभ्याख्यास्यामः । अथैनन्नदीवत् ।<sup>9</sup>

1. VII. 93.

2. VII. 92.

3. VII. 93.

4. VII. 153.

5. VIII. 65.

6. II. 132.

7. XII. 40.

8. II. 137.

9. II. 23.

इयं शुष्मेभिः etc. etc.<sup>1</sup>

13. मन्यते मध्यमं चैव यास्कोऽग्निं न तु पार्थिवम् ।<sup>2</sup>

Yāska says in the Nirukta:—कमन्यं मध्यमादेवमवक्ष्यत् ।<sup>3</sup>

14. आदित्यं मन्यते यास्को हविषेति सहस्तुतम् ।<sup>4</sup>

This may be compared with the words of Nirukta:—  
चायिता आदित्यः ।<sup>5</sup>

15. त्विन्द्रं मेने इह यास्कः प्रधानम् ।<sup>6</sup>

This is with reference to R̥g-veda I. 132. 6. This is not noticed in the Nirukta.

16. इतिहासमिदं सूक्तमाहतुर्यास्कभागुरी ।<sup>7</sup>

This is with reference to R̥g-veda VIII. 91, which is not explained in the Nirukta.

17. इतिहासमिमं यास्कः ।<sup>8</sup>

In the Nirukta we read:—तत्रेतिहासमाचक्षते ।<sup>9</sup>

18. यास्कौपमन्यवौ ।<sup>10</sup>

This is with reference to the expression पञ्चजनाः ।

In the Nirukta we read:—गन्धर्वाः पितरो देवा असुरा रक्षांसीत्येके ।  
चत्वारो वर्णा निषादः पञ्चमः इत्यौपमन्यवः ।<sup>11</sup> Here Yāska does not give his own opinion. We may assume that he accepts the explanation of Aupamanyava. But the statement of Bṛhaddevatā is quite different. According to Bṛhaddevatā the opinion: निषादपञ्चमा वर्णाः<sup>12</sup> is held by Śākāṭyāna, and Yāska holds the opinion:—मनुष्याः पितरो देवा गन्धर्वोऽगराक्षसाः ।<sup>13</sup>

1. II. 24.
2. III. 76.
3. X. 36.
4. III. 102.
5. V. 24.
6. IV. 4.
7. VI. 107.
8. VII. 7.
9. XII. 10.
10. VII. 69.
11. III. 8.
12. VII. 69.
13. VII. 68.

But in the Nirukta, Yāska gives this as the opinion of "some" (एके).

19. यास्को द्रौघणमैन्द्रं वा ।<sup>1</sup>

This may be compared with the statement in the Nirukta: द्रुघणो द्रुमयो वनः । तदभिवादिन्येषर्गु भवति ।<sup>2</sup>

Thus it will be found that out of the nineteen<sup>3</sup> references in the Bṛhaddevatā to Yāska, only a very few has any correspondence to the Nirukta. Many of them can have no place in the Nirukta and some of them are in contradiction to the statements in the Nirukta. It is quite possible that most of these references are to the Sarvānukramaṇī of the Taittirīyasaṃhitā by Yāska from which Petta Śāstrin quotes.

I must here add that the difficulty in correlating the references to Yāska found in the Bṛhaddevatā with Yāska's Nirukta has already been recognised by Macdonell in his edition of the Bṛhaddevatā. Skold has dealt with the point more elaborately in his book on Nirukta and he confesses that he has not been more fortunate in solving the difficulty. He suggests that the references may be to another recension of the Nirukta.

There is a Sarvānukramaṇī for the Ātreyaśākhā of the Yajurveda, which has been noticed by Max Müller in his History of Ancient Sanskrit Literature<sup>4</sup>. Yāska is mentioned here as one of the Ṛṣis through whom this Śākhā was handed down<sup>5</sup>. This Sarvānukramaṇī (published in Indische Studien Vol. III. by Weber) is different from the work of Yāska from which Petta Śāstrin is quoting.

1. V. 11.

2. X. 23.

3. I have ignored one reference.

4. p. 222.

5. *Ibid* p. 223.

NOTEWORTHY CONTENTS IN ORIENTAL JOURNALS.  
ANNALS OF THE BHANDARKAR ORIENTAL RESEARCH INSTITUTE.  
VOL. XI. PARTS ii TO iv.

1. *The place of the Āryasatyas and Pratītyasamutpāda in Hīnayāna and Mahāyāna*: Dr. Nalinākṣa Dutt, Ph. D. (Cal.), D. Litt. (Lond.).

2. *Slow progress of Islam power in Ancient India*: Dr. D. R. Bhandarkar, M.A., Ph. D.—Part II. The author concludes his article in this no., summarising the reasons why the Muhammadans could not establish an Islam empire over the country.

3. *Śāntarakṣita's reference to Kumāṛila's attacks on Sāmantabhadra and Akalaṅkadeva*: Dr. K. B. Pathak, B. A., Ph. D.

4. V. S. Sukthamkar continues his '*Epic studies*', in his second instalment—'Further Text-critical notes'.

5. *A peep into Ancient Indian Sociology*: Dr. R. Sham Sastri.

6. *Bengal's contribution to Samskṛt Literature*: Chintāharan Chakravarti, M.A. In this "choronological frame-work" the author, divides the literary history of Bengal into five periods, the Pre-Pāla period, the Pāla period, the Sena period, the Muhammadan period and the British period. The author mentions Sandhyākara Nandin's Rāmacarita as the only Kāvya work of the Pāla dynasty. It may be mentioned here that another Kāvya of the same name, by Abhinanda was produced in the same age and published by Mr. K. S. Ramaswami Sastri, Śiromaṇi, in the Gaekwads' Oriental Series.

7. *Epic studies*: V. S. Suktamkar. Part III.

8. *The Grammar of the Gītā—A vindication*: B. N. Krishnamurthi Sarma. A criticism of Prof. V. K. Rajvade's article on the Gītā that it could not be regarded as one of the best poems of the world.

9. *Proof of Possession under the Smṛtis*: Dr. Amareśwar Thakur M.A., Ph. D.

10. *Dravidian culture*: Dr. R. Sham Sastri, B. A., Ph. D. The author draws a true picture of the religious and social life

of the Vedic Aryans, in order to clarify the issues connected with the theory of the bifurcation of the Aryan and Dravidian cultures.

VOL. XII. PARTS i TO iii.

1. *Forms of Government in Ancient India*: Dr. R. Sham Sastri.

2. *Economical Philosophy of the Ancient Indians*: Dr. R. Sham Sastri.

3. *Was Kautilya a Sceptic?*: Prof. K.M. Shembarekar, M.A. This article refers the theory that Kautilya was heterodox and establishes his orthodoxy.

4. *Historical data in the Drama 'Kaumudimahotsava'*: K. P. Jayaswal, M. A. This enthusiastic article extracts these theories out of the drama Kaumudimahotsava, published in the Dakṣiṇa Bhārati Sanskrit Series. The theories are—

a. Kiśorikā is the name of the authoress of this drama.

b. In style, this drama belongs to the School of Bhāsa, though chronologically, it is nearer Kālidāsa's time than that of Bhāsa.

c. It is earlier than Viśākhadatta's *Mudrā-Rākṣasa*.

d. This drama restores a missing link in Gupta History.

5. *Apotheosis in the Ṛg-veda. The Ṛbhus*: (continued from Vol. VIII, p. 182): Sītānāth Pradhān.

6. *Śaṅkara on the limit of empirical knowledge*: Satīndra-kumar Mukerji, M.A.

7. *Dharmakīrti's Trilakṣaṇa Hetu*: Dr. K. B. Pathak.

8. *Indian Studies. No. 2. Aryan Immigration into Eastern India*: D. R. Bhandarkar.

9. *Kumārila's verses attacking the Jain and Buddhist notions of an Omniscient Being*: Dr. K. B. Pathak.

10. *The problem of knowledge and the four Schools of Later Buddhism*: Durgacaran Chatterji.

11. *Jinendrabudhi, Kaiyaṭa and Haradatta*: Dr. K. B. Pathak. The author establishes that Kaiyaṭa is to be assigned to the close of the 11th century and Haradatta to the 13th century.

*The Arctic Regions in the Ṛg-Veda*: D. R. Mankad, M.A. The author refutes the statements of Dr. Das in his "Ṛg-Vedic India" and tries to prove that the Vedic people were definitely acquainted with the circumpolar regions.

INDIAN ANTIQUARY.

1931 January—August.

1. *Dravidic Miscellany*: L. V. Ramaswami Ayyar, M.A., B.L.
2. *On the modern Indo-Aryan Vernaculars*: Sir George A. Grierson, in April, June and August issues.
3. *A Note on the Ten plays of Bhāsa*: R. T. Jatagirdar, M.A. The author classifies 10 of the so called Bhāsa dramas into 2 groups the first group being earlier and the latter group being imitative. He also grants that the Svapna, Pratiññā and Pratimā nāṭakas are the works of one and the same author.
4. *Possible origin of the Caste system in India*: Biren Bonnerjea. D. Litt. (Paris.) In this instalment, the writer defines caste and considers the 'Occupational,' 'Somatological' and 'Totemic' theories of the origin of caste in India. The article is continued in the April number and the author concludes his thesis in the May number with the statement—'caste is not an Anthropological Division, but is the outcome of primitive superstitions.'
5. *The staging of the Viddhasūlabhañjikā*: Daśarath Śarma, M.A. The author says that the drama was staged at the Court of Keyūra Varṣa Yuvarājadeva I, the Cedi ruler.
6. *Date of Kauṭilya's Artha Śāstra*: Pran Nath. D. Sc., Ph. D. The author places the work between 484 and 510 A. D.
7. *A Buddhist paralled to the Avimāraka Story*: A Venkaṭasubbiah.
8. *The name of the Kharoṣṭhī Script*: Jean Pr Zyluski.
9. *Prāyaścitta or the Hindu ideas of the expiation of Sin*: Biren Bonnerjea.

---

INDIAN HISTORICAL QUARTERLY.

1930. Vol. VI. Nos. 1—4.

1. *The machinery of Administration in the Kauṭilya*: Dr. Narendranath Law.
2. *Problems of the Nāṭya Śāstra*: Manoranjan Ghosh. The article says—
  1. The Nāṭas were śūdras. The word Bharata, meaning Nāṭa is not derived from any person of the same name.

- ii. The Nāṭya Śāstra legend about the origin of Nāṭya is palpably a badly made fable fitted to the text in a still worse manner.
- iii. Śilālin and Kṛśāśva were the earliest writers on texts for Naṭas and these works are lost because of socio-political circumstances in post-Pāṇiniyan times.
- iv. Bharata and Ādi Bharata are 2 different works.
3. *Śaṅkara on the relation between the Vedas and Reason*: S. K. Mukerjee.
4. *Antiquity of Tantricism*: C. Chakravarti.
5. *The Trustworthiness of the Mahāvamśa*: Dr. Wilh. Geiger, Ph. D.
6. *The Guṇa doctrine in Bharata*: P. C. Lahiri, M.A.
7. *The sign of Buddhism*: Manoranjan Ray, M.A.
8. *Some difficult Vedic words*: V. K. Rajwade.
9. *The Indo-Aryan Invasion—A Myth*: Jainath Pati.
10. *Maṇimekhalā, a divinity of the Sea*: Sylvain Levi.
11. *Yuddhakāṇḍa caṃpū of Rājacūḍāmaṇi Dīkṣita*: T. R. Chintāmani. The text is printed with a short introduction.
12. *The Riddle of the Pradyota dynasty*: Jyotirmoy Sen.
13. *Vidyāranya and Mādhava*: R. Rama Rao. The author establishes that even according to orthodox tradition, the two are not identical. The article is continued in. No. 2. Vol. VII. 1931. Vol. VII. Nos. 1 and 2.
1. *Śīlaparikathā of Vasubandhu*: Ananth Nath Basu: The Tibetan text is published with a Sanskrit rendering and a short introduction. The work is a very short one and deals of Śīla—"morals, vows or observances".
2. *Daṇḍin's Conception of the Guṇas*: P. C. Lahiri.
3. *The Lokāyatikas and the Kāpālikas*: Dākṣiṇa Ramjan Śāstri.
4. *A short chronology of Indian Astronomy*: S. K. Das.
5. *Date of the Mudrārākṣasa*: S. Śrīkanṭha Śāstri. The author argues that it must have been written in the time of Candragupta II.
6. *Maṇimekhalā "The gaurdian deity of the Sea"—a Cambodian document*: Sylvain Levi.

7. *Notes on Dravidian*: L. V. Ramaswami Ayyar.
8. *Maṇḍana, Sureśvara and Bhavabhūti : The problem of their identity* : D. C. Bhattacharya. The author establishes the equation—Maṇḍana—Viśvarūpa—Umveka--Bhavabhūti—Sureśvara.
9. *Kulaśekhara of Kerala*: K. Rama Pishoroti, M.A.
10. *Vilvamangalarn Svamiyās*: A. Govinda Wariyar. The author decides the number of the saints so named and which of them is the author of the Kṛṣṇakarnāmrta.
11. *More on Maṇimekalā*: Sylvain Levi.
12. *Maṇimekalā*: Arthur A Pereira.

---

JOURNAL OF THE ANDHRA HISTORICAL RESEARCH SOCIETY.  
January and April 1930.

1. *The discovery of the author's Vṛtti on Vākyapadīya* Ramakṛṣṇa Kavi.  
October, 1930.
2. *Gautamīputra Śātakarṇi*: R. Subba Rao.
3. *Ballāla III and Vijaya Nagara*: Dr. N. Venkataramanayya, M.A., Ph. D.  
January 1931.
4. *Literary Gleanings*: No. XI. The identity of Sureśvara: Ramakṛṣṇa Kavi.

---

JOURNAL OF THE ASIATIC SOCIETY.  
Feb.—Dec. 1930.

1. *The Date of the Yoga-Sūtras*: Jwala Prasad. The writer refutes the arguments of Prof. Jacobi and Prof. Woods for the late date of the Yoga-Sūtras.
2. *Some Sāṅkhya and Yoga Conceptions of the Śvetāśvatara Upaniṣad*: E. H. Johnston.  
January 1931.
3. *The Kālavāda and the Zervanite System*: O. G. Von Wesendonk: The writer compares Indian conceptions of time with Greek and Iranian conceptions of time.
4. *Kṛṣṇadeva Rāya's Conquest of Rachol*: Rev. H. Heras.  
S. J.  
July, 1931
5. *Varuṇa, God of the Sea and Sky*: Jean. Przyluski.

6. *Māṭhara and Paramārtha*: S. S. Suryanarayana Sastri. The writer states that the original for Paramārtha's Chinese translation is not the Māṭhara-Vṛtti and that it is probable that both had a common original.

7. *Discovery of the lost Phonetic Sūtras of Pāṇini*: Raghu Vira. The writer makes a study of the original Śikṣā-Sūtras of Pāṇini himself, discovered by the late Dayananda Sarasvati in 1879. The text, available only in a corrupt form, is printed here.

April, 1931.

8. *Notes on the Nyāyapraveśa by Śaṅkara Svāmin*: Giuseppe Tucci.

JOURNAL OF THE BIHAR AND ORISSA RESEARCH SOCIETY.

1930, Nos. i—iv.

1. *Prosemy and Ecsemy in Dravidian*: L. V. Ramaswami Ayyar.

2. *Rāmadeva Raya, an unknown emperor of Vijaya Nagara*: Rev. H. Heras. S. J.

3. *Problems of Śaka—Śālavāhana history*: K. P. Jayaswal. March, 1931.

4. *On the interpretation of some doubtful words in the Atharva-Veda*: Tarapada Chowdhury.

QUARTERLY JOURNAL OF THE MYTHIC SOCIETY.

1931. Parts 1—3.

1. *Glimpses into the married life of the Ancient Tamil people*: K. G. Sesha Aiyar.

2. *The date of Māṇikkavācaka*: K. G. Śankar. The writer assigns Māṇikkavācaka to the close of the 7th century—A. C.

3. *Social legislation in Ancient South India*: C. M. Ramacandra Chettiyar.

4. *The Kadambas of Banavase*: V. Raghavendra Rao.

5. *Viveka Sāra of Śaṅkarānanda*: Dr. K. Shama Sastri.

6. *Ārya parentage of Astronomical Systems of Chaldea*: V. Subramanya Śāstri.

7. *Antiquity of the Vedas*: H. N. Subba Rao. The writer says that we cannot fix the age of Vedas at any period and should believe them to be coeval with the creation.

## NOTEWORTHY CONTENTS IN ORIENTAL JOURNALS 229

### JOURNAL OF INDIAN HISTORY.

April 1931. Vol. X. Part I.

1. *The Prince of Wales Museum inscription of Jayakeśi III.*  
—The Kadamba King Goa: C. S. Sharma.

2. *The Historical origin of the distinction between Svārthānumāna and Parārthānumāna*: Dr. S. Sen. An examination of the theory that this distinction originated in Dignāga; to be continued.

---

### THE PHILOSOPHICAL QUARTERLY.

April, 1930.

1. *Kumārila's Conception of Soul*: Jānakī Vallabha Sārnkhya tīrtha.

July, 1930.

2. *Indra and Prajāpati as Philosophers*: Sītānath Tattva Bhūṣaṇ.

3. *A Representationist's case examined*: Bibhuramjan Guha.

October, 1930.

4. *A neglected School of Vedānta or the Philosophy of Vijñānabhikṣu*: Umeścanda Bhattacharjee.

---

### REVIEW OF PHILOSOPHY AND RELIGION.

Vol. I. No. 2.

1. *Nyāya conception of Truth and Error*: Prof. Hiriyanna.

2. *The chronological Position of Viśiṣṭādvaita*: Y. Subba Rao.

Vol. II. No. 1.

3. *New light on the Gauḍapāḍakārikās*: B. N. Krishnamurti Śarma: a defence of Śrī Mādhavācārya's 'Upaniṣadic theory' of the Māṇḍūkya Kārikās of Gauḍapāda.

---

### BULLETIN OF THE SCHOOL OF ORIENTAL STUDIES.

1930. Vol. VI. Part. I.

1. *La theorie des Guṇa (Sattva, Rajas and Tamas)*: J. Przyluski.

---

### CENTAMIL. 1930.

1. *Tolkāppīya-c-collatikāraṅkurippu*: Dr. P. S. Subramanya Śāstri.

2. *The Tolkāppiyam and the Sanskrit Śikṣāprātishākyas and Niruktas*: Dr. P. S. Subramanya Śāstri.
3. *Purāṇānūrrukkuṟippu*: Dr. P. S. Subramanya Śāstri.

---

CENTAMILCCELVI. 1931.

1. *Koṅgu Country and Roman Coins*: C. M. Ramacandra Chettiyar.
2. *Moliyārāycci—Comparative Philology*—Vidvān G. Devadāsan. The writer gives a list of English, Greek and Latin words and their Dravidian (Tamil) cognate forms and says that a number of Tamil words had migrated into the foreign vocabulary in ancient times.

In the next issue the same writer gives a list of Tamil words that had got into the Sanskrit vocabulary.

## REVIEWS AND NOTICES OF BOOKS.

HISTORY OF DHARMASĀSTRA (ANCIENT AND MEDIEVAL RELIGIOUS AND CIVIL LAW) BY PANDURANG VAMAN KANE, M.A., L.L.M.—Advocate, High Court, Bombay; Vice-President and Fellow of the Royal Asiatic Society, Bombay Branch: etc. etc.—Vol. I, 1930—to be had of the Bhandarkar Oriental Research Institute, Poona (4), India—Price Rs. 15—per copy, exclusive of postage—[pages 467 + synopsis XLVIII + general index—pages 468 to 502 + appendix A—list of works on Dharmaśāstra—pages 503 to 676 + appendix B—list of authors on Dharmaśāstra—pages 677 to 760.]

This stout volume, of over eight hundred pages in all, is a substantial and massive work on the history of *Dharmaśāstra*, by Professor Pāṇḍurang Vāman Kane, M.A., L.L.M., whom Sanskrit scholars and Indologists all over the world have long become accustomed to think of first as a learned Sanskrit scholar of established reputation, and only on second thought, as a member of the legal profession. In this volume, the learned author brings together a vast mass of reliable chronological data and reconstructs on acceptable foundations the chronology of the Dharmaśāstra literature, with particular reference to its early makers and medieval scholiasts, beginning with Gautama and ending with Jagannātha Tarkapañcānana. The phrase *Dharmaśāstra* is used in the title of this work in a somewhat restricted sense and is applied only to the Sūtras, metrical texts and digests regulating the conduct of men in matters pertaining to *ācāra*, *vyavahāra* and *prāyaścitta*. The Śrauta-sūtras and Gṛhya-sūtras and the directory guides, called *prayoga-granthas*, are excluded from the scope of this work.

The author's prodigious industry and admirable analysis have made accessible to scholars, in a controllable form, a bewildering mass of chronological materials relating to Dharmaśāstra works, consisting partly of data gathered by other scholars with reference to individual works on Dharmaśāstra edited by them and partly of fresh data gathered by the learned author of

the work under review. The judicial attitude which the author has adopted in discussing various chronological problems is highly commendable. He arranges all the available data and indicates the conclusion that may follow, with due reservations. Generally, he avoids indulging in hasty or one-sided generalisations and playing the role of an advocate, though himself a veteran advocate by profession. He rightly points out (page 10) the unsoundness of the view held by Professor Max Muller and others that Smṛti works in continuous *anuṣṭubh* metre should invariably be held to be later than the sūtras of the Dharmaśāstra literature. A perusal of the sections (13, 14 and 31) dealing with the *Mānavadharmasūtra*, the *Kauṭīliya-arthaśāstra* and the *Manusmṛti* will show how cautious the author is in stating his conclusions regarding these works. His conclusions in these and similar cases are very satisfactory, though, under no circumstances, they can be said to be more than provisional. He has successfully exploded the myth of *Mānavadharmasūtra*, which, by mere repetition rather than by sound reasoning, has become petrified into a seemingly acceptable hypothesis in the history of ancient Sanskrit literature. He has clearly shown how the weight of evidence is greater in favour of the view that the traditional date of 300 B. C. for the *Arthaśāstra* of *Kauṭīliya* is likely to be correct. The data which he has analysed and presented in section 31 are such as would compel a very favourable consideration of his plausible suggestion that the extant *Manusmṛti* was finally recast, probably by Bhṛgu, between the 2nd century B. C. and 2nd century A. D., on the basis of two pre-existing metrical texts, which were perhaps produced respectively by *Svāyambhuva-manu* and *Prācetasamanu* long before the 4th century B. C. The work under review contains new information, not generally known to scholars, in several sections, such as those dealing with *Asahāya*, *Bharṭṛyajña* and *Bhāruci*. That, in spite of his usual caution, the author has sometimes been led to make somewhat hasty statements in the course of his big work is rather a proof of the temptations and difficulties in the way of an Indologist, however conscientious he may be. For instance, in the section dealing with *Viśvarūpa* (60), it is suggested in page 262 that the use of the word *मीमांसकमन्य*, in the *Taittirīya-bhāṣya-vārttika* 1-9-10, shows that *Viśvarūpa*, otherwise known as *Sureśvara*, was never *Bhaṭṭakumārila*'s pupil. As against this suggestion, one should carefully consider verse-442 p. 517, and similar passages in the

*hadāraṇyaka-bhāṣya-vārttika* and it will be seen that the feeling that Viśvarūpa's attitude towards Kumārila is one of great respect cannot be resisted. It should also be mentioned here that, an exhaustive survey of the history of the Dharmaśāstra, like the one under review, it would be felt as a palpable omission to completely ignore, as the author has done, two famous compilers of digests in South India, viz.: Vaidyanātha-dikṣita the famous author of the *Smṛtimuktāphala*, and Vaidika-sārvabhauma.

The exhaustive general index and the almost exhaustive list of works on Dharmaśāstra appended to this work (pages 503-760) greatly enhance its value as a book of reference. This short review cannot be more appropriately closed than by reminding the author of Kālidāsa's observation "क्लेशः फलेन हि निवृत्तां विधत्ते"; and it is our sincere prayer that the learned author of this valuable work may be blessed with a long life and with the health and strength necessary to enable him to complete his great task, by publishing at an early date, the second volume, which he proposes to deal with the development of the various subjects comprised in the Dharmaśāstra.

S. KUPPUSWAMI SASTRI.

HAGAVAD-GITA (STUDENTS' EDITION) BY D. S. SARMA M.A.

Published by the Current Thought Press, Triplicane, Madras. Crown 16 vo. pp. i—xi+299. Price :—Cloth bound Rs. 2. Wrapper Rs. 1-8-0.

This book contains the text and translation with introduction and notes. The author, Professor Sarma has made the Gītā his life study. He intends this book primarily for the use of all Hindu students in colleges. He says in the preface "Though the Gītā has passed through countless editions and has been commented on by a host of scholars and has been translated into many Asiatic and European languages, still I had long felt the want of a suitable edition with an introduction, text, English translation and notes for the use of students." So far as the translation is concerned he says "there are two principles that every translator should keep in view, namely faithfulness to the original and purity of the language into which the translation is made." He further adds "that most of the translators had not paid much attention to the second." How far this latter remark

is justified, we do not propose to discuss in this Review. But in respect of Professor Sarma's translation, the reader has the decided advantage of the translation having been scrutinised and improved by one of the greatest Sanskrit scholars now living, Mahāmahopādhyāya Professor S. Kuppaswami Sastri. This is, in itself in our opinion, a sufficient guarantee for the accuracy and faithfulness of the translation as far as possible to the original. It is indeed, evident that much labour has been bestowed by the author in co-operation with his other friends in bringing out this edition. Though, there may have been already many editions and translations from the pen of eminent scholars, we welcome this valuable edition to the list, especially a students' edition. The absolute necessity of the study of the Gītā by all Hindu students cannot be better put than in the words of Mahātmā Gāndhī, in his speech in the Hindu High School, Triplicane on 4-9-1927, an extract from which is given in the beginning of this edition. "Those of you who know Sanskrit should to-morrow, if possible to-day, buy the Gītā and begin to study the book. Have private Gītā classes for yourselves. Those of you who do not know Sanskrit, should study Sanskrit, if only for the sake of Gītā. I tell you that it contains treasures of knowledge of which you have no conception whatsoever." What the Gītā meant to the Mahātmā will best be realised from what he says in respect of verses 54 to 72 in the 2nd chapter which are said to be his favourite verses. He says "The last 19 verses of the second chapter have since been inscribed on the tablet of my heart. They contain for me all knowledge. All the truths they teach are the eternal verities. There is reasoning in them but they represent realised knowledge." These are golden words which summarise beautifully the value of the Gītā to the world and to humanity in general. It must, however, be admitted that the Gītā is a work which it is difficult to translate and whose real meaning and ultimate import in many places, it is difficult to grasp. Indeed, it may even be said that the work is as elusive as the personality of the Lord whose teachings it contains. In the beginning of his commentary to this work, the great Śaṅkarācārya observes as follows:

तदिदं गीताशालं समस्तवेदार्थसारसङ्ग्रहभूतं दुर्विज्ञेयार्थं तदर्थ-  
विष्करणाय अनेकैः विवृतपदपदार्थवाक्यवाक्यार्थन्यायमपि अत्यन्तविरुद्धाने-

कार्यत्वेन लौकिकैः गृह्यमाणमुपलभ्य अहं विवेकतः अर्थनिर्धारणार्थं  
संक्षेपतो विवरणं करिष्यामि ॥

To add to the difficulties the interpretation of the Gītā by modern thinkers and scholars in the light of present day problems and ideals and in the language of modern thought has introduced a fresh source of confusion. Hence the task of bringing out an edition like this must be said to be a difficult one. But Professor Sarma has, we are glad to say, accomplished it with a fair measure of success. In a short review, it is not possible to advert to the various points discussed by the author in his valuable introduction and also in the notes. We congratulate the Publishers also on their neat printing and get up.

We conclude, however, with the wish that it should be possible to organize a fund which will enable us to present every student, especially a Hindu student, on the eve of the Annual Convocations of the Universities with a copy of this edition. We hope that there are a few atleast among us who have got something of the spirit, enthusiasm and love which the Christian Missionaries possess.

K. BALASUBRAHMANYA IYER.

### MUGHAL BIBLIOGRAPHY.

Messrs. D. B. Taraporevala Sons & Co., are to publish shortly an annotated bibliography of books and manuscripts relating to the Mughals in India on Art, Science, Biography, History, Geography, Travels, Literature, Philosophy, Religions, Economics, Sport, &c., &c., which is now being prepared and will be published early next year. Every effort is being made to make bibliography as complete as possible. Authors desirous of having their works included in bibliography are requested to send particulars of their books or magazine articles to the Editor of the "Indian Literary Review," 190, Hornby Road, Bombay, as early as possible. The full title, author's name, number of pages and illustrations, year and place of publication should be clearly mentioned. If possible, a very short summary of the contents also should be given. If any persons or Institutions happen to have any unique manuscript, full particulars of the same should be given.

## CONTRIBUTORS TO THIS ISSUE.

K. A. SUBRAHMANYA IYER, M.A., (Lond.). Prosecuted his high studies in Sanskrit in the French Universities under Dr. Sylvain Levi. He is the Sissendi Raj Reader in Sanskrit and Head of the Department of Sanskrit in the University of Lucknow.

L. V. RAMASWAMI IYER, M.A., B.L. A Good scholar in Dravidian languages and a contributor to many Journals. He is a lecturer in the Malabar College, Ernakulam.

S. R. BALASUBRAHMANYAN, B.A., L.T. A Teacher at Chidambaram, who is keenly interested in advanced Historical Research.

P. S. SUBRAHMANYA SASTRI, M.A., PH. D., A very good scholar in Tamil and Sanskrit. Lecturer in Dravidian languages, Bishop Heber College, Trichinopoly. Now Assistant Editor of the Tamil Lexicon compiled by the Madras University.

T. G. ARAVAMUTHAN, M.A., B.L. An Advocate of the Madras High Court, who is a keen researcher in the sphere of Indology, with special reference to the historical material in ancient Tamil literature and the author of "The Kāveri, the Maikharis and the Śaṅgam age" and "South Indian Portraits in Stone and Metal."

C. KUNHAN RAJA, M.A., D. PHIL. (OXON.). Reader in Sanskrit and Head of the Department of Sanskrit in the Oriental Research Institute, University of Madras.

N. AIYASWAMI SASTRI, MĪMĀṂSĀ ŚĪROMAṆĪ. He was working for some time in the Śānti Niketan. Now Lecturer in Sanskrit in the Madras Ayurveda College, Mylapore. Knows Tibetan and many other languages.

  3. The last two verses are cited in म०वृ० p. 548, l. 6 (L.V.P.).
  4. =Sbyar. baḥi. lugs. Cf. p. 174. l. 14 above.
  5. =Don. dag. ḥjog. par. byed. pa

words *kālam*, *ulakam* etc., mentioned in this sūtra never take *āṇpāl*, *peṇpāl* or *palarpāl* verbs unless there is a change in the form of words like *kālan* for *kālam* etc.

*Note 3.*—The meaning given above is that accepted by Iḷampūraṇar, Cēṇāvaraiyar and Naccīṇārkkīṇiyar.

*Note 4.*—Teyvaccilaiyār, on the other hand, differs from them. He splits the sūtra into 2 sentences:—‘*kālam...kiḷavi-y-ellām uyartiṇai mēṇa; (avaṛ) pāl pīrinticariyā.*’ (The words *kālam* etc., belong to *uyartiṇai*; but they do not take *āṇpāl* *peṇpāl* or *palarpāl* verbs.) That they take *aṣṛiṇai* verbs is sanctioned, according to him, by the sūtra ‘*Icattalu m-uriya vēṛiṭat t-āṇa*’ (Tol. Col. 59).

There are three objections against Teyvaccilaiyār’s interpretation. (1) That the words *kālam*, *teyvam* which denote gods are *uyartiṇai* is already learnt from the statement

*Teyvañ cuṭṭiya peyar-nilai-k kiḷavi*  
*Uyartiṇai maruṇkiṛ pāl-pīrin t-icaiikkum.*

in the fourth sūtra of *kiḷavi-y-ākkam*. Hence it need not be repeated here. That the word *ulakam* when it means people is *uyartiṇai* has already been mentioned in Tol. Col. 2. (2) If the sūtra is split into two sentences, it gives room to *vākyabhēda* or sentence-split. (3) If the sūtra ‘*Icattalu m-uriya vēṛiṭat t-āṇa*’ is taken to mention that *aṣṛiṇai* verbs follow the words *kālam*, *ulakam* etc., there will then be no sūtra to sanction the usage ‘*kālan vantāṇ*’.

*Note 5.*—This sūtra has to be taken as an *apavāda* or exception to the second part of Tol. Col. 4 and ‘*Icattalum.....*’ (Tol. Col. 59) has to be taken as an *apavāda* to this sūtra and *prati-prasava* or exception of the exception to the second part of Tol. Col. 4.

58. நின்றான் இசைத்த விவணியல் பின்றே.

*Ninr-āṇ k-icaitta l-ivan-iyal p-inṛē.*

It is not in their nature to take *uyartiṇai* verbs without modification in their form.

*Note 1.*—This sūtra suggests that the words *kuṭimai*, *āṇmai* etc., mentioned in Tol. Col. 56 may take *uyartiṇai* verbs without having any change in their form.

59. இசைத்தலு முரிய வேறிடத் தான.

*Icattal-u m-uriya vēṛiṭat t-āṇa.*

They (the words *kālam* etc.) may take *āṇpāl*, *peṇpāl* or *palarpāl* verbs in other places.

Ex. *Kālaṇ uyirai-k koṇṭāṇ.*  
(Yama took away life.)  
*Ulakar pacittār.*  
(People felt hungry.)

*Note 1.*—The word *vēṇṭam* (other places) refers to change in their form like *kālaṇ* for *kālam* etc.

*Note 2.*—*Vēṇṭam* is taken by Teyvaccilaiyār to refer to *aṅṅiṇai*. It has already been mentioned under Tol. Col. 57 that it is not a satisfactory interpretation.

60. எடுத்த மொழியினஞ் செப்பலு முரித்தே.  
*Eṭutta molu-y-iṇaṅ ceppalu m-urittē.*

A sentence which is expressed may suggest related ideas.

Ex. 'Kīlai-c-cēri-k-kōlī venṇratū' eṇiṇ 'mēlai-c-cēri-k-kōlī vīṇtatū' eṇpatū pera-p-paṭum.

(If it is said that the cock of the eastern side of the village came out victorious, it is suggested that the cock of the western side was defeated.)

*Note 1.*—It is worthy of note that it is not obligatory that the expression should always suggest related ideas. If one says '*antaṇar vālka*' (may the brahmins live), it does not suggest that *aracar* (kings) and *vaṇṇikai* (merchants) should not live long.

*Note 2.*—Iḷampūraṇar states under this sūtra that, if one says that the cock of the western side of the village came out victorious, it is evidently suggested that the cock of the eastern side was defeated and that, if one says that the man carrying a pot fell down, it is evidently suggested that the pot also fell down. He also adds that, if one says that cows and brahmins should live, it is not suggested that others should die. Cēṇāvaraiyar criticises him thus:—In the first two examples the suggested fact is *ananyathāsiddha* or the invariable concomitant to the expressed fact. The suggested meaning comes only by *poruḷ-ārral* or the suggestive power of the meaning of the sentence and not by *col-l-ārral* or the suggestive power of the sentence. This objection cannot stand since he himself says that, if one says that virtuous man goes to heaven, it is suggested that the sinner goes to hell. The suggested meaning here is only from *poruḷ-ārral*. In the

third example he seems to have mistaken that *ḷampūraṇar* meant that the words *ā* (cows) and *antaṇar* (brahmins) never meant related objects.

*ḷampūraṇar*'s example '*ā vālka, antaṇar vālka*' is exactly similar to Cēṇāvaraiyar's example '*ṭivu arintu unṭāṇkaṇ inṭam eytum*'.

61. கண்ணுந் தோளு முலையும் பிறவும்  
பன்மை சுட்டிய சினேநிலைக் கிளவி  
பன்மை கூறுங் கடப்பா டிலவே  
தம்வினைக் கியலு மெழுத்தலங் கடையே.  
*Kaṇṇun tōḷu mulayum pīravum*  
*Paṇmai cutṭiya ciṇai-nilai-k kīlavu*  
*Paṇmai kūṟuṇ kaṭaṭṭā ṭ-ilavē*  
*Tam-vṇai-k k-iyalu m-eḷuttalaṅ kaṭaryē.*

The words denoting limbs in plural number like *kaṇ*, (eyes), *tōḷ* (shoulders), *mulai* (breasts) etc., need not denote the plural number unless they are followed by *palavunṭpāl* verbs.

Ex. *Avaḷ kaṇ-ṇallaḷ.*

(She is fair-eyed.)

*Avaḷ kaṇṇār kottai.*

(She is blind.)

*Note 1.*—The following point is worthy of note here. The words *kaṇ*, *tōḷ* etc., may denote singular or plural since the addition of the particle *kaḷ* to denote plural was only optional (cf. Tol. Col. 169). In the sentences like '*kaṇ nontaṇa*' (eyes ached), the word *kaṇ* is evidently plural since it is followed by the plural verb *nontaṇa*. Similarly in sentences like '*kaṇ nontatū*' *kaṇ* is evidently singular since it is followed by the singular verb *nontatū*. But in expressions like '*kaṇṇār kottai*', there is no element to ascertain whether *kaṇ* is singular or plural. Hence it may be singular or plural. Even if a man or a woman is blind by one eye, he or she is said to be blind by common people. Similarly in the example '*avaḷ kaṇ-ṇallaḷ*' where *avaḷ* is the subject and *kaṇ-ṇallaḷ* is the predicate, there is no element to determine whether *kaṇ* is singular or plural. It may be singular or plural. If a woman has one of her eyes very fine, it may be said that she is fair-eyed. Among Tamils the expression '*Kaṇṇaki mulai-y-ilāl*' is frequently heard. It means that *Kaṇṇaki* is devoid of a breast since there were statues of *Kaṇṇaki* with one breast.

*Note 2.*—Iḷampūranar, Cēnāvaraiyar and Naccinārkkiniyar interpret this sūtra thus:—The words *kaṇ*, *tōḷ* etc., which denote limbs and are plural in number need not be followed by a plural verb if they are not followed by verbs denoting their action; they may be followed by such verbs as suit the object or objects of which they are limbs. For example the word *kaṇ* may be followed by the singular predicate *nallaḷ* if the subject is *avaḷ* or *ivaḷ* and may be followed by the *palarpāl* predicate *nallar* if the subject is *avar* or *ivar* etc. In examples like *avaḷ kaṇ-nallaḷ*, the subject is *avaḷ* and the predicate is evidently the compound noun *kaṇ-nallaḷ*. Here what is the need for saying that *kaṇ* may not be followed by the verb *nallana*. The intention of the speaker is to say something about the lady with respect to the fineness of her eyes and not to say anything about the eyes. Besides the word *kūrum* which means ‘denoting’ in the sentence *paṇmaikūrum kaṭappāṭila* does not convey any sense according to their interpretation. If their interpretation was correct, it should have been replaced by ‘*koḷḷum*’.

*Note 3.*—Teyvaccilaiyār’s interpretation is this:—If the words *kaṇ*, *tōḷ* etc. are not followed by *palaviṇpāl* verbs, they may be followed by *onṛaṇpāl* verbs like ‘*kaṇ nontatū*’ though such a sentence may mean ‘eyes ached’. *Kaṇ* etc., in such cases may be taken as *jātyēkavacana*. Since the use of *jātyēkavacana* is sanctioned by the sūtra

*Orumai cuṭṭiya peyar-nilai-k kiḷavi*

*Panmai-k kaku m-iṭaṇumā r-uṇṭē* (Tol. Col. 46.)

and the sentence ‘*paṇmai-kūruṇ kaṭappāṭilavē*’ found in this sūtra does not fit in with his interpretation, his interpretation also does not seem to be sound.

## 2. *Vērrumai-y-iyal*.

62. வேற்றுமை தாமே யேழென மொழிப.

*Vērrumai tāmē y-ēl-ēṇa moḷipa.*

It is said that cases are seven in number.

*Note 1.*—The word *tām* in the sūtra may be said to have been used either for the sake of euphony or to make up the number of syllables in the line.

*Note 2.*—*Ēl* is the old form of the modern *ēlu*. cf. Tol. *Ēlut*. 389.

*Note 3.*—Case is called *vērrumai* since it brings the object denoted by the noun in some relation to the action denoted by

the verb. The nominative case is included under *vērrumai*, since the object denoted by the noun is also made the subject of the action denoted by the verb. This point is clearly mentioned by Teyvaccilaiyār. Cēnāvaraiyar seems to have missed to note this point. Hence he says, at first, that the nominative case is included under *vērrumai* since it is differentiated from other cases—accusative, instrumental etc. Being possibly not satisfied with this explanation he suggests an alternative reason that it is done so by the *chattri-nyāya* or the rule of the majority.

The vocative case is not included under the seven cases since it does not directly denote any relation of the noun to the verb which follows it. Hence it is mentioned separately in the next sūtra.

*Note 4.*—It is worth nothing that Tolkāppiyānār has mentioned in the sūtra

*Ai-oṭṭu ku-in atū-kaṇ ṇ-enṇum*  
*A-v-v-ā r-enṇa vērrumai y-urupē.* (Tol. Elut.  
 114.)

that the *vērrumai-y-urupē* or *case-suffixes* are *six* in number and here the cases are *seven* in number. Hence it is evident that the nominative case has no suffix.

*Note 5.*—What is the *iyaiṇṇu* (*saṅgati*) or the relationship of this chapter *vērrumai-y-iyal* to the previous one *kilavi-y-ākkam*? The answer is found in *Note 5* to the first sūtra in *kilavi-y-ākkam*. That is the opinion of Teyvaccilaiyār. But the other commentators :—Iḷampūraṇar, Cēnāvaraiyar and Nacciṇārkiṇiyar have given different opinions on the point, which deserve a careful examination here.

Iḷampūraṇar says that *kilavi-y-ākkam* deals with the four kinds of *col* or word (*i.e.*) *peyar-c-col* or noun, *viṇai-c-col* or verb, *iṭai-c-col* and *uri-c-col* and the following chapter *vērrumai-y-iyal* deals with *peyar-c-col*.

Cēnāvaraiyar condemns him for the following reasons:—

(1) If *vērrumai-y-iyal* deals with *nous*, the sūtras

*Ellā-c collum poruḷ-kurit tana-v-ē.* (Tol. Col. 155.)  
*Poruṇmai terital-uṇ coṇmai teritalum*  
*Colli ṇ-āku m-enṇaṇār pulavar.* (*ibid.* 156.)  
*Teriṇṇu-vēru nilaiyal-uṇ kuripṇir rōṇṇal-um*  
*Iru-pār r-enṇa poruṇmai nilai-y-ē.* (*ibid.* 157.)  
*Col-l-enṇa-p paṭuṇa peyar-ē viṇai-y-enṇu*

*Ā-y-iraṇ t-enpa v-arintici u-ōr-ē. (ibid. 158.)*

*Iṭai-c-cor kīlavi-y-u m-uri-c-cor kīlavi-y-um*

*avarṇu-vali maruṅku rōṇru m-enpa. (ibid. 159.)*

which deal with the definition and the classification of *col* or word and which are now found at the commencement of *peyar-iyal*, the fourth chapter, should have been mentioned at the commencement of this chapter. (2) The sūtras

*Kūriya muṇai-y-i u-uruṇu-ṇilai tiriyāti*

*īru-peyar-k k-āku m-iyarkaiya v-enpa. (Tol. Col. 69.)*

*Poruṇmai cuṭṭal viyaṅkoḷa varuṭal... (ibid. 66.)*

*peyar-ṇilai-k kīlavi kālān tōṇṇā. (ibid. 70.)*

which, in his opinion, deal with the definition of *peyar-c-col*—that it takes case-suffixes after it or it is followed by a predicate and that it does not denote tense unless it is a *tolir-peyar* or verbal noun, should have preceded the sūtra

*Vērrumai tāṁē y-ēl-ēṇa molīpa (Tol. Col. 62).*

Having thus condemned Iḷampūraṇar he states his own reasons which are as follows:—(1) The *kīlavi-y-ākkam* deals with the four kinds of words:—*peyar*, *viṇai*, *iṭai-c-col* and *uri-c-col* and this with *peyar* and *iṭai-c-col* since the case-suffixes are *iṭai-c-col* and they have to be suffixed to *peyar*. (2) Since *peyar-c-col* is that which takes case-suffixes after it, the cases should be dealt with before nouns. (3) No other context is more befitting than this.

As regards the first reason, it may be noted that all the sūtras in *kīlavi-y-ākkam* except the first *ten* deal only with sentences and not with words. Hence it cannot stand. If the second reason holds good, the sūtras Tol. Col. 66, 69 and 70 should have been mentioned at the commencement of this chapter as he himself says in his condemnation of Iḷampūraṇar. The third reason needs no answer.

Nacciṇārkkīṇiyar thinks that this chapter deals with all the four kinds of *col* as *kīlavi-y-ākkam* does since *vērrumai* has to deal sometimes with a *peyar*, sometimes with a *viṇai*, sometimes with an *iṭai-c-col* and sometimes with an *uri-c-col*. Since *uri-c-col* has nothing to do with case, his reason also cannot stand.

Hence the opinion of Teyvaccilaiyār appears to be sound.

63. விளிகொள் வதன்கண் விளியோ டெட்டே.

*Vili-koḷ vatan-kaṇ vili-y-ō t-eṭṭ-ē.*

The cases are eight when vocative, which is used when one is addressed, is included among them.

*Note 1.*—The subject here is *vērrumai* mentioned in the previous sūtra.

*Note 2.*—Teyvaccilaiyār takes this sūtra and the previous one as one sūtra. This seems to be unsound since Tolkāppiyāṇār deals with the first seven cases in two chapters (*i.e.*) *vērrumai-y-iyal* and *vērrumai-mayaṅkiyal* and the vocative in a separate chapter *viḷi-marapū* and uses the two endings *molipa* and *eṭṭē* in the two lines. Besides the vocative case may be given a subordinate position relative to the other cases only if the two lines are taken as different sūtras.

64. அவைதாம்,  
பெயர் ஐ ஒது கு  
இன் அது கண்விளி பென்னு மீற்ற.  
*Avaitām,*  
*Peyar ai oṭu ku*  
*In-atu kaṇ-viḷi y-enṇu m-īrra.*

They are *peyar-vērrumai* (nominative), *ai-vērrumai* (accusative), *oṭu-vērrumai* (instrumental), *ku-vērrumai* (dative), *in-vērrumai* (ablative), *atu-vērrumai* (genitive), *kaṇ-vērrumai* (locative) along with *viḷi-vērrumai*.

*Note 1.*—The subject in the sūtra is *avai* which refers to *vērrumai* mentioned above in the sūtra 62; the predicate is the compound word *peyar-ai-oṭu-ku-in-atu-kaṇ*; and the compound word *viḷi-y-enṇu-m-īrra* is a *vinai-y-āl-aṇai-y-un-peyar* or verbal noun which stands in adjectival relation to the compound word *peyar-ai-oṭu-ku-in-atu-kaṇ*.

*Note 2.*—Teyvaccilaiyār says that this sūtra deals with *case-suffixes*. But since the case-suffixes have already been mentioned in Tol. Eḷut. 114, this, sūtra would become unnecessary. Besides there would have been no sanction for Tolkāppiyāṇār to name the second case, the third case etc. as *ai-y-eṇa-p-peyar-iyā-vērrumai*, *oṭu-v-eṇa-p-peyariya-vērrumai* etc. in the succeeding sūtras of this chapter.

*Note 3.*—Cēṇāvaraiyār says under this sūtra that though Tolkāppiyāṇār has named the third, and the sixth cases as *oṭu-vērrumai* and *atu-vērrumai*, yet the suffixes *āṇ* and *ā* also may respectively be used in the third and the sixth cases. So far as

āṇ is concerned, he may be right since Tolkāppiyāṇār himself makes mention of it in the sūtra

*'Ku-ai āṇ-eṇa varūu m-iṟuti.* (Tol. Col. 108.)

But Tolkāppiyāṇār does not seem to have mentioned 'a' as a case-suffix, nor has he made use of it as a genitive suffix. Nannūlār, on the other hand, says so. How 'a' began to be used as the genitive suffix will be discussed later. This statement of Cēṇāvaraiyar makes me infer that he may have been later than Nannūlār.

65. அவற்றுள,

எழுவாய் வேற்றுமை பெயர்ஜோன்று நிலையே.

*Avarrul,*

*Eluvāy vēṟṟumai peyar-tōṇṟu nilai-y-ē.*

Of them the *peyar-vēṟṟumai* is used to denote the doer or the subject of the active verb.

*Note 1.*—In the interpretation of this sūtra there is much difference of opinion. Iḷampūraṇar, Naccinārkkkiṇiyar and Teyvaccilaiyār seem to agree in the point that this sūtra deals with the meaning of the nominative case though they differ in the method of arriving at it. Iḷampūraṇar seems to take *eluvāy-vēṟṟumai-p-peyar* as the subject and (*payanilai*)-*tōṇṟu-nilai* as the predicate. The word *payanilai* is taken here from the following sūtra. *Eluvāy-vēṟṟumai-p-peyar*, according to him means the *vēṟṟumai-p-peyar* which is mentioned first (in the previous sūtra); *Payanilai-tōṇṟu-nilai* means the state of the predicate following it. Naccinārkkkiṇiyar seems to take *eluvāy-vēṟṟumai* as the subject and *peyar-(payanilai)-tōṇṟu-nilai* as the predicate. He too takes the word *payanilai* from the next sūtra; but he introduces it in the middle of the compound word *peyar-tōṇṟunilai*, which does not seem to be appropriate. Teyvaccilaiyār, on the other hand takes *eluvāy-vēṟṟumai* as the subject and *peyar-tōṇṟu-nilai* as the predicate, but seems to take *payanilai-k-ku-mun* as being understood before *peyar-tōṇṟu-nilai*.

Since the sūtras 71, 73, 75, 77, 79 and 81 respectively deal directly with the meaning of the accusative, instrumental, dative, ablative, genitive and locative, it may be better if this sūtra also is interpreted in such a way that it may be said to deal directly with the meaning of the nominative case. Hence I venture to suggest that the word *eluvāy* would have been used before the time

# TOLKAPPIYAM

The oldest work on Tamil Grammar.

Published for the first time in English.

EDITED BY

P. S. SUBRAHMANYA SASTRI, M.A., PH.D., L.T.,  
Formerly Lecturer in Dravidian Languages, Bishop Heber College,  
Trichinopoly,

Now acting as Principal, Maharaja's Sanskrit & Tamil College, Trivadi.

WITH

An easy flowing English translation, copious illustrations and short notes.

Indispensable for students of Tamil literature.

The only book of the kind.

Published in three volumes.

Vol. I Eḷuttatikāram.

Complete with verse index, word index etc.

PRICE Re 1-0-0.

---

## Vibhrama Viveka

OF

## Mandana Misra

PRINTED FOR THE FIRST TIME

EDITED BY

MAHĀMAHOPĀDHYĀYA, VIDYĀVĀCASPATI

PROF. S. KUPPUSWAMI SASTRI, M.A., I.E.S.

AND

Vedāntālaṅkāra T. V. RAMACHANDRA DIKSHIT,  
Professor of Vedānta, Madras Sanskrit College, Mylapore.

Very useful for all students of Indian Philosophy.

Deals with the various theories of *Bhrama* or error.

PRICE 0-8-0.

SIR ALLADI KRISHNASWAMI AIYAR,

*Advocate-General, Madras and  
Member of the Editorial Board.*

We have great pleasure in expressing our heartfelt felicitations to *Sir Alladi Krishnaswami Aiyar*, a distinguished member of our Editorial Committee, on the great and well-merited distinction of *Knighthood* that has been conferred on him by the Government of India on 1st January, 1932. This honour has been conferred, evidently in token of his services as Advocate-General of Madras and as a member of the Committee appointed by the Government for drafting the "Sale of Goods Bill" and "Partnership Bill." There has been widespread satisfaction among the general public and among the members of the legal profession throughout the presidency. The distinction has been unique in the sense that no previous incumbent of the high office of Advocate-General of Madras was honoured with this title during his period of office. The Bar has felt a special joy because *Sir Alladi Krishnaswami Aiyar* is its head not only by virtue of his office, but also by reason of the princely income, which he has been earning for more than ten years at the Bar, and his large and varied practice, his great powers of advocacy and his erudition in many branches of the Law, including international law and constitutional law. He enjoys a wide popularity by the simplicity of his nature, his affability and accessibility; and his hold on the affections of his countrymen and on the younger section of the Bar is, indeed, very great owing to his discriminating philanthropy, his generous appreciation of intelligence and merit and his encouragement of talent.

The Editorial Committee of the Journal of Oriental Research are specially grateful to him for the keen interest he has been taking in the work of the Journal ever since its inception, and for the generous donation which he has been giving every year towards the finances of the Journal.

# THE PORTRAIT OF KĀLIDĀSA

BY

MR. L. KRISHNA DAS, B.A., B.L., ADVÓCATE, MADRAS.

*An Appreciation by Vivius.*

Art is creative and the artist is also a creator. Of recreation in Art it may indeed be said that it is truer and finer than what is wrought by the creative processes of nature. In the latter, the spirit is often overwhelmed and masked by matter and material, at once gross and drossy. It is the supreme function of fine art to reveal the spirit appearing veiled in every object of creation.

The Art of Painting is not the Art of Photography. The painter is not he who merely reproduces in paint the figure, features and flesh of man. What he has to paint is the soul radiating through the flesh—the man that is the spirit, with all the characteristics and the whole history rewritten in language which one can read.

If, therefore, in the case of living human beings the Artist-Painter, under the guise of painting the human figure really paints the human soul, the process comes to be reversed in painting historic persons dead long ago, with regard to whose form, feature or lineaments there are no available records or data.

A poet is known by his personality as revealed in his poems. The spirit of the poet reconstructed by a synthesis imaged in imagination and realized in the vision of the artist, is, by him, appropriately embodied by providing the soul with the vesture of a body in harmony with its own true nature. The artistic process by which such embodiment is effected is a wondrous process of recreation rendering it at the same time truer and finer. All human memory is only a similar artist and what we remember is but what we can or care to put together in imagination.

Here in this picture painted by my friend, Mr. Krishna Das is seen Kālidāsa the great Indian Poet and Dramatist as he appeared in the divine vision of the artist. The poetic soul is

there seen with eyes as those of a child opened wide in wondrous appreciation. The eyes are lifted high, fixed on things high.

The eyes are the windows of the soul and the large beautiful eyes of the Poet are seen there pictured with the poetic soul glistening as it were at the corners. It almost seems that the soul of the great poet is seeking to go out of the frail and delicate body to get *en rapport* with the beauty of the external world. That world sublime and beautiful is in the picture depicted by the sublimity of the Himalayas with its foot in the dark recesses of the forest and with its snowclad peaks towering in skies radiant with the hues of the rising sun, and also by the beauty of the lake with its lotuses still in bud and reflecting in its still waters all the morning glory, almost at the feet of the lonely poet. The antelopes grazing and playing at some distance seem only to be part of the nature depicted in the picture, the sole living being evidently enjoying his loneliness in the solitude he seems to have specially chosen for himself. Such is the setting of the picture.

The refinement and nobility of the soul are sufficiently suggested by the refinement and delicacy of the figure, especially the face. The small mouth slightly opened, apparently unconsciously, shows the soul thirsting for beauty and drinking in all the beauty there is.

The poet seems lost not only in the contemplation of the sublime and the beautiful but also in thought, waiting for some sudden inspiration to give body and shape to a fleeting poetic idea. The palm leaves already written on, lie scattered by the side and the poet pausing in the midst of a partly written leaf, sits in repose looking out as it were for the coming of the beautiful word or the beautiful thought, the inseparable unity of which represented to him the God of his worship even then imaged by him perhaps in those glorious heights he was gazing at. The stile held loosely between the fingers he is merely toying with, indicating forsooth that writing or even the style of writing is the least and last part of the poet. Whom else can this picture represent, the picture of the youthful Brahmin learned, *en rapport* with nature and beauty, following his dharma, refined and delicate in body and soul and writing on the inspiration of the sublime and the beautiful, but the great Kālidāsa of Sanskrit song?

The demands and worries of the professional life of a lawyer are scarcely propitious to the cultivation and development of Art.

Even more than Law, Art is a jealous mistress impatient of interruptions and impertinences. That in the intervals of such preoccupations Mr. Krishna Das should have been able not only to cultivate the art of painting, so little cultivated especially in this Presidency, and that what is more he should have found the necessary inspiration and time for doing such a creditable work is a matter indeed for sincere congratulation.

It is not for me to say whether his true vocation in life is Law or Art. But whatever that may be or prove to be, the work he has achieved is full of promise. May he and his devotion to art be spared long to produce still greater works of a similar kind ?

Art, like everything else, can grow and thrive only in a propitious soil and atmosphere. A barren soil will not let the young plant grow. The chill of apathy will nip it in the bud and the hot blast of envy will parch or burn it up. The genial warmth of generous appreciation is a necessary condition for all growth and luxuriance. It is also true that new shades of beauty are revealed only in the sunshine of sympathy. I hope and trust that it may be given to my friend Mr. Krishna Das to receive an adequate measure of appreciation and encouragement from the public of this Presidency. I am glad to think that he has already been the recipient of a small token of recognition from the blessing hands of the Sanskrit Academy of Madras.

In the Indian Renaissance which we of this generation are witnessing in progress under our own eyes, art is destined to take and occupy a high and important place. Will Mr. Krishna Das carve out a niche for himself there ?

## SOME MORE NYĀYAS.

BY

K. A. SUBRAHMANYA IYER, M.A., (LOND.),

*Head of the Department of Sanskrit, Lucknow University.*

Students of Sanskrit Literature will always be very grateful to the late Colonel Jacob for the three collections of Nyāyas or 'Popular Maxims' which he published some years ago. They were the result of his wide reading, extending over many years and covering a wide field of Sanskrit Literature. Anybody who is engaged in studying the literature on any Śāstra will find these collections a useful guide. They are all the more useful as Colonel Jacob's explanations of the Nyāyas always include quotations from the passages in which they occur.

Wide as Colonel Jacob's reading was, he was, of course, not familiar with certain branches of Sanskrit Literature, published subsequent to the publication of his three collections. Rich additions are being made in many parts of India to the published literature on the Śāstras and it is only natural that these newly published works should contain Nyāyas not included in Colonel Jacob's collections. I propose to lay a few such before the public, with the explanations which have suggested themselves to me,

### १. दर्पणनगरन्याय

*The simile of the mirror and the city.* This is frequently met with in the Kashmir Śaiva literature.<sup>1</sup> It is one of the tenets of this system that the whole Universe is an emanation from the Supreme Being. This emanation is not different from the Supreme Being, yet it appears to be so. The system, being thoroughly monistic, cannot accept the Universe as a reality separate from the Supreme Being, Paramaśiva. If the Universe were different from the Supreme Being, it would end in dualism. If it were one with the Supreme Being, what is the force of the

---

1. Here, as elsewhere, Kashmir Śaiva works referred to are those published by the Research Department, Jammu and Kashmir State.

saying: The Universe shines (emanates). जगत् प्रकाशते इति कथं वाचोयुक्तिः ? How does it appear different from the Supreme Being ? To remove this difficulty the दर्पणनगरन्याय is brought in. Abhinavagupta says in his परमार्थसार

दर्पणनगरे यद्वन्ननगरग्रामादि चित्रविभागा ।

भाति विभागेनैव च परस्परं दर्पणादपि च ॥

विमलपरमभैरवबोधात् तद्वद्विभागशून्यमपि ।

अन्योन्यं च ततोऽपि च विभक्तमाभाति जगदेतत् ॥ (p. 35.)

On a clear mirror are reflected towns, villages, rivers, mountains, men, women, animals etc. These reflections appear different from one another, but they are all contained within the mirror. The mirror is, however, not swamped by these reflections. No reflection is beyond the mirror. In that sense, the reflections and the mirror are the same. Still, the mirror is perceived as transcending the reflections. Thus there is भेद as well as अमेद. In the same way, the Universe with all its variety appears in the Supreme Consciousness and yet the latter transcends the Universe. The Universe is not beyond the Supreme Consciousness, in which sense, there is identity between the two, while the latter transcends the former, in which sense they may be said to be different from one another. The analogy must, of course, not be pressed too far, because there is one essential point of difference between the mirror and the Supreme Consciousness. The latter creates the things which are reflected in it, whereas the mirror does not create the things which are reflected in it. While commenting on the verses quoted above Yogarāja quotes the following verse from the विवृतिविमर्शिनी of Abhinavagupta, referring to the difference pointed out above.

अन्तर्विभाति सकलं जगदात्मनीह

यद्वद्विचित्ररचना मुकुरान्तराले ।

बोधः पुनर्निजविमर्शनसारयुक्त्या

विश्वं परामृशति यो मुकुरस्तथा तु ॥

(परमार्थसार p. 39.)

The Nyāya is also referred to in other works belonging to the Kashmir Śaiva system. Thus Abhinavagupta says in his ईश्वरप्रत्यभिज्ञाविमर्शिनी—

तस्य च प्रमातुरन्तः सर्वार्थावभासः चिन्मात्रशरीरोऽपि तत्सामा-  
नाधिकरण्यवृत्तिरपि दर्पणनगरन्यायेनास्ति इत्यपि उक्तम् । (Vol. I, p. 244.)

“It has also been said that within that Experiencer, the manifestation of all things, though essentially of the nature of Consciousness and co-existent with it, exists according to the analogy of the mirror and the city.”

Again we read:—

दर्पणतलमिव विततप्रवहन्दीप्रवाहक्रमसमाश्लिष्टम्, अत्र च केवलं  
दर्पणस्य तथा इच्छा नास्ति । परमेश्वरस्य तु सा अस्ति । (Vol. II, p. 23-24.)

Again we read of the प्रत्यभिज्ञाहृदय—

स्वमित्तौ न तु अन्यत्र कापि ग्राह्निर्णीतिं विश्वं दर्पणनगरवदभिन्नमपि  
भिन्नमिव उन्मीलयति । उन्मीलनं चावास्थितस्यैव प्रकटीकरणम् ॥ (p. 6.)

Examples can be multiplied, but the above passages are sufficient for making the idea clear.

## २. समधृततुलापुटन्याय

*The simile of the two discs of a balance in equilibrium.* In such a state, the two discs are of equal importance. Hence the Nyāya is used in the Kashmir Śaiva literature, to illustrate that stage in evolution which is called ईश्वरावस्था. Yogarāja says in his commentary on the परमार्थसार

तथा अत्रैव ‘अहमिदम्’ इति अभेदेन अहन्तेदन्तयोः समधृततुलापुट-  
न्यायेन यः स्वात्मचमत्कारः सैषा तस्य ईश्वरावस्था । (p. 42.)

Abhinavagupta also uses this Nyāya in his ईश्वरप्रत्यभिज्ञाविमर्शिनी

प्रकाशस्य यदात्ममात्रविश्रमणमनन्योन्मुखस्वात्मप्रकाशताविश्रान्तिलक्षणो  
विमर्शः ‘सोऽहम्’ इति उच्यते ; यस्त्वन्योन्मुखः स ‘इदम्’ इति स च  
स्वप्रकाशमात्रे पुनरनन्योन्मुखरूपे विश्राम्यति परमार्थतः । तत्राद्ये विमर्शोऽपि  
शिवतत्त्वम्, द्वितीये विधेशता, मध्यमे तु रूपे ‘अहमिदम्’ इति समधृत-  
तुलापुटन्यायेन यो विमर्शः स सदाशिवनाथ ईश्वरभट्टारके च.....

(Vol. II, p. 196.)

## ३. अङ्गुलिद्वयन्याय

This simile, like the above, is used to illustrate two things in a state of equal importance. It occurs in the ‘ईश्वरप्रत्यभिज्ञाविमर्शिनी’ of अभिनवगुप्त in a discussion on the nature of memory. While

expounding the views of the Pūrvapakṣin, Abhinavagupta says :—

इह स्मृतिकाले सुस्मूर्षितोऽर्थो भवतु ध्वंसतां वा इति किमनेन ?  
अनुभवस्तावत् ध्वस्त इत्यत्र सर्वस्य अविवादः । तमेव चानुरुन्धाना स्मृति-  
ज्ञायते । तथा हि—स्मृतौ नार्यस्य प्रकाशः नाध्यवसायः, नापि अनुभवस्यार्थस्य  
चाङ्गुलिद्वयवत् नापि अनुभवविशिष्टस्यार्थस्य दण्डिवत् । (Vol. I, p. 60.)

The occurrence of this Nyāya, together with the दाण्डिन्याय helps to make its meaning clear. The latter, like the चक्रन्याय, illustrates two things of which one appears as subordinate to the other. 'अङ्गुलिद्वयन्याय' as the very name shows, is used to illustrate two things having equal importance just as two fingers in a hand are equal to each other in importance.

## १. सहभोजिनामेकपात्रन्याय

*The simile of one plate serving in turn many people dining together.* This serves to illustrate anything which fulfils many purposes *in succession*. Thus it is the opposite of the देहलीदीपन्याय, the simile of the lamp on the threshold illuminating two rooms at the same time. This Nyāya occurs in the note explaining on the word आवृत्ति of the ईश्वरप्रत्यभिज्ञाविमर्शिनी. Says the author of the note:—

देहलीर्दीपन्यायेन युगपदुपकारकत्वं तन्त्रत्वम् । सहभोजिनामेकपात्र-  
न्यायेन क्रमेणोपकारत्वमावृत्तित्वम् । (p. 22, Vol. I.)

(To be continued)

## A NOTE ON ŚRĪ VIRŪPĀKṢA.

BY

N. VENKATARAMANAYYA, M.A., PH. D.,

*Reader in Indian History, University of Madras.*

Śrī Virūpākṣa is the sign-manual of the emperors of Vijayanagara with which their inscriptions usually terminate. It is like the signature which every individual affixes to a letter he writes or a legal document which he executes. "The signature," says an ancient writer, "is the life of a letter."<sup>1</sup> The same thing may be said of a document also. The sign, Śrī Virūpākṣa, with which all the Vijayanagara grants, especially those engraved on the copper-plates, end, takes the place of the signature of the emperors.

Why did the emperors of Vijayanagara affix to their *dāna-śāsanas* and probably to other legal documents also, the name of the God Virūpākṣa and not their own? No particular attention has been paid to this question so far, and scholars have generally assumed that as God Virūpākṣa, the presiding deity of Hampi was also *kula-dēva* or the family deity of the Vijayanagara emperors, they adopted this method of signing their documents. The explanation, however, is hardly satisfactory. The family deity of the Saṅgas, Tuluvas and the early Āraṇṇika monarchs was Viṣṇu. Nevertheless, they did not change the sign-manual. Moreover, it was not usually the practice even of pious kings to substitute for their names, the name of the god whom they adored in their legal documents. The Emperor Harṣa, for instance, was a Buddhist, and yet he used to affix his own signature to his *dāna-śāsanas* and other documents, and not that of the Buddha. स्वहस्तो मम महाराजाधिराजस्य श्रीहर्षस्य is familiar to all students of Indian History. The Naiks of Ikṛi were very staunch Liṅgāyats; nevertheless they signed their documents with their own names, e.g., Śrī-Sadāśiva and Śrī Venkaṭādrī. Nowhere do we come across a king or a line of kings signing the state document with the name of a god, although this god was not, as it

---

1. Sumati.

happened in the case of the Saḷuvas, Tuḷuvas etc., the family deity.

Mr. C. R. Kṛṣṇamācārlu, the present Superintendent of Epigraphy, is the only scholar who bestowed some attention to this problem. In a very interesting paper which he contributed to the *Indian Antiquary*<sup>1</sup> some years ago, he discusses the sign manual of Vijayanagara rulers; but he does not make any attempt to explain its significance. However, he draws a very useful distinction between the gods of the king and the god of the state. Rāmacandra, Nṛsimha, Veṅkaṭeśa, Viṭṭhala etc. might become the favourite deities of the monarchs for the time being, but Śrī Virūpākṣa remained "the guardian God of the empire". "The Vijayanagara throne was still believed to be under the blessed guardianship of the wings of Virūpākṣa. The king on the throne neither could nor would dismiss Virūpākṣa from the place of veneration in his heart".<sup>2</sup> Therefore, "Virūpākṣa continued to be the city-god and the empire-god".<sup>3</sup>

The capital of every kingdom or empire should have had its own guardian deity. None but the emperors of Vijayanagara allowed the name of the guardian deity of their capital to take the place of their own names in signing their state papers and documents. Even at present, there are several minors with guardians; but no minor is ever permitted to affix the signature of his guardian to a letter or a document which he has to sign. The legal sense of the emperors of Vijayanagara cannot be said to have been inferior to our own. How then did they tolerate the continued existence of this absurdity? We do not believe that Virūpākṣa's guardianship of the city or the empire had anything to do with the sign-manual. The Śrī Virūpākṣa of the Vijayanagara documents should be regarded as a person belonging to the world of legal fictions whose signature was considered indispensable for legalising the state documents. The emperors of Vijayanagara were his agents holding a hereditary power of attorney, managing his affairs. It is only by an assumption of this kind that we can explain continuous use of the sign-manual by the emperors, although their personal faith had drawn some of them to the feet of gods other than Virūpākṣa.

---

1. I. A. XLIV. p. 219.

2. *Ibid.*

3. *Ibid.*

The assumption is not unjustifiable. The temple of Virūpākṣa had been in existence from very early times. The place became famous owing to the shrine of the god. And, according to an early tradition, Virūpākṣa wedded Pampā or Hampādevī.<sup>1</sup> Owing to the importance of the divine pair, the shrine became a coveted place of pilgrimage. Around the shrine sprang up a small hamlet which in course of time grew up into a township. It was appropriately named Hampe or Hampe-Virūpākṣam. The township belonged to Virūpākṣa and his wife. The sage Vidyāraṇya who was a staunch devotee of Virūpākṣa, was discovered by Harihara, according to tradition, in his temple.<sup>2</sup> Moreover, it is said that upon Vidyāraṇya's advice, Harihara made Hampe, which he transformed into Vidyānagara or Vijayanagara, his capital. But, as the township belonged to Virūpākṣa, Harihara could not hold it as his own. Therefore, he obtained, of course, through the agency of Vidyāraṇya, the hereditary right of managing the township, and the properties belonging to the god, on his behalf. He was managing the township not in his own right but a servant or steward of the god.

At the time when Harihara made Hampe his capital, his power and resources were not very great. He had to contend against many powerful enemies. On the north there were the Mussalmans, the enemies of his race and religion. On the west and the south, there was Ballāla III who had broken his lance on many a battlefield. And on the east there were several petty warlike chiefs who were busy carving out independent principalities for themselves, out of the dismembered empire of the Kākatīyas. Harihara and his brothers who were anxious to save South India from falling into the hands of the Muhammadans wanted men, and above all money. They could easily command the services of men provided they had money; but where could they get money from? It was the most important problem which they had to solve; and it was the sage Vidyāraṇya that solved the problem for the five brothers. Tradition has preserved this solution under a miraculous garb. At his request the goddess Durgā "for seven *ghaṭikās* showered gold on the land that was to become the site of the later Vijayanagara or Vidyānagara".<sup>3</sup>

---

1. Nellore Inscriptions; Butterworth and Vēṇugōpāla Chetty. C. P. 15.

2. *Ibid.*

3. I. A. XLIV. p. 219.

Shorn of its miraculous setting this statement reveals to us for the first time the source from which Harihara and Bukka derived the power not only to defeat their enemies but to conquer an extensive empire. It also explains the real cause for the extraordinary influence which Vidyāraṇya wielded over the first three emperors of Vijayanagar. What then was the solution which Vidyāraṇya offered? He placed the contents of the Śrībhaṇḍāra of Pampādevī and Virūpākṣa at the disposal of Harihara and Bukka, and commanded them to go and conquer the enemies of the Hindus, and to conquer everyone that might hamper them in their task. The gold which the goddess showered for seven ghaṭikās is no myth. She did shower it from her own treasury. Over the land which 'was to become the site of the later Vijayanagara or Vidyānagara'? Yes; a good part of the gold was invested in building the new city, and making it impregnable to the enemy. What was the object of Vidyāraṇya in thus placing the temple treasury at the disposal of Harihara and his brothers. It was with the noblest object that he took this step. He wanted to save from destruction the Hindu religion and culture as well as the temple of Pampā-Virūpākṣa, and several others of its kind.

The brothers went forth to conquer, and they prospered. They defeated the Mussalmans and drove them across the Kṛṣṇā. They subdued the petty chiefs in the east and extended their dominion until it reached the Bay of Bengal. And they destroyed the power of the Hoysalas and extended their territory to the west until it touched the Arabian sea. They could say with pardonable pride ten years after the foundation of the city of Vijayanagara that they conquered the whole earth from the eastern to the western ocean.

Who was the real owner of the vast empire which the five brothers had conquered within so short a time? Since they went forth to conquer with the money which belonged to the god Virūpākṣa and his spouse, they might be said in a very real sense to be the owners of the empire. This fact was recognized by all the emperors of Vijayanagara, and they did not dispute the right of the god. Therefore, whatever might be their personal faith, they dared not change the sign-manual; for they knew that they had no right to rule the kingdom except as the agents of the god. Whatever view they held about religion, they always signed the state documents with the name of Virūpākṣa, the real owner of the empire.

Moreover, the Pardao, the standard coin of the country bore the images of a god and a goddess. "The gold coin which they call pardas", says Barbosa, "is worth three hundred maravedis... Some of them have on one side Indian letters and on the other two figures of a man and a woman."<sup>1</sup> According to Nuniz the pardao "bears impressed on one side two images."<sup>2</sup> Sir Walter Elliot informs us that "the figures represent Śiva and his consort Pārvaṭī."<sup>3</sup> We should like to add that they represent Virūpākṣa and his consort, Pampādevī.

The emperors of Vijayanagara not only signed their documents with the signature Śrī Virūpākṣa, but they had the images of this god and his spouse Pampā engraved on the standard coin of the empire. They also made their gifts usually in the presence of the god himself. All these show that theoretically the empire belonged to the god, and they governed it only as his representatives.

Veṅkaṭa II deliberately changed the sign-manual. He substituted the name of Veṅkaṭeśa for that of Virūpākṣa. "Superstitions tradition", has it, "that the dynasty of Vijayanagara came to an end,"<sup>4</sup> as a consequence of this act. When Veṅkaṭa II deprived Virūpākṣa of his rights, the god is believed to have struck him and his successors down, and they rapidly fell from power.

What has been suggested in the foregoing paragraphs is not without a parallel. Take, for instance, the modern state of Travancore. The state in theory does not belong to the Rājā. It belongs to the god Śrī-Padmanābha of Anantaśayanam. The Rājā governs the state as an agent of the god. He calls himself Padmanābhādāsa, and conducts the administration of the estate as the god's agent.<sup>5</sup> The position of the emperor of Vijayanagara in relation to the temple of Virūpākṣa should have been similar to that of the Rājā of Travancore in relation to the temple of Padmanābha. Otherwise, it is extremely difficult to explain in a satisfactory manner, the sign-manual of the Vijayanagara emperors.

## BHAVASAMKRĀNTI SŪTRA.

RESTORED FROM THE TIBETAN VERSION WITH AN  
ENGLISH TRANSLATION.

BY

N. AYYASWAMI SASTRI, MYLAPORE.

Going through the chapter VI of Candrakīrti's *Madhyamakāvātāra*, I came across a long quotation from *Bhavasamkrānti Sūtra*. For a time, I was not able to get at further particulars regarding this *Bhavasamkrānti Sūtra*. On further investigation I came to understand that this *Sūtra* was among the Kandjour collection of Tibetan translations (Vol. XVII). The actual title of this book, as transliterated in the *sūtra*, is *āryabhavasamkrānita sūtra*. The word *samkrānita* being an ungrammatical form in Sanskrit language, I think it is an incorrect transliteration for *samkrānti*. This fact is also corroborated by further external evidence. In the Tandjour collection we come across another *Bhavasamkrānti* by one Nāgārjuna the title of which is correctly transliterated as we expected. The word *samkrānita* in the *Bhavasamkrānti Sūtra* referred to above is thus evidently a wrong transliteration of the word *Samkrānti*. A closer examination of the contents of Nāgārjuna's *Bhavasamkrānti* and its *Ṭikā* thereon by Maitreyanātha reveals that this book is so named for the reasons that it contains the salient features of the former *Bhavasamkrānti*. The addition of the word *madhyama* to the title of Nāgārjuna's work seems to have been made by Tibetan translators of later date apparently with a view to differentiate between these two works<sup>1</sup>. How the two *Bhavasamkrāntis* agree with each other will form the subject matter of a separate paper.

The authenticity of the *Bhavasamkrānti Sūtra* can be recognised from the evidence available in Candrakīrti's *Madhyama-*

---

1. The restoration of the Sanskrit text of Nāgārjuna's *Bhavasamkrānti* with Maitreyanātha's commentary thereon from Tibetan versions is being prepared by me and will be published with Tibetan versions in due course of time.

kāvatāra itself. An extensive prose section in the Madhyama-kāvatāra has been freely quoted from the present sūtra and this again agrees verbatim with a portion of Pitāputrasamāgama sūtra quoted in Śikṣāsamuccaya, as Prof. Poussin has pointed out. Moreover, two of the verses from the Bhava. sūtra are cited by Candrakīrti in his Prasannapadā without mentioning the source from which he has drawn them, but as the words of Lord Buddha (उक्तं हि भगवता). They are :—

न चक्षुः प्रेक्षते रूपं मनोधर्मान् वेत्ति च ।  
 एतत्तु परमं सत्यं यत्र लोको न गाहते ॥  
 सामग्रया दर्शनं यत्र प्रकाशयति नायकः ।  
 ग्राहोपचारभूमिं तां परमार्थस्य बुद्धिमान् ॥

(M. V. p. 120.)

The variation is, however, noticeable. The order of the verses in the present sūtra has been changed; the first coming after the second and the second being the first. According to Candrakīrti, therefore, the sūtra belongs to a class of sūtras which advocate the theory of Śūnyatā.

Going through the text of Bhavasamkrānti sūtra, we find two topics mainly dealt with:—the transitoriness of *karman* and its relation to rebirth. During the Lord Buddha's stay at Rājagṛha, Bimbisāra interviews him and puts the following question:—How is it that *karman*s which are momentary in their nature and cease to exist afterwards, present themselves before individual minds causing rebirth? If it is, that these *karman*s produce the desired effect through a mediatory *dharma* called *avipraṇāśa*, how can such a thing *avipraṇāśa* exist when everything in the world is one utter *Śūnya*.

Regarding the first question, Lord Buddha gives the following answer in his usual way, citing an illustration. In such a case, past actions appear before the mind's eye in the same way as we are able to remember dreams while we are conscious. We see a woman in our dreams. Do we not recall to our minds this and similar dreams in our waking state? Exactly the same things happen. Our past *karman*s appear before our minds in our last moment and we have rebirth. This rebirth is nothing more than a new sphere of conscious mood in one of

the six realms of rebirth wherein we enjoy the fruits of the past *karmas*.

As for the second question the Lord says: Everything in this world is void. *Karmas* in their turn are of the same nature. There is, therefore, no such thing as disappearance of actions. This non-disappearance we call *avipranāśa*<sup>1</sup>. Then the Buddha, in the next following seven verses, dwells upon the nature of the existing world and explains the nature of the Relative Truth and the Absolute Truth. Here ends the discourse.

The Tibetan transcription of this sūtra has been done by me from the Narthang Edition of the Kandjour collection preserved in the Adyar Library. Dr. Von Monen, the general Secretary of the Asiatic Society of Bengal, kindly compared my transcript with the manuscript of the same book belonging to the Library of the Society.

The original Sanskrit text of the sūtra, which is lost, has been restored from the Tibetan version and published 'in the following pages with an English translation. In doing so, the major portion of the prose and verse sections of the sūtra has been identified, either directly or indirectly, with the originals. We may thus, say, with some degree of certainty, that the original sūtra has been, in the main, recovered from oblivion.

---

1. This interpretation is given by Ārya Nāgārjuna. See his *Madhyamakakārikas* XVII. 21, and Candrakīrti's vṛtti thereon.

## RESTORED SANSKRIT TEXT.

## II

## TRANSLATION.

Adoration to all the Buddhas and Bodhisattvas.

1. Thus have I heard. The Blessed One (*i. e.* Lord Buddha) was once staying at the Bamboo-grove, called Kalantakanivāsa, which is situated in Rājagṛha, with a large assembly composed of Bhikṣus numbering two hundred and fifty and innumerable Bodhisattva Mahāsattvas. Thereupon, the Blessed One who was surrounded by many hundreds of thousands of followers, beholding ahead, preached Dharma and explained the Brahmācārya (celibacy) which is blessing in the beginning, blessing in the middle, blessing in the end, full of good significance, full of good letters and syllables, unmixed, quite perfect, quite pure and quite clean.

2. Then, Bimbisāra the king of Magadha an expert in arts, with all his royal pomp and grandeur and with all his royal forces, came out of Rājagṛha the great city and arrived at the Bamboo-grove where the Blessed One was staying. On arriving, he bowed at the feet of the Blessed One and walking around Him three times from left to right, stood in a corner. While standing there, Bimbisāra the king of Magadha, the expert in arts, asked the Blessed One thus: How, O Blessed One! does an action that has been done, long after its accumulation is checked and it has disappeared, present itself at the time of death

1. The following two verses are cited in the Madhyamakavṛtti p. 120 (उक्तं हि भगवता).

2. Tib. reads gdags-pahi-sa = प्रशस्तिभूमि

3. Tib. reads. तत्र

4. = Tib. dpogs-so.

and appear before the mind (*manas*); and how is there no annihilation (*avipranāśa*) of actions when everything is empty ?

3. The Blessed One replied to Bimbisāra the king of Magadha the expert in arts, as follows:—Take for example, O king! a man, who, while asleep, dreams that he was roving about with some beautiful young woman of a city. When he wakes up from sleep he may remember that young woman. What do you think, O king ? Does that woman exist in the dream ?

4. He said: No, Blessed One.

5. The Blessed One said : What do you think, O king ? Would that man be considered wise who would cling to that woman [who appeared] in his dream ?

6. He said: No, Blessed One. And why so ? Because the young woman in the dream does not exist at all; nor could she be got at; then how could there be any roving about with her ? And thus he becomes an object of failure and fatigue.

7. The Blessed One said : Even so, O king ! a foolish, untaught, worldling, when he sees beautiful forms, becomes attached to them; being attached to them, he begins to like them and after liking, he feels a passion for them; and feeling a passion, he performs the action that springs from the passion, indignation and ignorance, by means of body, speech and mind; and that action which is performed disappears. Disappearing, it does not go towards the east, nor south, nor west, nor north, nor up, nor down, nor to the intermediate points. But at a period later on, when the time of death comes in, and when the last consciousness disappears by the exhaustion of one's action of similar kind,<sup>1</sup> that action appears before the mind, as the young woman to a man who was asleep and was awakened from sleep. So, O king ! the last consciousness disappears and the first consciousness associated with rebirth is born either amongst gods or men, or demons, or in the hells or in the womb of beasts or amongst *pretas*. And immediately after this first consciousness disappears, O king ! a new series of thought belonging to that [first consciousness] arises where the experience of ripening of the act is to

1. तत्सभागस्य कर्मणः क्षयात्. सभाग = सदृश. See मध्य० वृत्ति p. 321.

6. But तत्सभागं कर्मन् is translated by C. Bendall and W. H. D. Rouse thus - "the action that is his share." See Śikṣāsamuccaya, English translation, p. 234.

be felt. There is, O king ! nothing that goes from this world to another; but death<sup>1</sup> (*cyuti*) and rebirth<sup>1</sup> (*upapatti*) take place. What is, O king! the disappearance of the last consciousness that is known as "death". What is the manifesting of the first consciousness that is known as "rebirth". The last consciousness, O king, when it ceases, does not go anywhere. The first consciousness, when it arises, does not come from anywhere. And why so? Because they have no reality. So, O king! the last consciousness is of itself empty, death of itself empty, action of itself empty, the first consciousness of itself empty, rebirth of itself empty. And the inexhaustibility of actions comes into play. Immediately after the disappearance of the first consciousness associated with rebirth, O king ! an uninterrupted new series of thought arises, where the experience of the ripening of the act is to be felt. So spoke the Blessed One. The Buddha (Sugata) the commander (Śāstā) having spoken in this way, also said as follows:—

8. All this is only a name and the name alone stands. There is nothing capable of speech apart from words.

9. By whatever particular names, particular things may be called, they [the things] do not exist in them [those names] indeed; this is what is known as thinghood (*dharmatā*) of all things (*dharma*).

10. Namehood is void of name, by name there is no name. Nameless are all things; but they are illuminated by names.

11. These things do not exist, but are born of imagination. That imagination is itself empty by which the empty things are discriminated.

12. That which is uttered by a man of correct perception that "the eye sees the form (*rūpa*) is called Relative Truth (*samvṛtisatya*) in the view of the world of false faith.

13. Where the Leader (Nāyaka = Buddha) teaches that the perception (*darśana*) arises by the aid of a concatenation of cause and conditions, the wise declare that it is the *upacārabhūmi* of the Absolute Truth.

14. The eye sees not the form and the mind knows not the things; this is the Absolute Truth unto which the world reaches not. Thus spoke the Blessed One.

---

1. च्युति and उपपत्ति in corresponding passages in Śikṣāsamuccaya are translated "rebirth" and "arising" respectively. But this is evidently an error.

15. Bimbisāra the king of Magadha, the expert in art those Bodhisattvas and Bhikṣus and the world comprising god men, demons and angels, being pleased, greatly praised the teaching of the Blessed One.

Here ends the Noble Bhavasamkrānti,  
a Mahāyāna Sūtra.

# SOME MINOR WORKS OF ŚRĪ CITSUKHĀCĀRYA.

BY

T. R. CHINTAMANI, M.A.,

*Senior Lecturer in Sanskrit, Madras University.*

Śrī Citsukhācārya was one of the greatest of Advaitins belonging to the 12th and 13th centuries of the Christian era. Several works of his have come down to us, though only two of them have seen the press. The following works of Citsukha are available at present:—

1. *Tattvapradīpikā*, a work printed already in the Nirṇaya-sagara Press, Bombay.
2. *Nyāyamakarandavyākhyā*, a commentary on the *Nyāyamakaranda* of Ānandabodha, published in the Chowkhamba Press, Benares.
3. *Brahmasūtrabhāṣyabhāvaprakāśikā*, a commentary on the *Bhāṣya* of Śrī Śaṅkara.\*
4. *Brahmasiddhivyākhyā—Abhiprāyaprakāśikā*, a commentary on the *Brahmasiddhi* of Maṇḍanamīśra.
5. *Pramāṇaratnamālavyākhyā—Sambandhokti*, a commentary on the *Pramāṇaratnamālā* of Ānandabodha.
6. *Adhikaraṇasaṅgati*.
7. *Adhikaraṇamañjarī*.
8. *Naiṣkarmyasiddhiṭīkā—Bhāvatattvaparakāśikā*, a commentary on the *Naiṣkarmyasiddhi*.
9. *Pañcapādikāvivarāṇa Vyākhyā—Bhāvadyotani*.

---

\* An edition of this work is under preparation by the author of this paper, under the auspices of the Madras University.

	See	G. O. Mss.	Library.	R. No.	3020
1.					3853
2.	"	"	"	"	3273
3.	"	"	"	"	3305
4.	"	"	"	"	"
5.	"	"	"	"	3271
6.	"	"	"	"	4305.
7.	"	"	"	"	

In all these works he tells us that he is the pupil of on Jñānottama. In the *Tattvapradīpikā* we are informed that this Jñānottama is Gauḍa, i.e., a native of Bengal. The following colophon occurring at the end of the *Tattvapradīpikā* is worthy of note in this connection:—

इति श्रीगौडेश्वराचार्यपरमहंसपरिव्राजकाचार्यज्ञानोत्तमपूज्यपादशिष्यश्री  
परमहंसपरिव्राजकाचार्यश्रीचित्सुखमुनिविरचितायां तत्त्वप्रदीपिकायां चतुर्थ  
परिच्छेदः ॥

The word Gauḍeśvarācārya leads to the conclusion that Jñānottama was a native of Bengal.

We know of another Jñānottama who is the author of a commentary on the *Naiṣkarmyasiddhi* of Sureśvara. But this Jñānottama is different from the teacher of Citsukha, for he is said to belong to the village Maṅgala in the Coladeśa.<sup>1</sup>

Regarding Jñānottama, the teacher of Citsukhācārya we have very little information, except what Citsukha and the commentator on the *Tattvapradīpikā* tell us. In the closing pages<sup>2</sup> of the *Tattvapradīpikā* we find—

एवं हि न्यायसुधायाम् आराध्यपादैरुपपादितं संसारमूलकारणाविद्य  
यद्यप्येकैव, तथापि तस्याः सन्त्येव बहव आकाराः ॥

And Pratyagrūpabhagavān, while commenting on this passage, remarks—

आराध्यपादाः स्वगुरवः ज्ञानसिद्धिकाराः । पादशब्दश्च पूजार्थः  
तत्प्रणीतं च वेदान्तप्रकरणं न्यायसुधा ॥

From these extracts it is clear that Jñānottama was the author of a work on Vedānta, *Nyāyasudhā* by name. It may be surmised that the word Jñānasiddhikāra means the author of a work by name Jñānasiddhi. The Jñānasiddhi and the *Nyāyasudhā* referred to here are otherwise unknown.

The line of sannyāsins beginning with Jñānottama occupies a very important place in the galaxy of Advaitic writers of the

1. See Introduction to the *Naiṣkarmya Siddhi*—Edited by Prof. M. Hiriyanna, B.S.S.

2. See Page 395 of the *Tattvapradīpikā*. N. S. P.

12th and 13th centuries. The names of those persons may be indicated in tabular form as follows:—

Jñānottama
(Pupil.) Citsukhācārya
(Pupil.) Sukhaprakāśa
(Pupil.) Ānandagiri.

The works of Jñānottama and Citsukha have been referred to just now. Sukhaprakāśa is the author of a work by name *Adhikaraṇaratnamālā*, a copy of which is deposited in the Government Oriental MSS. Library, Madras. (R. No. 2902.) It deals with the *adhikaraṇas* of the *Brahmasūtras* in a lucid form. Sukhaprakāśa has, in addition, commented upon the *Tattva-pradīpikā* and a copy of this work also is found in the Government Oriental MSS. Library, Madras. (R. No. 5203.) Ānandagiri, we all know, was the famous commentator on the works of Śrī Śaṅkarācārya. Fuller information regarding Ānandagiri is given in the Introduction to Ānandagiri's *Tarkasaṅgraha*, published in the Gaekwad Oriental Series.

Regarding the date of Citsukha there is not much difficulty. The date of Ānandagiri, as given by Mr. Tripāṭhī, B.A. the editor of the *Tarkasaṅgraha*, is fairly near the mark. He says on page xx of the introduction that Ānandagiri should have lived in the latter half of the 13th century. Calculating back from this date, one may conclude that the last quarter of the 12th century is the period of the literary activity of Citsukha.

In the following pages the *Adhikaraṇamañjarī*, a short compendium of the *adhikaraṇas* of the *Brahmasūtras*, is presented for the first time. The edition of this short treatise is based on two copies of the work found in the Oriental MSS. Library, Madras. (R. Nos. 1492 and 3305 designated A and B respectively.) The *Adhikaraṇamañjarī* will be followed by the other minor work the *Adhikaraṇasaṅgati* in a further issue of this Journal.

# HISTORY OF GRAMMATICAL THEORIES IN TAMIL AND THEIR RELATION TO THE GRAMMATICAL LITERATURE IN SANSKRIT.

BY

P. S. SUBRAHMANYA SASTRI, M.A., PH. D.,  
*Assistant Editor, Tamil Lexicon.*

(Continued from page 195 of Vol. V.)

Since the 11 sounds  $\dot{u}$ ,  $\ddot{u}$ ,  $\eta$ ,  $n$ ,  $m$ ,  $\eta$ ,  $y$ ,  $l$ ,  $v$ ,  $\dot{l}$  and  $\&$  can come as *orṛaḷapeṭai* after one short vowel or two short vowels, in the middle of words in the case of all and at the end in the case of all except  $\&$ , the number of *orṛaḷapeṭai* is  $11 \times 4 - 2 = 42^1$ . Since *kurṛiyal-ikaram* takes the place of *kurṛiyal-ukaram* when the latter is followed by 'y' in sandhi and there are 36 *kurṛiyal-ukaram* and the 'i' in the particle 'miyā' in such words as *kēṇmiyā* is *kurṛiyal-ikaram*, its number is  $36 + 1 = 37^2$ . Since *kurṛiyal-ukaram* may be preceded by one of the 7 long vowels alone, two or more vowels except 'au' (which are therefore 11 in number), *āytam*, 6 voiceless consonants, 6 nasals and all semi-vowels except 'v' (which are therefore 5 in number), its number is  $7 + 11 + 1 + 6 + 6 + 5 = 36^3$ . Since *aikāra-k-kurukkam* may be found at the beginning, the middle and the end of words, its number is 34. Since *aukāra-k-kurukkam* can be had only at the beginning of words, its number is only 15. Since *makara-k-kurukkam* can be had after  $\eta$  and  $\eta$  and before  $v$ , as in *maruṇṇ*, *pōṇṇ*, *taruṇ-vaḷarav*, its number is 36. Since *āytam* may be

1. *Nā-ñā-ṇa na-ma-na va-ya-la-ḷa v-āytam*  
*Alapāṇ kuril-ṇai kurir-kēl-iṭṭai-katai*  
*Mikālē vararin kuri-y-ām vērē.* (Ibid. 92.)
2. *Yakaram vura-k-kura ḷ-u-t-tiri y-ikaramum*  
*Acai-c-col miyū-v-i n-ikaram-ṇi kuriya.* (Ibid. 93.)
3. *Neṭṭiḷ ḷ-āyta m-uṇir-vuḷi meli-y-iṭai*  
*Toṭar-mali y-iṭuti vaṇmai-y-ū r-ukaram*  
*Aḷ-kum piṇamēl toṭara-v-um peṇum-ē.* (Ibid. 94.)
- 4 & 5. *Taṇ-cuṭ ḷ-aḷapoḷi y-ai-mmū vaḷi-y-um*  
*Nai-y-u m-au-v-u mutal-aṇ ṇākum.* (Ibid. 95.)
6. *Nā-ṇa-muṇṇum vaḷ. k-āṇ micaiyu-ma-k kurukum.* (Ibid. 96.)

substituted for *l* or *ḷ* in sandhi, as in *al + tiṇai = aḥṇai* and *mul + tītū = muḥṭītū* and its *mātrā* is  $\frac{1}{2}$  (according to him), the number of *āyta-k-kurukkam* is 21.

Nacciṇārkkiniyar repeats under Tol. E. 1 the opinion of Iḷampūraṇar.

The author of *Ilakkaṇaviḷakkam* mentions that the secondary sounds are 240 in number consisting of *kurriyal-ikaram*, *kurriyal-ukaram*, *āyтам*, 216 *uyirmey*, 7 *uyir-aḷapeṭai*, 11 *orṟaḷapeṭai*, shortened 'ai' and shortened 'au' and *makara-k-kurukkam* and condemns Nannūlār and says that *āyтам* never reduces itself to  $\frac{1}{2}$  of a *mātrā*, and that other sounds like *uyir-aḷapeṭai*, etc., except *uyir-mey* remain the same, whether they stand at the beginning, the middle or the end of words and that therefore the number 369 mentioned by Nannūlār cannot stand<sup>2</sup>.

Civañña-muṇivar, on the other hand, says that there is no purpose served by taking *uyirmey* as *cārpeluttū*, that *uyiraḷapeṭai* is only a short vowel added to the previous long vowel to lengthen its *mātrā*, that *orṟaḷapeṭai* is only a consonant that is added for the sake of lengthening the *mātrā*, and shortened 'ai' shortened 'au' and *makara-k-kurukkam* are produced at the same part of the vocal organs as 'ai', 'au' and 'm' respectively, but vary only in their quantity. Besides one cannot say that *kurriyal-ikaram* and *kurriyal-ukaram* are shortened 'i' and shortened 'u' in the same way as shortened 'ai' and shortened 'au'. For, had it been the opinion of Tolkāppiyaṇār, he would have designated them as *kurrikaram* and *kurrukaram* and not as *kurriyal-ikaram* and *kurriyal-ukaram*, and would not have indicated a separate symbol for them as he now does in Tol. E. 2.<sup>3</sup>

1. *La-ḷa-v-ir ṇ-iyaiṇṇā m-āyta m-a ∴ kum.* (Ibid. 97.)

2. *Āyata-k-kurukkam-onṇu inṇeṇatum... uyirmey-yolittū ṇaiyavellām iṇṇeṇṇumaiyāṇ-onṇu eluttu-vēṇṇumaiyāṇ aṇṇaṇam paḷkāmaiyyir cārpeluttū munnūṇṇarupattoṇpatām eṇṇal niraṇṇpātū.*

3. *Iṇi immūṇṇumē-y-aṇṇi uyirmey mutaliyavayyāyūṇ cārpeluttenṇārum uḷarāḷ v-eṇṇi, —... uyir-mey eṇṇapaṇṇai... orṇumaiyayam-parṇi onṇu eṇṇapaṇṇāl oru payaṇ-iṇṇumaiyāṇum... aḷapeṭai cārpeluttena vēṇṇāmai muṇṇar-k-kāṭṭappaṭṭatākalāṇum, aikāra-k-kurukka mutaliyāṇa... vēṇṇeluttenā p-paṭṭā-v-ākalāṇum vaṇṇūlārum... uyir-mey, uyir-aḷapeṭai, aikāra-k-kurukkam mutaliya eluttukkaḷai-cāritū tirintama-parṇi vēṇṇeluttena yāṇṇu collūmaiyaṇum atu poruntūtu eṇa marukka.* (T. M. V. 29—30).

I totally agree with Civañāṇa-muṇivar. I may add that the definition given to *cārpeḷuttu* by the commentators on Nannūḷ to include vowel-consonants does not at all hold good. (Cf. 1.221. *supra*.) They say '*tammoṭu tām cārntatū*'. In the vowel-consonant '*ka*', we may say that '*k*' is in the company of '*a*' or '*a*' is in the company of '*k*'. Hence either of the two may be said to be *cārpeḷuttu* with respect to the other. How can the whole be called *cārpeḷuttu*? Besides it may be noted here that in many places the sounds '*ka*', '*ca*', '*ṭa*', etc. are used to represent only the consonantal sound '*k*', '*c*', '*ṭ*', etc. to enable the hearer to understand what consonant is pronounced and Tolkāppiyaṇār himself says so in the sūtra *Meyyi n-iyakka m-akaramoṭu civaṇum*. E. 46. He has also used the symbols '*ka*' (க), '*ca*' (ச), etc. to represent '*k*' (க), '*c*' (ச), etc.<sup>1</sup>; besides for the purpose of representing the sounds '*kā*', '*ki*', '*kī*', etc., the symbols denoting '*ā*', '*i*', '*ī*' etc. are added to the symbol denoting '*ka*' and not to the symbol denoting '*k*'. These three points, it seems to me, may have led the author of Nēminātam, Nannūḷār and others to mistake *uyirmey* for a unitary sound. As regards *aḷapeṭai* and shortened '*ai*' Tolkāppiyaṇār himself has mentioned them in the sūtras,

*Mūvaḷa p-icaitta l-ōr-eḷut t-iṇṇē*. (Tol. E. 5.)

*Niṭṭam vēṇṭi n-a-v-v-aḷa p-uṭaiya*

*Kūṭṭi y-eḷūuta l-enmaṇār pulavar*. (ibid. 6.)

and

*Ōr-aḷa p-āku m-iṭaṇumā r-uṇṭē*

*Tēruṇ kālai moli-vayi n-āṇa*. (ibid. 57.)

but has not included them among secondary sounds.

1.223. *Classification of secondary sounds*:—The secondary sounds are not classified by Tolkāppiyaṇār either as vowels or as consonants, or as neither. But according to Nannūḷār and the later grammarians except Civañāṇa-muṇivar they may be classified into vowel secondary sounds, consonant secondary sounds and secondary sounds that are neither. This point will be dealt with at greater length in 1.348, 1.3481, 1.3482, 1.3483, 1.3484, 1.47 & 1.5.

1. Cf. *Valleḷut t-eṇpa ka-ca ṭa ta-pa-ra*. (Tol. E. 19.)

*Melleḷut t-eṇpa ṇa-ṇa-ṇa na-ma-ṇa*. (Ibid. 20.)

*Itai-y-eḷut t-eṇpa ya-ra-la va-la-la*. (Ibid. 21.)

## 1.3. VOWELS: 1.31. CLASSIFICATION.

1.311. *Ancient period*:—(Tolkāppiyaṇār says that) there are 12 vowels from 'a' to 'au' which may be classified thus:

Primary vowels:  $\left\{ \begin{array}{l} \text{Simple vowels: } \left\{ \begin{array}{l} \text{Short: } a, i, u, e \text{ \& } o \\ \text{Long: } \bar{a}, \bar{i}, \bar{u}, \bar{e} \text{ \& } \bar{o} \end{array} \right. \\ \text{Diphthongs}^1 \quad \quad \quad ai \text{ and } au \end{array} \right.$

Secondary vowels;  $\dot{i}$  (shortened  $i$ ) and  $\dot{u}$  (shortened  $u$ ).<sup>2</sup>

1.312. *Medieval period*:—The primary vowels are the same as those in the ancient period; but the secondary vowels are 'i', 'u', 'ai' (shortened  $ai$ ) and 'au' (shortened  $au$ ) and  $uyirala$   $\dot{a}$ ,  $\bar{a}$ ,  $\bar{i}$ ,  $\bar{u}$ ,  $\bar{e}$ ,  $au$ ,  $\bar{o}$  and  $auu$ .

1.313. *Modern period*:—According to Ilakkāṇa-ṇaṇṇam and Tonnūl-ṇaṇṇam the primary vowels are the same as those of the ancient period and the secondary ones as those of the medieval period; but according to Civañāṇa-muṇivar's Tolkāppiya-mutaṅg-cūttira-viruttu both the primary and the secondary vowels are the same as those of the ancient period.

N.B.—The parallelism between

'Aukāra viṇuvāy-ṇaṇṇam  $\dot{p}$  paṇṇīr-eluttum  
uyir-eṇa molīṇa'. (Tol. E. 8.)

and

'Akārādyāḥ svarā jñēyāḥ  
aukārāntāḥ caturdaśa'. (B. N. p. 170, 8.)

is worth noting; but we cannot say definitely whether the extant text of Nāṭya Śāstra is anterior or posterior to Tolkāppiyam.

1. He does not mention the name diphthongs, but suggests it in the sūtras

*Akara ikara m-aikāra m-ākum.* (Tol. E. 54.)

*Akara ukara m-aukāra m-ākum.* (Ibid. 55.)

2. He does not mention 'i' and 'u' as vowels, though, for practical purposes, they may be taken as such.

1.32. *Quantity of vowels*:—Short vowels have one *mātrā*,<sup>1</sup> long vowels and diphthongs two<sup>2</sup> and secondary vowels half<sup>3</sup>. The shortened ‘*ai*’ and the shortened ‘*au*’ have one *mātrā* according to Tolkāppiyānār<sup>4</sup> and one and a half according to Peruntēvaṇār<sup>5</sup> and Kuṇavīra-panṭitar<sup>6</sup>; but only one *mātrā* according to Naṇṇūlār<sup>7</sup> and the later grammarians.<sup>8</sup>

1.33. *Quality of vowels*:—All vowels are open sounds, as is seen from the statement ‘*añkāntiyalum*’ in the sūtra

‘*Avaṛṇuḷ*

*A a a-y-iraṇ t-añkāntiyalum*’ (Tol. E. 86) and

‘*avaṛṇōraṇṇa*’ in the sūtra,

*I-i e-ē ai-y-eṇa v-icaikkum*

*A-p-pa l-aintu m-avaṛṇō r-aṇṇa.*

*Avaitām,*

*Aṇ-paṇ mutanā viliṇp-uṇa l-uṭaiya.*’ (ibid. 86.)

and ‘*italkucintiyalum*’ in the sūtra,

‘*I-ū o-ō au-v-eṇa v-icaikkum*

*A-p-pa l-aintu m-italkuvuṇ t-iyalum.*’ (ibid. 87.)

All the later grammarians agree with Tolkāppiyānār in this point.

1. *Avaṛṇuḷ*

*A i u*

*E o eṇu m-appū l-aintum*

*Ōraḷa picaikkum kuṛṇṇuḷ t-eṇpa.* (Tol. E. 3.)

2. *Ā i ā*

*Ē ai*

*Ō au eṇu m-appū l-ēlum*

*Ōraḷa picaikku neṭṭeḷut t-eṇpa.* (Ibid. 4.)

3. *Avoiva nilaiyu m-ēṇai mūṇṇē.* (Ibid. 12.)

4. *Ōraḷa paku m-iṭaṇum-ā r-uṇṇē*

*Toruṇ kalai moḷivayi ṇ-āṇa.* (Ibid. 57.)

5. *Akara aukara-k kuṛukkaikaḷ oṇṇarai mattirai peṇum.* (V. C. 5 Comm.)

6. *Kuriyettika l-onṇuṇṇu....*

.....

.....

*Ai-yau v-aḷaṇṇu rai.* (N. N. E. 5.)

7. *Mūṇṇu uyir aḷaḷu iraṇṭām neṭil oṇṇē*

*Kuṇṇiḷḷu ai au-k kuṛukkam oṇṇaḷaḷu*

.....(Na. 99.)

8. *Neṭil-iraṇ t-ai-y-au-k kuṛukkan kuṇṇi-onṇu*

.....(I. V. 24.)

1.34. *Treatment of each vowel sound.*

1.341. 'a' : 1.3411. Dr. Caldwell says in p. 133 "In Tamil 'a' is the heaviest of all the simple vowels and therefore the most liable to change. It evinces a tendency to be weakened into 'e' (Cf. Skt. *balam*—strength, with Tamil *belam*: Skt. *japa*—prayer, with Tamil *śebam*. See also the pronoun of the first person)".

It seems that the change of 'a' to 'e' in the above *tadbhava* words is not due so much to the heaviness of 'a' as to the peculiar way in which 'g', 'j', 'ḍ', 'd' and 'b', the third plosive consonant of each *varga* in Sanskrit is pronounced. They are pronounced as 'gə', 'jə', 'ḍə', 'də' and 'bə'. When the Tamilians first learnt these sounds which were new to them, they had a tendency to write *belam* for *balam* though later on they began to adopt both the forms *palam* and *pelam*. This may be clearly seen from the following table:

Sanskrit	Tamil
<i>Gaṅgāṭra</i>	<i>keṅkāṭṭiram</i> <sup>1</sup>
<i>Garuḍa</i>	<i>keluḷam</i> <sup>2</sup>
<i>Galāyus</i>	<i>ketāyū</i> <sup>3</sup>
<i>Gaja</i>	<i>kecam</i> <sup>4</sup>
<i>Japa</i>	<i>cepan</i> <sup>5</sup>
<i>Bahuvrīhi</i>	<i>vekuviriyam</i> <sup>6</sup> .

But at the same time they use the same sounds without change also.

Sanskrit	Tamil
<i>Gagana</i>	<i>kukāṇam</i> <sup>7</sup>

1. *Keṅkā-ṭṭirattu-t-tācam*. (P. K. 33, 220.)  
(The country on the banks of the Ganges.)
2. *Kelulam nanta neṇṇaḍ*. (C. C. 1926.)  
(Whether Nanda is Garuḍa.)
3. *Camara purintatam-rāṇum ketāyū v-āyiyāṇ*. (V. P. 405, 37.)  
(Even he who engaged himself in battle lost his life.)
4. *Keca turaka mutalūṇa caturāṅkam*. (Tā. 33, 6.)  
(The four limbs consisting of elephants, horses, etc.)
5. *Cepan t-tam tānam*. (C. P. 319, 2.)  
(Meditation, penance and gifts.)
6. *Vekuviriyam*. (Pi. 24.)  
(Possessive compound.)
7. *Kakana-rāmarakal* (Ka. P. i. 493, 13.)  
(Residents of celestial regions.)

Sanskrit	Tamil
<i>Gaṅgā</i>	<i>kaṅkai</i> <sup>1</sup>
<i>Gaja</i>	<i>kacam</i> <sup>2</sup> .

The same change does not generally take place when 'a' is preceded in Sanskrit by *kh* or *gh*, *ch* or *jh*, *dh*, *ph* or *bh*.

Sanskrit	Tamil
<i>Khadyōta</i>	<i>kaccōtam</i> <sup>3</sup>
<i>Ghaṭa</i>	<i>kaṭam</i> <sup>4</sup>
<i>Chala</i>	<i>calam</i> <sup>5</sup>
<i>Jhaṭiti</i>	<i>caṭiti</i> <sup>6</sup>
<i>Dharaṇi</i>	<i>tarāṇi</i> <sup>7</sup>
<i>Phala</i>	<i>paḷam</i> <sup>8</sup>
<i>Bhaya</i>	<i>payam</i> <sup>9</sup> .

Hence we may safely infer that 'a' generally changes to 'e' when it is preceded by the third consonant of each varga and not by the second or the fourth. Besides such a change is not seen in pure Tamil words.

1.3412. Dr. Caldwell further observes that "'a' has almost entirely disappeared from the end of nouns in Tamil and has been succeeded by 'u' or 'ei'. Where final 'a' changes into 'ei' in Tamil, it generally changes into 'e' in Canarese... In Telugu and especially in Malayāḷam, this vowel is less subject to changes'".

- 
1. *Kaṅkai kaṅkai yeṇṇa vācakattālē*. (P. A. T. 80, 1.)  
(With the words of the Ganges, the Ganges.)
  2. *Kaca-rata-turaka-mū-k-kaṭal*. (Kampar, B. 149, 22.)  
(The vast sea of elephants, chariots and horses.)
  3. *Kaccōtam eṇṇi karuti*. (Ka. P. i. 569, 43.)  
(Having taken it to be glow-worm.)
  4. *Kaṭamuṇi-cēraḷōṭum*. (Ka. P. i. 133, 65.)  
(With the arrival of the pot-sage Agastya.)
  5. *Calā-p-paṭaiyūṇ iraviṇṇ rākkīyat-ellūm*. (Pari. 43, 57.)  
(All the on-slaughters of the Indian Cupid at nights.)
  6. *Caṭiti vīṇṇi*. (C. P. 84, 20.)  
(Having fallen soon.)
  7. *Taraṇi-mēṇṇ rīlakam-aṇṇāy*. (C. C. 1178.)  
(You are like a *tilka* on earth.)
  8. *Pala-v-iṇṇ paḷam*. (P. N. 109, 5.)  
(Jack-fruit)
  9. *Payattiṇṇōṭuṇ cella*. (T. T. P. 206, 21.)  
(To go with fear.)

No doubt the nouns that end in 'a' in Tamil are rare. The few cases where they end in 'a' are *palla*, *pala*, *cila*, *uḷḷa*, *illa*, etc.<sup>1</sup> But whether the 'a' that stood at the end of words was changed to 'u' or 'ei' deserves careful examination. Because Telugu and Malayāḷam have 'a' at the end where Tamil has 'ai' and Canarese 'e', as is seen from the following table, he seems to conclude that 'a' was the final sound at the end of such words in the parent Dravidian Language.

Tamil	Telugu	Malayāḷam	Canarese
<i>kaṭai</i>	<i>kaḍa</i>	<i>kaḍa</i>	<i>kaḍe</i>
<i>karai</i>	<i>kara</i>	<i>kara</i>	<i>kare</i>
<i>kaḷai</i>		<i>kaḷa</i>	<i>kaḷe</i>
<i>kaṛai</i>	<i>kara</i>	<i>kaṛa</i>	<i>kaṛe</i>

But considering the statement of Dr. Caldwell, that "Tamil being probably the earliest cultivated of all the Dravidian idioms, the most copious, and that which contains the largest portion and the richest variety of indubitably ancient forms, it is deservedly placed at the head of the list", (C. D. G. p. 6.), and considering the fact that words ending in 'ai' are found in Tolkāppiyam (Cf. *avai-y-vai y-eṇa varūṁ peyarum*...Tol. Col. 167) and that it is more natural for 'ai' to be lightened to 'e' (as is found even now in spoken Tamil *yānai* as *yāne*, *karai* as *kare*, etc.) and later to 'a' as Tolkāppiyaṇār says that 'ai' may be changed to 'ay'<sup>2</sup>, the 'y' of which may afterwards be dropped, is it not more reasonable to assume that the parent Dravidian language had 'ai' at the end of such words instead of 'a'? But in the medieval period 'a' before the palatal explosives 'c' and 'ñ' and semi-vowel 'y' in the middle of words had a tendency to change to 'ai' mostly in literary works perhaps by the influence of prosody. Cf. *araican* for *aracan* in *kali-araiṣaṇ* (Ep. I, Vol. XVII, Pt. VII, V. G. line 90), *maiñcu* for *mañcu*, *maiyaḷ* for *mayal*, etc.<sup>3</sup>. Then through analogy 'ai' was substituted for 'a' even before non-palatal sounds. Cf. *paḷaimai*, *iḷaimai*, for *paḷamai* and *iḷamai* respectively. Hence Dr. Caldwell's statement that 'a' is most liable to change may apply to a certain

1. Cf. *Palla pala-cila v-eṇṇum peyarum*  
*Uḷḷa v-illa v-eṇṇum peyarum*  
.....(Tol. Col. 168.)
2. *Akara-t t-impar yakara-p puḷḷiyum*  
*Ai-ye neṭuñ-ciṇṇai mey-pera-t iḍṇṇum*. (Tol. E. 56.)
3. *A ai mutal-iṭai y-okkuñ ca-ñā-ya-muṇ*. (Na. 123.)

extent only in the medieval period and in the modern period. Cf. *caritai* for Skt. *carita*.

1.3413. Besides it may be interesting to note that the Tamil pronunciation of 'a' may have influenced the South Indians to pronounce the Sanskrit 'a' at the end of words like *paśya*, *vada*, *gaccha*, etc. as an open vowel though it is a close one according to P. A. 8.4.68 and M.B.i.15.14 and it is still pronounced in North India as such.

1.34111. 'Ā' : 1.34111. The statement of Dr. Caldwell that 'ā' is formed in Tamil by the coalescence of two short a's<sup>1</sup> is quite against the genius of the Tamil language. This is one of the points where Tamil differs generally from Sanskrit. If two short a's come together in Tamil as *pala* + *aṛam*, an intervocalic 'v' is generally inserted between them as *palavaṛam* and they can never coalesce into 'ā'.

1.34112. Again he says that 'ā' becomes poetically 'ō'.<sup>2</sup> This existed even in the ancient period and is supported by Tolkāppiyam<sup>3</sup>. But he says that *viṇṇavar* becomes *viṇṇōr*. This need not be. A personal noun *viṇṇār* may be formed by adding the plural suffix 'ār'<sup>4</sup> to the noun *viṇ* and 'ō' may be substituted for 'ā'<sup>5</sup> in the same way as the final 'a' in Sanskrit is pronounced as 'o' by Bengalis at the present day. Cf. *villōṇ* for *villāṇ*; and *nallōr* for *nallār* in the stanza.

*villōṇ kālaṇa kaḷalē...nallōr yār kol-aḷiyar tāmē.* (Ku. T. 7.)

1.34113. He then says that final 'ā' of Sanskrit feminine abstracts becomes 'ai' in Tamil. This may be accepted as a general rule though modern writers do not strictly adhere to it.<sup>6</sup>

1.342. 'I'. This is inserted when Sanskrit words having conjunct consonants, one of which is generally 'y', 'r' or 'l', are Tamilised. Cf. *paṭṭiyam*, *ilakkiyam*, *vāṭṭiyam* *paṭṭiram*,

1. & 2. C. D. G. 133.

3. *Ā-v-ō v-ākum peyarum-ā r-uḷavē*  
*Ā-y-iṭa ṇ-aṛital ceyyul i-uḷḷē.* (Tol. Col. 195.)

4. *Ar ār pa-eṇa varāu mūṇṇum*  
*Pallōr maruṅkiṇṇ paṭarkkai-c collē.* (Ibid. 206.)

5. *Pāl-aṇi maraṇi ṇ-animū v-iṇṇum*  
*Ā-v-ō v-ākuṇ ceyyu i-uḷḷē.* (Ibid. 211.)

6. Cf. *anukampam* for Skt. *anukampā* in 'anukampam....uṭai-  
*yarē ciṇantār.* (Civa. pala. 39.)

(Great are they who have compassion.)

*cukkilaṃ* for Skt. *pathya*, *lakṣya*, *vādyā*, *patra* and *śukla*<sup>1</sup>. In ancient period this is substituted for a final 'y'. Cf. *nāi* (नै) for *nāy*<sup>2</sup>.

1.3421. 'Ī'. The final 'ī' in *nī* is shortened when case-suffixes are added to it<sup>3</sup>.

1.343. 'U'. Dr. Caldwell says that "u is of all vowels the weakest and lightest and is largely used especially at the end of words for euphonic purposes or as a help to enunciation. The Tamil rule with regard to the addition of 'u' to words which end in a consonant is that in words which end in any hard or surd consonant, viz., *k*, *ch*, *t*, *ṭ* or *p*, or in the hard rough *r* which is peculiar to these languages, the hard consonant shall be followed by 'u' in consequence of its being impossible for Tamilian organs of speech to pronounce those letters without the help of a succeeding vowel. In most instances this enunciative 'u' is not merely short but so very short that its quantity is determined by grammarians to be equal only to a fourth of the quantity of a long vowel.... It often happens (though it is not an invariable rule) that the final surd to which enunciative 'u' has been appended, is doubled apparently for the purpose of furnishing a fulcrum for the support of the appended vowel. Thus the Sanskrit *vāk* becomes *vākku*. The rule is further extended in Tamil so as to apply to the final consonants of syllables as well as to those of words. If a syllable, though in the middle of a word, terminates in one of the hard consonants above mentioned and if the initial consonant of the succeeding syllable is one which cannot be assimilated to it, the final consonant is doubled and 'u' is affixed. Thus Skt. *advaita* becomes in Tamil *attuvaida*".

Here three points are to be noted:—(1) The rule stated above holds good only in the case of *tadbhava* words (i.e.) words tamilised from Sanskrit; for no pure Tamil word can have according to the Tamil grammarians, *k*, *c*, *t*, *ṭ*, *p* or *r* as the final

- 
1. *Kūṭṭeluttin-piṇ ya-ra-la-k-kaṭṭṇṇiṇ kūṭṭitaiyē*  
*Ōṭṭeluttāka-p perum-or-ikāram*.... (V. Tat. 8.)
  2. *Ikara yakara m-iruti viravum*. (Tol. E. 58.)
  3. *Nī-y-e m-oru-peyar neṭu-mutal kuṟukum*  
*Avayi n-akara m-orrā kum-m-ē*. (Ibid. 180.)

member<sup>1</sup>. (2) The 'u' that is added at the end of such words have, in the opinion of the Tamil grammarians, for their quantity one mātrā<sup>2</sup> and not half a mātrā as stated by Dr. Caldwell; for this 'u' does not play the same part in sandhi as 'ū' (*kurriyal-ukaram*) at the end of pure Tamil words:—*vāḱku* (*tadbhava* o *vāḱ*) + *iṅkē* becomes *vāḱku-v-iṅkē*; while *nāḱku* (pure Tamil word) + *iṅkē* becomes *nāḱkūiṅkē*, the intervocalic 'v' being inserted in the former case and 'ū' being dropped in the latter case<sup>3</sup>. (3) The addition of 'u' at the end of a syllable under the conditions stated above has certain limitations. It cannot hold good where there are two or more conjunct consonants. For instance, the Sanskrit word *plutākṣara* is tamilised into *pulutākkaram* and not *pulutāḱṣaram*. Hence the same law may be modified thus:—wherever in the middle of a word two or more conjunct consonants which can not be assimilated to each other appear, the intervocalic 'i' (*vyakta* into *viyattam*) or 'u' (*pluta* into *pulutam*) is inserted since the genius of the Tamil language is to minimise the conjunct consonant. 'U' alone is not inserted, but 'i' also is inserted; this is generally determined by the consonants that precede and those that follow. This point is clearly stated in *Vīracōliyam* and *Nannūl*, the grammars of the medieval period<sup>4</sup>. *Vīracōliyam* speaks of the

1. *Na-na-na-ma na-ya-ra la va-la-la-v-eṇṇum*  
*Aṇ-ṇaṇ-ṇe ṇuṇṇe ṇuṇṇe y-ṇuṇṇe*. (Ibid. 78.)

2. *Ētu, tātu eṇṇum vaṭa-moli-y-ṇuṇṇe-y-ukaramum... kuṇṇu-ki-y-icattal-vēṇṇum... aṇṇaṇṇam icaiyāmaiṇṇu... kuṇṇi-yaḱ-ukaram tamīl-c-cirappēluttākalṇ vaṭamoliṇṇ vārātāyirṇu*. (T. M. V. 28.)

3. But it must be noted that the final 'u', whether at the end of pure Tamil words or *tadbhava* words or *tatsama* words, is now pronounced as if its 'ū', though grammars sanction it only in certain cases. This is a clear case where *false analogy* has played its part to the full; for instance, the final 'u' in 'itu' must have one mātrā and must be pronounced as 'u', but it is now pronounced as 'ū' though it is quite against the rules of grammar.

4. *Kūṭṭēluttuṇ-pin ya-ra-la-k-katōṇṇiṇṇiṇṇ kūṭṭiṇṇaiyē*  
*Ōṭṭēluttāka-p ṇeṇṇum-or-ikāram va-v-vu-k-k-or-u-v-v-ām*  
*Miṭṭēluttu-t-tamī l-allaṇa-pōm-vēṇṇu tēya-c-collṇ*  
*Māṭṭēluttum-m-ita ṇāl-aṇi-maṇṇai vikāratṭiṇṇē*. (V. Tat. 8.)  
*Iṇaintiṇṇai kālai ya-ra-la-k-k-ikaram-um*  
*Ma v-va-k-k-ukaram-um naḱara-k-k-akaram-um*  
*Micai-varum ra-v-vali y-u-v-vu m-ām ṇiṇṇa*. (Na. 149.)

insertion of 'i' and 'u', while Nannūl speaks of that of 'a' also as in *arataṇṇam*, the *laddhava* of Sanskrit *ratna*<sup>1</sup>, which is seen in the following sentence,

'*arataṇṇak kaṭaca viyaṇ karam*' (T. P. kaṭavuḷ, 3)

(Big hand holding a pot made of gems.)

1.3431. 'Ū'. Ū, as Dr. Caldwell says, is sufficiently persistent.

1.344. 'E' & 'O'. These two sounds, Dr. Caldwell says, are not found in Sanskrit. His statement is almost true; but Patañjali in his *Mahābhāṣya* says that 'e' and 'o' are not generally found in Sanskrit, but find a place in the *Sātyamugri* and *Rāṇāyaṇiya Śākhās* of the *Sāma Vēda*<sup>2</sup>. The same point is noted in *Tolkappiya-muṭar-cūttira-virutti*<sup>3</sup>.

M. J. Vinson says that 'e' and 'o' are always preceded by 'y' & 'a' respectively. This is true in the Tamil districts of India; but in Jaffna, I hear that it is not so<sup>4</sup>.

1.345. 'Ē' and 'Ō'. Dr. Caldwell seems to think like the Tamil grammarians of the modern period that these two sounds are the same as are found in Sanskrit. The author of *Pirayōka-vivekam* says in his commentary under the 5th sūtra '*akara v-ikaram-e kārām-akum*' (a and i become ē) and '*akara v-ukaram-ōkārām-ākum*' (a and u become ō) and calls them *canti-y-akkaram*. *Ciranāṇi-munivā* also says so.<sup>5</sup> But it seems to me that they are entirely different; for the Sanskrit 'ē' and 'ō' are diphthongs in their origin wherever they represent the Indo-Germanic tauto-syllabic *ai*, *ei* and *oi*, and tauto-syllabic *au*, *eu* and *ou*, respectively. They are still remembered as such in *Prātiśākhya*s

1. This insertion of a vowel at the beginning is called *prothetic anaptyxis* and the same in the middle is called *medial anaptyxis*. This plays a large part in the Indian *Prākṛts*. Cf. *ittiyā* for *strī* and *puṭuma* for *padma*.

2. *Chandāśānam sātyamugri rāṇāyaṇiyāh ardhamaṅkūram ardhamaṅkurañ cadhyāyate; naira hi lokē nānyasmin vēdē ardha ēkārārōrdha-ōkarō vāsti* (M. B. i. 22, lines 21, 23 & 24).

3. *Ekara okaramka[...cūmaivētam-utaiyūruḷ oru-c-cārūr icai parri-k kulū-k-kuṭṭōla k koṇṭōtupa-v-ūkalāṇum* (T. M. V. 26).

4. A temporary fact of Phonetics in Dravidian, *Dixieme Serie* tome 18, 1911....(J. A.)

5. *Ekaram-āratu akarakkuṇum-ikarakkūṇum...tammul-otticaittu naramataṅkal-pōṇṇūkalāṇum...irūṇṇūtal-parri ē, ō, ai, au eṇṇu nāṇ-kiṇṇaiyūm cūmaivētam cantiyakkaram-eṇṇur*. (T. M. V. 24.)

(R. V. P. i, 11: and A. V. P. iii, 40), and by the Sanskrit Grammarians Pāṇini, Patañjali and others. Cf. *ēcaḥ sandhyakṣarāṇi*. For grammatical purposes too, they are such when *a* and *i* coalesce into 'ē', and *a* and *u* coalesce into 'ō' and wherever they are respectively split into *ay* and *av* in sandhi as in *dēvē + iha* and *gurō + iha* which respectively become *dēvayīha* and *guravīha*. But they are not diphthongs wherever they represent the Indo-Germanic *az*. In pronunciation, they became simple long vowels even in the *Samhitā* period. This is seen from the fact that, in sandhi if the initial member of the succeeding word is 'a' and the final member of the preceding word is 'ē' or 'ō', the 'a' is elided.<sup>1</sup> (cf. *harē + atra = harētra*: *gurō + atra = gurōtra*) Cf. *luṇyatē tu akāra-ēkārāukārāpūrvah* (Tai. P. xi, 1): *ēkāra-ukārāntāt pūrvah padādērakārasya* (A. V. P. iii, 53). For grammatical purposes it is more an exception that they are simple long vowels rather than a general rule. But in Tamil they are always simple sounds as in the parent Indo-European language, and not diphthongs; for *a + i* becomes *a-v-i* or *ā + i* becomes *ā-y-i* as in *a-v-v-iṭam* and *ā-y-irutiṇai*, and so also *a + u* becomes *a-v-u* as in *pala-v-uṇṇi*. This difference in their nature is one of the points which determine that Tamil is independent of Sanskrit.

M. J. Vinson is of opinion that these two also are preceded by 'y' and 'w' in their pronunciation. But I hear that such is not the case in Jaffna.

1.346. 'AI': 1.3461. Dr. Caldwell says in p. 133 that "ei unlike the Sanskrit diphthong 'ai' represents *e* and *i* and not *æ* and *ɪ*." The reasons he adduces for the same are (1) 'it is represented in Grantha and Malayālam by a double *e* and in Telugu-Canarese by a character which is compounded of *e* and *i*; (2) it is also to be observed that the Tamil *ei* is the equivalent of the *e* of the Malayālam accusative and is the ordinary representative of the final *e* of Canarese substantives and verbal nouns; (3) it is worthy of notice also that Kumārila-bhaṭṭa in transliterating Tamil *naḍei* into Sanskrit characters writes it not as *naḍai*, but as *naḍe*.'

If the first reason holds good for Tamil 'ei', it holds good for Sanskrit 'āi' also, since it is represented in Devanāgarī script as two *e*'s (॒॒); it is not safe to determine the nature of a sound

1. Cf. M. V. G. p. 4 Para 6 and p. 15 Para 2.

from its symbol.<sup>1</sup> The second point has already been answered under 1.3412. As regards the third point, Kumārilabhaṭṭa may have had in his mind the forms of spoken Tamil but not of written Tamil for he says *cor* for *cōṛi*.<sup>2</sup> The 'u' at the end is only 'ū' and so people may have pronounced *cōṛi* as almost similar to *cor*. I have already stated that the final 'u' or 'ū' is spoken only as 'ū'. Similarly *naḍai* also may have been pronounced as *naḍe*, as is done even now. Hence Dr. Caldwell's third reason also cannot stand. Besides, Tolkāppiyāṇār clearly says that *ai* may be split into *a* and *i*<sup>3</sup> and *ay* may be used instead of *ai*<sup>4</sup>. It also appears to me that the way in which Tamil *ai* was, and is, pronounced may have influenced the pronunciation of Sanskrit *ai* in the pre-Christian Era; for, in the earliest times, it is possible that the latter was pronounced as *āi* since it represented generally the Indo-Germanic *āi*, *ēi* and *ōi*. At the time of the author of Taittirīya-Prātiśākhya, it appears it was pronounced as *a* ( $\frac{1}{2}$ ) *i* ( $1\frac{1}{2}$ ) where *a* had half a *mātrā* and *i* one and a half *mātrās*.

Cl. *Akarardham āikārāṅkārāyōḥ ādih*  
and

*Ikaro adyardhah pūrcasya śēṣaḥ.* (Tai. P. ii, 26 and 28.)

The same, it seems to me, was the pronunciation at the time of Patañjali.

Cl. *Āi ośca uttarabhūyastvāt.* (M. B. i, 22, 18.)

It has been accepted that Patañjali lived in the 2nd century before Christ. The Tamil extant Grammar Tolkāppiyam may be taken to belong at least to the beginning of the Christian era, and there is no inscription or literary work in Telugu, Kanarese and Malayalam belonging to that date. It is evident that, at the time of Tolkāppiyāṇār, *ai* in Tamil was pronounced in the same way as it is now, since he says *ai* may sometimes be written as *ai* (அ) or *ay* (அய). Hence I am led to believe that the present

1. The symbols in Telugu for *v*, *p*, *s*, *n* and *h* have greater similarity than dissimilarity and it is not safe to conclude from it that they are related sounds.

2. *Cōṛi* *ityukṛā* (K. T. V. under 1—3—9 and pp. 200 and 201 in Vol. 41 of the Indian Antiquary).

3. *Akara ikara m-aikāra m-ākum.* (Tol. E. 54.)

4. *Akara-t t impar yakara-p pulḷiyum*  
*Āi-y-e neṭuñ-erai mey-pera-t tōṇṇum.* (Ibid. 56.)

pronunciation of Sanskrit *ai* might be due to the influence of Dravidian languages, especially Tamil.<sup>1</sup>

1.3462. This *ai* is different from Sanskrit *ai* in two ways. Sanskrit *ai* is, for grammatical purposes, *āi*, and it is formed by the coalescence of *a* or *ā* with *ē*; but, in Tamil, if *a* or *ā* is followed by *ē*, both would respectively become '*avē*' generally and *āvē* or *āyē*, but never '*ai*'. Hence, this cannot be said to be a diphthong in the same way as the Sanskrit *āi*; but it may be called so since it is split into *a* and *i*, or *a* and *y*, if it stands at the beginning of a word. Cf. *avaṇam* அஇவனம் or *ayvaṇam* for *avaṇam* (ஐவனம்).

1.347. '*ai*'. Dr. Caldwell states that 'it has been placed in the (Dravidian) alphabets solely in imitation of Sanskrit. It is used only in the pronunciation of Sanskrit derivatives; and when such derivatives are used in Tamil, they are more commonly pronounced without the aid of this diphthong. Ordinarily, the diphthong is separated into its component elements; that is, the simple vowels *a* and *u*, from which it is derived, are pronounced separately, with the usual euphonic *v* of the Tamil between them to prevent hiatus.—e.g. the Sanskrit noun *saukhyam* is ordinarily pronounced and written in Tamil as *šavukkiyam*.' (C. D. G. 136.) The same opinion is held by M. J. Vinson<sup>2</sup> and G. U. Pope.<sup>3</sup> Their whole argument stands on the assumption that it is used only in the pronunciation of Sanskrit derivatives. But there are words like *avvai*, *ṭavvam*, *kavvutal*, *vavvutal*, etc. which are pure Tamil words. In such cases *ai* is replaced by *av* as *avvai*, *ṭavvam*, *kavvutal*, *vavvutal*, etc. and not by *avu* as in *šavukkiyam* as stated by Dr. Caldwell. Cf. *nāṇ kavvi* (N. 70.) *kavviyum* (P. N. 188. 4). Besides, *Tolkāppiyaṇār*

1. When Taittirīya-Prātiśākhya says that *ai* was *a* ( $\frac{1}{2}$ ) *i* ( $1\frac{1}{2}$ ) it refers in all probability to its pronunciation. Śukla Yajurveda Prātiśākhya says that the first part of *ai* and *au* is *a* and the second part *ē* and *ō*. This evidently refers to the etymology of the same. Rg-vēda Prātiśākhya and Atharva-vēda Prātiśākhya do not seem to say anything definitely on this point. But Dr. A. A. MacDonell says that *ai* and *au* were pronounced as *ai* and *au* even at the time of Prātiśākhyas. (M. V. G. 15. 4.) I am not able to find out why he has said so.

2. Sur un caractere singulier dans l' alphabet Tamoul in J. A. Onzieme Serie tome vii, 1916, p. 313, 4.

3. P. H. T. L. p. 13.

says that the initial *au* of a word may be split into *a* and *u*<sup>1</sup> and Ṭampūraṇai says under Tol. E. 56 that it may be replaced by *av* as *au* is replaced by *av*. But Sanskrit *āu* though it was pronounced even at an early period as *au*<sup>2</sup> is for grammatical purposes only *au* and can be replaced by only *āv* and not *av*. It also seems to me that the Tamil pronunciation of *au* may have changed the pronunciation of Sanskrit *āu* as in the case of *āv*, since the Sanskrit *au* ought to have been once pronounced as *āv* and then as *a* (') *u* (11) at least till the time of Mahābhāṣya.

1.348. 'Ī'. This sound is peculiar to Tamil. It is found in the middle of words like *kēṇmivā*,<sup>3</sup> and in places where the final 'ū' of a word is followed by 'v'<sup>4</sup> as in *nākiū + yātū = nāki-vatū*.

What could be its origin? This may have been originally in the parent Dravidian language a glide almost similar to 'ū', and it may have been represented by 'ī' whenever it was followed by the palatal semi-vowel *v*. Hence the Tamil grammarians have stated that *ū* changes to *ī* when the former is followed by *y* in sandhi.

1.3481. 'Ī': 1.34811. It has already been stated that this differs from *u* both in quality and quantity and also undergoes change in sandhi quite differently from it. This is not found in Sanskrit, but it plays a large part in Tamil and so Tolkāppiyam contains one full chapter explaining the changes which it undergoes in sandhi. It is used as the final member of words except in the word *nūntai*<sup>5</sup> after a voiceless consonant in words other than those which have only one short vowel which is not followed by a conjunct consonant or āyṭam.<sup>6</sup> Thus in *atu*, *itu*, *utu*, *u* is not *kurriyal-ukaram*; but in *uñkiū*, *uṣūū*, *aḷaḷū*, *yātū*, it is *kurriyal-ukaram*. *U* in *ēlu*, the modern form of ancient *ēl* cannot

1. *Akara ukara m aukara m-ākum*. (Tol. E. 55.)

2. M. V. G. 13, 3.

3. *Kurriya tikara nirral venḷum*  
*Yaren enai-mudai uraiyavai-k kiḷavi-k-*  
*Kurayin varum makara m-ūrntē*. (Tol. E. 34.)

4. *Ponnavai nilai-yiḷai k kuzukatu m-urittē*  
*Uṇara k kurriy mūṇṇar-t tṭṭṭum*. (Ibid. 35.)

5. *Kurriya tukara mūḍai-p-peyar maruṅkiṇ*  
*Orriya nakara-micai nakaramoṭu mutalum*. (Ibid. 67.)

6. *Nēṭṭelut t-impuram toṭarmoli y-āṭṭum*  
*Kurriya t-ukaram vallū yūrntē*. (Ibid. 36.)

be *kurɻiyal-ukaram* according to its definition in grammar, though it is pronounced so now. I have already stated that it has for its organ of articulation that of the previous voiceless consonant.<sup>1</sup> (Cf. 1.22. *supra*)

What could be its origin ? Was it formerly *u* and was then shortened on account of accent or was it a vowel glide like the neutral vowel which appeared in pronouncing the final voiceless consonants and later on taken as a secondary sound ? If it were the former, it need not play in sandhi a part different from *u*. I have already stated that it (*ü*) is dropped if it is followed by a word commencing with a vowel, while *u* takes the intervocalic *v* when it is followed by a vowel. cf. *nāḱḱu + iṅḱē = nāḱḱiṅḱē*; *atu + iṅḱē = atuviṅḱē*. Hence the latter view that it was in the parent Dravidian a vowel glide is worth considering. If that be so, we have to assume that the Tamil grammarians happened to recognise the glide, take it as a secondary sound and conclude that no voiceless consonant could be the final member of any word.<sup>2</sup>

1.3482. *UYIR-AḶAPEṬAI*: 1.34821. The authors of *Vīracōḷiyam*, *Nēminātam*, *Nannūḷ*, *Ilakkaṇa-viḷakkam* and *Pirayōka-vivēkam* state that the seven sounds, *āa*, *īi*, *ūu*, *ēe*, *aii*, *ōo*, *auu* are *uyir-aḷapeṭai* each having three *mātrās* and have taken them as secondary vowels.

But *Tolkāppiyaṇār* has not mentioned them under secondary sounds; for it seems to me that in cases of *aḷapeṭai*, *āa*, *īi*, etc. are not *single* sounds according to him, but two sounds made up of *ā* and *a*, *ī* and *i*, etc. This is clear from the following points mentioned by him. He states in the *sūtra*

*Mū-v-aḷa p-īcaitta l-ōr-eḷut t-iṇṇē*. (Tol. E. 5.)

that there is no *single* sound having *threc mātrās*; in the *sūtra*

*Nīttam vēṇṭi ṇ-a-v-v-aḷa p-uṭṭaiya*

*Kūṭṭi y-eḷūuta l-eṇmaṇār pūlavar*. (ibid. 6.)

1. *Cārntu-varī ṇ-allatu tamakk-iyal p-ila-v-eṇa-t*  
*Tērntu-velip paṭutta v-ēṇai mūṇṇum*  
*Tattañ cārṇṇiṇ piraṇṇōṭu civaṇi*  
*Oṭta kūṭciyir ṇam-m-iyal p-iyalum*. (Ibid. 101.)

2. Here it is worth noting that the vowel-glide *i* between *d* & *r* in the Sanskrit word *Indra* has appeared as a separate letter in the word *Indira* derived from the same. Similarly, the second *a* in the word *manḍratha* which originally was *manḍrtha*. (Wackernagel's *Altindisch Grammatik*.)

he says that, if the quantity of a sound is to be lengthened, separate sounds having the desired additional quantity should be added. In the sūtra

*Kuṇṇīcat molī-vayi ū-ṇṇīcat nṇāikkum*  
*Nettelut t-iṇṇa v-otla-kur ṇeluttē.* (ibid. 41.)

it is said that as many short like-vowels are added after a long vowel as the additional *mātrās* needed. In the sūtra

*ḷ-eṇa varum-ṇvīr meyyī ṇ-ākātū.* (ibid. 71.)

it is said that *e* cannot be the final letter of a word if it is preceded by a consonant and in the sūtra

*ḷkara e-okaram ḥavarkkī ṇ-ākā*  
*Muṇṇūlat molīya v-eṇmaṇṇār ḥulavar*  
*Tēṇṇamū cīṇaḥḥu m-alvali ṇ-āṇa.* (ibid. 273.)

it is said that it follows *ē* denoting certainty or superiority. Hence in *ee keṇṇāṇ*, *e* is taken to be a sound separate from *ē*. In the sūtra

*Tēṇṇa v-ekaramū cīṇaḥḥi ū-ovvum*  
*Meṇ-kū ṇ-iṇṇakai valleluttū mikumē.* (ibid. 274.)

he says, '*tēṇṇa v-ekaramū*' which clearly shows that *ē* and *e* in *ee* are considered separate sounds. In the sūtra

*ḷ-v-e ū-iṇṇū-k k-ekaram varumē.* (ibid. 278.)

he says that *e* will follow *ē*. That the same is the case with *o* in *oo* is inferred from the sūtras Tol. E. 273 and

*Uṇṇamai-k kaṇṇu m-alayṇō v-aṇṇē*  
*Okaram varula l-ā-vayi ū-āṇa.* (ibid. 293.)

In the sūtra

*Kuṇṇīcat muṇṇāru m-ōṇeluttu molikkum*  
*Aṇṇa-t tōṇṇu m-akara-k kiṇavi.* (ibid. 227.)

it is said that *a* is inserted after *ā*, the final member of the standing word, if it is preceded by a short vowel as *ḥalā-a-k-kōtū* or if it happens to be a single lettered word.<sup>1</sup> In the sūtra,

*Alaḥḥai mikū m-ikara-v-iṇṇaḥḥar*  
*ṇāṇkaiya v-ākuṇ-ḥeṇṇakaiya v-eṇḥa.*

(Tol. Col. 125.)

he says that the word ending in *i* which generally appears with *alaḥḥai* in the nominative case remains as it is without any change in the vocative case. For instance, the word

1. It may be noted that the author of *Pirayōka-vivēkam* says that in *muraṇṇi*, *ḥaṇṇaṇṇu*, *a* is separate from *ā* and an intervocalic *i* is not inserted between them. (P. V. P. 49.)

*tolī* can be used in the same form as nominative or vocative. Here he states that the final member of such words is *i* and not *ī*. Besides in Ceyyūḷ-iyal, a section in the third chapter of Tolkāppiyam, he says that *alaṭṭai* may be taken as a separate syllable in prosody<sup>1</sup>. For example in *paṇiyār tē*m (Pattu. 220, 230) *tē* is taken as one *acai* and *em* as another, though *e* is added to prolong the quantity of *ē*.<sup>2</sup> Similarly in *kaṭṭāk kaḷirrimēl* (K. 1087) *kaṭṭā* is taken as one *acai* and *ak* as another.<sup>3</sup>

The reason why he does not treat *āa*, *īi*, etc. in cases of *alaṭṭai* as single sounds seems to me this. In Manusmṛti there is a line

*Akāraścāsyā nāmnōntē vācyaḥ pūrvākṣaraḥ plutaḥ*  
(M. S. 2. 125.)

in connection with the use of *pluta* in *pratyabhi-vādana*. This is interpreted by some commentators that *a* is only *upalakṣaṇam* here and it means that the final syllable of the name of the person who prostrates himself before another should be *pluta* in the blessings offered by the latter, in the same way as is said by Pāṇini; (i.e.) if Dēvadatta is a *dvija* and prostrates himself before another, another should say ‘*āyusmān bhava Dēvadatta3*’; if he is *Harī*, ‘*āyusmān bhava Hare3*’ etc. But Haradatta, the author of Padamañjarī, a commentary on Kāśikāvṛtti, interprets the same line in a different way. The final syllable should be *pluta* and an ‘*a*’ should be added to it at the end. Hence the *pratyabhi-vādana* should be in the form ‘*āyusmān bhava Dēvadatta3 a*.’ Similarly if two persons *Śambhu* and *Pinākapāṇi* are at a distance and they are called, the forms that should be used in the vocative case are *Śambho3* and *Pinākapāṇe3* in the opinion of Pāṇini and *Śambho3 a*, and *Pinākapāṇe3 a*, in the opinion of Haradatta. Similarly if they are not at a distance, the forms that should be used are *Śambha3 u* and *Pinākapāṇa3 i* according to Pāṇini, and *Śambha3 va* and *Pinākapāṇa3 ya* according to Haradatta<sup>4</sup>. The latter says that his interpretation is based on what is said in Bharataśāstra.<sup>5</sup>

1. *Alaṭṭai-y-acai-nilai-y-ākalu-m-urittē*. (Tol. Ceyyū. 17.)

2 & 3. These are cases of hiatus allowed by Tolkāppiyaṇār.

4. Pandit Reprint 12. Kāśikā vyākhyā uttarārdha p. 960 and P. A. 8. 2. 83, 8. 2. 84 and 8. 3. 107.

5. I searched for this statement in the extant editions of Bharata’s Nāṭyaśāstra, but I was not able to find it out.

From this it is evident that there were two schools as regards the use of *pluta*. Tolkāppiyaṇār having in his mind the view of the author of Bharataśāstra may have thought that, since a separate syllable *a* is used by him in all places, there is no need for the previous sound to be *pluta*, and hence may have said that there is no need for a sound *a* having three *mātrās* before the final *a*. Besides to have *a* even after *i*3, *e*3, *o*3 may not have appealed to him. Hence he may have thought that, if one wants to use similar sounds, one might as well use *ī*, *ū*, *ē* and *ō* with *i*, *u*, *e* and *o* following them. This is most probably the reason for his saying that there is no *single* sound *having three matras* (Tol. K. 5). Hence, according to him, *alapeṭai* is that sound *i*, *u*, *e*, etc. which is super-added to the preceding long vowel *a*, *i*, *u*, etc. It may be worth noting that the term *alapeṭai* is adapted from the term *pluta* though in a somewhat different sense.

But the author of Viracōliyam in the light of what is said in Paṇini's grammar may have mistaken *alapeṭai* for *pluta* in Sanskrit and hence has stated that *āa*, *īi*, etc. are *alapeṭai* and the others may have followed him. They have taken them as secondary sounds, since according to them secondary sounds are those which are other than primary sounds and no primary sound has more than two *matras* for its quantity. If *alapeṭai*, according to them, has three *mātrās*, they should have given separate names for *āa*, *āāa* and so on. But they have not done so. Perhaps, they too may be called *alapeṭai* in the same way as a sound of four *matras* in Sanskrit is called *pluta*<sup>1</sup>. The authors of Nannūḷ, Naṇṇūḷ, Ilakkaṇa-ṇaṇṇam and Tonṇūḷ-ṇaṇṇam have followed the author of Viracōliyam *in toto* in this point; but the authors of Naṇṇūḷ and Ilakkaṇa-ṇaṇṇam, when they make mention of the vowels that can stand finally in words, say that the short vowels can stand finally even when they are part of *alapeṭai*. This is not consistent with their statement that *alapeṭai* has three *matras*. Hence it seems to me that they too did not have a decisive idea about it.

Urayaṇṇavar and Naccinārkkinīyar in commenting on the sūtra

1. *Iyatu eṇa vatu matrai plutai* (M. B. iii. 421, 13 & 14.)  
*Karuvai alai n-ra mekaram*  
*Meyvō pluta n-ra vō-tām-ai*  
*Kakara vakaramō tūku m-ēpa.* (Na. 108 & I. V. 29.)

*Nīṭṭam vēṇṭi ṇ-a-v-v-aḷa-p uṭaiya*  
*Kūṭṭi-y elūṭa l-eṇmaṇār ṇulavar.* (Tol. E. 6.)

say that the long and the short vowel should be pronounced together. Hence it appears that, in their opinion, *āa*, *u*, etc., are pronounced as vowels having three *mātrās*, but for grammatical purposes they are separate sounds. Civañña-muṇivar, on the other hand, says that *aḷapeṭai eluttu* has three *mātrās*<sup>1</sup> and it is made up of one long vowel and one short vowel and since it is used in the place of the long vowel only for lengthening its *mātrā* without any change in meaning, it is not included as a separate sound, and hence it is not included among vowels.<sup>2</sup> On considering the sūtras in Tolkāppiyam mentioned above, it may be clear that Civañña-muṇivar confounds the *pluta* in Sanskrit with *aḷapeṭai*. But in the definition of *cārpeḷuttu* or secondary sounds he agrees with Tolkāppiyaṇār and hence he has not included *aḷapeṭai* among them.

The number of *uyir-aḷapeṭai* is 7 according to the grammarians of the medieval and modern periods except Naṇṇūlār. He says that they are 21 taking into consideration the place in a word where it occurs, whether at the beginning, middle or end. But since the sound is generally the same whether it is at the beginning, middle or end, it does not appear to be scientific to further sub-divide 7 and make them into 21.

1.3483.—‘Shortened *ai*’: Ancient Period. Tolkāppiyaṇār mentions that ‘*ai*’ has in certain positions only one *mātrā*,<sup>3</sup> but does not say where it so happens, nor does he include such ‘*ai*’ among secondary sounds, since it has the same place of articulation as ‘*ai*’ though reduced in quantity, and it may sometimes be used as the initial letter of a word as *aiyam* and hence does not satisfy this definition of *cārpeḷuttu* or secondary sounds.

*Medieval and Modern Periods.* The author of Vīracōliyam says that the shortened *ai*, has for its quantity one *mātrā* and a half. The author of Nēminātam agrees with him and includes it among secondary sounds. The authors of Naṇṇūl, Ilakkaṇa-

1. *Mūṇṇu mātiraiyāy uccarikkukāl aḷapeṭai y-eluttenṇum*  
 (T. M. V. p. 24.)

2. *Aḷapeṭai annetteḷuṭiṭu...* (p. 24, Line 3.) *nuṇṇuṇarvāṇṇṇṇu-ṇarka* (T. M. V. p. 24.)

3. *Ōraḷa pāku m-iṭaṇum-ā r-uṇṇē*  
*Tēruṇ kūlai mōli-vayṇ ṇ-āṇa.* (Tol. E. 57.)

viḷakkam and Tonṇūl-viḷakkam say that it has only one *mātrā* for its quantity. C. J. Beschi says that it is shortened in such words as *aṭṭaci* where it is the initial letter, in words like *maṭṭavan* where it is medial and in words like *kuvaḷai* where it is final. All of them include it among secondary sounds since it is other than 'ai' having two *mātras* and hence satisfies their definition of *carpṣutū*. The division by Nanṇūlār of 'shortened ai' into three according to its place in a word is unnecessary and unscientific. Civaṇāṇa-muṇivar agrees with Tolkāppiyaṇār.

Since no purpose is served by taking 'shortened ai' as a secondary sound, the opinion of Tolkāppiyaṇār seems to me to be the sound one.

1.3484. 'Shortened ai': Ancient Period: Tolkāppiyaṇār does not speak definitely about this; but the commentators on the sūtra

*Oi-aḷa ṭ-āku m-iṭṭan-um-ā r-uṇṭē*  
*Tēruṇ kālai mōḷi-vayī ṇ-āṇa.* (Tol. E. 57.)

say that what holds good for 'ai' holds good for 'ai' also.

*Medieval and Modern Periods:* The 'shortened ai' is considered in the same way, as 'shortened ai.' Vīracōḷiyam says that it has one and a half *mātras* while the rest, one *mātrā*. Whatever is said of 'ai' holds good of 'ai' also. C. J. Beschi says that *ai* is shortened to *ai* only when it stands initially. Dr. Caldwell does not make mention of the shortened *ai*.

1.35. *Vowel Gradation.* This plays only a very small part in Tamil. In the declension of pronouns like *nī*, *nān*, *tān*, the *i* and the *ā* are shortened in the oblique cases as *ninnai*, *ninnāl*, etc., *nammai*, *nammāl*, etc., *taṇnai*, *taṇnāl*, etc., and *yā* in the pronoun *vāy* is shortened to *e* in the oblique cases as *eṇnai*, *eṇnāl*, etc. But on the whole its part in the Tamil language is very small since the cases and the conjugation in Tamil are not classified as strong and weak, except that the nominative case may be considered strong and the remaining weak.

In some of the verbal forms of monosyllabic roots having *a*, *ā* is shortened to *a*.

Root.	Present Tense.	Past Tense.	Future.	Past Relative Participle.
<i>tā</i>	<i>taṇkiṇṇāṇ</i>	<i>taṇlāṇ</i>	<i>taruvāṇ</i>	<i>tanta</i>
<i>kāṇ</i>	<i>kaṇkiṇṇāṇ</i>	<i>kaṇlāṇ</i>	<i>kāṇṭāṇ</i>	<i>kaṇṭa</i>
<i>cā</i>	<i>cākiṇṇāṇ</i>	<i>cēlāṇ</i>	<i>cāvāṇ</i>	<i>cetta</i>

Sometimes the negative forms of verbs have long vowels, while the positive forms short ones.

Root.	Affirmative.	Negative.
<i>kāṇ</i>	<i>kaṇṭāṇ</i>	<i>kāṇāṇ</i>
<i>vā</i>	<i>varuvāṇ</i>	<i>vārāṇ</i>
<i>tā</i>	<i>taruvāṇ</i>	<i>tārāṇ</i>

In forming nouns from certain verbs, the short vowels are lengthened.

Root.	Noun.
<i>viṭu</i>	<i>vīṭū</i>
<i>keṭu</i>	<i>kēṭū</i>
<i>paṭu</i>	<i>pāṭū</i>
<i>miṇ</i>	<i>mīṇ</i>
<i>cuṭu</i>	<i>cūṭū</i>

This is one of the most important points where Tamil differs from Indo-European languages in general and Sanskrit in particular where gradation plays a very prominent part.

13.6. *Initial and final vowels in words in Tamil and in Sanskrit ; Their Similarities and Dissimilarities:* Tolkāppiyaṇār says that all the 12 primary vowels can stand both as the initial and the final member of words, but the final *au* can be preceded only by *k* or *v*, the final *e* cannot be preceded by any consonant, the final *o* by any consonant except *n*, the final *ē* and *ō* by *ñ* and *u* and *ū* by *n* or *v*.<sup>1</sup> Of the secondary vowels *ū* cannot stand at the beginning, while shortened *i* can stand neither at the beginning nor at the end. The author of *Vīracōliyam* differs from Tolkāppiyaṇār in the fact that *e* and *o* cannot stand as final members. This is possibly due to the fact that, according to the latter, *e* in *ēe* (a particle denoting certainty) is not a part of it in the same way as is taken by the former and the word 'no' might have become obsolete in his time.<sup>2</sup>

- 
1. *Paṇṇī r-uyiru molu-muta l-ākum.* (Ibid. 59.)  
*Uyir-au v-eñciya v-iṭuti y-ākum.* (Ibid. 69.)  
*Ka-va-v-ō ṭiyaiyi n-au-v-u m-ākum.* (Ibid. 70.)  
*E-ena varum-nyir me-y-y-i ṭ-ākātu.* (Ibid. 71.)  
*O-v-v-u m-aṇṇē na-v-v-alaiṇ kaṭaiyē.* (Ibid. 72.)  
*Ē ē enum-uyir ṇakāra-t t-illai.* (Ibid. 73.)  
*Ū ū kāra na-va-v-oṭu navilā.* (Ibid. 74.)
  2. *Īru-makara ṇakaraṇkaṭāmu m-iṭai-y-inattil*  
*Ērum-vakara m-olintaintum-īrain teḷil-uyirum*

But Nannūlār and other grammarians agree with Tolkāppiaṇār in this respect.<sup>1</sup> According to them *aḷaṭṭai* and 'shortened *ai*' can stand both at the beginning and at the end, 'shortened *au*' only at the beginning, *u* cannot stand at the beginning and *i* cannot stand either at the beginning or at the end.

The Ṛg-vēda Prātiśākhya, the Śukla Yajur-vēda Prātiśākhya and Atharva-vēda Prātiśākhya say that *!* (ॐ) cannot stand as final.<sup>2</sup> The Ṛg-vēda Prātiśākhya adds *ṛ* also in the 1st verse of the 12th chapter.<sup>3</sup> The Śukla Yajur-vēda Prātiśākhya adds that *ṛ* can stand as final only in the first members of compounds.<sup>4</sup> It seems to me that in mentioning the initial and the final vowels in words, Tolkāppiaṇār has followed the Prātiśākhyas since Pāṇini considered it unnecessary to mention them.

# THE ŚĀṬYĀYANA BRĀHMAṆA.

BY

T. R. CHINTAMANI, M.A.,

*University of Madras.*

The Śāṭyāyana Brāhmaṇa was regarded till now as one of the lost Vedic Brāhmaṇas. Two copies of this Brāhmaṇa are mentioned by Oppert in his list of Mss. existing in south India but neither of the copies could be traced. The only information we had till now regarding the Śāṭyāyana Brāhmaṇa was based upon the quotations from that work found in the bhāṣya of Sāyaṇa on the Ṛg Veda. A few references to that Brāhmaṇa are also found in other works.

As early as 1897 Professor Hanns Oertel of the Yale University contributed a paper to the Journal of the American Oriental Society on the *Parallel Passages from the Jaiminīya Brāhmaṇa to Fragments of the Śāṭyāyana Brāhmaṇa*. (page 15—48.) In this paper the Professor remarks that there is a close parallelism between the Jaiminīya Brāhmaṇa and the Śāṭyāyana Brāhmaṇa and he shows the agreement in a clear form. Long before 1827, A. C. Burnell, as soon as he discovered the Jaiminīya Brāhmaṇa, sent in a note to the London Academy regarding the contents of the Jaiminīya Brāhmaṇa and there he remarked (Vol. XV, pp. 126.) "Were it not that the Jaiminīyas consider the Śāṭyāyana school to be different from theirs, I should identify this new Brāhmaṇa with the Śāṭyāyana Brāhmaṇa quoted by Sāyaṇa. Probably the difference between the two schools, if there really be any, is very small."

According to Burnell and H. Oertel, the Śāṭyāyana Brāhmaṇa should have belonged to the Sāma Veda, and that accounts for the close parallelism that exists between the Jaiminīya Brāhmaṇa and the Śāṭyāyana Brāhmaṇa. This conjecture of Burnell and Oertel receives corroboration from the remarks in the <sup>1</sup>Prapañcahṛdaya, a work published in the Trivandrum Sanskrit Series. On the other hand, the reference to this Brāh-

---

1. See page 19.

maṇa in the Caraṇavyūha makes it out to be a Brāhmaṇa of the Yajur Veda. Writing as late as 1929, Paṇḍit Bhagavad Datta of the D. A. V. College, Lahore, states it to be his opinion, that this Brāhmaṇa should have belonged to the Sāma Veda alone. All these writers had only the fragments of the Śāṭyāyana Brāhmaṇa before them when they wrote what they did.

I was fortunate enough to come across a fragmentary copy of the Śāṭyāyana Brāhmaṇa, witten in Telugu characters on palm leaf. It consists of 54 leaves with 8 lines on each page. The first leaf is missing and therefore we are not able to say in what form it exactly began. It abruptly ends in the middle of the 53rd leaf, a fact which indicates that the manuscript is incomplete. I have been able to identify this work as the Śāṭyāyana Brāhmaṇa on the strength of the statement found in the first leaf of the manuscript which contains a list of the several works that are contained in the big volume.

The following subjects are dealt with in the portion that is now available.

- |                      |                         |
|----------------------|-------------------------|
| 1. Audumbarī         | 11. Yajñāyajñiyavidhāna |
| 2. Bahiṣpavamāna     | 12. Ukthyavidhāna       |
| 3. Ājyavidhāna       | 13. Rātriparyāyavidhāna |
| 4. Gāyatravidhāna    | 14. Atirātra            |
| 5. Mādhyandina       | i. Vairūpavidhāna       |
| 6. Rathantaravidhāna | ii. Vairājavidhāna      |
| 7. Vāmadevyavidhāna  | iii. Śoḍaśavidhāna      |
| 8. Naudhasavidhāna   | iv. Śākvaravidhāna and  |
| 9. Kāleyavidhāna     | 15. Mahāvratā.          |
| 10. Ārbhavavidhāna   |                         |

Regarding the divisions of this Brāhmaṇa as found in this manuscript, a few words are necessary. On the second page of the manuscript we find No. 3. The numbering continues up to 10 on page 8 of the manuscript where we find षष्ठोऽध्यायः. On page 13 we find सप्तमोऽध्यायः, after No. 10 as before. On page 19 we find similarly अष्टमोऽध्यायः. The numbering of sections after the eighth adhyāya presents some changes. After section 5 on page 23 the numbering begins from 1 again and goes up to 6, where, curiously enough, we find प्रथमोऽध्यायः.

Sections 1 and 2 after प्रथमोऽध्यायः are missing and the first number we come across is 3. There is a change again after No. 4 and we find Nos. 1 to 6 continuously. The numbering begins from 1 again and goes up to 7, where we find द्वितीयोऽध्यायः. Then again the number begins from 1 and goes up to 6, on page 36. The numbering begins again and ends with 6 on page 40, where we find तृतीयोऽध्यायः. As before, the numbering begins from 1 and ends with 6 on page 43. Six more sections are again found and at the end of the 6th we find चतुर्थोऽध्यायः. Then we find six sections continuously and after the 6th we find only No. 10 on page 50 where we find the words चतुर्थोऽध्यायः. There are six more sections and the manuscript abruptly ends.

For the sake of convenience, and with the hope that scholars may be able to identify other copies of the work, I reproduce below one section from the beginning.

# THE BĀṆAS.

BY

T. N. RAMACHANDRAN, M.A.,

*Archaeological Assistant, Madras Museum.*

It is indeed a matter for gratification that the name Bāṇa or Vāṇa, as it is called in Tamil, is found in the inscriptions of most of the dynasties of South India that held sway over the country from about 345 A. D. to 1500 A. D. To pursue the history of those people who were called the Bāṇas or the Vāṇarāyars is therefore a pleasant quest for any student, much more so to the historian as while dealing with the Bāṇas he has to deal with a race of feudatories that served almost all the important powers of South India.

Unfortunately for these Bāṇas, they should have started under an evil star, for they not only began as subordinate officials in charge of the administration of portions of the kingdom but continued almost throughout to be just feudatories of the ruling powers and nothing more till about 1500 A. D. Now they were the vassals of the Kadambas of Banavāsī; then of the Western Cāḷukyas. When the Pallavas of Kāñcīpuram were in power they swore their allegiance to them. So did they too to the Nolamba-Pallavas. After the decline of Pallava power they became the vassals of the Cōḷas and later on when the Pāṇḍyas became powerful they transferred their allegiance to the latter. We say that they should have started under a bad star because, though they never preferred to be submissive and though consequently their restlessness was often visible in sporadic attempts to regain their independence, especially when any one ruling power was waning, they never gained their end. Instead, reactionary forces set in and the Bāṇas found themselves, after every sporadic attempt at independence, more submissive, with the difference that instead of Master Pallava they had Master Cōḷa or Pāṇḍya to obey now. Like the Śambuvarāyans who were Cōḷa feudatories, they indicated their subjection to the ruling powers by employing the names of the kings and the

princes of the ruling family as their *aliases*<sup>1</sup>. This they did so long as they were forced to retain their subordinate character.

This feudatory family "which played an important part in the ancient history of Southern India" claims descent from the demon Mahābali (Mahāvali) and his son Bāṇa, whence it is called the Bāṇa family. The Bāṇa crest was a bull, the banner bore the emblem of a black buck and their drum was called *paśūca*<sup>2</sup>.

References to the Bāṇas are made in inscriptions dating from very early times. The earliest mention is in the Talagunḍa inscription of the Kadamba king Kakusthavarman (430-450 A.D.) in which it is said that Mayūraśarman, the first Kadamba king (345-370 A. D.) was helped by an ally of his called "Bṛhad Bāṇa" in his fight with the Pallavas in the forests of Śrī Parvata and that he levied tribute from this "Bṛhad Bāṇa" as well as from other kings<sup>3</sup>. It would appear that the territory of this "Bṛhad Bāṇa" was very near Śrī Parvata, i.e., the present Śrīśailam in the Kurnool district.

From the Mallohalli plates<sup>4</sup> we learn that the progenitor of the Gaṅga line, the illustrious Koṅgaṇivarman (425-450 A. D.) was "a wild fire in consuming the stubble of the forest Bāṇa", while the Hastimalla plates<sup>5</sup> state that the Gaṅga king Koṅgaṇi (Koṅgaṇivarman) was "consecrated to conquer the Bāṇa-maṇḍala". In the Devarhalli plates<sup>6</sup> it is narrated that the "Bāṇa-kula" was confounded by "the Nirggunḍa Yuvarāja Duṇḍu".

The term "Bṛhad Bāṇa" in the Talagunḍa inscription corresponds to the Tamil term *Perum-Bāṇa* of the territorial term *Perum-bāṇaṣṭpāḍi*. It was by the latter term that the Bāṇa dominions were denoted. This takes us to the question what exactly the Bāṇa capital was and where the Bāṇa territory was located.

According to tradition the Bāṇa capital was known as *Paṇṇipuri*, whose other forms were *Praṇṇi*, *Paṇṇipura*, *Paṇṇai*,

---

1. M. E. R., 1919, p. 98, para 21.

2. S. I. I., Vol. II, p. 388.

3. E. I., VIII, p. 30.

4. I. A., V, 136.

5. E. C. X, IV.

6. I. A., II, 156.

*Parvai*, *Parvi*, *Parvāṭpura*, *Parvāpurī* and *Parigipura*. Indeed the last term, *Parigipura*, has led the late Rai Bahadur Venkayya to identify it with Parigī in the Hindupur Taluk of the Anantapur District<sup>1</sup>. The claim of Tiruvallam in the North Arcot District for the Bāṇa capital, inasmuch as it was also known by the appellation *Vāṇāpuram*, is easily explained by him as merely meaning that Tiruvallam was one of the important towns, if not the capital, of the Bāṇa territory. Long after the Bāṇas had ceased to rule, their scion, wherever they were, claimed to be lords of *Parivipura* and of *Nandagiri*, another equally important place. *Nandagiri* is the present Nandi-drug in the Chikballapur Taluk, Kolar District, Mysore. The fact that most of the inscriptions of the Bāṇas have been found in the Arcot, Kolar, Anantapur, and Kurnool districts makes one believe that the term *Peṇumbāṇaṣṣpāḍi* which denoted the Bāṇa territory was applied to the large tract of territory with Śrīśailam in the north, Kolar and Puṇḡanūr in the west, Kālahasti in the east and the river Pālār in the south. In the north they appear to have been the governors of the Pallava territory till the latter were driven down by the western Cāḷukyas in the latter part of the 6th century A. D. And when the Cāḷukyas became powerful they transferred their allegiance to them. They are often heard of as participating in petty cattle-raids and skirmishes. Sometimes they are actually seen participating in frontier wars<sup>2</sup>.

The Bāṇa territory was also known as *Vaḍugavalī-mēṛku*, *vaḍugavalīyīṇ-mēṛku*, *Vaḍugavalī* 12000, and also in Sanskrit as *Āndhrāt paṭlhaḥ paścimato kṣitīḥ*, i.e., "the land to the west of the Āndhra road or of the country called Āndhrāpatha". *Vaḍugavalī-mēṛku*, is a Tamil rendering of the Sanskrit form used here. The *Vaḍugas* are taken to be Kanarese by some<sup>3</sup>, but it is more reasonable to take them to be the Telugus to whom the name is more commonly applied by the Tamils. Venkayya identifies *Vaḍugar-mēṛku* with a portion of the modern Ceded Districts, which alone would strictly be situated to the west of the Āndhra country<sup>4</sup>. Even to-day the Telugus regard the Ceded Districts as

1. E. I., xi, p. 231.

2. *Ibid.* p. 230.

3. M. E. R., 1915, Part II, para 36.

4. E. I., xi, p. 231.

situated to the west of the Āndhra country. Venkayya's identification is strengthened by the fact that "the Pallava dominions originally extended into the Ceded Districts and that the Bāṇas were also ruling some frontier province in that part of the country during the time of the Kadamba king Mayūraśarman". The rise of the western Cāḷukya power in the 7th century acted as a check not only to the Pallava power in the Telugu country but also to that of the local Bāṇas who appear to have guarded the Pallava territories there. Consequently the Bāṇas, as Venkayya supposes, were forced into the northern portion of the North Arcot district<sup>1</sup>.

*The Bāṇas and the Cāḷukyas.*

We have already seen that Śrīśailam was in the vicinity, it not the actual seat of the territory of "Bṛhad Bāṇa", a contemporary of Mayūraśarman. And we know that Śrīśailam is in the Kurnool district, one of the Ceded Districts and that on its southern border lies Gooty. It was in the Gooty province that the earliest known inscriptions, one of them dated, of the Bāṇas were discovered in 1920<sup>2</sup>. All the three inscriptions are the records of the western Cāḷukya king Vijayāditya Satyāśraya Pṛthivīvallabha who ruled from 696 to 733-34 A. D. The first two (nos. 333 and 343) are in archaic Kanarese while the third (no. 359) is in archaic Telugu. These three inscriptions are from different places in the Gooty Taluk of the Anantapur District. The first record (no. 333) registers a grant of land made by Vikramāditya, while Bāṇarāja was ruling over the *Turamara-Viṣaya*. The second inscription (no. 343) records the gift of the village of Nāḍanūru and certain taxes in the country of Bāṇarāja. The third inscription (no. 359), which is an important record, is assigned to the same Vijayāditya Satyāśraya Śrī Pṛthivīvallabha and is written in Telugu. It refers to a fight between the governors of *Turamara-Viṣaya* belonging to Vikramāditya Bali Indra Bāṇarāja, son of Balikulatilaka Narasimha Bāṇādhirāja and the lords of Puḷagicheruvu. Being dated in the 23rd regnal year of Vijayāditya it may be assigned to 719-720 A. D. In the fight referred to in this record it appears that the rulers of the *Turamara-Viṣaya* were defeated by the chief Vikramāditya Bali Indra Bāṇarāja, son of Narasimha Bāṇādhirāja, who acted on behalf of the king, Vijayāditya. We

1. E. I, xi, p. 231.

2. M. E. R., 1920, nos. 333, 343 and 359.

also learn that Vinayāditya, the father of Vijayāditya of the present record, had encamped in 692 A. D. at a village called Citrasēḍu in the *Toramara-Viṣaya*<sup>1</sup>. Citrasēḍu is the modern Chitracchēḍu in the Gooty Taluk and *Toramara-Viṣaya* is certainly the *Turamara-Viṣaya* of the record under discussion. The country now covered by the Gooty Taluk should have formed the ancient *Turamara-Viṣaya*, which about 719-20 A.D., the date of the present record, was governed by a Bāṇa chief, Vikramāditya Bali Indra, in the name of the western Cālukya Vijayāditya Satyāśraya. "The mention of a fight with the rulers of this Viṣaya in the time of Vijayāditya suggests clearly that this part of the country was invaded by enemies (probably the Pallavas or their feudatories from the south-east of it) some time between 692 and 720 A.D. and temporarily occupied by them. The Bāṇa chiefs mentioned above, governed this territory as vassals of the western Cālukya kings as shown by other inscriptions"<sup>2</sup>. And Vikramāditya Bali Indra probably owed his *alias* "Vikramāditya" to the fact that he was a feudatory of the western Cālukyas, the grand-father of Vijayāditya being Vikramāditya.

*The Bāṇas and the Pallavas.*

In the following century we find the Bāṇas changing their allegiance to the Pallavas and moving down from the Gooty tract to the northern part of the modern North Arcot District. Most of their inscriptions of this period are found in the present Chittoor region. For a long time the chronology of these Pallava feudatories was almost obscure. But to-day it is no longer possible to complain of dearth of materials. The information given by the Guḍimallam plates of the Bāṇa Vikramāditya II, when combined with the information found in other records such as the Udayēndiram plates of Vikramāditya III, five Bāṇa inscriptions (stone) from Guḍimallam, Gūlgānpode stone inscriptions and the Muḍiyanūr plates gives us a connected genealogy of these Bāṇas as indicated in the following table:—

Leaving aside the mythical personages in the Bāṇa genealogy we get the following historical persons who were occupying the North Arcot district between roughly 700 to 970 A.D., most of them being feudatories of the later Pallavas beginning with Nandivarman Pallavamalla :—

1. Nandivarman or Jayanandivarman.
2. Vijayāditya-Dēva I.
3. Malladēva *alias* Jagadēkamalla.
4. Jayamēru Vikramāditya I Bāṇavidyādhara.
5. Prabhumēru Vijayāditya II.
6. Vikramāditya II.
7. Vijayāditya III Puḡaḷvippavargaṇḍa.
8. Vijayabāhu Vikramāditya III.

Luckily we have ample materials in the shape of inscriptions regarding the above 8 persons.

1. *Nandivarman* or *Jayanandivarman*—Should have received this name as being a feudatory of Nandivarman Pallavamalla. From an inscription dated in the 62nd regnal year of Nandivikramavarman we learn that the Pallava king of that name had an unnamed Māvali-Vāṇarāya as his feudatory<sup>1</sup>. Though Venkayya has identified this Pallava with Nandivarman III, the son of Dantivarman<sup>2</sup>, it is clear, in the present state of our knowledge of Pallava history, that the long reign extending to 65 years with which Nandivarman Pallavamalla is associated would warrant the Nandivikramavarman of the inscription under discussion being identified with Nandivarman Pallavamalla (714-778 A.D.).

2. *Vijayāditya-dēva I*—was a feudatory of Dantivarman, the son and successor of Nandivarman Pallavamalla as is evident from one of the Guḍimallam inscriptions<sup>3</sup> dated in the 49th regnal year of Dantivarman (778-829 A.D.). In this, a Bāṇa chief, Vijayāditya Mahāvali Vāṇarāya is said to be a feudatory of Dantivarman.

1. S. I. I., Vol. III, p. 91.

2. E. I., xi, p. 234.

3. *Ibid.* p. 225, B.

3. *Malladēva*.—We know of this chief from an inscription<sup>1</sup>, and from the Muḍiyanūr plates professing to be dated in the Śaka year 261 (338 A.D.) and consequently declared spurious. If we discard the date furnished by the latter plates there seems to be no objection to admit its evidence. The plates say that Nandivarman was of the Mahābali race and that he was succeeded by his son Vijayāditya-dēva, who was succeeded by Malladēva who bore the titles *Vadhūvallabha* and Nandivarman, and resembled the Bodhisattva—"a very uncommon and ancient looking allusion". If we admit the evidence furnished by these spurious plates we have to admit two things, that he bore the title *Vadhūvallabha* and that he took on himself the name Nandivarman to mark his subjection to the Pallava Nandivarman, who in this case is surely Nandivarman III, (829-853 A. D.) the son of Dantivarman.

4. *Jayamēru Vikramāditya I Bāṇavidyādhara*.—This chief, who was also a Pallava feudatory, entered, however, into a matrimonial alliance with the Gāṅgas. He married Kundavvai, the daughter of Pratipati-Araiyar, i. e., of the Gāṅga king Prthvīpati I<sup>2</sup>, who was a contemporary of the Rāṣtrakūṭa king Amōghavarṣa I and of the Pāṇḍya king Varaguṇa<sup>3</sup>. There are three inscriptions speaking of his connection with the Pallavas, thereby corroborating the evidence with regard to his date furnished by the Gāṅga alliance alluded to above. If the Gāṅga alliance indicated that this Bāṇa should be assigned to the third quarter of the ninth century the inscriptions speaking of his connection with the Pallavas prove this point. Of the three inscriptions, two are of Nandivarman III and the third of Nṛpatuṅga. The first which is dated in the 17th regnal year of Nandivikramavarman<sup>4</sup> speaks of a Vikramāditya Māvali Vāṇarāya as a feudatory of the Pallava king. The second speaks of the same Bāṇa chief and is dated in the 23rd year of Nandippōttaraiyar, who is identified with Nandivarman III (829-853 A. D.). The third inscription is dated in the 24th year of Nṛpatuṅga (853-879 A. D.), the son and successor of Nandivarman III and speaks of a Vāṇavidyādhara Mahābali

1. M. E. R., 1905, no. 301.

2. S. I. I., Vol. III, p. 99.

3. E. I., xvii, p. 3.

4. S. I. I., Vol. III, p. 94.

Vāṇarāya, who can be identified with this Bāṇa chief<sup>1</sup>. This inscription contains the usual *praśasti* attendant on almost every Bāṇa inscription, *viz.*, *sakalajagat-trayābhivandita-surās-surādhiśa-Paramēśvara-pratihārīkṛta-Mahābalikulōdbhava*, from which we learn that Mahābali, the progenitor of the Bāṇa race was made door-keeper by Paramēśvara (Śiva). It also contains the reference to the Bāṇa territory by the term *Vaḍugavalayin-mēṛku*.

5. *Prabhumēru Vijayāditya II*.—He is referred to in an inscription<sup>2</sup> as the son of Vāṇavidyādhara and his queen Mahādēvi-Aḍigaḷ *alias* Māraka-maḍigaḷ. This inscription being dated in Śaka 820 (898 A. D.) and containing no reference to the Pallavas proves that by Śaka 820 the Bāṇas had no masters and that our Vijayāditya was not a Pallava feudatory but an independent king. Fortunately for him he lived at a time when the Pallava power had almost waned. To denote his independence his records are dated in Śaka years. One, as we have seen was dated in Śaka 820. Another is dated Śaka 827 (905 A.D.)<sup>3</sup> and is a record of a Bāṇa called Vijayāditya Vāṇarāya who is identical with Vijayāditya II. A few inscriptions discovered in the Punganūr Zamindari of the North Arcot District make mention of Mahāvali--Bāṇarasa--Vikramāditya--Bāṇakandarpa-Jayamēru, Mahāvali-Vāṇarasa-Bāṇavidyādhara, and Mahāvali-Vāṇarasa-Vijayāditya-Vīracūḷāmaṇi-Prabhumēru. The third Bāṇa in the list can be identified with Prabhumēru Vijayāditya II, while the first two are identical with Vijayāditya II's father, Jayamēru Vikramāditya I Bāṇavidyādhara. From these inscriptions we also learn that Vijayāditya II had the title '*vīracūḷāmaṇi*'. One of these inscriptions speaks of a battle fought at Sōremaṭi, to capture which Vijayāditya II, or more probably his father allied with the Vaidumba king Gaṇḍa Trinētia and opposed on behalf of the Permanaḍi (*i.e.*, the western Gāṅga king) the Nolamba king (Vīra-Mahēndra?), and Rācamalla and Mayindadi<sup>4</sup>. A Bāṇa bearing the title "*vīracūḷāmaṇi*" and therefore identical with Vijayāditya II, is said to have repelled a raid made on Kōyaṭūr *i.e.*, Laḍḍigam in the Punganūr Zamindari, by Kāḍuvaṭṭi-Muttarasa, a general of a Nolamba (Vīra-Mahēndra?). The fight with

1. E. I., xi, p. 226.

2. *Ibid.* p. 227, D.

3. *Ibid.* p. 228, E.

4. *Ibid.* p. 235.

Kāḍuvaṭṭi-Muttarasa is attested to by one of the Gūlgānpode inscriptions, in which it is stated that "by order of Prabhumēru, a hero fought against the Kāḍuvaṭṭi force"<sup>1</sup>. The title Prabhumēru in this inscription removes all doubts on the point and proves that the raid on Kōyaṭūr was indeed made in the reign of Vijayāditya II.<sup>2</sup>

Vijayāditya II appears to have ruled till 910 A.D. An inscription from Maṇigaṭṭa-Gollarahaḷḷi<sup>3</sup> attests to a Bāṇa called Bejeyitta (Vijayāditya)—Bāṇarasa, who is none other than Vijayāditya II, ruling in Śaka 831 (909 A.D.). The next year, however, Śaka 832 (910 A.D.) witnesses his death as is proved by an inscription in Tamil found on a hero-stone from Cendattūr recording the death of Māvali-Vāṇarāyar *alias* Kudiparitaṇḍikkāmaṇār, whom I identify with our Bāṇa, in a cattle-raid at Cendattūr<sup>4</sup>.

### *The Bāṇas and the Cōḷas.*

6. *Vikramāditya*.—How long he ruled, it is not easy to ascertain. But it was during his reign that the Bāṇas lost the little independence that they had got in the reign of Jayamēru Vikramāditya I. The Cōḷa Vīra-Nārāyaṇa Parāntaka I (907-952—3 A.D.) is said to have suddenly "uprooted by force two lords of the Bāṇa kings"<sup>5</sup>. Though we are in the dark as to who the two Bāṇas were that were uprooted and whether they were uprooted simultaneously or in succession, we learn from other sources that the Cōḷa Parāntaka I conquered the Bāṇa kingdom (probably only a part of it) and made it over to his Gāṅga feudatory Prthivīpati II Hastimalla in or before A.D. 915-16<sup>6</sup>, and that the recipient was called Śembiyaṇ Māvalivāṇarāyan, *i.e.*, "the Mahāvalivāṇarāja (who was a feudatory) of the Cōḷa king"<sup>7</sup>.

1. E. I., xi, p. 235.

2. I have said here very little of the connection between the Bāṇas and the Nolambas as my friend, Mr. M. S. Sarma, who has much specialised knowledge on this point, will shortly be publishing an article on this.

3. E. C., x, Kolar, Mb. 229.

4. M. E. R., 1921, no. 168.

5. S. I. I., Vol. II, p. 387, verse 9.

6. E. I., xi, p. 238, 2n.

7. S. I. I. Vol. II, p. 389.

7. *Vijayāditya III Puḡalvip̐pavargan̐ḍa*.—The title *Puḡalvip̐pavargan̐ḍa* that he bore was also borne by a brother-in-law of the Cōḷa prince Rājāditya, son of Parāntaka I, who was killed in the battle of Takkōlam in 949 A. D. by Būtuga, the western Gāṅga feudatory of the Rāṣṭrakūṭa king Kṛṣṇa III. This Bāṇa appears to have been a contemporary of Rājāditya, Gaṇḍarāditya and Ariṇjaya, the sons of Parāntaka I. We hear of a daughter of Ariṇjaya and sister of Rājakēsarivarman Sundara Cōḷa Parāntaka II (950-966 A.D.) being given in marriage to a Bāṇa king.<sup>1</sup>

8. *Vijayabāhu Vikramāditya III*.—According to the Udayēndiram plates this chief was a friend of Kṛṣṇa-rāja. Dr. Hultzsch has identified the Kṛṣṇa-rāja with the Rāṣṭrakūṭa king Kṛṣṇa III (about A. D. 950) of whom we know from other sources that he made extensive invasions of the south. The reason for the Bāṇa chief calling himself the "dear friend of Kṛṣṇa" (*Kṛṣṇarāja-priyakh*) is not far to seek. We know already that the Cōḷa Parāntaka I gave a part of the Bāṇa kingdom to his Gāṅga feudatory Pṛthivīpati II, who was also the recipient of the titles "Śembiyaṇ Māvalivāṇarāyan" and "Bāṇādhirāja" at the hands of his kind lord. This Bāṇādhirāja was therefore a temporary usurper and a predecessor of our Bāṇa chief. He was indeed the Cōḷa king's candidate for the Bāṇa throne, while Vijayabāhu Vikramāditya III, the legitimate ruler of the Bāṇa throne, was the protégé of the Rāṣṭrakūṭa king.<sup>2</sup>

It has been supposed that the history of the Bāṇas came almost to an abrupt end with the conquest of the *Perumbāṇappāḍi* by Parāntaka I and its transference to the Gāṅga Pṛthivīpati II Hastimalla in about 915-6 A. D. This was however not the case for we learn that soon after 915-6 A. D. the Bāṇas seem to have moved further south, crossed the river Pālār which was till then the southern boundary of the *Perumbāṇappāḍi* and settled down on the banks of the river South Pennār (*Pindākinī*) calling the new colony *Vāṇakōppāḍi* or *Vāṇagappāḍi*.<sup>3</sup> Vijayabāhu Vikramāditya III appears to have ruled till about 969 A. D. In an inscription of the Cōḷa Āditya II Karikāla (966-970 A. D.) a certain Vāṇakōvaraiyar Vīraparumar is referred to, who is ostensibly identical with Vikramāditya III.<sup>4</sup>

1. M. E. R., 1911, no. 215.

2. E. I., xvii, p. 3.

3. M. E. R., 1906-7, part II, para 46; E. I., xi, p. 238.

4. *Ibid.* 1906, no. 109.

The province of *Vāṇagappāḍi* appears to have come into existence as such prior to 949 A. D.<sup>1</sup> and the Rāṣṭrakūṭa Kṛṣṇa III (about 950 A.D.) appears to have given it to a Vaidumba feudatory of his. Another feudatory of Kṛṣṇa III, the Gāṅga Pṛthvi-Gaṅgaraiyar (who was different and later than the Pṛthivīpati who was a contemporary of the Cōḷa Parāntaka I) was an ally of the Bāṇas as is evident from his espousing the daughter of a Vāṇakōvaraiyar. It is not clear why the Bāṇa territory should have been apportioned to the Vaidumba by Kṛṣṇa III, "the dear friend" of Vikramāditya III or why a Gāṅga should espouse a Bāṇa lady unless it be that the protege of the Cōḷa Parāntaka I was the person defeated by Kṛṣṇa III and his territory (*i. e.*, a part of the kingdom that was given to him by Parāntaka I) was the province handed over to the Vaidumba feudatory of Kṛṣṇa III. The Bāṇa lady that was espoused by the Gāṅga should then be of the main legitimate line, to which Vikramāditya III belonged and whom Kṛṣṇa III was bent on restoring to his legitimate throne. Kṛṣṇa III should have helped Vikramāditya III along with the Gāṅga feudatory against the Cōḷa protege and the result was a grateful matrimonial alliance between the Bāṇa and the Gāṅga. We have no doubt that Vikramāditya III was almost a feudatory of Kṛṣṇa III just like the Vaidumba, the Gāṅga and other feudatories of the latter. And Kṛṣṇa, the mighty invader of the south as he was, appears to have united these minor powers by marriage ties and the like so that they can help him against the imperial power of the south, the Cōḷa.

The subsequent history of the Bāṇas under the Cōḷas is meagre and almost fragmentary. With the advent of Rājarāja I (985-1014 A. D.) they appear to have become feudatories of the Cōḷas. Though a Bāṇa called Vāṇarāja Aḷagamaiyan is mentioned in an inscription of Pārthivendravarman from Tirumāl-puram it is not clear if he had become a feudatory of the latter, who preceded Rājarāja I by perhaps a few years.<sup>2</sup> But of their subjection to Rājarāja I we have proof, for in an inscription from Jambai in the South Arcot district<sup>3</sup> a Bāṇa with the usual Bāṇa titles and named Maṇavaṇ Narasimhavarman *alias* Rāja-

---

1. E. I., xi, p. 239.

2. *Ibid.*

3. M. E. R. 1906, No. 86.

rāja-Vāṇa-Kōvaraiyar is mentioned as a feudatory of Rājarāja. The fact that the Bāṇa here has adopted the name of Rājarāja as his *alias*, in accordance with the Bāṇa custom, proves our point. About this Bāṇa we have it that he built a tank at Ner<sub>kun</sub>ram (Vayiramēga—Caturvēdimāṅgalam).

In the time of Rājendra Cōla I (1012—1044 A. D.), the son and successor of Rājarāja I, we find that the Bāṇa territory (Vāṇagappāḍi or Vaḍagarai-Vāṇagappāḍi) was called Madhurāntaka-vaḷanāḍu. This is strictly in accordance with the Cōla custom of naming places under their subjection with their own names and titles. And in the time of Kulōttuṅga I (1070-1120 A. D.) it was called Rājendra-vaḷanāḍu<sup>1</sup>. Kulōttuṅga did not stop there. He named his throne at Muḍigoṇḍaśōlapuram Vāṇādhirājaṇ<sup>2</sup>. The Bāṇas appear to have taken service under the Cōlas. Thus for instance Kulōttuṅga I counted among his officers a Vāṇarājaṇ, and his son Vikrama-Cōla (1118-1135 A. D.) had two, a Mahābali-Vāṇarāja and a Virudarājabhayaṅkara-Vāṇakōvaraiyaṇ.<sup>3</sup> Kulōttuṅga III (1178-1216 A. D.) had a Bāṇa feudatory who was called Rājarājadēvaṇ Poṇparappiṇān Vāṇakōvaraiyaṇ of Ārkaḷūr, who is however different from his namesake who was a feudatory of Kō-Peruñjiṅgadēva (1243 A.D.), for the latter, though also a Poṇparappiṇa-Vāṇakōvaraiyar has been identified by Venkayya with Magadēśaṇ Vāṇakulōttamaṇ and Vīramāgadan Rājarājadēvaṇ Poṇparappiṇāṇ Magadaipperumāl mentioned in inscriptions from the South Arcot district and Kuḍimiyāmalai in the Pudukottah state. The fact that he bears the *alias* Rājarājadēvaṇ shows his subjection to the Cōla, for we know that Kulōttuṅga's son was Rājarāja III.

As regards the Bāṇa feudatory of Kō-Peruñjiṅgadēva, we have inscriptions of his in the South Arcot district and the Pudukottah state. His title Magadēśaṇ or Magadaipperumāl has come for some discussion at the hands of Dr. Hultzsch and Venkayya. Both connect the Magadai-maṇḍalam referred to in one of the inscriptions of the above chief<sup>4</sup> with the Makara or Magara kingdom that the Hoysaḷa Narasimha II is said to have

1. M. E. R., 1906-7, Part II, para 46.

2. *Ibid.*, 1910, Nos. 93—96.

3. E. I., xi, p. 239, 7n.

4. M. E. R., 1903, No. 10.

conquered. While Dr. Hultsch locates the Magara in the Coimbatore or Salem district, Venkayya places it between South Arcot and Trichinopoly districts. His remarks are as follows:—  
 “At Tittagudi on the border between the districts of Trichinopoly and South Arcot has been found an epigraph of Magadēśan Ponparappina Vāṇakōvadaraiyar recording the gift of a village in Magadai-maṇḍalam. Three other records from the same village show that the district of Magadai should have been close to the village, if it was not actually included in it. It would not be an altogether wild conjecture to suppose that Mahara, Makara and Magara of the Hoysala inscriptions is identical with the Magadai-maṇḍalam ruled over by the Vāṇakōvaraiyar - - - mentioned - - -. If this identification be true, it would indicate the movement of the Bāṇas further south as far as the Pudukkoṭṭai state. The chief of this province who was evidently a feudatory of the rebel Peruñjiṅga had to be overcome before the latter could be attacked by the Hoysala generals commissioned to liberate the Cōḷa king Rājarāja III from captivity.”<sup>1</sup> When the Bāṇas become feudatories of Kō-Peruñjiṅga, their action only means that they show their usual spirit of restlessness already alluded to and make a bid for independence by making common cause with the rebel chief against the Cōḷa Rājarāja III, especially when the Cōḷa power was waning.

*The Bāṇas and the Pāṇḍyas*

When Cōḷa power fell in about 1250 A. D. and the Pāṇḍyas came to rule the land, the Bāṇas found again to their dismay that they had now Master Pāṇḍya instead of Master Cōḷa, for we learn from Pāṇḍya inscriptions that the Bāṇas had become now Pāṇḍya feudatories.<sup>2</sup>

Most of them held office under the Pāṇḍya sovereigns in the 13th and the 14th centuries A. D. From a few inscriptions of Jaṭavarman Sundara Pāṇḍya (acc. A. D. 1251 A. D.) from Chidambaram<sup>3</sup> we learn that he “inflicted a severe defeat on the Telungas at Muḍugur, slaughtering them and their allies, the Āryas, right up to the bank of the Pērāru and driving the Bāṇa chief into the forest”<sup>4</sup>. Mr. Nilakanta Sastri

1. E. I. xi, p. 240.

2. *Ibid.*

3. M. E. R., 1913, Nos. 332, 340 and 361.

4. *Ibid.* 1914, part II, para 18.

takes this campaign of Sundara Pāṇḍya to have taken place some time before 1260 A. D., the enemy against whom the campaign was primarily directed being Gaṇḍagōpāla, a Telugu-Cōḍa ruler, who was perhaps helped by the Kākatīya king Gaṇapati and the Bāṇa chieftain who is said to have been "driven into the forest." Who this Bāṇa chief was is not clear.

There are references in the records of Kulaśekhara (acc. A.D. 1268) and his contemporary Vīra Pāṇḍya to a number of chieftains with names ending in Vāṇādirāyaṇ or Māvāli Vāṇādirāyaṇ, who were in charge of the administration of portions of the Pāṇḍya kingdom. In later times these chieftains took advantage of the rivalry among the Pāṇḍyan princes and the consequent weakness of the central government to bid for freedom and to "restrict the actual rule of the later Pāṇḍyas to the Tinnevely district." So long as they were under the Pāṇḍya subjection they seem to have been employing the names of the ruling kings and the princes as their *aliases*. This becomes also apparent from the fact that their Pāṇḍya suzerains referred to them in terms evincing paternal interest like *piḷḷai*, *makkaḷ* etc.

From the records of Jaṭāvarman Sundara Pāṇḍya (acc. 1251 A. D.) we get the name of a Bāṇa feudatory called Parākrama Pāṇḍya Mābeli Vāṇādirāya *alias* Pāvanaṅgakāra.<sup>1</sup> He was also called Makkanāyanār. Another Bāṇa chieftain of the name Vikrama Pāṇḍya Mahābali Vāṇarāya-Nāyanār has been assigned to this period.<sup>2</sup> Jaṭāvarman Vīra Pāṇḍya (acc. 1253 A. D.) had in his service a Mābeli-Vāṇarāyar whom he calls Piḷḷai Kulaśekhara. The term Kulaśekhara, as we have seen, was a mark of subjection of the Bāṇa to the Pāṇḍya ruler, while the term Piḷḷai was a mark of almost parental interest that the said Pāṇḍya ruler had for his subordinate officer. The term Kulaśekhara associated with the name of this Bāṇa leads one to identify this Bāṇa with a Piḷḷai Mābali-Vāṇarāyar, who was serving Māravarman Kulaśekhara (acc. A. D. 1268) as the latter's governor of the province of Kōṇāḍu, which formed part of the present Pudukkottah state. Another Bāṇa officer of both Sundara Pāṇḍya and Māravarman Kulaśekhara was entrusted with the province of Kēraḷaśiṅga-Vaḷanāḍu, which has been identified with a portion of the present Ramnad district, and this Bāṇa appears to have

1. M. E. R., 1916, part II, para 28.

2. K. A. Nilakanta Sastri, Pāṇḍyan Kingdom, p. 187.

enjoyed the governorship of this province from about 1251 A. D. to 1292 A. D.

When, in the second half of the 14th century the Pāṇḍya power had waned and the Pāṇḍyas themselves were forced to loose Madura and had to content themselves with their southernmost possessions in the Tinnevely district, we find the Bāṇas asserting themselves. It appears that Kampana, the Vijayanagara viceroy, was assisted by the Bāṇarāya chieftains in his final conquest of Madura, the Pāṇḍya capital, "and these quandom feudatories of the Pāṇḍya kings doubtless had an interest in thus restricting the range of Pāṇḍya power." It appears that these Bāṇa chieftains had an easy time under the Vijayanagara monarchs and had vast opportunities to rise to prominence.

It has not been possible to identify the Bāṇa that is said to be the author of *Trivikrama-vṛtti*, a Prākṛt grammar, though we have got the information that he claims himself to be a descendant of the Bāṇa family and had the name Trivikrama-dēva, whence the name of the work. But this much is clear, that he was a Bāṇa chieftain of the 15th century.<sup>1</sup>

Two Bāṇa chieftains, one named Sundara Toḷ Mahāvilivāṇādirāyar, and the other Muttarasa Tirumalai Mahāvilivāṇādirāyar were first noted by Sewell, who remarks that they were rulers of Madura in the period 1451-1499 A. D.<sup>2</sup> The subsequently discovered inscriptions at Śrīvilliputtūr in the Tinnevely district record that these two Bāṇas "obtained possession of the Pāṇḍya throne in 1453 and 1476" and that they were popularly known as "Mahāvali Vāṇādhirāja".<sup>3</sup>

From a few inscriptions from different places in the Madura district<sup>4</sup> we get some detail about two Bāṇas that were powerful in the country in the 16th century A. D. The earlier of the two was one Mahābali-Vāṇādarāya-Nāyaka. The other that followed him was Sundarattōḷ-Uḍaiyār Māvali-Vāṇādarāyar also known as Sundarattōḷuḍaiya Mahābali-Vāṇādarāyar or more simply Māvali Vāṇādarāyar. He bears the qualification *irandakālam eḍuttan*, *i. e.*, "who revived the past." This epithet is best explained by Venkayya as suggesting that the said Bāṇa was responsible for

1. E. C., x, VIII.

2. Sewell, List of Antiquities, ii, p. 223.

3. I. A., xv, p. 173, E. C., x, VIII.

4. M. E. R., 1902, Nos. 585 & 587; 1903, Nos. 109, 113, 121.

the re-establishment of the Pāṇḍya kingdom, and it would appear as though he is cautioning us not to rely too much on this expression when he follows his translation of the expression with the following remarks:—

“This may be taken to show that he took some part in the attempt made by the contemporaneous Pāṇḍya princes Śrī-vallabha and Kulaśēkhara to set up a show of Pāṇḍya overignty”.<sup>1</sup>

We have thus seen that the study of the history of the Bāṇas has been the study of “the movement of a tribe from one part of Southern India to another.”

[*Note.*—It was remarked on page 302 *ante* (lines 19 and 20) that all the three inscriptions, Nos. 333, 343 and 359 of 1920 belong to Vijayāditya Satyāśraya Śrī Pṛthivīvallabha (A. D. 696-734.) Though, in No. 343 the name Vijayāditya does not occur. The ascription of this record to the same king is based upon the presence of the birudas Satyāśraya Śrī Pṛthivīvallabha in the said record.]

# MĀDHAVA: AN UNKNOWN BHĀṢYAKĀRA FOR THE ṚGVEDA

BY

DR. C. KUNHAN RAJA M.A., D. PHIL. (oxon.)

*Reader in Sanskrit, University of Madras.*

There is the Bhāṣya on the Ṛgveda called the Vedārtha-prakāśa by Sāyaṇa Mādhava. It is called the Madhaviya Vedārtha-prakāśa as well. In this Bhāṣya, Sāyaṇa refers to a Mādhava Bhaṭṭa<sup>1</sup>, who has been now identified with Mādhava son of Veṅkaṭārya<sup>2</sup>. There is a third Mādhava, who is the son of Nārāyaṇa Sūri and who has written a Bhāṣya on the Sāmaveda.<sup>3</sup> Besides these three Mādhavas, there is a fourth Mādhava who has written a commentary on the Ṛgveda. So far as I know there is only one manuscript of this work available and that is now in the possession of the Adyar Library. It is numbered XIX L. 52.

It is an old palm leaf manuscript, written in Grantha characters. The writing is legible, but the manuscript is worm-eaten in parts. It contains 87 folia each folio is about 18 inches long and 1½ inch wide, with an average of 8 lines a side, each line containing an average of 2½ Granthas. Thus the total extent is about 3500 Granthas. The manuscript is complete for the first Aṣṭaka.

The work opens :

ओं नमो भगवते वासुदेवाय ।

1. सारभूता सुसंग्रहा

2. द्वादश्यनुक्रमणिका

3. क्रियते संहिता समाम्

4. पदक्रमः स्वरः पादः

5. दैवं सु ति....भक्तयः

6. देशान्देशान्तराणि समया

7. उपाया दश....

---

1. R. V. X, 86, 1.

2. Government Oriental Mss. Library, R. 3076, 3703, and Adyar Library 38 D. 15, Mysore Catalogue of 1900 No. 2; T. S. S. xcvi.

3. Mss. are available at Bodlein, Berlin, Calcutta Sanskrit College, Bikaner.

There are thus six anuṣṭup lines (though defective in some lines) and a fragment of the seventh line. There must be one more line to make up two anuṣṭup stanzas. There is no lacuna between the lines in the manuscript, and it is not possible to fix the exact position of the missing pāda. It is very likely that the first pāda is

ओं नमो वासुदेवाय ।

This is found to be the first pāda in his Anukramaṇīs. His Akhvatamukramaṇi opens:

ओं नमो वासुदेवाय धातवो नामयोनयः ।

The last line may be:

उपाया दश कीर्तिताः

In the second pāda extracted above there is a reference to Devadāśi Anukramaṇi. And in the last 4 pādas the names of some of the Anukramaṇis are given; and in the last line there is the word दश.

The Anukramaṇis are :

(1) पदक्रम (2) स्वर (3) पाद (4) दैव or देवता (5) सुप्  
(6) तिङ् (7) उपसर्ग (8) समय ।

सु in the fifth line must be for सुप्, and ति... must be तिङ्. देशान्तराणि must be a mistake. It can be only देशान्तराणि as the metre shows.

In the body of the Bhāṣya, so far as it is available, he mentions the following Anukramaṇis of his :

(1) स्वर (2) छन्दस् (3) निपात (4) विभक्ति (सुप् and तिङ्)  
(5) समय (6) इतिहास ।

I give below the complete list of references to his Anukramaṇi which Mādhyama gives in the available portion of his Bhāṣya on the R̥gveda:

1. तत्र यथेत्यस्य अनुदात्तत्वमुपमार्थस्य भवति । प्रकारवचनस्य उदात्तता वक्तव्या । इति स्वरानुक्रमण्यामुक्तम्<sup>1</sup> ॥

Devarāja in his *Nighaṇṭubhāṣya* (published by the Asiatic Society of Bengal) says that Mādhava son of Veṅkaṭārya wrote a Bhāṣya on the Ṛgveda, and he has also written a large number of Anukramanīs.<sup>6</sup> In the body of the *Nighaṇṭubhāṣya*, he quotes very often from Mādhava. A large number of quotations are found in the newly discovered Bhāṣya of Mādhava, I give the following :—

1. Mādhava :

विवस्वान् । आदित्यश्चेदाद्युदात्तः<sup>7</sup> ॥

Devarāja :

विवस्वच्छब्द आदित्यवाच्याद्युदात्तः । अन्यत्र मनुष्यविशेषे यजमाने  
द्वितीयाक्षरमुदात्तम् । इति माधवः<sup>8</sup> ॥

2. Mādhava :

फलर्भेदनकर्मापि । भिन्....<sup>9</sup> ॥

Devarāja :

माधवस्तु फलर्भेदनकर्मापि । भिन्दन् गच्छति फलसंयुक्तो गच्छतीति  
वा इति निरवोचत्<sup>10</sup> ॥

3. Mādhava :

इष्टिशब्दः हविर्यज्ञ आद्युदात्तः । यज्ञमात्रे अन्तोदात्तः<sup>11</sup> ॥

1. Bhāṣya on RV. i, 112, 18.

Edition.

2. " " i, 53, 7.

7. Bhāṣya on RV. i, 31, 3.

3. " " i, 84, 14.

8. p. 187.

4. " " i, 116, 12.

9. Bhāṣya on RV. i, 62-4.

5. " " i, 25, 3.

10. p. 67.

6. p. 4. Bibliotheca Indian

11. Bhāṣya on RV. i, 30, 12.

Devarāja :

इष्टिशब्दः हविर्यज्ञ आद्युदात्तः । यज्ञमात्रे अन्तोदात्त इति  
माधवः<sup>1</sup> ॥

From this it is certain that Devarāja is quoting from this Vedabhāṣya, and also from the Anukramaṇīs written by this Mādhava. It is true that there are quotations from the other Mādhavas already known.

About the new Mādhava, we know that his name is Mādhava<sup>2</sup> and that he belongs to the village designated Gomati<sup>3</sup>. I give below all the colophons found at the end of the various Adhyāyas in the first Aṣṭaka.

1. निपुणमतिषु धर्मस्ते युगेऽस्मिन्न लभ्या

This Mādihava is different from Mādihava son of Veṅkaṭārya, who is the author of Ṛgarthadīpikā. I give below the Commentary on two mantras selected at random to show that the two commentaries are different from each other.

(i) Mādihava son of Veṅkaṭārya :

आ तु न इन्द्र<sup>1</sup> । पुत्रमिन्द्रसममिच्छन् कुशिको ब्रह्मचर्यं चचार ।  
 तस्येन्द्रः स्वयमेव पुत्रो बभूव । सास्य कौशिकता । स सुवर्णरजताभ्यां

(ii) Mādhava son of Veṅkaṭārya :

त्वं तम्<sup>1</sup> । त्वं तं ब्रह्मणस्पते सोम इन्द्रश्च मर्त्यं यज्ञस्य पत्नी दक्षिणा च  
रक्षतु दारिद्र्यात् आहन्तुर्वा रक्षसः ॥

The present Mādhava :

त्वं तम्<sup>2</sup> । त्वं तमिममस्माकं यज्ञं ब्रह्मणस्पते सोम इन्द्रश्च मर्त्यमंहसः  
आहन्तुः सपत्नात् पातु । परोक्ष उत्तमः पादः दक्षिणा च तं पातु  
इति । दक्षिणा ददतेः । प्रजापतेर्दुहिता या दानदेवता । इति ॥

There are some places where both the Mādhavas deal with the same point. But neither makes a reference to the other. I give the following instances:

(i) Mādhava son of Veṅkaṭārya :

प्रायेण व्यक्तिभेदस्य वीप्सैकस्या अपि क्वचित् ।  
अग्निमग्निं हवीमभिरिति तत्र निदर्शनम् ॥  
वदन्त्यन्ये कालभेदादग्निरेकोऽपि भिद्यते ।  
विद्यते तत्र वीप्सेति देश भेदादथापरे<sup>3</sup> ॥

The present Mādhava :

अग्निमग्निम् । एकोऽप्यग्निः भेदादनेक इव । दशभेदादित्यपरे । तन्न  
समञ्जसम्<sup>4</sup> ॥

(ii) Mādhava son of Veṅkaṭārya :

सुतसोमपरिज्ञानं न त्वागमनकारणम् ।  
न चोदात्तमिहाख्यातं वक्ष्यते तत्र कारणम् ॥  
ऋचामभिहितानां यथा पश्चात् समन्वयः ।  
हेतुत्वहेतुमद्भावौ तथैवात्रापि संगतौ<sup>5</sup> ॥  
अत्र ब्रूमोऽर्थसंस्थानमिह यस्मिन् भवेत्तिडि ।  
तत्तु सर्वानुदात्तं स्यादसंस्थित उदात्तवत्<sup>6</sup> ॥

1. RV. i, 10, 11.

2. RV. i, 18, 5.

3. Kārikā iv, iii, 4 and 7.

4. Bhāṣya on RV. i, 12, 2.

5. Cf. T. S. S. Edition V R i. . . .

6. Kārikā i, i, 14.

The present Mādhava :

अपर्यवसितार्थत्वादाख्यातमुदात्तम् । दृशेयम् इति । चवायोगे प्रथमा  
इति चार्धमहे । यत्राख्यातयोरितरेतरापेक्षा नास्ति द्वे अभ्युदात्ते भवतः । यत्र  
त्वपेक्षा तत्र विवक्षायां पूर्वमुदात्तम् । अविवक्षितश्चेत् सोऽर्थः अनुदात्तत्वमेव ।  
इति वैयाकरणाः<sup>1</sup> ॥

(iii) Mādhava son of Veṅkaṭārya :

एवंविधेषु मन्त्रेषु तस्मादेक ऋषिर्मतः ।  
प्रधानोऽन्ये त्वप्रधाना इति मन्यामहे वयम् ॥  
स च प्रधानो निर्देशादस्माभिर्ज्ञायते कचित्<sup>2</sup> ।  
ऋज्राश्वः प्रष्टिभिरिति विस्पष्टमृषिराह च<sup>3</sup> ॥  
प्राधान्यश्चात्मनो दृष्टौ भ्रातृणामप्रधानताम् ।

The present Mādhava :

तत्रैतदवगन्तव्यम् । बह्वृषीकेषु मन्त्रेषु एकः प्रधानो द्रष्टा । अन्ये तु  
प्रोत्साहकाः । तथा च ऋज्राश्वः प्रष्टिभिरिति ऋज्राश्वस्यैव प्राधान्यम् अत्र श्रुतम्<sup>4</sup> ॥

The following points are clear. (1) There are three Mādhavas who have commented on the Ṛgveda, namely Sāyaṇa Mādhava, Mādhava son of Veṅkaṭārya and the present Mādhava. (2) It is the last of the three that has written the Anukramaṇī which Devarāja attributes to Mādhava son of Veṅkaṭārya. (3) The second and the third Mādhavas cannot be identical. (4) Devarāja identifies all the Mādhavas with Mādhava son of Veṅkaṭārya.

In the Trivandrum Palace Library, there is a work called the Nāmākhyātānukramaṇī. I give below a few stanzas from the beginning of the work.

हरिः श्रीगणपतये नमः । अविघ्नमस्तु ।  
लोकः पदं स्वरो वाक्यं समभिव्याहतिः श्रुतिः ।  
आर्षाण्यपि च शास्त्राणि पदार्थज्ञानहेतवः ॥  
व्युत्पत्तिस्तत्र लोकस्य पारम्पर्यसमागता ।  
अग्निवाश्वादयः शब्दास्तत्र सर्वे निदर्शनम् ॥  
प्रकृतिप्रत्ययव्यूहात् पदार्थपरिकल्पनम् ।

1. Bhāṣya on RV. i, 24, 1.  
2. Kārikās, v-iv, 11, 12a, b.

3. Kārikā v-iv, 15.  
4. Bhāṣya on RV. i, 100, 1.

पदमित्युक्तमस्माभिर्धनो हन्ता हनो यथा ॥  
 स्वरः प्रसिद्धो बहवस्तेन चार्थाः प्रकल्पिताः ।  
 नामाख्यातविभागश्च स्वरादेवावगम्यते ॥  
 ज्ञातार्थानि पदानि स्युर्वाक्यनिर्णयहेतवः ।  
 वाक्यं तदुक्तमस्माभिरपामर्थं निदर्शनम् ॥  
 अर्थो हि निम्नवाच्यत्र कृतोऽर्त्ते? वाक्ययोगतः ।  
 पदयोरेव संयोगः समभिव्याहृतिर्मता ॥

Further on in the Introduction, Mādhava says that he has written twelve Anukramanīs. The twelfth is the Bhāṣya itself. So he calls the Bhāṣya the द्वादश्यनुक्रमणिका in the introductory stanzas of the Bhāṣya, quoted in the beginning of this Paper. Only the Ākhyātānukramaṇī and the Nāmānukramaṇī are available. I quote below what he says about his Anukramaṇīs :

1. आख्यातानुक्रमणिका पठितव्याग्रतो नृभिः ।
2. अनुक्रमणिका नाम्नामध्येया तदनन्तरम् ।  
नासंस्कृता अधीयीरन्ननुक्रमणिके इमे ।
3. निपातानुक्रमणिका शीलनीया ततो द्विजैः ।
4. अनुक्रमणिका तुर्या गूढार्थपदगोचरा ।  
तयैवाव्यक्तसंस्कारा निरुच्यन्ते क्रमादिति ।
5. पञ्चम्यनुक्रमणिका विभक्त्यर्थप्रदर्शिनी ।  
तया सुसिद्धविभक्त्यर्थवृत्तयो दर्शिता इति ।
6. अनुक्रमणिका षष्ठी स्वरतोऽर्थस्य निर्णयः ।
7. सप्तम्यनुक्रमणिका शाकल्यमनुधावति ।  
व्याख्यातैवं हि तेनेयं संहितापददर्शनात् ।  
समयानुक्रमणिका यत्नेन महता द्विजैः ।  
बह्वचैरवगन्तव्या तस्मात्प्राज्ञतमैरिति ।
8. अनुक्रमणिका तस्मादार्ष्टी ग्राह्याष्टमी द्विजैः ।
9. छन्दोऽनुक्रमणी तस्माद्ग्राह्या सूक्ष्मेक्षिकापरैः ।
10. दशम्यनुक्रमणिका देवतानां प्रदर्शिनी ।
11. एकादशीतिहासानामनुक्रमणिका ततः ।

12. एताभिरेकादशभिर्यास्वर्थो नावभासते ।  
 द्वादश्यनुक्रमणिका तासामर्थं वदेदिति ।  
 अङ्गैः किं चैकादशभिरर्था ये प्रतिपादिताः ।  
 व्यक्ता भवन्ति ते सर्वे मन्त्रार्थानां प्रदर्शनात् ।

In a certain recension of the Ṛgvedabhāṣya by Skandasvāmin, which is different from the recension for which the first Adhyāya has been published in the Trivandrum Sanskrit Series as No. XCVI, there are many quotations from the Nāmānukramaṇī of the present Mādhava. I give some quotations.

- |                              |                                 |
|------------------------------|---------------------------------|
| 1. ऋतुर्वीर्योर्जितं शची     | 5. ऋतं मघो देवतातिः             |
| 2. ब्रह्म वीर्यं ऋतुर्व्रतम् | 6. यद्ब्रह्मात्रोऽद्भुतो ब्रह्म |
| 3. स्त्रियो योषा योषणा ग्राः | इतीमे महतिश्रुताः               |
| 4. दधिक्रा वह्निवाघतौ        |                                 |

I am bringing out an edition of this recension of the Ṛgvedabhāṣya by Skandasvāmin. I may here mention that none of these quotations is found in the recension published in the Trivandrum Sanskrit Series. If Skandasvāmin is really quoting from the present Mādhava, he must be one of the earliest of Vedic commentators, as Skandasvāmin is, on the evidence now available, placed at about 600 A. D. The available portion of the Vedabhāṣya by the present Mādhava will be soon published by me.

---

# IṢṬA-SIDDHI : AN OLD ADVAITIC WORK.

BY

M. HIRIYANNA, M.A., L.T.,

Mysore.

In concluding his *Advaita-siddhi* which has become a classic of Indian philosophy, Madhusūdana Sarasvatī remarks<sup>1</sup> that there were in his time three advaitic works bearing the title of *Siddhi* and that he added a fourth to them. He is comparatively a recent writer (1500 A. D.) but the three works to which he refers are all very old. They are : (1) The *Naṣkarmya-siddhi* of Sureśvara which is well known and has been published more than once. It is a work contemporaneous with Śaṅkara and is indeed said to have been composed at his suggestion.<sup>2</sup> (2) The *Brahma-siddhi* of Maṇḍana Miśra which is now for the first time in the course of publication under the editorship of Mahāmaho-pādhyāya Prof. S. Kuppaswāmi Śāstrī. This work also may be taken as contemporaneous with Śaṅkara. Perhaps it is slightly earlier.<sup>3</sup> (3) The *Iṣṭa-siddhi* of Vimuktātman which is little known now. It is of this work that some account is proposed to be given here, indicating particularly its place in the history of Vedāntic thought. Its author, as known from the colophon<sup>4</sup>, was a disciple of one Avyayātman and seems to have written

---

सिद्धीनामिष्टनैष्कर्म्यब्रह्मगानामियं चिरात् ।

अद्वैतसिद्धिरधुना चतुर्थी समजायत ॥

(p. 900, Nirṇaya-sāgara Edition.)

2. See i. 3. (Bombay Sanskrit Series. No. xxxviii.)

3. Contrary to common belief, Sureśvara and Maṇḍana Miśra are not the same. See JRAS. for 1923, pp. 259—63.

4. The colophon is as follows :—

इति श्रीमत्परमहंसपरिव्राजकाचार्यस्य श्रीमदव्ययात्मभगवत्पूज्यपादशिष्यस्य  
विमुक्तात्मभगवतः कृताविष्टसिद्धावष्टमोऽध्यायः ॥

Some Manuscripts substitute विमुक्ताचार्य- for विमुक्तात्म.

another work named *Pramāṇa-vṛtta-nirṇaya* (28)<sup>1</sup>. Manuscripts of the *Iṣṭa-siddhi* are rather rare, they being found only in a few public libraries. They are also generally incorrect, evidently because the work has ceased to be studied for a very long time ; and the copies of it made in later times have not been properly scrutinized. The work is now being printed and will soon appear in the Gaekwad's Oriental Series<sup>2</sup>.

It is well known that Rāmānuja in his *Śrī-bhāṣya* has instituted a searching examination into the advaitic doctrine of Śaṅkara. In doing so he has, as may be expected, taken as his authority for Advaita, the statements of Śaṅkara himself, and of other celebrated exponents of the doctrine like the Vivaraṇa-kāra.<sup>3</sup> But in one essential portion of his examination which is designated the *mahāpūrva-pakṣa*<sup>4</sup> and in which are found summarised some of the characteristic features of the Advaita such as the unity, permanence, self-dependence etc. of *anubhūti* or Brahman, Rāmānuja draws his information solely from the *Iṣṭa-siddhi*. We have for this the authority of no less a person than Vedānta Deśika<sup>5</sup>; and it is fully corroborated by the arguments as given in this portion of the *Śrī-bhāṣya* and even by some of the phrases and turns of expression which Rāmānuja

1. The figures within brackets, whether in the body of the Paper or in the foot-note, refer to the pages of the Deva-nāgarī Manuscript in the Mysore Oriental Library.

2. I have to express my gratitude to the Curators of the Oriental Libraries in Madras and in Mysore for permitting me to consult the MSS. of the work in the Libraries and lending or furnishing me copies of them.

3. Cf. e.g. passages occurring on pages 69 and 172 of the Nirṇaya-sāgara Edn. of the *Śrī-bhāṣya* on the first four *sūtras* with those on p. 26, in the Edn. issued from the same Press of Śaṅkara's *Bhāṣya* on the *Vedānta-sūtra* with *Ratna prabhā* etc. and on page 13 of *Pañcā-pādikā-vivaraṇa* (Vizianagaram Sanskrit Series) respectively.

4. Pp. 45—69 : in the Nirṇaya-sāgara Edition.

5. See *Tattva-tīkā* (p. 34 part ii of the Conjeevaram Edn.), his incomplete commentary on the *Śrī-bhāṣya* where he quotes the first stanza of the *Iṣṭa-siddhi* and states that the summary of the *mahāpūrva-pakṣa* is according to the arguments of that stanza. This stanza is—

यानुभूतिरजामेयानन्तात्मानन्दविग्रहा ।

महदादिजगन्मायाचित्रमिति नमामि ताम् ॥

takes from the *Iṣṭa-siddhi*. The very word *anubhūti* which he so frequently uses in this connection in the sense of Brahman is taken from it. It is clear from this that the *Iṣṭa-siddhi* was once held in high estimation by scholars in Southern India where Rāmānuja wrote; and that the work is important not only for tracing the development of the Advaita doctrine but also for a proper appreciation of the reasoning adopted by Rāmānuja in refuting that doctrine. Its importance is further indicated by the references to it found throughout the literature of both these schools of Vedānta.<sup>1</sup> We shall mention some of these in the sequel.

It would be useful if the chronological position of such an important work could be ascertained. We know that it is older than Rāmānuja. The references to it traceable in other Vedāntic works are all later than Rāmānuja; and their evidence is consequently of no use to us in this connection. One of these, however, is in a work which is definitely earlier, viz. the *Ātma-siddhi* of Yāmūnācārya who belonged to the same Vedāntic tradition as Rāmānuja and is stated to have been his *parama-guru* or preceptor's preceptor. In discussing the nature of the self from various standpoints in this work, Yāmūna quotes the first stanza of the *Iṣṭa-siddhi* and attempts to refute the advaitic position as stated in it.<sup>2</sup> This is the very stanza which, according to the *Tattva-tīkā*, Rāmānuja had in mind in criticising the conception of Brahman in the Advaita. In fact, Rāmānuja in this respect traverses the same ground as Yāmūna had done before him. This shows that the *Iṣṭa-siddhi* was regarded as a work of authority on the Advaita by 1100 A. D. which date we may assign to one that is reckoned as the *parama-guru* of Rāmānuja. No clear reference to our work is known in any earlier writing so that we must fix 1050 A. D. as the inferior

(iii) *Advaita-siddhi*, p. 440. (iv) *Vivaraṇa-prameya-saṁgraha* of Vidyāranya, p. 225. (Vizianagaram Series). (v) *Vedānta-sāra*; Edited by Jacob (Nirṇaya-sāgara Press), p. 89. (vi) *Sarvārtha-siddhi* on *Tattva-muktā-kalāpa* by Vedānta Deśika, p. 417. (Benares Edn.) The stanza which is quoted here and is described as 'a child's prattle' is *Iṣṭa-siddhi*, i, 9.

2. See p. 21 of the work printed at Conjeevaram under the title of *Siddhi-traya*.

limit of its date, assuming that it should have taken at least 50 years for the work to have attained the standing implied by its being referred to as an authority by the followers of a rival school of thought. This limit receives support from a rather unexpected quarter—the *Śrī-kaṇṭha-carita* of Maṅkhaka which belongs to the early part of the 12th century.<sup>1</sup> In the last canto of this work which gives a glowing description of contemporary men of letters, mention is made of an author who commented upon the *Iṣṭa-siddhi*. This, by the way, shows that the work was well known in the North also in Rāmānuja's time. As regards its superior limit, we have to depend upon the references to other works which it contains. Generally speaking, Vimuk-tātman quotes sparingly, quotations even from Śaṅkara being rare. He of course cites many passages from the Upaniṣads and the Bhagavad-gītā. He also quotes from Bādarāyaṇa, Gauḍapāda and Bhartṛhari. But they are all too early to be of any avail to us in determining the date of the *Iṣṭa-siddhi*. The latest writer to whom the book refers is Sureśvara. There are two quotations in it from him: one in the last chapter and the other in the last but one. The first cannot be traced in any of the printed works of Sureśvara, including the *Vārttika* on the Bṛhadāraṇyaka Upaniṣad.<sup>2</sup> The second passage is found in the *Naiṣkarṇya-siddhi* (iv 53) so that, even if we should leave out of consideration the first of these passages, we still have one which is definitely from Sureśvara. Since Sureśvara was a pupil of Śaṅkara, we may conclude that the *Iṣṭa-siddhi* cannot be earlier than 850 A. D. These limits, viz. 850 to 1050 A. D. are all that we can fix for the work with the data we at present possess. There is one circumstance however which at first sight seems to determine the time of our work quite definitely; and we should refer to it here. Sarvajñātman, disciple of Sureśvara, refers according to the commentators on his *Samkṣepa-śārīraka* to the *Iṣṭa-siddhi*<sup>3</sup>. If that is so and if the author of the *Iṣṭa-*

---

1. See *Kāvya-mālā* Series No. 3 (xxv 32).

2. The printed *Vārttika*, it may be stated, does not contain all the verses of the work. See Editor's note on page 298. (Ānandaśrama Edn.)

3. See Madusūdana's commentary (Benares Edn.) on iv, 14. Compare also the other commentaries in the Ānandaśrama Edn. of

*siddhi* in his turn quotes from Sureśvara, it is clear that all the three writers should have been contemporaries. Probably they were; but it seems somewhat risky to draw such a conclusion on the basis of what is stated by commentators who wrote several centuries later.

There is also another circumstance that has to be mentioned in this connection; but, while it may furnish a point of some biographical interest, it does not take us nearer the truth about the date of our author. There is a book with the title *Nyāya-makaranda* published in the Chowkhamba Series at Benares; and in this volume are included two other short treatises by the same author, viz. Ānandabodha. Ānandabodha's name is well known as that of a great exponent of the Advaita and his importance will be indicated if we mention that one of the five definitions of *mithyātvā*—a conception of fundamental importance for the Advaita—is ascribed to him<sup>1</sup>. In one of these short treatises, viz. *Pramāṇa-mālā*, Ānandabodha quotes the following half-śloka<sup>2</sup> which is found in the *Iṣṭa-siddhi* (120) prefacing it with the words *etadevoktam gurubhiḥ*—

नान्यत्र कारणात्कार्यं न चेत्तत्र क तद्ववेत् ।

‘An effect cannot be dissociated from its material cause; and if it does not abide there, where else could it be?’ We may conclude from this, though we cannot be quite sure about it, that Ānandabodha was a disciple of Vimuktātman<sup>3</sup>. There is nothing improbable in this, for Ānandabodha was an early writer on the Advaita as shown, for example, by the fact this his *Nyāya-makaranda* has been commented upon by Citsukha (1300 A. D.)<sup>4</sup>. Further, Ānandabodha quotes more than once from the *Iṣṭa-siddhi* and his view in regard to more than one detail of Advaitic

---

the work. The original contains only the general expression *mukṭi-kovidāḥ*, i. e. ‘those that are well-versed in the knowledge leading to release’.

1. See *Laghu-candrikā* on *Advaita-siddhi*. p. 440 (Nirn: sag. Press).

2. See p. 4. I owe this reference to Mahāmahopādhyāya Prof. S. Kuppaswāmi Śāstrī.

3. It is strange that the colophon in none of the three works of Ānandabodha mentions his *guru*.

4. See Introduction to *Naiṣkarmya-siddhi* (Bombay Sans. Series) 1925 p. xxxvi.

doctrine is identical with that maintained in the latter<sup>1</sup>. Ānandabodha's date is not known; but he frequently refers to Vācaspati<sup>2</sup> who is now generally taken to have flourished in the first half of the ninth century (841 A.D.)<sup>3</sup>. If the author of the *Iṣṭa-siddhi* be the *guru* of Ānandabodha, he cannot be earlier than 850 A.D.—a result at which we have already arrived.

The work is described by the author himself as a *prakaraṇa* or 'manual' of the Vedānta. It is divided into eight chapters of which the first is much the biggest, occupying over one-half of the work. The remaining chapters also are of unequal length. It is written throughout in *anuṣṭubh* stanzas which are commented upon by the author himself—a method of exposition which seems to have been common at one time. Speaking generally, the work exhibits more interest in the theory than in the practical aspects of Vedāntic teaching. The contents of the several chapters may be briefly stated as follows :—

*Chapters 1-5:* These are devoted to establishing the doctrine of what is known as *anirvacanīya-khyālī* or the Advaitic view of Error as against the views adopted in the other systems. In other words, the aim of these chapters is to defend the doctrine of Māyā; and this doctrine, it appears, is what is intended to be understood by the term *iṣṭa* occurring in the title of the work<sup>4</sup>. In these chapters is contained one of the fullest expositions of the various theories of Error known to Indian philosophy.

*Chapter 6:* This discusses the problem of what constitutes the *āśraya* or the seat of *anulā* or Māyā. As is well known, there are two views here some like Vācaspati maintaining that the *jīva* is the *āśraya*; and others like Sureśvara holding that it is Brahman<sup>5</sup>. The view taken here is the latter.

1. See e.g. pp. 199 & 359 on which are mentioned ideas found respectively on pp. (30) (291) of the *Iṣṭa-siddhi*.

2. See e.g. pp. 163 & 197.

3. See Keith: Indian Logic & Atomism. pp. 29-30.

4. Compare:—

अतो मायात्मा एको मयेष्टः सिद्धः 1 (277).

5. See e.g. *Siddhānta-leśa-saṃgraha* pp. 55 & 65 (Kumbhakonam Edition).

*Chapter 7 :* This deals with the question whether there is only one jīva or many and in this connection reviews the materialistic doctrine that denies the soul altogether, pluralistic doctrines like the Nyāya that recognize many souls, all being viewed as other than the Supreme and that school of Vedānta which assumes a relation of identity-in-difference (*bhedābheda*) between the jīva and Brahman. The conclusion reached is that there is only one jīva, which is no other than Brahman itself associated with Māyā.

*Chapter 8 :* This is about the nature of *avidyā-nivṛtti*, the disappearance or negation of *avidyā* which is itself conceived as neither *sat* nor *asat*. Granting *avidyā*, the opponent asks how its disappearance which is required as a pre-condition of release is to be conceived. This is a favourite question with the critics of the Advaita who not only attack the doctrine of Māyā directly but also try to refute it indirectly by showing the impossibility of conceiving the negation of *avidyā*. More than one explanation of it is given here. One of them is that *avidyā-nivṛtti* is *pañcama-prakārā* by which we have to understand that it is neither *sat*, nor *asat*, nor *sadasat*, nor other than *sat* and *asat* but is of a fifth variety. It looks as if the explanation was borrowed from the Mādhyamika school of Buddhism which conceives of its ultimate, viz. *Śūnya* in exactly the same way—as discarding the four predicables of *sat* etc. (*catuṣkoṭi vimirmukta*)<sup>1</sup>. This explanation of the negation of *avidyā* is found in the first chapter of the work. In the present chapter two other explanations are suggested as alternative ones. They are—(i) that it may be equated with Brahman itself on the principle that all negation is eventually expressible in positive terms and (ii) that it is *anirvacanīya* or other than 'is' or 'is not' like *avidyā* itself. It is the first of the three explanations that has come to be associated in Advaitic tradition with the *Iṣṭa-siddhi*<sup>2</sup>.

1. See *Sarvadarśana-saṃgraha*, Ch. ii.

2. See commentaries on the *Samkṣepa-śārīraka*, iv. 14, a stanza already referred to. The *Siddhānta-leśa-saṃgraha* of Appaya Dīkṣi ascribes the view to Ānandbodha (p. 436). But see *Nyāya-makaranda* pp. 352-9.

# NOTE ON THE MADRAS MUSEUM PLATES OF BHAKTI-RĀJA.

BY

T. N. RAMACHANDRAN, M.A.

In the April-June (Vol. V, Part II-1931, pp. 128-143) number of the Journal of Oriental Research, Madras I edited the above plates. A few corrections, and one or two points of interest that escaped my notice at the time of writing find a place in this note.

In the first place, my identification of the date of the grant from the data available in the plates as Monday, 21st October, 1355 A.D., needs revision. I am thankful to Mr. K. N. Dikshit, Deputy Director-General of Archæology for drawing my attention to this, and communicating to me his calculations which run as follows<sup>1</sup>:—

“ I think, we should take ‘ Śaka 1277 ’ as an ‘ Expired ’ year and not as a ‘ Current ’ one. It is also equally possible that the expression ‘ *Mahākārttikyām* ’ may denote the Kārttika amāvāsyā, instead of Paurṇimā. The following dates may be considered and against them I have also noted the ending moments of their respective *tithis* as given on page 315 of the Ephemeris (L. D. Swamikannu Pillai, *An Indian Ephemeris*, Vol. IV).

Day	Date	Month	Year A.D.	Tithi ending moment
1. Monday	24	October	1356	Amāvāsyā -40
2. (a)				
Monday	7	November	1356	14-60
2. (b)				
Tuesday	8	November	1356	Paurṇimā -67

Item 1 is a possible equivalent if ‘ Amāvāsyā ’ stands for the expression ‘ Mahākārttikī ’. Items 2 (a) and (b) will show that the Paurṇimā tithi began on Monday evening and ended on

---

1. Mr. Dikshit’s letter to me on this point is reproduced here.

Thus Monday, 7th November 1356 A.D. appears to be the most probable date corresponding to the data given in the plates. The cyclic year would then be Dundubhi instead of Manmatha.

P. 137- *Text*, line 7- Instead of “*mahair*” read “*mahō*”

P. 139- „ „ 34 „ „ *ya yēṣān* ” read “*yajūṣān*”

P. 141                    „        verse 10, lines 8 and 9-Instead of “He received or upheld or supported the friendly reverence of his leige, Bhōja-rāja—” read “He obstructed the passage of the vessel containing objects of worship that Bhōja-rāja sent to the sun, in token of his reverence to the latter”.

What has been narrated above with reference to the obstruction by Karikāla of the passage of the vessel containing objects of worship that Bhōja-rāja sent to the sun (p. 141, verse 10, lines 8 and 9) requires elucidation. For this Dr. N. Venkātaramanayya's article in Telugu on "The Polavarti stone inscription of Karikāla" published in the *Bhūratī*,<sup>1</sup> and *Navacōḷa caritra*<sup>2</sup> by

2. Lingana Kavi, *Navacōḷa caritra*, (pub. Andhrapatrika Press,

Mdaras, 1923), pp. 16-17.

Lingana Kavi are helpful. In both, the part of the hero is played by Karikāla. While, however, in the former the king who does worship to the sun is called, as in our plates of Bhakti-rāja Bhōja-rāja, in the latter he is known by the name of Bhāskara Cōḍa. The account found in the Doctor's article is more reliable than that found in the *Navacōḷa caritra*, being based on a stone inscription<sup>3</sup> of probably the 11th century A.D.

The story narrated in the "*Navacōḷacaritra*" being highly interesting, a short account of it is given below:—

While Karikāla was ruling the land there was a king called Bhāskara Cōḍa who was a great devotee of the sun. Every morning, about 10 A. M., he would worship the sun, get choice food served in 1,20,000 gold plates, and looking at the sun wave his hands upwards, offering them, as it were, to the deity. Immediately all the plates containing the offerings would mount up in the air and reach the sun, who would gladly partake of them. Then the plates would descend to the king. On account of the favour that the sun showed to the king by accepting his offerings, the latter got so conceited and puffed up with pride that he refused to obey the mandate of Karikāla, who sent to him his men asking him to help him in the task of erecting embankments for the river Kāvērī. His refusal was reported to Karikāla who once again demanded of him his obedience ere he would be forced to take steps to teach him to obey his command. But Bhāskara Cōḍa was stubborn saying that his own power and valour were unshakable inasmuch as he had the favour and support of the sun-god, who was daily accepting his offerings.

On hearing this, Karikāla sent a mandate to the sun-god as follows:—"You are hereby prohibited from accepting Bhāskara Cōḍa's offerings, as he has refused obedience to me, a devotee of Śiva." The sun-god preferred to do as Karikāla bade him, as he was loth to bring on his head the wrath of Śiva, whose devotee Karikāla happened to be. And on the next day, when Bhāskara Cōḍa sent his usual plates of offerings, they mounted up in the sky but were not accepted by the sun. Thereupon they descended down to the king who, on seeing that they were not accepted by his god, put up fervent prayers to him requesting him to accept them, and to let him know if he was guilty of any crime that prevented the god from showing him the usual favour. On

3. *Bhārati* (Telugu), Vibhava, Māgha, 1929.

being told by the sun-god that his disobedience to Karikāla was the crime that he was guilty of and that unless he did as the latter bade him to do he (sun) would be forced to refuse his offerings, Bhāskara Cōḍa agreed to do so; thereupon the sun accepted the offerings. Bhāskara Cōḍa went to Karikāla with all humility and helped him in the latter's task. Karikāla received the convert with open arms and rewarded him suitably.

The account of this story found in Dr. Venkataramanayya's article "The Polavarti stone inscription of Karikāla" is as follows:—

4. *Bhōjapūjārghyaḥpātrāṇi trīṇi Sūryārṇpitāni ca |*  
*Nijājñāyāmbharasthāni cakrē tam dāsavan-nṛpaṇ*

"The king (i.e. Karikāla) stopped the passage of the vessels containing offerings of worship dedicated to the sun-god by Bhōja, and by his command made them stay in the sky (By doing so) he made him (Bhōja), as it were, his slave".

The latter account is more reliable than the former for two reasons:—

(1). It agrees with the account found in our plates Bhakti-rāja. The name of the sun-worshipping king is given Bhōja in both while in the *Navacōḷacaritra* he is styled a Cōḷa (Cōḷa) and is called *Bhāskara Cōḍa*.

(2). It is a stone inscription dating from the 11th cent A.D.<sup>2</sup>. The *Navacōḷacaritra*, however, was written by Linga, a Telugu poet who lived in the latter half of the 15th century A.

## REVIEWS AND NOTICES OF BOOKS.

THE FIVE LAWS OF LIBRARY SCIENCE BY S. R. RANGANATHAN  
ESQ., M.A., L.T., F.L.A., Librarian, Madras University Library  
and Secretary, Madras Library Association. Published  
by the Madras Library Association. Demy 8 Vo. calico  
bound pp. i—xxxii + 1—458. Price Rs. 5.

This book has been published by the Madras Library Association as its Publication series No. 2 and as the first of a contemplated series of books on the technical and practical aspects of library work. The author, Mr. S. R. Ranganathan, is a trained expert in the subject of library science, having undergone special training in England in libraryship and made an intensive study of library work of all types by visits to libraries in various parts of England. As the librarian of the Madras University Library, he has harnessed to his task the knowledge he has so acquired. The Library "has developed in his hands wonderfully into a live human institution" with an increase in the issue of volumes from the library and a large influx of readers to it. It is, indeed, a very happy idea that the Madras Library Association, under the able and energetic guidance of its President, Mr. K. V. Krishnaswami Iyer, Advocate, Madras, should have chosen Mr. Ranganathan, to write this book. The history of the Library Movement in the various countries of the world, its progress and present condition, and the principles of the management and use of libraries have all been brought together under the title "The Five Laws of Library Science." As Sir P. S. Sivaswami Iyer says, "the author has a trained analytical intellect." According to him, the five laws are—books are for use ; books are for all ; every book its reader ; save the time of the reader ; the library is a growing organism. In his exposition of them, he has exhibited a wealth of learning, a mastery of detail, a fine sense of humour, and a polished style. Anybody who picks up this book for study may, at the outset, wonder how any person could manage to write a book of more than 400 pages on what may be considered a simple and recondite topic. To his agreeable surprise, however,

he will find that what appear to be simple propositions have until recently not been sufficiently realized by educated men in the management and use of libraries and that a good deal of special training and scientific instruction is involved in them. Above all, he will find it very interesting reading and will not like to close the book until he has perused it right through. This is, in fact, the highest compliment, that an author may lay claim to. Mr. Ranganathan has used the arts known to authors for the purpose of sustaining the interest of the reader. He often illustrates his statements by humorous anecdotes like the one about the application to the Readership in Mathematics by a graduate, at page 49 ; and he clothes certain of his conclusions in the garb of dialogues, such as the one we read at page 25 between "The Rule of Least Space" and "Rule of Least Cost" and the First Law ; and the one at page 237 between the Development Minister, the Finance Minister, the Director of Public Instruction, etc., in a departmental conference.

In India, where the percentage of literacy among its vast population is very small, the modern system of library science must be considered absolutely necessary, specially for the purpose of liquidating the large mass of ignorance by the establishment of rural libraries all over the country. The movement is in its infancy here ; but its progress is entirely due in the Madras Presidency to the propaganda and the organising work of the Madras Library Association. This book will easily be a standard treatise in the literature that is gathered by them for the propagation of the principles of library science among the educated public and for the enlightenment of the library staff.

We have great pleasure in congratulating the author on this nice and interesting volume, which has been so finely printed and got up by the Madras Law Journal Press. It contains a foreword by Sir P. S. Sivaswami Iyer who has given expression to his appreciation of the book and of the author. It is, indeed, no small achievement to have earned the praise of one who is a great scholar and a discerning critic. It contains also a very interesting introduction by Mr. W. C. Berwick Sayer's, Chief Librarian, Croydon, one of the masters of the science. One remark of his about this book is very noteworthy. He says, "It is unique, I believe, in that it attempts for the first time a comprehensive survey by a librarian, who has a peculiar Indian mind and reflects his own racial culture and basic theories of the

art of book distribution, as it is understood in the modern library world."

We hope and trust that Mr. Ranganathan will continue his labours and bring out many more works on the practical and scientific aspects of library work, which will enrich India's contribution to the literature on a world subject. The following Sanskrit verses composed by Prof. S. Kuppuswami Sastri enumerate the 'five laws' in a cryptic manner to be easy of remembrance.

“कोशवान् हि सदाचार्यः पञ्चसूत्रीपरायणः ।  
पुस्तानि पठितुं<sup>1</sup> तानि सर्वेभ्यः<sup>2</sup> स्वस्वमाप्नुयुः ॥  
पठन्तं<sup>3</sup> समयं तस्य शेषेत् कोशः<sup>4</sup> सदापि च ।  
वर्धमानः स चिन्मूर्तिः<sup>5</sup> पञ्चसूत्रीं विदन्विमाम् ॥”
